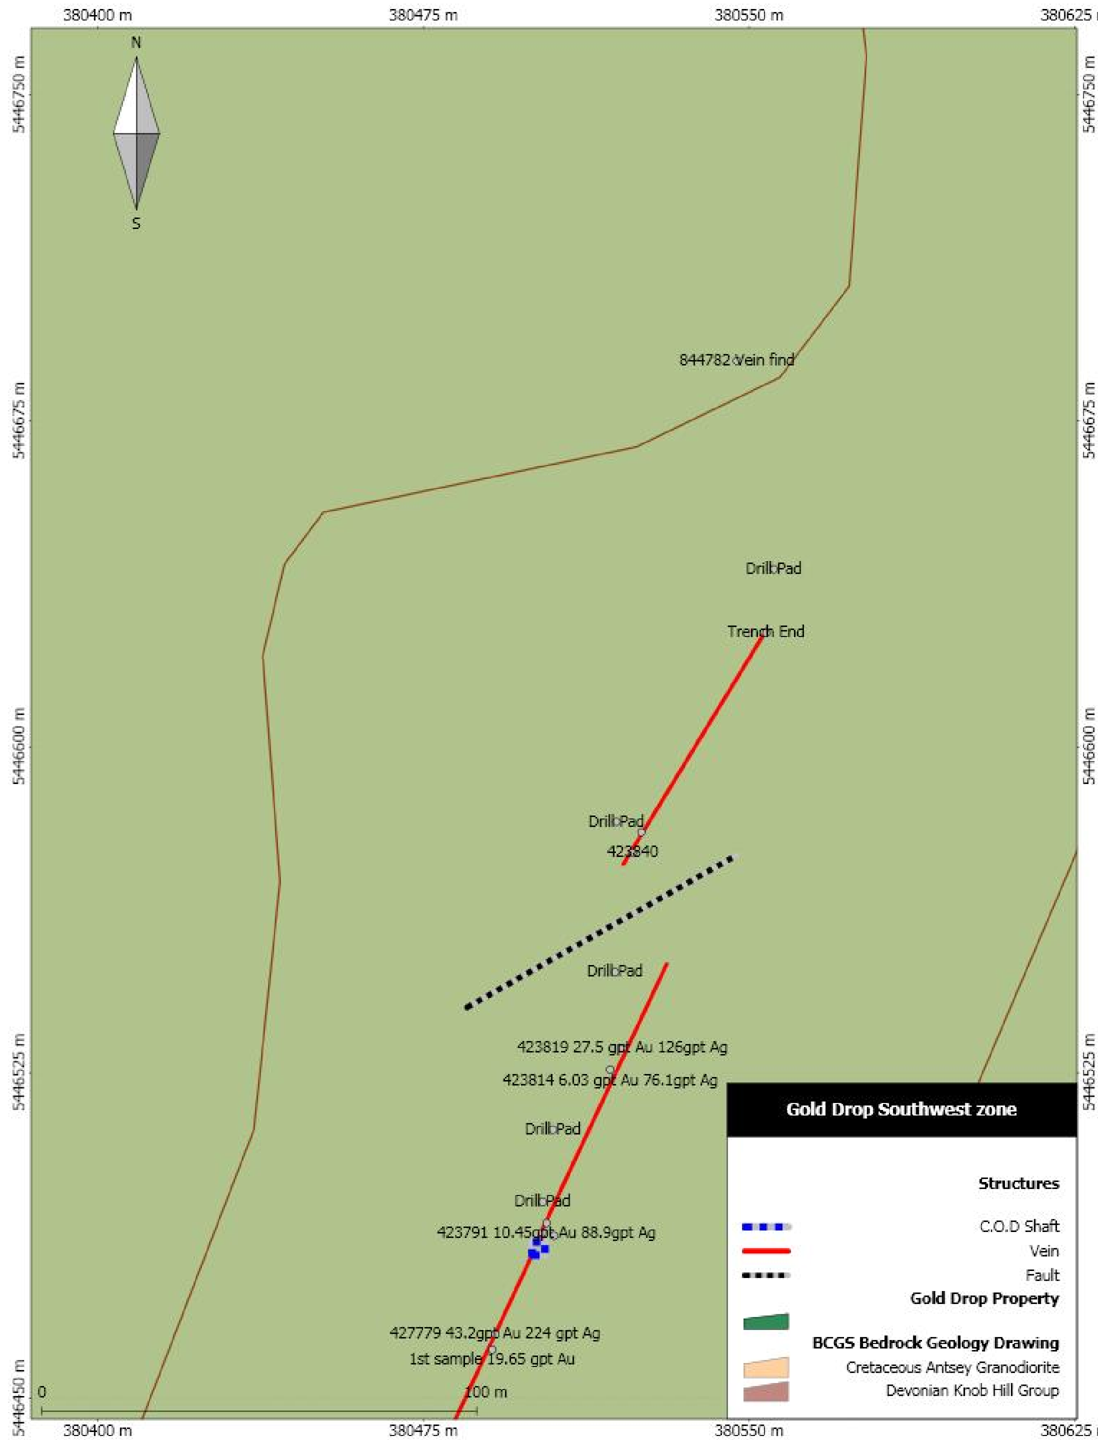
GGX Gold receives additional Drill Core Sample Results from Phase II Diamond Drilling at Gold Drop Property, including 3.17 g/t Gold over 0.47 Meters, Greenwood BC

Vancouver, British Columbia – October 25, 2017 – GGX Gold Corp. (TSXV: GGX) (the "Company" or "GGX") is pleased to announce the receipt of additional drill core sample analytical results from the recent diamond drilling program at its Gold Drop Property, located near Greenwood, B.C. These analytical results are for samples from drill holes COD17-21 to COD17-27. The Company recently completed a Phase II diamond drilling program in the Gold Drop Southwest Zone, targeting the gold and silver bearing COD Vein.

