
Memex Inc.

Management's Discussion and Analysis

For the three and nine-month periods ended June 30, 2021 and 2020

Management's Discussion and Analysis (the "MD&A") of the financial condition and results of operations of Memex Inc. ("Memex" or the "Company") pertain to the three and nine-month periods ended June 30, 2021. This MD&A should be read in conjunction with the Company's condensed interim consolidated financial statements and related notes for the three and nine-month periods then ended, and readers are encouraged to refer to the Company's consolidated financial statements for its most recent year ended September 30, 2020. The MD&A is prepared as at **August 24, 2021**, and is current to that date unless otherwise stated. The condensed interim consolidated financial statements and extracts of those financial statements provided within this MD&A, except as otherwise stated ("Other Financial Measures") have been prepared in accordance with International Financial Reporting Standards ("IFRS") and are presented in Canadian dollars, which is the Company's functional currency.

COMPANY OVERVIEW

Memex, with its head office in Burlington, Ontario is a corporation continued under the Alberta Business Corporations Act ("ABCA"). The Company is a reporting issuer in Ontario, British Columbia, Alberta and Saskatchewan.

Memex's flagship product, MERLIN Tempus™, a software-driven communications platform that delivers manufacturing productivity metrics including Overall Equipment Effectiveness ("OEE") in real time, has established Memex as a leader in the Industrial Internet of Things ("IIoT").

MERLIN measures and analyzes manufacturing and production performance and provides its users with real-time insights on operational efficiency, as well as unparalleled visibility at all levels of the manufacturing process from "Shop-Floor-to-Top-Floor." Its funnel of process data and analytics truly enables Data-Driven Manufacturing, a cornerstone of Continuous Improvement ("CI") and other lean manufacturing initiatives.

MERLIN's customers are generally focused in the discrete manufacturing and aerospace sectors. In addition to the Company's direct sales force it also utilizes a network of resellers, system integrators and Original Equipment Manufacturers ("OEM's") to support and expand its global sales footprint.

The MERLIN Tempus Suite provides effective quantification and management of OEE by revealing hidden capacity using real-time objective data, and it offers sustainable benefits that enable world-class OEE such as reducing costs, incorporating strategies for lean manufacturing, CI, and boosting bottom-line financial performance.

HIGHLIGHTS AND SIGNIFICANT EVENTS

Income from Operations and Net and Comprehensive Income

For the first time in its history the Company remains operationally profitable after nine months (for fiscal 2021), and anticipates to continue the trend through year end. This positive result thus far in fiscal 2021 (\$179 thousand from YTD operations) would have been achieved even without the limited COVID relief support received from the Canadian government in fiscal 2021 (receipt of the final \$25K of a total \$127 thousand zero-interest loan and \$11 thousand in CEWS wage subsidies). Quarterly income from operations of \$88 thousand was the second highest ever reported after only Q2-2021, and net and comprehensive loss of \$32 thousand is the closest to break-even the Company has been this far into a year.

But for \$92 thousand in debt extinguishment charges on the G&G loan extension the Company would also have shown a small net and comprehensive income as well with a YTD loss of only \$32 thousand. Management believes a profitable year overall is within reach.

Revenues, Bookings and Backlog

Memex reported \$2.21 million in revenue for the nine months ended June 30, 2021, compared to \$1.75 million for the same period a year ago, a \$463 thousand (26%) improvement. Q3-2021 revenue of \$767 thousand was a \$213 thousand, or 38% increase over the same three-month period one year ago.

Bookings for the first nine months of 2021 of \$1.77 million were \$109 thousand (6%) off the 2020 level for the same period, and bookings for the third quarter of 2021 of \$425 thousand were 10%, or \$46 thousand lighter than the same three-month period in 2020.

As at June 30, 2021, the Company had \$763 thousand in project backlog, down \$489 thousand or 39% from September 30, 2020 and \$149 thousand, or 17% from the beginning of the quarter. This difference represents the volume of project business the Company delivered in the quarter in excess of new project business it brought in during the same period.

Cash changes from Operations

The net cash generated from operational activities for the first nine months of 2021 (after changes in non-cash working capital balances) of \$402 thousand is a \$382 thousand improvement over the same period a year ago. And for the most recent quarter, \$180 thousand in cash was generated from operations, a \$170 thousand improvement from Q3-2020.

COVID-19 UPDATE

The financial impact, both past and future of COVID-19 ("COVID") on operations is not possible to quantify. The steps management has taken to mitigate the effects are summarized here.

Health and safety

Memex's office remains closed (since March 2020) to all visitors and non-essential staff. A very limited number of staff continue to manage all critical office functions as most staff continue to work remotely.

Management continues to review and comply with all government requirements surrounding workplace safety and required social distancing.

Business and supply chain disruption

The Company has experienced no supply-side procurement delays and continues to maintain sufficient inventory to satisfy all customer orders and to allow sufficient lead-time to replenish inventory while taking on new business.

Client services work and customer/prospect interactions are undertaken remotely wherever possible. US-based resources have enabled the Company to perform on-site installation and service work to its primary customer base, although at a lesser capacity than pre-COVID due to the government restrictions on cross border travel.

Nature and impact of government measures

During fiscal 2020 and to a limited extent in fiscal 2021, the Company received zero-interest loan proceeds (YTD 2021 - \$25K, fiscal 2020 - \$102K) and CEWS funds (YTD 2021 - \$11K, fiscal 2020 \$333K) from the Canadian Government to alleviate some of the financial impact and effects of COVID. Management continually reviews opportunities to obtain government funding and incentives that it believes it is eligible for.

Access to capital

Prior to the onset of COVID, the Company's financial performance made access to competitively priced capital difficult. The continuing uncertainty in the global and in particular the North American economy as well as the volatility in Canada's small-cap financial market has likely made the Company's access to new sources of capital more challenging.

Customer demand

Memex continues to experience significant interest in its products and services. There is no certainty, however, that this interest will continue, or that this interest will convert into sufficient orders and revenue to maintain operations.

COVID's impact on the financial statements as presented

COVID is believed to have had an effect on the results of Company operations since the beginning of the third quarter of fiscal 2020, and management believes that effect has likely been material. The exact effect on results, however, including those presented in its latest financial statements are impossible to determine.

Exacerbated by COVID, but also due to its financial position and available working capital, prior history of operational losses, and concerns over potential challenges accessing future sources of operational funding, the Company continues to include a 'going concern' warning to its shareholders in Note 1 of its financial statements.

Management has considered the effects COVID on the assumptions used in the preparation of its latest financial statements, and in general, believes that other than adding to the degree of uncertainty, the assumptions used are appropriate to properly reflect the Company's performance.

