Description of Business

Austin Resources Ltd. (individually, or collectively with its subsidiary, as applicable, "Austin Resources", or the "Company") completed the sale of all of its properties in Chile in early 2020, and as a result of the transaction, the Company did not maintain the requirements for a TSX Venture Tier 2 company and its listing was transferred to the NEX board of the TSX Venture Exchange (the "NEX"). While the Company currently holds no mineral properties, it retains its classification as a 'Mineral Exploration/Development' company.

The Company's head office and principal address in Canada is The Canadian Venture Building, 82 Richmond St East, Suite 204, Toronto, Ontario, M5C 1P1. The Company's common shares were listed on the TSX Venture Exchange ("TSX-V", or the "Exchange") under the symbol "AUT". The Company had been advised by the Exchange that, with the closing of the transfer of all of its interests in the mineral exploration properties in Chile, the Company ceased to have active operations, no longer met the continued listing requirements of the Exchange and was transferred to the NEX. As a result of such transfer to the NEX, the Company's trading symbol changed from AUT to AUT.H during the year ended December 31, 2020.

The Company was in the process of exploring its mineral properties and had not yet determined whether those properties contained mineral reserves that were economically recoverable. During the year ended December 31, 2020, the Company transferred all of its interest in the mineral exploration properties in Chile held by Minera Azul Venturas Limitada ("Minera Azul"), the Company's wholly owned Chilean subsidiary and wound up operations in Chile and disposed of its interest in Minera Azul.

Trends

Management regularly monitors economic trends and financial market conditions and assesses their impact on the Company's operations and incorporates these estimates in both short-term operating and longer-term strategic decisions. Over the last several years and up to the date of this Interim MD&A conditions in the equity markets for the junior resource sector have been challenging. In many instances there appears to be a disconnect between operational achievements and the underlying share prices for many junior resource companies. This trend is occurring as investor interest, both retail and institutional, has been difficult to sustain notwithstanding a relatively strong performance in the underlying prices of both base and precious metals since 2015. The Covid-19 pandemic has only exacerbated this market sentiment across a broad spectrum of sectors. The timing of the return to normalized global economic activity on the heels of the pandemic is the largest question facing the market today.

Due to the worldwide COVID-19 pandemic, material uncertainties may arise that could influence management's going concern assumption. Management cannot accurately predict the future impact COVID-19 may have on:

- The severity and the length of potential measures taken by governments to manage the spread of the virus, and their effect on labour availability and supply lines;
- Availability of government supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; and
- Ability to obtain funding.

At the date of this Interim MD&A, the Canadian federal government and the provincial government of Ontario have not introduced measures that have directly impeded the operational activities of the Company. Although cash in the Company has materially declined, management believes the business will continue and, accordingly, the current situation has not impacted management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods.

Apart from these factors and the risk factors noted under the heading "Risks and Uncertainties", management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations. See "Risks and Uncertainties" below.

Off-Balance-Sheet Arrangements

As at June 30, 2022, the Company had a working capital deficit of \$306,647.
