SIERRA'S GEOCHEMICAL RESULTS

Vancouver, BC – SIERRA IRON ORE CORPORATION (“Sierra” or the “Company”) is pleased to announce strong positive results from a geochemical survey conducted on its Emo, Ontario optioned claims. In addition to a definition of a drill – ready target for gold, targets for other tested metals including Ni -Cu –PGMs were identified. Significantly all targets align along the apparently same NNE- SSW trend. Additional anomalies will require expansion of geochemical survey to enhance refinement.

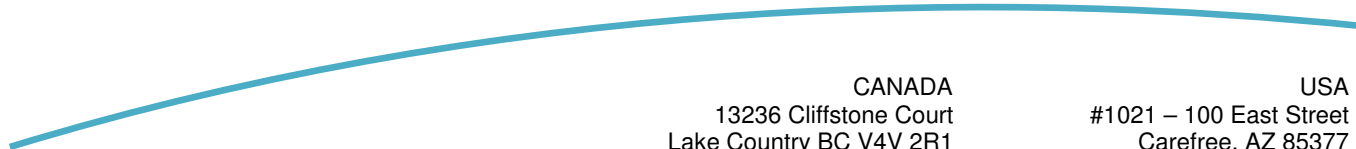

The geological content of this press release was evaluated and approved by Mr. Frank Puskas P.ENG, MSc., a qualified person as defined by National Instrument 43-101,

On behalf of The Board of Directors of Sierra Iron Ore Corporation.

Wally Boguski,
President & CEO