Risks and uncertainties to Memex due to COVID

Travel restrictions

Regardless of Memex's willingness and ability to deliver goods and services and to attend customer locations, travel restrictions could still delay the Company's ability to physically attend customer locations and deliver its goods and services. These delays could have a material effect on Memex's future ability to generate revenue and continue its operations.

Customer decision making

With continued uncertainty over the effects and duration and of the pandemic, and its effect on (prospective) customer operations, some customers may be hesitant to invest in Memex's goods and services until their own operations stabilize, the general indicators over local/regional/national/global economies improve, customers' management relaxes its control over discretionary spending, and/or customers have access to necessary capital (possibly) lost due to the pandemic.

OTHER FINANCIAL MEASURES

Management is using Project 'bookings' and 'backlog' as key performance indicators ("KPI's") in assessing the overall performance of the Company. Neither bookings, nor backlog, have any standardized meaning under International Financial Reporting Standards ("IFRS") and therefore may not be comparable to similar measures presented by other issuers.

Due to the nature of the Company's business and most of its product offerings, IFRS only allows for the recognition of revenue from most of Memex's sales and delivery efforts once all elements of that sale have been completed. This is regardless of the timing of the effort or the expense laid out by the Company to deliver these orders (IFRS does not provide a 'percentage of completion' alternative for revenue recognition).

A combination of revenue recognition policies and varying customer implementation timelines create inconsistent fluctuations in revenue from period to period such that Management needed to consider other information when measuring and monitoring growth success beyond recognized revenue. Although Management views significant fluctuations in revenue as a key performance indicator, when considered in combination with fluctuations in bookings and backlog it gives a more complete understanding of the Company's overall performance.

Unearned revenue, reported with current liabilities in the Company's statement of financial position, consists of invoiced unearned software and service fees plus all invoiced and unearned project orders (i.e. deposits, progress billings). **Backlog** is the total of all unearned project orders, *both invoiced and un-invoiced*, that the Company has on-hand at any given time. A comparative illustration of unearned revenue and backlog is provided.

Management considers **bookings** to be the total dollar value of new project orders plus any service and software fees generated in each period. Bookings are the combination of revenue plus current backlog less any backlog that was on-hand at the beginning of the measurement period, adjusted for any changes in unearned services and future software rights.

$$\text{Bookings} = \text{Revenue} + \text{Ending backlog} - \text{Beginning backlog} + \text{or} - \text{Changes in unearned services \& future software rights}$$

OVERALL PERFORMANCE

Memex \$2.21 million in revenue for the nine-months ended June 30, 2021 is a \$463 thousand (26%) improvement from the \$1.75 million reported in the same period a year ago.

The Company showed \$32 thousand net and comprehensive loss for the first nine months of fiscal 2021, equating to \$0.000 net and comprehensive loss per share, in comparison to a \$738 thousand net and comprehensive loss the same period a year ago, and a \$0.005 loss per share;

Bookings for the first nine months of 2021 totalled \$1.77 million versus \$1.88 million in the same period a year ago, down 6%;

Gross margin percentage for the nine months ended June 30, 2021 of 79.7% is a 6.6% improvement from that experienced in the first nine months of 2020;

Cash generated from operating activities (before changes in working capital balances) was \$255 thousand for the first nine months of fiscal 2021, up \$875 thousand from the same prior year period; and

The Company had \$757 thousand working capital (after excluding unearned revenue) and \$748 thousand in cash on hand at June 30, 2021, as compared with \$780 thousand in working capital and \$549 thousand in cash at September 30, 2020.

SELECTED NINE-MONTH INFORMATION

For the nine months ended June 30 (Canadian dollars - in thousands except per share performance)	2021	2020	% change	
Revenues	2,215	1,752	↑	26%
Gross margin	1,766	1,281	↑	38%
Operating expenses				
Development	353	452	↓	22%
Selling and marketing	525	865	↓	39%
Administration	628	627	↑	0%
Income (loss) from operations	179	(636)	↑	128%
Net and comprehensive loss for the period	(32)	(738)	↑	96%
Basic and diluted loss per share	(0.000)	(0.005)	↑	91%
Weighted average shares outstanding	136,438	134,157	↑	2%
Actual shares outstanding	137,623	135,823	↑	1%

YEAR-TO-DATE RESULTS OF OPERATIONS

Revenues and Bookings

Nine-month revenue for the current year of \$2.22 million was \$463 thousand (26%) higher than the same period in 2020. Two larger projects completed during the second quarter made a significant contribution to YTD revenue.

Bookings for the first nine months of 2021 of \$1.77 million, were down \$109 thousand, or 6%, from the same period in 2020. Closing backlog (accumulated and undelivered bookings) of \$763 thousand was down \$489 thousand from September 30, 2020, representing the dollar value of projects delivered so far in fiscal 2021 in excess of new project worked, and was at its lowest level in more than two years.

For the nine months ended June 30 (In thousands of Canadian dollars)	2021	2020	% change	
Revenue for the nine month	2,215	1,752	↑	26%
+ Backlog - end of nine month	763	1,107	↓	31%
- Backlog - beginning of nine month	(1,252)	(1,189)		
+ or - change in unearned service & maint fees	44	209		
Bookings for the nine month	1,770	1,879	↓	6%

Gross Margin and Cost of Sales

Gross margin for the nine months ended June 30, 2021, of \$1.77 million is up \$485 thousand, or 38% from the same period a year ago on a 26% increase in revenue. This continues to reflect the fixed nature of the labour portion of the Company's cost of sales. It also highlights the decline in installation travel, this fiscal year-to-date from the prior (COVID). The gross margin percentage improvement is also primarily attributed to the same factors.

Operating Expenses

Total operating expenses for the nine-month period ended June 30, 2021, of \$1.59 million were \$330 thousand (17%) lower than the same period in fiscal 2020.

Operational changes in March 2020 (start of COVID) including staff rationalization and virtually no ability to travel for sales and marketing as well as product installations continue to be the main influencers in the spending decline, although Q3-2021 is the first quarter comparable to a prior year quarter also affected by COVID. Net of government CEWS grants operational labour spending was down \$273 thousand from the prior YTD, and advertising and marketing combined with associated travel was down a combined \$152 thousand year over year. By far the largest offsetting cost incurred in the current fiscal year relative to the prior is foreign exchange, swinging from a \$27 thousand pick up in YTD 2020 to an \$81 thousand charge in YTD fiscal 2021. A combination of COVID and political unrest in the US have had a significant effect on the Company's financial performance, as it continues to generate more than 75% of its revenues from the US, as well as arranges all non-domestic sales in US currency.

