

## **ASX Announcement**

1 April 2003

### **Southland Colliery Production Update**

---

Gympie Gold's 90%-owned Southland Colliery produced 225,000 run-of-mine tonnes during March, which is a monthly production record for the operation. The colliery has consistently produced about 50,000 tonnes per week for the past five weeks.

This above-budget performance reflects the new operational regime and a return to good mining conditions since the longwall unit was re-positioned back on the seam floor on 10 February 2003.
