

Eight Solutions' Jetstream Product Completes Integration of the Accelerated File Transfer Platform to Amazon S3

Vancouver, BC, April 4, 2019 – Eight Solutions Inc. (TSXV:ES) (“Eight Solutions” or the “Company”), a technology company focused on making data easy, today announced that the Cumul8:Jetstream high speed file transfer platform has been integrated to Amazon S3 cloud storage. This feature is now available in the latest Jetstream release, version 1.8.

Through the Amazon S3 integration, users can transfer a virtually unlimited amount of data for storage in the cloud. The traditional approach to sending data to or from Amazon S3 involves using the TCP protocol, which can be vulnerable to unreliable connections and slow transfer speeds. The Jetstream accelerated transfer technology is more resilient to adverse network conditions and moves files fast, offering users better workflow efficiency.

Integrating Jetstream with Amazon S3 also provides users with access to additional features such as bandwidth control, transfer prioritization, and more.

“This Amazon S3 integration is an important milestone for the Jetstream platform,” said Michael Devine, EVP of Sales and Marketing at Eight Solutions. “With Amazon S3, clients can reduce capital expenditures by eliminating the need to set up their own costly server infrastructure for on-premise storage. Jetstream offers our users a robust yet cost-effective way to quickly, securely, and reliably transfer their data.”

The latest version of Jetstream can be seen at the JB&A Pre-NAB Technology Event in Las Vegas starting April 7, 2018. Visit the new Jetstream website at <https://gojetstream.io> to learn more.

About Eight Solutions

Eight Solutions is a technology company bringing fast value to data through achievable AI. With a team of Media and Entertainment industry veterans, Eight Solutions brings together the ‘fast to excitement’ and ‘ease of use’ philosophies learned from years of producing the world’s biggest video games and the experience of handling immense volumes of VFX data while working on Hollywood blockbuster movies. The Eight Solutions product portfolio includes Cumul8, an AI-driven live analytics platform providing real-time and predictive insights that help businesses harness and realize operational value from their data; and Jetstream, a secure high speed file transfer application enabling users to focus on their own work product rather than how it is delivered.