Sales and installation activities still rely heavily on virtual communications and secure virtual private network (VPN) connections to customer servers, but the Company's US based resources were far more active travelling in the past quarter with a great deal of intra-US travel restrictions having been rolled back.

Development

Development expenses for the nine-month period ended June 30, 2021, were down \$99 thousand (22%) from the same period a year ago with \$81 thousand related to a decline in labour spending.

Selling and marketing

Selling and marketing expenses for the nine-month period ended June 30, 2021 of \$525 thousand, were down \$340 thousand, or 39%, from the same period a year ago. In addition to \$190 thousand reduction in labour spending travel spend is down \$75 year over year, and advertising and marketing spending is down \$73 thousand so far in 2021. Not being able to physically attend trade shows and other promotional events, which for the most part have been cancelled or postponed over the past 15 months is the primary reason for the spending decline in travel and marketing. As travel becomes safer, and in-person marketing events return, the Company intends to re-engage with this method of promotion, but not likely to the same degree it has previously.

Administration

Administrative charges for the nine months ended June 30, 2021 were \$1 thousand higher in the current year-to-date over prior with no significant fluctuations from year to year.

Income (loss) from operations

The Company's income from operations for the current year-to-date of \$179 thousand, was a \$815 thousand (128%) improvement from the same period a year ago. This improvement is net of the \$108 thousand negative variance in foreign exchange it suffered year over year. Top line improvements combined with spending reductions continue to contribute to the positive result.

Other transactions effecting net and comprehensive income (loss)

Interest and accretion expense for the current year-to-date of \$211 thousand was \$120 thousand higher than the same period a year ago. A total of \$92 thousand in loan extinguishment charges for the G&G loan extension account for the largest variance, along with the net present value adjustment for the RRRF term loan received in the third quarter of fiscal 2020 of \$57 thousand versus only a \$10K pick-up (for the balance of the loan receipt) in fiscal 2021.

Earnings per share

The basic and diluted loss per share of \$0.000 for the current fiscal year-to-date was based on a weighted average 136.4 million Common Shares outstanding (2020 – \$0.005 basic and diluted loss per share based on a weighted average 134.1 million Shares outstanding).

LIQUIDITY

As at June 30, 2021 the Company had working capital (excluding unearned revenue) of \$757 thousand and \$636 thousand in cash, as compared with \$780 thousand in working capital (same unearned revenue exclusion) and \$549 thousand in cash on hand at September 30, 2020.

In November 2020, the Company received the final \$25 thousand of \$127 thousand interest-free Regional Relief and Recovery Funding ("RRRF"), confirmed during FY2020.

During the current fiscal year-to-date ending June 30, 2021 the Company has repaid \$39 thousand of its interest-free FedDev IBI term loan (YTD 2020 - \$84 thousand), repaid G&G principal of \$105 thousand (YTD-2020 - \$70K), Company Officers \$8 thousand (YTS 2020 - \$5K) and reduced its property lease obligation by \$45 thousand (YTD 2020 - \$32K).

In March 2021, the Company arranged a one-year extension to the G&G loan, to March 2023, and paid a total of \$82 thousand in fees (on top of the NPV adjustment) to make it happen.

The Company spent \$4 thousand in capital additions so far in 2021 (2020 - \$4 thousand).

As at (Canadian dollars - in thousands except working capital ratio)	June 30, 2021	September 30, 2020	% change	
Cash on hand	748	549	↑	36%
Current assets	1,147	1,140	↑	1%
Total assets	1,607	1,692	↓	5%
Current liabilities	1,470	1,407	↑	4%
Long-term liabilities including lease	1,273	1,452	↓	12%
Working capital*	(323)	(267)	↓	21%
Modified working capital**	757	780	↓	3%
Modified working capital ratio***	2.94 to 1	3.17 to 1		

* Working capital = current assets less current liabilities

** Modified working capital = Working Capital plus unearned revenue

*** Modified working capital ratio = current assets / (current liabilities less unearned revenue)

Liquidity risk

It is possible that bookings and revenue will continue to allow the Company to achieve positive cash flow, however, there is no way to determine if it will be sufficient to meet the Company's objectives, or for how long a combination of positive cash flow from operations and other funding sources may be available.

Company management continues to monitor and manage cash flows daily to obtain reasonable comfort that all current and any future spending commitments made, can be settled with available resources.

Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the foreign exchange rates. Net foreign currency denominated assets held by the Company at any time are exposed to foreign exchange rate fluctuations.

The Company's reporting currency is the Canadian dollar. Virtually all the Company's non-sales operations are undertaken in Canada, and most expenses incurred are denominated in Canadian dollars. The Company's customer base continues to expand throughout North America and other parts of the world, and it generates the majority of its revenue outside of Canada denominated in US dollars. All foreign sales activity is denominated in US dollars.

As of June 30, 2021, the Company employed or otherwise contracted two full-time and one part-time US residents. All other utilized labour is Canadian. Also at June 30, 2021, the company held roughly \$629 thousand (net) in US denominated assets.

Credit risk

The Company, in the normal course of business, monitors the financial condition and reviews the credit history of each new customer. The Company estimates and reserves its expected credit loss (its "ECL") for the twelve-month period following each reporting date.

As of June 30, 2021, there was a concentration of credit risk with \$136 thousand (73%) of the Company's receivables collectible from three customers. As at September 30, 2020 - \$82 thousand (33%) was collectible from two customers.

Cash and cash equivalents

Operating activities

Net cash generated through operating activities for the nine-month period ended June 30, 2021 of \$451 thousand (after changes in non-cash working capital balances) is a \$431 thousand improvement from the same period in fiscal 2020. Management continues to monitor the monthly cash consumption to ensure capital continues to be available to fund ongoing activities.

Investing activities

The Company spent \$4 thousand on equipment additions so far in fiscal 2021 (2020 - \$4 thousand).

Financing activities

For the nine-month period ended June 30, 2021 the Company repaid a total of \$39 thousand (YTD 2020 - \$84 thousand) in FedDev IBI long-term financing, \$105 thousand in G&G loans (YTD 2020 - \$70K) and \$8 thousand in related party advances associated with the G&G financing (YTD 2020 - \$5K). The Company also reduced its lease liability by \$45 thousand.

Below is a summary of the cash flows provided by (used in) operating, financing and investing activities:

For the nine months ended June 30 (Canadian dollars - in thousands)	2021	2020	% change
Net Cash flows provided through (used in):			
Operating activities	451	20	↑ 2155%
Investing activities	(4)	(4)	↔ 0%
Financing activities	(253)	(191)	↓ 32%
Cash, beginning	549	740	↓ 26%
Cash, end	748	565	↑ 32%

Contractual obligations

The Company's lease of office space from Children's Financial Group Inc. extends to June 30, 2025. Future minimum lease payments (including the estimated common area costs) for the years ending June 30th are 2022 - \$168 thousand, 2023 - \$179 thousand, 2024 - \$181 thousand, 2025 - \$185 thousand.

