Avesoro Resources Inc.
TSX: ASO
AIM: ASO

COMMENCEMENT OF INFILL DRILLING CAMPAIGN AT NEW LIBERTY

Avesoro Resources Inc. ("Avesoro" or the "Company"), the TSX and AIM listed West African gold producer, is pleased to announce that four diamond drill rigs have been mobilised to its wholly owned New Liberty Gold Mine ("New Liberty") and have commenced a 14,000 metre diamond core drilling campaign targeting an area of the New Liberty resource model containing an Inferred Mineral Resource of some 3.5Mt with a mean grade of 2.8g/t Au and containing 315koz of gold.

This Inferred material is located within and below the current pit design and is within the open pit reporting limits, but due to its resource classification is currently treated as waste in the Mineral Resource announced by the Company on 11 October 2017.

The objective of the 46 hole infill drilling programme is to increase confidence in the continuity of the ore body and upgrade the classification of a proportion of the Inferred material to an Indicated Mineral Resource, and thereby increase the tonnage of mineralisation that can be converted to a Mineral Reserve and included in the economic model as required by NI 43-101.

It is anticipated that this drilling programme will be completed during Q1 2018, at which time the Company will commence work on an updated Mineral Resource and Reserve statement.

Serhan Umurhan, Chief Executive Officer of Avesoro Resources, said: "I am pleased to announce the start of this infill drilling programme at New Liberty. We expect drilling operations to be completed during Q1 2018 and I look forward to updating shareholders on the progress of this campaign which we believe has the potential to increase the mine life and significantly add to the value of New Liberty".

The 14,000 metre drilling programme contract (the "Drilling Contract") has been entered into between the Company's wholly owned subsidiary Bea Mountain Mining Corporation and Zwedru Mining Inc., a related party to the Company. The Drilling Contract has a value of approximately US\$1 million, which will be paid in cash, with a HQ drilling cost of between US\$59 and US\$69 per metre.

Zwedru Mining Inc. is 100% owned by Avesoro Jersey Limited, the Company's majority shareholder, and therefore, entering into the Drilling Contract constitutes a related party transaction for the Company under the AIM Rules.

About Avesoro Resources Inc.

The Company's assets include the New Liberty Gold Mine in Liberia (the "New Liberty Gold Mine," "New Liberty" or the "mine") which has an estimated proven and probable mineral reserve of 7.4Mt with 717,000 ounces of gold grading 3.03g/t and an estimated measured and indicated mineral resource of 9.6Mt with 985,000 ounces of gold grading 3.2g/t and an estimated inferred mineral resource of 6.4Mt with 620,000 ounces of gold grading 3.0g/t. The foregoing Mineral Reserve and Mineral Resource estimates and additional information in connection therewith will be set out in an NI 43-101 compliant Technical Report for the New Liberty Project to be filed on SEDAR within 45 days of the Company's disclosure of the new Mineral Resource estimate made on October 11, 2017.

The New Liberty Gold Mine is located within the Southern Block of the 100% owned Bea Mountain mining licence. This licence covers 478 km² and has a 25 year, renewable, mineral development agreement. The Bea Mountain mining license also hosts additional gold projects of Ndablama, Gondoja, Weaju and Leopard Rock which host indicated and inferred mineral resources. The Company also owns the Yambesei, Archaen West, Mabong and Mafa West licences, in addition to a gold exploration permit in Cameroon.

Qualified Persons

The Company's Qualified Person is Mark J. Pryor, who holds a BSc (Hons) in Geology & Mineralogy from Aberdeen University, United Kingdom and is a Fellow of the Geological Society of London, a Fellow of the Society of Economic Geologists and a registered Professional Natural Scientist (Pr.Sci.Nat) of the South African Council for Natural Scientific Professions. Mark Pryor is an independent technical consultant with over 25 years of global experience in exploration, mining and mine development and is a "Qualified Person" as defined in National Instrument 43-101 "Standards of Disclosure for Mineral Projects" of the Canadian Securities Administrators and has reviewed and approved this press release. Mr. Pryor has verified the underlying technical data disclosed in this press release.

Forward Looking Statements

Certain information contained in this press release constitutes forward looking information or forward looking statements with the meaning of applicable securities laws. This information or statements may relate to future events, facts, or circumstances or the Company's future financial or operating performance or other future events or circumstances. All information other than historical fact is forward looking information and involves known and unknown risks, uncertainties and other factors which may cause the actual results or performance to be materially different from any future results, performance, events or circumstances expressed or implied by such forward-looking statements or information. Such statements can be identified by the use of words such as "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "would", "project", "should", "believe", "target", "predict" and "potential". No assurance can be given that this information will prove to be correct and such forward looking information included in this press release should not be unduly relied upon. Forward looking information and statements speaks only as of the date of this press release.