The objective of the Phase II drilling was to further explore and define the COD Vein, a Dentonia / Jewel style quartz vein. Trenching during 2017 exposed the northeast – southwest striking COD Vein for over 160 meter strike length. The Phase II drilling program aimed to delineate the COD Vein from 2 pad locations in the northern extent of the trench, 100 and 160 m north of the COD mine shaft. The Phase II drilling totaled 12 holes (690 meters).

The Company had previously received analytical results for 68 trench channel samples collected at the COD Vein. These samples returned anomalous to high grade values for gold, including high values of 43.2 grams / tonne (g/t) Gold and 224 g/t Silver (News Release of July 26, 2017). The first batch of 2017 drill core samples for the COD Vein returned up to 24.1 g/t Gold and 192 g/t Silver (News Release of Aug 28, 2017). The second batch of drill core samples also returned significant gold and silver values including a broad intersection in hole COD17-14 grading 4.59 g/t Gold and 38.64 g/t Silver over 16.03 meters core length with a high grade core grading 10.96 g/t Gold and 89.86 g/t Silver over 5.97 meters core length (News Release of Sept 7, 2017).



Drill core was geologically logged and sampled at the Greenwood facility. Drill core was sawn in half with half core samples submitted for analysis and remaining half core stored in a secure location. Core samples were delivered to the ALS Minerals laboratory in Vancouver to be analyzed for gold by Fire Assay – AA. The samples from holes 15 to 27 were also analyzed for 48 Elements by Four Acid and ICP-AES / ICP-MS. Quality control (QC) samples are inserted at regular intervals.

Drill core samples collected for holes COD17-21 to COD17-27 were from select intervals, testing the COD Vein and intervals of host rock. The analyses listed in the following table below are from the gold and silver bearing vein and / or low grade mineralized host rock. Since true widths cannot be accurately determined from the information available the core lengths (meters) are reported. The Gold and Silver analyses are reported in grams / tonne.

HOLE ID	From	To	Core interval Length	Au ppm	Ag ppm
COD17-22	10.97	11.65	0.68	0.74	8.82
COD17-23	11.55	12.25	0.7	0.49	5.11
COD17-23	56.75	57.2	0.45	0.59	5.91
COD17-23	58.95	59.6	0.65	0.76	5.86
COD17-24	12.97	13.82	0.85	0.43	5.79
COD17-25	47.67	48.38	0.71	1.52	15.35
COD17-25	48.38	49.01	0.63	0.43	5.94
COD17-26	8	8.47	0.47	3.17	40.1
COD17-26	29.92	30.76	0.84	0.52	5.02
COD17-27	10.62	10.97	0.35	0.61	6.46
COD17-27	38.06	38.96	0.9	0.43	5.68

Hole COD17-26 was located at the northern-most pad along the COD trench. The sample at 8.00 – 8.47 meters from this hole was of a near-surface oxidized vein. The sample at 47.67 – 48.38 meters from hole COD17-25 was of quartz veins and altered host rock. This batch of analytical results continues to reveal intervals of low grade gold in the host rock. The two samples at 56.75 – 57.20 and 58.95 – 59.60 meters from hole COD17-23 are of altered host rock.

Quartz veins in COD17-14

Forward Looking Information

This news release includes certain statements that constitute ñforward-looking informationò within the meaning of applicable securities law, including without limitation, the Companyôs information and statements regarding or inferring the future business, operations, financial performance, prospects, and other plans, intentions, expectations, estimates, and beliefs of the Company. Such statements include statements regarding the completion of the proposed transactions. Forward-looking statements address future events and conditions and are necessarily based upon a number of estimates and assumptions. These statements relate to analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as ñexpectsò or ñdoes not expectò, ñis expectedò, ñanticipatesò or ñdoes not anticipateò, ñplansò, ñestimatesò or ñintendsò, or stating that certain actions, events or results ñmayò, ñcouldò, ñwouldò, ñmightò or ñwillò be taken, occur or be achieved), and variations of such words, and similar expressions are not statements of historical fact and may be forward-looking statements. Forward-looking statement are necessarily based upon several factors that, if untrue, could cause the actual results, performances or achievements of the Company to be materially different from future results, performances or achievements express or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which the Company will operate in the future, including the price of gold and other metals, anticipated costs and the ability to achieve goals, and the Company will be able to obtain required licenses and permits. While such estimates and assumptions are considered reasonable by the management of the Company, they are inherently subject to significant business, economic, competitive and regulatory uncertainties and risks including that resource exploration and development is a speculative business; that environmental laws and regulations may become more onerous; that the Company may not be able to raise additional funds when necessary; fluctuating prices of metals; the possibility that future exploration, development or mining results will not be consistent with the Companyôs expectations; operating hazards and risks; and competition. There can be no assurance that economic resources will be discovered or developed at the Gold Drop Property. Accordingly, actual results may differ materially from those currently anticipated in such statements. Factors that could cause actual results to differ materially from those in forward looking statements include continued availability of capital and financing and general economic, market or business conditions, the loss of key directors, employees, advisors or consultants, equipment failures, litigation, competition, fees charged by service providers and failure of counterparties to perform their contractual obligations. Investors are cautioned that forward-looking statements are not guarantees of future performance or events and, accordingly are cautioned not to put undue reliance on forward-looking statements due to the inherent uncertainty of such statements. The forward-looking statements included in this news release are made as of the date hereof and the Company disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as expressly required by applicable securities legislation.