CAPITAL RESOURCES

The Company is using its capital to finance current operations as well as its product development strategies. Memex capital consists of a combination of debt and equity; it has term-debt through the FedDev Ontario ("IBI" and "RRRF") as well as term-debt with G&G. FedDev repayments extend until 2027 and the G&G financing matures March 2023. Management believes the best way to maximize shareholder

value is to use a combination of equity and debt financing to leverage operating, product development and growth strategies.

Operating and other bank credit facilities

Through the Royal Bank of Canada, the Company has a \$100 thousand credit facility. This facility is being used through the issue of credit cards to Company employees. The Company has no other operating line or credit facility.

Outstanding share and other issued securities information

The following table shows the number of securities the Company has outstanding:

Thousands of securities outstanding as at	June 30, 2021	August 24, 2021
Common Shares	137,623	137,623
Options to purchase common shares by current and former directors and officers ¹	2,500	2,500
Options to purchase common shares by non-officer employees and contractors ¹	1,563	1,563
Options to purchase common shares by investor relations firms ¹	500	500
Warrants to purchase common shares by current and former directors and officers ²	50	50
Warrants to purchase common shares by lenders and investors ²	700	700

1. Each Option entitles its holder to purchase one common share of the Company.

2. Each Warrant entitles its holder to purchase one common share of the Company.

TRANSACTIONS WITH RELATED PARTIES

Related parties include shareholders of the Company holding greater than 10% of total outstanding shares of the Company, as well as any close family members and enterprises controlled by these individuals. Related parties also include current and former key management personnel and the Board of Directors. As at **August 24, 2021** only Company CEO and President, David McPhail holds (12.5%), through an entity he controls, more than 10% of the total outstanding shares of the Company.

As at June 30, 2021, the balance of loans and advances to the Company from key management personnel totalled \$171 thousand (before present value adjustment). An enterprise controlled by Company CEO and President, David McPhail is owed \$110 thousand, \$87 thousand for unpaid management fees between July 2010 and June 2011 and \$23 thousand as part of the G&G financing arrangement. An enterprise controlled by a former key management employee is owed \$52 thousand for unpaid management fees between July 2009 and April 2010. Company CFO, Ed Crymble is owed \$11 thousand as part of the G&G financing arrangement.

The Company has engaged Lindsey MacCarthy LLP ("LMLLP") to manage its corporate legal matters. Joe Brennan is both a lawyer at LMLLP and a member of the Company's Board of Directors. For the current year-to-date ended June 30, 2021, the Company had incurred \$22 thousand in legal fees from LMLLP (Fiscal 2020 - \$17 thousand).

Directors' fees of \$27 thousand were expensed in YTD fiscal 2021 (all fiscal 2020 - \$36 thousand in Directors fees and \$9 thousand in stock compensation costs).

The Company engaged Gladstone's Inc. ("Gladstone's") to assist in the creation and production of sales and marketing materials. Company CEO and President, David McPhail, is related to the sole shareholder of Gladstone's. The Company has paid Gladstone's \$2 thousand during fiscal 2021 (all fiscal 2020 - \$2 thousand) in fees.

SELECTED THIRD QUARTER INFORMATION

For the three months ended June 30 (Canadian dollars - in thousands except per share performance)	2021	2020	% change	
Revenues	767	554	↑	38%
Gross margin	598	484	↑	24%
Operating expenses				
Development	117	68	↑	72%
Selling and marketing	163	171	↓	5%
Administration	206	165	↑	25%
Income from operations	88	48	↑	83%
Net and comprehensive (loss) income for the period	(43)	52	↓	183%
Basic and diluted (loss) income per share	(0.000)	0.000	↔	0%
Weighted average shares outstanding	137,623	134,157	↑	3%

THIRD QUARTER RESULTS OF OPERATIONS

Revenues and Bookings

Q3-2021 revenue of \$767 thousand was \$213 thousand (38%) higher than Q3-2020. Q3-2021 revenue was \$111 thousand or 13% lower than Q2-2020.

Bookings for the 3rd quarter of 2021 of \$425 thousand, were down \$46 thousand, or 10%, from the same period in 2020. Closing backlog (bookings not delivered) of \$763 thousand, was down \$489 thousand (39%) from September 30, 2020 and \$149 thousand from the beginning of the quarter, essentially indicating that current quarter sales exceeded new project business brought in by these amounts over the corresponding periods. Management, and the sales team specifically, continue to strive to backfill deliveries with new project bookings. Q2-2021 did see the completion of two large projects which had a substantial impact on the reduction of backlog.

For the three month periods ended June 30 (In thousands of Canadian dollars)	2021	2020	% change	
Revenue for the Quarter	767	554	↑	38%
+ Backlog - end of period	763	1,107	↓	31%
- Backlog - beginning of period	(912)	(1,217)		
+ or - change in unearned service & maint fees	(193)	27		
Bookings for the Quarter	425	471	↓	10%

COVID is still a factor in generating bookings and revenue generation which is not possible to quantify, however management believes the effects have been material.

Gross Margin and Cost of Sales

Gross margin for the three months ended June, 2021 of \$598 thousand is up \$114 thousand, or 24% from the same quarter a year ago. Calculated as a percentage of revenue, gross margin decreased 9% from Q3-2020. The fiscal 2020 CEWS grant contributed to the majority of the year over year fluctuation.

Operating Expenses

Total operating expenses for the three-month period ended June 30, 2021 of \$510 thousand were \$74 thousand (17%) higher than the same quarter in fiscal 2020. Although labour and benefits spending alone was down \$39 thousand, net of the CEWS grants (2020) the overall labour expense is \$60 thousand higher in the current year quarter. The only other significant fluctuation between periods was an increase in stock-based compensation of \$21 thousand in the current year quarter but relating to an adjustment in Q3-2020 for option forfeitures.

Development

Development expenses for the three-month period ended June 30, 2021 were down \$49 thousand (72%) from the same quarter a year ago entirely related to prior year CEWS grant receipts.

Selling and marketing

Selling and marketing expenses for the three-month period ended June 30, 2021 of \$163 thousand, were down \$8 thousand, or 5%, from the same quarter a year ago, again with the variance almost entirely related to prior year CEWS grant receipts.

Administration

Administrative charges for the three months ended June 30, 2021 were up \$40 thousand (25%) from the same quarter a year ago. Prior year quarter CEWS receipts (\$18K) and the stock-based compensation adjustment (\$21K discussed above) were the variants.

