*Performance since First State was appointed as Investment Manager with effect from the 1st July 2010

Commentary

During August, the NAV was down 6.8%, the share price was down 3.2%, the index was down 8.9% and the Peergroup was down 7.3%.

At a country level, the Philippines (-3.10%) and Hong Kong (-5.34%) outperformed, while South Korea (-12.69%) and India (-11.64%) lagged. In terms of sectors, Consumer Staples (-3.28%) and Telecom Services (+0.94%) outperformed, while Industrials (-12.64%) and Materials (-13.07%) declined the most.

Our holding in E-Mart (South Korea: Consumer Staples) gained due to its attractive valuation following the split from Shinsegae. Philippine Long Distance (Telecom Services) outperformed as investors sought reasonably valued defensive businesses. On the negative side, Delta Electronics (Thailand: Information Technology) was weak as it faces increasing competition in power supply. DBS (Singapore: Financials) lagged on general concerns about the global financial sector. Over the month we bought Satyam Computer Services (India: Information Technology) as we are backing the new management to turn the franchise around.

Despite the recent correction in markets resulting in some more palatable valuations, we continue to err on the defensive side. We still see the best value in companies with pricing power, strong sustainable cash flows and growing dividend yields.

Investment Manager Profile

First State was appointed as Investment Manager with effect from the 1st July 2010. First State is 100 per cent owned by the Commonwealth Bank of Australia and is headquartered in Edinburgh. Its Asia Pacific ex Japan/Global Emerging Markets team is responsible for the portfolio and has 21 investment professionals, a number of whom are located in the firm's offices in Hong Kong and Singapore. The First State team has specialised in Asian investment for 22 years and has built a highly creditable long term performance record managing a range of client portfolios including Scottish Oriental Smaller Companies Trust plc, an investment company which invests in smaller companies in the Asian Pacific region. First State has a disciplined research procedure which seeks to identify high quality companies.

Investment Policy

To invest in companies with the aim of generating long term growth for shareholders. The Company invests principally in listed equities but may invest in other securities, including preference shares, debt instruments, convertible securities and warrants. In addition, the Company may invest in open and closed-ended investment funds and companies, up to a limit of 10 per cent of total assets, or in some cases 15 per cent. The Company is able to invest in unlisted securities but these will be limited to those which are expected to be listed on a stock exchange or which cease to be listed and which may be appropriate to continue to hold. Risk is diversified by investing in different countries, sectors and stocks within the Asia Pacific region and the Indian sub-continent, excluding Japan, Australia and New Zealand. The Board has set a current limit for single investments of 7.5 per cent of total assets at the time of investment. The Board has set a current limit on gearing, net of cash, of 20 per cent of shareholders' funds at the time of borrowing.

Important Information

Pacific Assets Trust plc (the "Company") is a UK investment trust listed on the London Stock Exchange and is a member of the Association of Investment Companies. As this Company may implement a gearing policy investors should be aware that the share price movement may be more volatile than movements in the price of underlying investments. Past performance is not a guide to future performance. The value of investments and the income from them may fall as well as rise and is not guaranteed. An investor may not get back the original amount invested. Changes in the rates of exchange between currencies may cause the value of investments to fluctuate. Fluctuation may be particularly marked in the case of a higher volatility fund and the value of an investment may fall suddenly and substantially. Shares in companies in the Asia Pacific region can prove volatile and above average price movements can be expected. There can be no assurance that the Company's investment objective will be achieved and investment results may vary substantially over time. This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Investment Trust share prices may not fully reflect underlying net asset values. There may be a difference between the prices at which you may purchase ("the offer price") or sell ("the bid price") a share on the stock market which is known as "bid-offer" or "dealing" spread. This is set by the market makers and varies from share to share. This spread typically averages 1-2% each way on the mid-market price (the price halfway between the bid and offer prices), and can fluctuate and at times be higher than average. Net Asset Value per share is calculated in accordance with the guidelines of the Association of Investment Companies in that income received by the company in the period since the last annual accounts is excluded. Total net assets are stated inclusive of income received. Any opinions on individual stocks are those of the Company's Investment Manager and no reliance should be given on any such views. Any research in this document has been procured and may have been acted upon by First State Investment Management (UK) Limited ("First State") for its own purposes. The results are being made available to you only incidentally. The views expressed herein do not constitute investment or any other advice and are subject to change. They do not necessarily reflect the views of Frostrow Capital LLP and no assurances are made as to their accuracy.
