

29 CERTIFICATE OF AUTHOR

Certificate of Qualified Person: Michael J. Rosko

As an author and reviewer of the Technical Report titled “Results of Years 2021 and 2022 Exploration Activities and Preliminary Lithium Resource Estimate, Salar de Arizaro Project, Salta Province, Argentina”, dated January 27, 2023, with an effective date of December 15, 2022, I, Michael J. Rosko, MSc., P.G., do hereby certify that:

- I am a principal hydrogeologist and general manager with Montgomery & Associates, Consultores, Ltda., Avenida Vitacura 2771, Of. 404, Las Condes, Santiago de Chile.
- I graduated with a Bachelor of Science degree in Geology from University of Illinois in 1983.
- I graduated with a Master of Science in Geology (Sedimentary Petrology focus) from University of Arizona in 1986.
- I am a registered professional geologist in the states of Arizona (25065), California (5236), and Texas (6359).
- I am a registered member of Society for Mining, Metallurgy, and Exploration (#4064687), and a member of the National Ground Water Association, Arizona Hydrological Society, and International Association of Hydrogeologists.
- I have practiced hydrogeology for more than 36 years, with much of this time working in salar basins in Chile and Argentina similar to the Project. The QP started working in brine salar systems in the Andes in the early 1990s. Starting in 2009, he began working as a QP and CP and was responsible for estimating lithium resources and/or reserves for the following projects: Lithium One – Salar del Hombre Muerto, Eramine – Salar de Centenario and Ratones, Galaxy Lithium – continued work in Salar de Hombre Muerto, Millennial Lithium – Salar de Pastos Grandes, Posco – Sal de Oro project, Alpha Lithium - Salar de Tolillar, Gangfeng Lithium - Salar de Llullaillaco, Lithium Americas Corp – Salar de Cauchari, SQM – Salar de Atacama, and more before taking on the work for Lithium Chile in Salar de Arizaro.
- I have read the definition of “Qualified Person” set out in National Instrument 43-101 (“NI 43-101”) and certify that by reason of my education and past relevant work experience, I fulfill the requirements to be a “qualified person” for the purposes of NI 43-101.
- During the time exploration field work was being done, the personal inspection was hindered due to travel restrictions relating to the COVID-19 pandemic. However, during that time,

local employees of Montgomery & Associates based in Argentina visited the site on November 10, 2021, during drilling operations. Since then, I completed a personal inspection of the concession areas and exploration well on March 22, 2022, consisting of measuring depth to water level, and obtaining a duplicate brine sample for future laboratory analysis if needed.

- As of the date of this certificate, to the best of my knowledge, information and belief, the Technical Report contains all scientific and technical information that is required to be disclosed to make the Technical Report not misleading.
- I assume responsibility for all Sections of the report.
- I am independent of the issuer applying all of the tests in Section 1.5 of National Instrument 43-101. I am independent of Lithium Chile Corporation and independent of any current or past groups associated with the Property. I am independent of the Project property, with no prior involvement with any aspect of the Project.
- I have read National Instrument 43-101 and Form 43-101F1, and the Technical Report has been prepared in compliance with that instrument and form.

Dated the 27th of January, 2023.