Income (loss) from operations

The Company's *income* from operations for the quarter of \$88 thousand is \$40 thousand (83%) higher than the \$48 thousand operating income generated in the third quarter of 2020. The 38% increase in revenues offset by only a 17% increase in operating expenses contributed to the result.

Other transactions effecting net and comprehensive income (loss)

Interest, accretion and loss on extinguishment expense for the 3rd quarter of 2021 of \$131 thousand was \$127 thousand higher than the same period a year ago, due primarily to \$83 thousand in loan extinguishment charges for the G&G loan extension not expensed in the second quarter, but also from a NPV adjustment for RRRF financing in Q3-2020, .

Earnings per share

The basic and diluted *loss* per share of \$0.000 for the current quarter was based on a weighted average 137.6 million Common Shares outstanding (2020 – \$0.000 basic and diluted *loss* per share based on a weighted average 134.1 million Shares outstanding).

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and the disclosure of contingent assets and liabilities. These estimates and assumptions are affected by management's application of accounting policies and historical experience and are believed by management to be reasonable under the circumstances. Such estimates and assumptions are, and will continue to be, evaluated on an ongoing basis. However, actual results could differ significantly from these estimates.

Management believes that the following critical accounting policies reflect the more significant estimates and assumptions used in the preparation of the Company's financial statements. It is believed that there have been no significant changes in the critical accounting estimates for the periods presented in the financial statements. (A complete summary of the Company's significant accounting policies can be found in the accompanying notes to its consolidated financial statements for its latest year ended September 30, 2020.)

Revenue recognition

The Company recognizes revenue at the time significant risks and rewards of ownership have been transferred to the customer or the services have been performed, the price is fixed or determinable, collectability is reasonably assured, and costs incurred or to be incurred can be measured reliably. Amounts invoiced to customers (primarily deposits, down payments and charges for ongoing maintenance or support services) that do not meet the revenue recognition criteria are considered 'unearned' and included with the Company's current liabilities for reporting purposes.

The Company enters into revenue arrangements that may consist of multiple deliverables ("Multiple-element arrangements") of software licensing, hardware, support service and installation. Except for software subscriptions and version upgrade rights, which are recognized over the periods to which the rights relate, revenue from arrangements involving multiple deliverables is recognized when collection is probable, and all elements have been delivered/completed. Revenue is allocated to each respective element based on its fair value.

The Company often requires a 40% deposit on multi-element arrangements as well as some contractual situations. Any deposits received are initially recorded as unearned revenue.

(a) Software licensing

The Company's software licensing revenue reflects sales to its clients primarily on a perpetual basis, where the customer receives an indefinite future right to use the software provided in accordance with the Company's terms of use. Unless the sale is part of a multiple-element arrangement, revenue from perpetual license sales is recognized once the software has been installed on client equipment, the amount of revenue can reliably be measured, and collection is reasonably certain. Software licensing revenue also includes software version upgrade rights, which are charged to licensed users annually and recognized as revenue after collection over the periods to which the upgrade rights relate. Amounts collected prior to being earned are recorded as unearned revenue.

Software licensing revenue also includes the sale of ongoing licensing rights, where the client maintains the right to use the software as long as they pay their periodic licensing fee. Revenue from the sale of ongoing licensing rights is recognized over the periods to which the licensing rights relate.

(b) Hardware

Unless part of a multiple-element arrangement, revenue from the sale of hardware products is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the sale price is fixed or determinable, and collection is probable. Hardware is considered delivered to the customer once it has been shipped and title and risk of loss have been transferred. For most of the Company's hardware sales, these criteria are met at the time the product is shipped.

(c) Support services and installation

Unless part of a multiple-element arrangement, revenue from support services is recognized after the service has been provided and collection is probable. In instances where the Company invoices the client prior to performing support service, the prebilling is recorded as unearned revenue. Support revenue also includes the recognition of previously deferred revenue related to multi-element arrangements for installation, configuration and support.

Financial Instruments

(a) Financial assets

1. Initial recognition and measurement

Non-derivative financial assets within the scope of IFRS 9 are classified and measured as "financial assets at fair value", as either fair value either through profit or loss ("FVPL") or through other comprehensive income ("FVOCI"), and "financial assets at amortized costs", as appropriate. The Company determines the classification of financial assets at the time of initial recognition based on the Company's business model and the contractual terms of the cash flows.

All financial assets are recognized initially at fair value plus, in the case of financial assets not at FVPL, directly attributable transaction costs on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

Financial assets with embedded derivatives are considered in their entirety when determining their classification at FVPL or at amortized cost. Trade and other receivables held for collection of contractual cash flows are measured at amortized cost.

2. Subsequent measurement – financial assets at amortized cost

After initial recognition, financial assets measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the Effective Interest Rate (“EIR”) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the consolidated statements of operations and comprehensive income (loss).

3. Subsequent measurement – financial assets at FVPL

Financial assets measured at FVPL include financial assets management intends to sell in the short term and any derivative financial instrument that is not designated as a hedging instrument in a hedge relationship. Financial assets measured at FVPL are carried at fair value in the consolidated statements of financial position with changes in fair value recognized in other income or expense in the consolidated statements of operations. The Company does not measure any financial assets at FVPL.

4. Subsequent measurement – financial assets at FVOCI

Financial assets measured at FVOCI are non-derivative financial assets that are not held for trading and the Company has made an irrevocable election at the time of initial recognition to measure the assets at FVOCI. The Company does not measure any financial assets at FVOCI.

After initial measurement, investments measured at FVOCI are subsequently measured at fair value with unrealized gains or losses recognized in other comprehensive income or loss in the consolidated statements of operations and comprehensive income (loss). When the investment is sold, the cumulative gain or loss remains in accumulated other comprehensive income or loss and is not reclassified to profit or loss.

5. Derecognition

Financial assets are derecognized when the contractual rights to receive the cash flows from these assets have ceased to exist or when the Company has transferred substantially all the risk and rewards of ownership of the assets. Where substantially all the risks and rewards of ownership of the financial asset are neither retained nor transferred, the Company derecognizes the transferred asset only if it no longer controls the asset. Control is represented by the practical ability to sell the transferred asset without the need to impose additional restrictions. If the Company retains control over the asset, it will continue to recognize the asset to the extent of its continuing involvement. When a financial asset is derecognized in full, a gain or loss is recognized in net income for an amount equal to the difference between the carrying amount of the asset and the value of the consideration received, including any new assets and/or liabilities recognized.

