Eight Solutions Launches Jetstream Version 1.4 For High Speed File Transfer

Jetstream Brings Exciting New Audit and Sharing Features for More Flexibility and Wider Customer Base

Vancouver, BC, January 16, 2018 – Eight Solutions Inc. (TSXV:ES) ("Eight Solutions" or the "Company") today announced the release of version 1.4 of its Cumul8:Jetstream high speed file transfer software, which enables users to quickly, easily, and securely share large volumes of data.

The latest version of Jetstream introduces a robust system to manage transfer logs and safekeep all transaction history. Already in use in the Media & Entertainment industry to accelerate large data transfers between production and visual effects studios across the globe, with these new features Jetstream can now be used by businesses in other industries that need to share files while maintaining a detailed audit trail. This Jetstream release is already in use in the expanded market of professional services by users who have traditionally struggled with finding a simple solution to move large folders to their clients without big courier expenses or the frustration of sharing in the cloud.

Jetstream now also includes tokenized file sharing, allowing users to share files from their servers via an email link with flexible options for time-based expiry or one-time use.

As with previous releases, this version of Jetstream has a highly intuitive user interface that makes the software very easy to use. Jetstream accelerates large data transfers over unreliable and high latency connections through an optimized protocol using 100% of its allocated bandwidth. From a security perspective, Jetstream keeps data highly secure with unique user-level authentication and transfer-level encryption. Jetstream also seamlessly integrates to existing workflows via an extensive API library so users can increase efficiency by automating the delivery and transfer of data.

"Jetstream version 1.4 bridges the gap between consumer-oriented applications with more limited features sets and B2B products that are more complex and difficult to use," says Michael Devine, Executive Vice President of Eight Solutions. "It has become increasingly clear that many other industries can use Jetstream, especially ones that need to share sensitive and confidential information. If you're in a legal or accounting firm or government agency, for example, data security is paramount. With Jetstream, users can have peace of mind knowing data is transferred using a fast and secure method that guarantees files will get to where they need to go."

A 30-day free trial for unlimited users and no bandwidth or transfer caps is available at http://jetstream.cumul8.com.

About Eight Solutions
Eight Solutions brings together highly visual and user-centric technology solutions designed and developed by a team of entertainment and gaming industry veterans with a combined 60+ years of experience working on some of the world's most successful films and video games.
