About Viva Gold Corp

The Tonopah project sits in the middle of gold mining country about a half hour drive south of the Round Mountain mine owned by Kinross Gold and controls a major land position on the prolific Walker Lane Trend in Western Nevada. Viva has built a high confidence gold mineral resource at Tonopah since commencing work in 2018. The Company plans to update the resource model and initiate feasibility study in 2025, both of which are major catalysts and value creation events for shareholders.

Viva Gold is led by CEO James Hesketh, a 40-year veteran in the mining space who has led the development and construction of eight other mines around the world throughout his career. James has surrounded himself with equally experienced mining professionals both on the management team and the board.

The Tonopah Gold Project, a potential open pit, heap leach/mill opportunity, has all the hallmarks of a successful mining development project with early access to high grade mineralization, tested gold recovery, and key infrastructure in place. The project is supported by compelling economic PEA study.

Viva Gold trades on the TSX Venture exchange "VAU", on the OTCQB "VAUCF" and on the Frankfurt exchange "7PB". Viva currently has ~145.5 million shares outstanding and boasts a best-in-class management team and board with decades of gold exploration and production experience. The Company is advancing its high-grade Tonopah Gold Project in mining friendly Nevada with the support of several institutional shareholders.