(b) Financial liabilities

1. Initial recognition and measurement

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVPL as is the case for held for trading or derivative instruments, or the Company has opted to measure the financial liability at FVPL. The Company's financial liabilities include accounts payable and accrued liabilities and long-term liabilities, which are each measured at amortized cost. All financial liabilities are recognized initially at fair value and in the case of long-term debt, net of directly attributable transaction costs.

2. Subsequent measurement – financial liabilities at amortized cost

After initial recognition, financial liabilities measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in finance cost in the consolidated statements of operations and comprehensive income (loss).

3. Derecognition

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires with any associated gain or loss recognized in other income or expense in the consolidated statements of operations and comprehensive income (loss).

Asset impairment

(a) Financial assets

The Company's only financial assets subject to impairment are other accounts receivable, which are measured at amortized cost. The Company has elected to apply the simplified approach to impairment as permitted by IFRS 9, which requires the expected lifetime loss to be recognized at the time of initial recognition of the receivable. To measure estimated credit losses, accounts receivable have been grouped based on shared credit risk characteristics, including the number of days past due. An impairment loss is reversed in subsequent periods if the amount of the expected loss decreases, and the decrease can be objectively related to an event occurring after the initial impairment was recognized.

(b) Non-financial assets

Property, equipment and intangible assets are tested for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. For the purpose of measuring recoverable amounts, assets that cannot be tested individually are grouped

at the lowest levels for which there are separately identifiable cash flows (cash-generating units – “CGUs”).

The recoverable amount of an asset or CGUs is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is recognized if the carrying value of an asset or a CGU exceeds its recoverable amount. Impairment losses are recognized in profit or loss.

The Company evaluates impairment losses for potential reversals when events or circumstances warrant such consideration.

Leases

On January 1, 2019, the IASB issued IFRS 16, Leases (“IFRS 16”), which supersedes IAS 17, Leases. The Company adopted the new standard as of its effective date, on October 1, 2019, on a modified retrospective basis whereby comparative information has not been adjusted.

The Company has applied the following practical expedients:

- On transition to IFRS 16, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Company applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17, and IFRIC 4, determining whether an arrangement contains a lease, were not reassessed for whether there is a lease. The Company applied the definition of a lease under IFRS 16 to contracts entered into or changed on or after October 1, 2019;
- Account for leases with a remaining term of less than 12 months as at October 1, 2019 as short-term lease
- Account for lease payments as an expense and not recognizing a right-of-use asset if the underlying asset is of low dollar value; and
- Use hindsight in determining the lease term where the contract contains terms to extend or terminate the lease;
- The Company has elected not to record depreciation of the right-of-use assets prior to the date of initial application.
- The Company has elected not to separate non-lease components from lease components, and instead account for each lease component and any associated non-lease components as a single lease component.

On adoption of IFRS 16, the Company's leases are measured at the discounted present value of the remaining minimum lease payments, excluding short-term and low-value leases at its weighted average incremental borrowing rate

(a) Leases before October 1, 2019 (IAS 17)

Finance leases - Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Operating leases - Operating lease payments are recognized as office and general expenses in the consolidated statements of operations and comprehensive income (loss) on a straight-line basis over the lease term and include renewal terms when it is reasonably certain that the option will be exercised. Contingent rentals arising under operating leases are recognized as an expense in the year in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

(b) Leases as at October 1, 2019 (IFRS 16) (Lessee)

A contract is a lease (or may contain a lease) if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. A lease liability is recognized at the commencement of the lease term at the present value of the lease payments that are not paid at that date. At the commencement date, a corresponding right-of-use asset is recognized at the amount of the lease liability, adjusted for lease incentives received, retirement costs and initial direct costs. Amortization is recognized on the right-of-use asset over the lesser of the lease term and the asset's useful life. The lease liability is subsequently measured at amortized cost using the effective interest method. The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases (lease term of 12 months or less) and leases for which the underlying asset is of low value. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Research and development expense

Since becoming a reporting issuer in October 2013, all expenses related to research and development activities have been expensed as incurred.

Development costs of certain hardware components incurred prior to becoming a reporting issuer, net of investment tax credits, were capitalized as deferred development costs. These costs are being amortized over their estimated product life estimated to be 2024.

Income taxes

Income taxes are accounted for using the asset and liability method. This creates deferred income tax assets and liabilities which can be affected by changes in income tax rates and the assumption of the income rates that are most likely to apply when the deferred income tax asset or liability is settled. The effect of changes in income tax rates is recognized in the year during which these rates change. As appropriate, a valuation allowance is recognized to decrease the value of the tax assets to an amount that is more likely than not to be realized. In estimating the realization of deferred income tax assets, management considers whether a portion or all deferred tax assets are more likely or not to be realized. Realization is subject to future taxable income.

RISKS AND UNCERTAINTIES TO THE COMPANY

There are several inherent risks associated with the business of the Company. The following are certain risk factors related to the business being carried on which should be carefully considered. It is believed that these are factors that could cause actual results to be different from expected and historical results, but the risks presented below may not be all of the risks that the Company may face. The following information is a summary only of certain risk factors and is qualified in its entirety by reference to, and must be read in conjunction with, the detailed information appearing elsewhere in this MD&A. Other sections of this MD&A include additional factors that could have an effect on the business and financial performance of the business of the Company.

The markets in which the Company currently competes are very competitive and change rapidly. Therefore, new risks may emerge, and management may not be able to predict all of them or be able to predict how they may cause actual results to be different from those contained in any forward-looking statements. You should not rely upon forward-looking statements as a prediction of future results.

Effects on revenue of customer speculation or knowledge of future product or feature releases

As the Company continues to develop, improve, upgrade and otherwise alter its product offerings, it may periodically provide advanced timing and availability information to its customers and prospects, or they may speculate as to future products availability and timing. Management believes that customer and prospect speculation or knowledge of upcoming product and feature releases, including timing, has, and may continue to, cause fluctuations in revenues. The willingness of customers and prospects to purchase currently available products (even with the right to upgrade to the newest product releases once they become available) may or may not be influenced by new product development, and there is no guarantee that customers or prospects will ever make a purchase from Memex.

History of losses and the inability to achieve or sustain profitability

The Company showed a profit for the year ended September 30, 2011 followed by net losses for the years ended September 30, 2012 through 2020. There is no certainty that the Company will become profitable in the short term or if it will continue to incur net losses through 2021 and beyond.

Further, the Company expects to continue to incur future expenses including product development and sales and marketing costs, which will most likely be in advance of sales generated by those efforts. If the Company is unable to convert its development costs into revenue it may be difficult to achieve and maintain profitability. Beyond this, the Company may incur significant losses in the future for a number of reasons including other risks described in this document, and it may encounter unforeseen expenses, difficulties, complications, delays and other unknown events. Accordingly, the Company may not be able to achieve or maintain profitability.

