

Transition Metals to Present at the 2019 John Tumazos Very Independent Research

Sudbury, Ontario--(Newsfile Corp. - June 18, 2019) - Transition Metals Corp (TSXV: XTM) ("Transition", "the Company") is pleased to announce that management will be attending and presenting at the upcoming John Tumazos Very Independent Research Metals Conference in Holmdel, New Jersey, as well as meeting with investors throughout the conference which will be held on June 19-20. The conference will take place at 20 Hillcrest Road, Holmdel, New Jersey 07733.

Scott McLean, President & Chief Executive Officer of Transition Metals, will be providing a company update on its various projects to attendees on Wednesday, June 19 at 1:55 pm ET.

This presentation will be available via live webcast and can be accessed at: <http://wsj.com/webcast/vir18/>

The link will provide an archived playback shortly after the presentation.

About Transition Metals Corp

Transition Metals Corp (TSXV: XTM) is a Canadian-based, multi-commodity project generator that specializes in converting new exploration ideas into Canadian discoveries. The award-winning team of geoscientists has extensive exploration experience in established, emerging and historic mining camps and actively develops and tests new ideas for discovering mineralization in places that others have not looked, which often allows the company to acquire properties inexpensively. The team is rigorous in its fieldwork and combines traditional techniques with newer ones to help unearth compelling prospects and drill targets. Transition uses the project generator business model to acquire and advance multiple exploration projects simultaneously, thereby maximizing shareholder exposure to discovery and capital gain. Joint venture partners earn an interest in the projects by funding a portion of higher-risk drilling and exploration, allowing Transition to conserve capital and minimize shareholder's equity dilution. The Company has an expanding portfolio that currently includes more than 25 gold, copper, nickel and platinum projects primarily in Ontario, Nunavut, British Columbia, Nova Scotia, New Brunswick, Newfoundland and Saskatchewan.
