## TUDOR GOLD COMPLETES MT SURVEY AND COMMENCES DRILLING ON TREATY CREEK

August 15, 2016 - Vancouver, British Columbia: Tudor Gold Corp. (the "Company" or "Tudor Gold") is pleased to announce the completion of an MT ("magnetotelluric") geophysical survey on the Company's Treaty Creek project. The MT survey was designed to cover favorable areas identified by previous drilling and geophysical programs and was successful in providing valuable geophysical data regarding the Treaty Creek property. The Company also announces that a drilling program on the Treaty Creek property has now commenced. A 3,000 meter drill program is planned, which may be increased or decreased subject to weather conditions.

Tudor Gold's Chairman Walter Storm states, "I am excited that our 2016 field season exploration program is moving forward and our field team has completed an MT Survey and initiated a drilling program within two months of closing the Treaty Creek deal."

The Treaty Creek property consists of 44 claims and covers approximately 179 square kilometers (17,913 hectares) in northwest British Columbia. The project is contiguous with and/or in close proximity to Seabridge Gold Inc.'s KSM project and its southern border lies approximately 15 kilometers north of Pretium Resources Inc.'s Snowfield/Brucejack (Valley of the Kings) mineral resource.

<u>About the Company</u>

Tudor Gold is focused on being a significant explorer in British Columbia's Golden Triangle, an area which hosts multiple past-producing mines and several large deposits that are approaching potential development. The Company has a 60% interest in both the Electrum and Treaty Creek properties, and a 100% interest in the Mackie, Eskay North, Orion, Fairweather, Delta and the High North properties, all of which are located in the Golden Triangle area. *There are no known resources or reserves on any of the Company's mineral properties, and the presence of mineral deposits on properties adjacent to or in close proximity to the Company's mineral properties is not necessarily indicative of mineralization on the Company's properties.*