IIoT software is a relatively new market

The Company derives, and it is expected that the Company will continue to derive, substantially all its revenue from selling its flagship product MERLIN, a software driven IIoT communications platform that provides manufacturing analytics in real time. This is a relatively new and rapidly evolving market, where the majority of manufacturers have not adopted manufacturing analytics software. If the market for MERLIN fails to grow or grows at a slower rate than the Company currently anticipates, the Company's business would be negatively affected. The Company has targeted expansion into markets it believes are most likely to adopt MERLIN. However, the Company's efforts to expand within and beyond the current markets may not be achieved at the rate of adoption the Company anticipates.

No assurance that cash flow from operations, debt or equity financing will be available

The Company anticipates continuing to make substantial operating expenditures as it implements its growth strategy. These operating expenditures may be financed out of cash generated from operations and possible future debt or equity financings. However, the ability to finance such expenditures out of cash generated from operations will depend on the financial performance of the Company. The ability of the Company to finance such expenditures from possible future debt or equity financings will be dependent on, among other factors, the overall state of capital markets, the financial condition of the Company and investor demand for investments in the technology sector and the Company's securities in particular. To the extent that either internal or external sources of capital become limited or unavailable, or only available on onerous terms, the Company's ability to maintain existing assets may be impaired, and its assets, liabilities, business, financial condition and results of operations may be materially and adversely affected as a result. Readers are encouraged to review Note 1 – 'Nature of business and going concern' to its most recent financial statements.

Retention of key personnel

The Company's performance is substantially dependent on the performance of its executive officers and key employees. The loss of the services of any of the Company's executive officers or other key employees could significantly harm its business. Memex does not currently have a formal succession program or management training program in place for succession or training of management.

Competition

The Company is engaged in an industry that is highly competitive, evolving and is characterized by technological change. As a result, it is difficult for it to predict whether, when and by whom new competing technologies or new competitors may enter the market. Some of these

current and potential competitors are much larger than the Company with access to significant resources it cannot currently match. The Company cannot assure that it will be able to compete effectively against current and future competitors. In addition, competition or other competitive pressures may result in price reductions, reduced margins or loss of market share, any of which could have a material adverse effect on the Company's business, financial condition or results of operations.

Protection of intellectual property

The Company's commercial success depends to a significant degree upon its ability to continue to develop and improve its core product software, MERLIN, and to maintain the associated hardware technologies and products that support this software. Despite its efforts to protect and maintain security around the Company's Intellectual Property ("IP"), competitors and other third parties may be able to design around or develop products similar to those of Memex.

A number of the Company's competitors and other third parties have been issued patents, or may have filed patent applications, or may obtain additional patents or other IP rights for technologies similar to those that the Company has developed, or may develop, use or commercialize, in the future. As certain patent applications in the United States and other countries are maintained in secrecy for a period of time after filing, and as publication or public awareness of new technologies often lags behind actual discoveries, the Company cannot be certain that it has been the first to develop the technology. Further, prosecution and protection of the rights sought in patent applications and patents can be costly and uncertain, often involve complex legal and factual issues and consume significant time and resources.

In addition, while the Company generally enters into confidentiality and non-disclosure agreements with its employees, consultants, contract manufacturers, distributors and dealers and with others to attempt to limit access to and distribution of its proprietary and confidential information, it is possible that:

- misappropriation of its proprietary and confidential information, including technology, will nevertheless occur;
- its confidentiality agreements will not be honored or may be rendered unenforceable;
- third parties will independently develop equivalent, superior or competitive technology or products;
- disputes will arise with its current or future strategic licensees, customers or others concerning the ownership, validity, enforceability, use, patentability or registerability of IP; or
- unauthorized disclosure of its know-how, trade secrets or other proprietary or confidential information will occur.

The Company cannot assure that it will be successful in protecting, maintaining or enforcing its IP rights. If it is not successful in protecting, maintaining or enforcing its IP rights, then the Company's business, operating results and financial condition could be materially adversely affected.

Intellectual property of others

The Company's commercial success depends, in part, upon it not infringing or violating IP rights owned by others. The industry in which the Company competes has many participants that own, or claim to own, IP. The Company cannot determine with certainty whether any existing third-party patents, or the issuance of any new third-party patents, would require it to alter its technologies or products, obtain licenses or cease certain activities, including the sale of its core product.

The Company may in the future receive claims from third parties asserting infringement and other related claims. Litigation may be necessary to determine the scope, enforceability and validity of third-party IP rights or to protect, maintain and enforce the Company's IP rights. Some of the Company's competitors have, or are affiliated with companies having, substantially greater resources than it has, and these competitors may be able to sustain the costs of complex IP litigation to a greater degree and for longer periods of time than the Company can. Regardless of whether claims that it is infringing or violating patents or other IP rights have any merit, those claims could adversely affect the Company's relationships with current or future distributors and dealers of its products, adversely affect its reputation with customers, be time-consuming and expensive to evaluate and defend, cause product shipment delays or stoppages, divert management's attention and resources, subject the Company to significant liabilities and damages, require it to enter into royalty or licensing agreements or require it to cease certain activities, including the sale of products.

If it is determined that the Company has infringed, violated or is infringing or violating a patent or the IP right of any other person or if it is found liable in respect of any other related claim, then, in addition to being liable for potentially substantial damages, the Company may be prohibited from developing, using, distributing, selling or commercializing certain of its technologies or applications unless it obtains a license from the holder of the patent or other IP right. The Company cannot assure that it will be able to obtain any such license on a timely basis or on commercially favorable terms, or that any such licenses will be available, or that workarounds will be feasible and cost-efficient. If it does not obtain such a license or find a cost-efficient workaround, the Company's business, operating results and financial condition could be materially adversely affected and it could be required to cease related business operations in some markets and restructure its business to focus on its continuing operations in other markets.

Information technology systems and security

The Company utilizes many information technology systems for the management of its business. The reliability and security of these systems

is critical. If the functionality of these systems is interrupted or fails and cannot be restored quickly, or if the technologies are no longer supported, the Company's ability to conduct its business could be compromised. Further, although the technology systems the Company utilizes are intended to be secure, there is a risk that an unauthorized third party could access the systems. Such a security breach could lead to adverse consequences, including but not limited to, the unavailability, disruption or loss of key functionalities within the Company's control systems and the unauthorized disclosure, corruption or loss of sensitive company, customer or personal information. The Company attempts to prevent such breaches through the implementation of various technology security measures, engaging skilled consultants and employees to manage the Company's technology applications and improve policies and procedures. There is no guarantee that these measures will be effective.

