The Company has incurred losses since its inception, and had an accumulated deficit of \$4,403,161 as at September 30, 2016 which has been funded primarily by the issuance of shares. The level of the Company's future operations will be determined by the availability of capital resources, which will be derived from the issuance of special warrants and future financings. In addition, The Company has no source of operating cash flows and expects to incur further losses in the exploration and development of its mineral properties.

Overall Performance

The Company is currently focused on its recent acquisition of the Gold Drop Project and is actively pursuing other precious metal assets particularly in the province of British Columbia.

Corporate Update

On September 7, 2016, the Company announced the appointment of Mr. Dan Stuart as a President, CEO and director of the Company and Mr. Robert Birmingham stepping down as a President and CEO of the Company. On November 11, 2016, was appointed President and CEO of the Company.

Share-Consolidation

During the year ended June 30, 2016, the Company consolidated the issued share capital on the basis of three (3) old common shares for one (1) new common share (the "Consolidation ratio"). Outstanding stock options, agent's options and warrants were adjusted by the Consolidation ratio. All common shares and per common share amounts in these financial statements have been retroactively restated to reflect the share consolidation.

Change of Name

On October 07, 2016, the Company announced that it will change its name from Revolver Resources Inc. to GGX Gold Corp. at the start of trading on the TSX Venture Exchange on October 11, 2016 and that its ticker symbol will change to TSXV: GGX from TSXV: RZ.

Investment

In July 2016, the Company acquired a 9% interest in the J2 Syndicate a private exploration company (the "Syndicate") for a cash payment of \$225,000. The Syndicate was formed to identify precious metal targets in British Columbia.

Private Placements

In August 2016, the Company completed a private placement, raising gross proceeds of \$112,500 by issuing 750,000 units at \$0.15 per unit. Each unit consists of one common share and one share purchase warrant. Each share purchase warrant entitles the holder to purchase one additional common share of the Company at \$0.20 per share for a period of 5 years expiring August 19, 2021. Finders' fees of \$1,500 were paid.

In October 2016, the Company completed a non-brokered private placement and issued 3,750,000 units at a price of \$0.15 per unit for gross proceeds of \$562,500. Each unit consisted of one common share and one share purchase warrant. Each warrant is exercisable for one additional common share at a price of \$0.20 per share for five years. The warrants are subject to a 10-day accelerated expiry provision if the closing price of the Company's share is \$0.25 or higher for 10 consecutive trading days. In connection with this private placement, the Company paid cash commissions totalling \$20,949 and issued 107,715 agent's warrants.

Mineral exploration is typically a seasonal business, and accordingly, the Company's operating expenses and cash requirements will fluctuate depending upon the season and the level of activity. The Company's primary source of funding is through the issuance of share capital. When the capital markets are depressed, the Company's activity level normally declines accordingly. As capital markets strengthen and the Company is able to secure equity financing with favorable terms, the Company's activity levels and the size and scope of planned exploration projects will typically increase.

The optionee shall remain the operator till the term of the agreement is completed.

Changes in Accounting Policies and Accounting Pronouncements

In preparing these interim financial statements as at September 30, 2016, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual financial statements for the year ended June 30, 2016.

Critical Accounting Policies and Estimates

The details of GGX's accounting policies are presented in Note 3 of the financial statements ended June 30, 2016. These policies are considered by management to be essential to understanding the processes and reasoning that go into the preparation of the Company's financial statements and the uncertainties that could have a bearing on its financial results.

Off Balance Sheet Agreements

The Company has not entered into any material off-balance sheet arrangements such as guarantee contracts, contingent interests in assets transferred to unconsolidated entities, derivative instrument obligations, or with respect to any obligations under a variable interest entity arrangement.

Financial Instruments and Risk Management

The Company is exposed to varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management processes. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash. The Company limits the exposure to credit risk by only investing its cash with high-credit quality financial institutions. Management believes that its credit risk is not significant.

Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2016, the Company had a cash balance of \$106,415 to settle current liabilities of \$141,226. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms. Management expects to fund those liabilities through equity financing and loans from related parties over the coming year.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. The Company's amounts due to related parties are non-interest bearing, and as such, the Company is not exposed to significant interest rate risk.

Foreign Currency Risk

The Company is exposed to foreign currency risk on fluctuations related to cash and accounts payable and accrued liabilities that are denominated in U.S. Dollars. The Company's financial instruments denoted in U.S. Dollars are insignificant and any fluctuation in foreign currency exchange rates would have an insignificant impact on net loss for the year.

Commodity Price Risk

The Company is subject to price risk from fluctuations in the market prices of commodities as it relates to the possible underlying values of its commodity based mineral properties and the corresponding ability to raise funds for future operations. Management closely monitors commodity prices to determine the appropriate course of actions to be taken in its investing and financing activities. As the Company has not yet developed commercial mineral interests, it is not exposed to significant commodity price risk.

Capital Risk Management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and exploration of its exploration and evaluation assets. The Company does not have any externally imposed capital requirements to which it is subject.

The Company considers capital to consist of all components of shareholders equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue common shares or dispose of assets.

Risk and Uncertainties

There are no significant changes relating to the risk factors since the filing of the annual MD&A of June 30, 2016.

Internal Control over Financial Reporting

In connection with National Instrument (NI) 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings) adopted in December 2008 by each of the securities commissions across Canada, the Chief Executive Officer and Chief Financial Officer of the Company will file a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited interim financial statements and the audited annual financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issuer Basic Certification does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109.

Forward-Looking Statements

This MD&A, which contains certain forward-looking statements, are intended to provide readers with a reasonable basis for assessing the financial performance of the Company. All statements, other than statements of historical fact, are forward-looking statements. The words "believe", "expect", "anticipate", "contemplate", "target", "plan", "intends", "continue", "budget", "estimate", "may", "will", "schedule" and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company, are inherently subject to significant business, economic and competitive uncertainties and contingencies.
