Rouyn-Noranda, Québec, March 20th, 2018 : Pershimex Resources Corporation (formerly Khalkos Exploration inc.) (« **Pershimex** » or the « **Company** ») (TSX VENTURE: PRO) is pleased to announce the second round results of its 2017 drill campaign on the Courville property. All holes intersected the expected gold mineralization with positive grades and thicknesses similar to historical drill datas.

The 2017 campaign, of approximately 5,000 m, has extended the mineralized zone to nearly 900 m long and to a depth of more than 150 m. The gold mineralization is manifested as pyrite veinlets intersecting an altered porphyritic intrusive. Drilling intersected continuous gold values averaging more than 100 m in thickness (see Table 1). As a result of drilling, the footprint of the Rolartic deposit was extended by more than 400 m (see Figure 1).

Robert Gagnon, President and Chief Executive Officer stated: *« This first campaign on the recently acquired Courville project by Pershimex highlights the development potential of the Rolartic deposit. With only 5,000 m of drilling, the Pershimex technical team has managed to significantly increase the size of the deposit. We are very encouraged by these first results which confirm the importance of continuing development of the Courville project. »*

It should be noted that a bulk sample taken in 2005 from the Rolartic showing yielded 14,000 tonnes of ore at an average grade of 1.90 g/t Au. The mineralized zone remains open in lateral extension and at depth.

Following an analytical quality assurance and control program, blank samples and certified reference materials were added to the core samples before being shipped and analyzed by ALS Chemex of Val-d'Or, Quebec, following the pyro-analysis method. This press release was prepared by Robert Gagnon, Professional Geologist, President of Pershimex Resources, and Qualified Person under NI-43-101.

Pershimex Resources Corporation– Short overview

- Holds more than 800 claims in the Abitibi-Témiscamingue
- Drilling underway with their partner Dundee Precious Metals on the Malartic property
- Partner with Chalice Gold Mines on the Forsan property