Failure to manage growth

The Company's failure to manage its growth successfully may adversely impact its operating results. The Company's ability to manage growth will require it to continue to build its operational, financial and management controls, human resource policies, and reporting systems and procedures. The Company's ability to manage its growth will also depend in large part upon a number of factors, including the ability for it to rapidly expand its internal, operational and financial controls significantly so that it can maintain control over operations, attract and retain qualified technical personnel in order to continue to develop its core product ensuring that it continues to respond to evolving customer needs, build a sales team to keep customers and channel partners informed regarding the technical features issues and key selling points of its products and services, develop support capacity for customers as sales increase, and build a channel network to create an expanding presence in the evolving marketplace for its products and services.

An inability to achieve any of these objectives could harm the business, financial condition and results of operations of the Company.

Litigation

Although there are currently no legal proceedings outstanding or, to the best of the knowledge of the Company, contemplated against it, the Company may become party to litigation from time to time in the ordinary course of business which could adversely affect its business.

Sales forecasting

The Company's revenues are difficult to forecast and, as a result, its quarterly operating results can fluctuate substantially. The Company has developed a pipeline approach to anticipate when revenue will occur, but these estimates can be significantly impacted by the sales process, economic conditions in general or specific in the Company's target markets, and the order cycle of its customers.

Foreign exchange

The presentation currency of the Company is the Canadian dollar. The Company does business and sells primarily into foreign markets, primarily the United States of America, with virtually all of its sales and most of its sales and marketing spending taking place in US dollars. The Company does not currently participate in hedging activities. Although it cannot predict the effect of possible foreign exchange losses in the future, if they occurred, then they could have a material adverse effect on the Company's business, results of operation, and financial condition. In addition, fluctuations in exchange rates could affect the pricing of its products and negatively influence customer demand.

RISKS RELATED TO AN INVESTMENT IN COMMON SHARES OF THE COMPANY

Concentration of Voting Power

Many common shares of the Company are concentrated in the hands of the Company's Senior Management team and its Board of Directors, whose collective holdings currently total 14.3%. As a result, these shareholders may have a significant influence over any matters requiring shareholder approval, including the election of directors and significant corporate transactions such as a business combination, takeover proposal or other sale of the Company or its assets, for the foreseeable future.

Dilution and Future Sales of Common Shares

The Company may issue additional common shares in the future, which may dilute a shareholder's holding in the Company. The Company's articles permit the issuance of an unlimited number of common shares, and shareholders will have no pre-emptive rights in connection with such further issuances. The directors of the Company have the discretion to determine if an issuance of common shares is warranted, the price at which such issuance is affected and the other terms of issue of common shares. Also, additional common shares of the Company may be issued by the Company upon the exercise of options to acquire common shares under the Company's Stock Option Plan or Warrants to purchase common shares which are currently outstanding, which will result in further dilution to the shareholders of the Company.

Unpredictability and Volatility of the Common Share Price

There can be no assurance that a significant public market for the common shares of the Company will develop or be sustained. The current trading price of the common shares of the Company or the price at which the common shares have been issued in connection with the private placements may not be indicative of the market price of the common shares of the Company in the future. If an active public market for the common shares of the Company does not develop or is not maintained, the liquidity of an investment in such common shares may be limited, the market price could be subject to significant fluctuations and the price per share may decline below the deemed price of the common shares

of the Company exchanged in connection with the Qualifying Transaction.

The market price of the common shares of the Company could also fluctuate significantly as a result of many factors, including but not limited to the following: economic and stock market conditions generally, and specifically as they may impact participants in the software development industry; the Company's earnings and results of operations and other developments affecting the Company's business; sales of common shares of the Company into the market by the shareholders and/or the insiders of the Company; changes in financial estimates and recommendations by securities analysts following the common shares of the Company; earnings and other announcements by, and changes in market evaluations of, the software development industry; changes in business or regulatory conditions affecting participants in the software development industry; trading volume in the common shares of the Company; additions or departures of key personnel; and competitive pricing pressures in the software development industry.

In addition, the financial markets have experienced significant price and volume fluctuations that have particularly affected the market prices of equity securities of companies and that have often been unrelated to the operating performance of such companies. Accordingly, the market price of the common shares of the Company may decline even if the Company's operating results or prospects have not changed.

Dividends

If the Company generates earnings in the foreseeable future, it expects that such earnings will be retained to finance growth, both organically and by acquisitions, if any, and, when appropriate, repay debt. The directors of the Company will determine if and when dividends should be declared and paid in the future based on the Company's financial position at the relevant time. Each of the common shares of the Company entitles its holder to an equal share in any dividend declared and paid by the Company. The Company does not expect to pay any dividends in the foreseeable future. Investors seeking cash dividends should not purchase common shares of the Company.

Financial Market Turmoil

Global financial market and economic conditions can pose a significant threat to economic growth in almost all sectors and economies, causing a decline in consumer and business confidence, a reduction in credit availability and a dampening in business and household spending.

Economic Downturn in the Global Economy

At times when there is a downturn in the global economy, the Company and its industry peers may have restricted access to capital and may suffer from increased borrowing costs. The lending capacity of all financial institutions may be diminished, and risk premiums may increase. As the ability of the Company to meet future capital requirements may depend upon its ability to borrow money from third parties or make additional offerings of securities in the future, the ability of the Company to do so may be limited by, among other factors, the overall state of capital markets and investor demand for investments in the technology industry, more precisely in the software development industry and the Company's securities in particular.

To the extent that external sources of capital become limited or unavailable or only available on onerous terms, the ability of the Company to make capital investments and maintain existing assets may be impaired, and its assets, liabilities, business, financial condition and results of operations may be materially and adversely affected as a result. Failure to obtain any financing necessary for the growth plans of the Company may result in a delay in carrying out its business strategy.

Economic conditions and other factors may also reduce the demand for software products or services from that forecasted and factors expected to support or increase demand may not have the effect expected. Any reduction in demand may have a material adverse effect on the financial results or condition of the Company.

FORWARD-LOOKING STATEMENTS

This MD&A may contain certain "forward-looking statements" and certain "forward-looking information" as defined under applicable Canadian securities laws. Forward-looking statements and information can generally be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "estimate," "anticipate," "believe," "continue," "plans" or similar terminology. Forward looking statements and information are subject to various known and unknown risks and uncertainties, many of which are beyond the ability of the Company to control or predict, that may cause the Company's actual results, performance or achievements to be materially different from those expressed or implied thereby, and are developed based on assumptions about such risks, uncertainties and other factors. While Memex anticipates that subsequent events and developments may cause its views to change, the Company undertakes no obligation to update forward-looking information except as required by applicable law. Such forward-looking information represents Management's best judgment based on information currently available. No forward-looking statement can be guaranteed, and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
