

GATEKEEPER

Gatekeeper Supplies Video Analytics Solutions for School Buses in Virginia

Abbotsford, BC – June 9, 2020 - Gatekeeper Systems Inc. ('Gatekeeper' or the 'Company') (TSX-V: GSI) (OTC: GKPRF) (FSE: 1GK) a leading provider of intelligent video solutions for public transport and smart cities, has recently received orders for approximately CDN \$270,000 to install or upgrade intelligent video solutions for school bus interiors in four school districts in the state of Virginia. Gatekeeper's customer base in Virginia is now 14 cities or counties, and the Company expects to receive additional orders from new customers in the region in the coming months.

Customers cited Gatekeeper's video analytics software as a key contributor in their decision to install or upgrade their interior camera systems and applauded the Company on its software design which allows easy zooming and facial blurring.

Gatekeeper's Platform-as-a-Service (PaaS) business model is centered around its intelligent video recording devices that record, store, and wirelessly transmit video and audio from multiple devices. These digital video recorders also serve as the "black box" to aid in accident investigations. Customers can customize their configurations by choosing from the Company's comprehensive product suite which includes:

Video Analytics Software - records time, location, audio, and video, enabling quick and easy assembly of video evidence needed to deal with school bus problems such as bullying, grazing, vaping, or verbal abuse.

Stop Arm Camera - records license plate information day or night, of vehicles that illegally pass a school bus when the stop arm is deployed. Gatekeeper's optional proprietary software also automates the ticketing process of stop-arm infractions.

360° Camera - provides the driver with 360° real-time imaging, automatically activated at pre-programmed bus speeds. The 360° view is displayed within the vehicle's specialized rear-view mirror system allowing drivers to monitor school children all around the bus.

Interior Camera - records the video and audio activity on the bus interior using adjustable vandal-resistant cameras.

Tactical Ready Kit - is a portable unit that allows law enforcement personnel to obtain quick and easy display of the internal video and audio of a school bus in close proximity, even while in motion.

Gatekeeper has significant experience in supplying cameras for school bus safety. During its operating history, the Company has sold over 100,000 cameras that are being used to help protect children while riding to and from school.

About Gatekeeper Systems Inc.

Gatekeeper is a leading provider of intelligent video solutions designed to provide a safer transportation environment for children, passengers, and public safety personnel on multiple transportation modes. The Company uses AI, video analytics and mobile data collectors to inter-connect public transit assets as part of intelligent transportation systems for Smart City initiatives. The Company's Platform-as-a-Service (PaaS) business model is designed to connect moving vehicles in the era of Internet of Things (IOT).