Forward looking statements or information in this press release include, among other things, statements with respect to Mineral Reserves and Mineral Resource estimates, upgrades of the classification of Mineral Resources to Mineral Reserves and increasing the New Liberty life of mine;

In making the forward looking information or statements contained in this press release, assumptions have been made regarding, among other things: general business, economic and mining industry

conditions; interest rates and foreign exchange rates; the continuing accuracy of Mineral Resource and Reserve estimates; geological and metallurgical conditions (including with respect to the size, grade and recoverability of Mineral Resources and Reserves) and cost estimates on which the Mineral Resource and Reserve estimates are based; the supply and demand for commodities and precious and base metals and the level and volatility of the prices of gold; market competition; the ability of the Company to raise sufficient funds from capital markets and/or debt to meet its future obligations and planned activities and that unforeseen events do not impact the ability of the Company to use existing funds to fund future plans and projects as currently contemplated; the stability and predictability of the political environments and legal and regulatory frameworks including with respect to, among other things, the ability of the Company to obtain, maintain, renew and/or extend required permits, licences, authorizations and/or approvals from the appropriate regulatory authorities; that contractual counterparties perform as agreed; and the ability of the Company to continue to obtain qualified staff and equipment in a timely and cost-efficient manner to meet its demand.

Actual results could differ materially from those anticipated in the forward looking information or statements contained in this press release as a result of risks and uncertainties (both foreseen and unforeseen), and should not be read as guarantees of future performance or results, and will not necessarily be accurate indicators of whether or not such results will be achieved. These risks and uncertainties include the risks normally incidental to exploration and development of mineral projects and the conduct of mining operations (including exploration failure, cost overruns or increases, and operational difficulties resulting from plant or equipment failure, among others); the inability of the Company to obtain required financing when needed and/or on acceptable terms or at all; risks related to operating in West Africa, including potentially more limited infrastructure and/or less developed legal and regulatory regimes; health risks associated with the mining workforce in West Africa; risks related to the Company's title to its mineral properties; the risk of adverse changes in commodity prices; the risk that the Company's exploration for and development of mineral deposits may not be successful; the inability of the Company to obtain, maintain, renew and/or extend required licences, permits, authorizations and/or approvals from the appropriate regulatory authorities and other risks relating to the legal and regulatory frameworks in jurisdictions where the Company operates, including adverse or arbitrary changes in applicable laws or regulations or in their enforcement; competitive conditions in the mineral exploration and mining industry; risks related to obtaining insurance or adequate levels of insurance for the Company's operations; that Mineral Resource and Reserve estimates are only estimates and actual metal produced may be less than estimated in a Mineral Resource or Reserve estimate; the risk that the Company will be unable to delineate additional Mineral Resources; risks related to environmental regulations and cost of compliance, as well as costs associated with possible breaches of such regulations; uncertainties in the interpretation of results from drilling; risks related to the tax residency of the Company; the possibility that future exploration, development or mining results will not be consistent with expectations; the risk of delays in construction resulting from, among others, the failure to obtain materials in a timely manner or on a delayed schedule; inflation pressures which may increase the cost of production or of consumables beyond what is estimated in studies and forecasts; changes in exchange and interest rates; risks related to the activities of artisanal miners, whose activities could delay or hinder exploration or mining operations; the risk that third parties to contracts may not perform as contracted or may breach their agreements; the risk that plant, equipment or labour may not be available at a reasonable cost or at all, or cease to be available, or in the case of labour, may undertake strike or other labour actions; the inability to attract and retain key management and personnel; and the risk of political uncertainty, terrorism, civil strife, or war in the jurisdictions in which the Company operates, or in neighbouring jurisdictions which could impact on the Company's exploration, development and operating activities.

This press release also contains Mineral Resource and Mineral Reserve estimates. Information relating to Mineral Resource and Mineral Reserve contained in this press release is considered forward looking information in nature, as such estimates are estimates only, and that involve the implied assessment of the amount of minerals that may be economically extracted in a given area based on certain judgments and assumptions made by qualified persons, including the future economic viability of the deposit based on, among other things, future estimates of commodity prices. Such estimates are expressions of judgment and opinion based on the knowledge, mining experience, analysis of drilling results and industry practices of the qualified persons making the estimate. Valid estimates made at a given time may significantly change when new information becomes available, and may have to change as a result

of numerous factors, including changes in the prevailing price of gold. By their nature, Mineral Resource and Mineral Reserve estimates are imprecise and depend, to a certain extent, upon statistical inferences which may ultimately prove unreliable. If such Mineral Resource and Mineral Reserve estimates are inaccurate or are reduced in the future (including through changes in grade or tonnage), this could have a material adverse impact on the Company and its operating and financial performance. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Due to the uncertainty that may be attached to inferred mineral resources, it cannot be assumed that all or any part of an inferred mineral resource will be upgraded to an indicated or measured mineral resource as a result of continued exploration.

Although the forward-looking statements contained in this press release are based upon what management believes are reasonable assumptions, the Company cannot provide assurance that actual results or performance will be consistent with these forward-looking statements. The forward looking information and statements included in this press release are expressly qualified by this cautionary statement and are made only as of the date of this press release. The Company does not undertake any obligation to publicly update or revise any forward looking information except as required by applicable securities laws.
