

GATEKEEPER

Gatekeeper Announces C\$335,000 Order for Broadband Wi-Fi on School Buses for Enhanced Distance Learning

Abbotsford, BC – March 15, 2022 - Gatekeeper Systems Inc. ('Gatekeeper' or the 'Company') (TSX-V: GSI) (OTC: GKPRF) (FSE: 1GK) a video and data solutions provider for public transportation and smart cities, is pleased to announce it has received a purchase order for approximately C\$335,000 from a school district to equip their fleet of school buses with the Company's recently-launched Mobile Wi-Fi System. The purchase order also includes a 12-month services contract that is renewable for up to five years.

The Mobile Wi-Fi System is an enhanced distance learning solution that provides 4G or 5G internet connectivity for students and authorized users while the bus is transporting students or while the bus is parked in a neighborhood for the purpose of providing internet access to students who do not have suitable connectivity at home. Data is routed through the school's content filters and network infrastructure to ensure that students are provided with a safe internet environment and that firewall-protected school content is accessible.

The Mobile Wi-Fi System is an additional data layer on Gatekeeper's Platform-as-a-Service (PaaS) business model which is centered around mobile data collectors that record and analyze video, audio, GPS location and data on the school bus, and becomes the on-board intelligence platform for future applications. Gatekeeper has installed approximately 40,000 intelligent mobile data collectors for over 3,500 school district customers throughout North America.

"This is the second progressive school district that has recently embraced our Mobile Wi-Fi System as part of their enhanced student learning program," commented Doug Dymont, President and CEO. "Increasing broadband access for students is an important priority for the Biden administration and we have carefully designed our Mobile Wi-Fi System to help address this priority. It's an effective solution to assist students who don't have acceptable broadband at home and gives students the opportunity to focus on their schoolwork during the bus ride, which in turn reduces bus driver distractions."
