

Financial reporting responsibility of management

The accompanying consolidated financial statements of DATA Communications Management Corp. ("DCM") have been prepared by management and approved by the Board of Directors of DCM. Management of DCM is responsible for the preparation and presentation of the consolidated financial statements and all the financial information contained within this Annual Report within reasonable limits of materiality. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). In the preparation of the consolidated financial statements, estimates are sometimes necessary because a precise determination of certain assets and liabilities is dependent on future events. Management believes such estimates have been based on available information and careful judgements and have been properly reflected in the accompanying consolidated financial statements. The financial information throughout the text of this Annual Report is consistent with that in the consolidated financial statements.

To assist management in discharging these responsibilities, DCM maintains a system of internal controls which are designed to provide reasonable assurance that DCM's consolidated assets are safeguarded, that transactions are executed in accordance with management's authorization and that the financial records form a reliable base for the preparation of accurate and timely financial information.

Management recognizes its responsibilities for conducting DCM's affairs in compliance with established financial standards and applicable laws, and for the maintenance of proper standards of conduct in its activities.

PricewaterhouseCoopers LLP are appointed by the shareholders and have audited the consolidated financial statements of DCM in accordance with Canadian generally accepted auditing standards. Their report outlines the nature of their audit and expresses their opinion on the consolidated financial statements of DCM.

The Board of Directors has appointed an Audit Committee composed of three directors who are not members of management of DCM. The Audit Committee meets periodically with management and the auditors to discuss internal controls over the financial reporting process, auditing matters and financial reporting issues. It is responsible for reviewing DCM's annual and interim consolidated financial statements and the report of the auditors. The Audit Committee reports the results of such reviews to the Board of Directors and makes recommendations with respect to the appointment of DCM's auditors. In addition, the Board of Directors may refer to the Audit Committee other matters and questions relating to the financial position of DCM.

The Board of Directors are responsible for ensuring that management fulfills its responsibilities for financial reporting, and are responsible for approving the consolidated financial statements of DCM.

Independent auditor's report

To the Shareholders of DATA Communications Management Corp.

Our opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of DATA Communications Management Corp. and its subsidiaries (together, the Company) as at December 31, 2023 and 2022, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards).

What we have audited

The Company's consolidated financial statements comprise:

- the consolidated statements of financial position as at December 31, 2023 and 2022;
- the consolidated statements of operations for the years then ended;
- the consolidated statements of comprehensive (loss) income for the years then ended;
- the consolidated statements of changes in shareholders' equity for the years then ended;
- the consolidated statements of cash flows for the years then ended; and
- the notes to the consolidated financial statements, comprising material accounting policy information and other explanatory information.

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2023. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
Valuation of property, plant and equipment and assets held for sale acquired in the Moore Canada Corporation (MCC) business acquisition <i>Refer to note 2 – Material accounting policies, note 4 – Business acquisition, note 7 – Property, plant and equipment and note 20 – Assets held for sale to the consolidated financial statements.</i> In April 2023, the Company acquired MCC for total cash consideration of \$135.7 million. The fair value of the identifiable assets acquired included \$41.4 million related to properties (including \$25.8 million classified as assets held for sale, which was the subject of a sale and leaseback agreement) and \$26.1 million related to presses and printing equipment, office furniture and equipment, and leasehold improvements (together plant and equipment). Management applied significant judgment in estimating the fair values of the acquired properties, plant and equipment. The fair value of the properties acquired was estimated with the assistance of a third-party appraiser (management's property expert) using a combination of the income (direct capitalization) method and market (direct comparison) method. Significant assumptions related to the direct comparison method included the sales values of comparable properties, and subsequent sale and leaseback transactions (including market rental rates and incremental borrowing rates). Significant assumptions related to the direct capitalization	Our approach to addressing the matter included the following procedures, among others: • Read the purchase agreement and sale and leaseback agreement to understand the terms and conditions of the acquisition agreement and sale and leaseback transaction. • Tested how management determined the fair values of the properties, plant and equipment on a sample basis, which included the following: – Evaluating the work of management and management's experts with the assistance of professionals with specialized skill and knowledge in the field of real estate and equipment valuations, which included: - o assessing the qualifications, competence, capabilities and objectivity of management's experts; - o understanding the work performed by management's experts and evaluating the appropriateness of the work as audit evidence; - o checking the mathematical accuracy of management's experts' valuation analyses; - o assessing the appropriateness of the valuation methods used; - o testing the underlying data used in the appraisals;

Key audit matter	How our audit addressed the key audit matter
approach included capitalization rates and comparable market rental rates. The fair value of the plant and equipment acquired was estimated with the assistance of a third-party appraiser (management's plant and equipment expert) using a combination of the market and cost (direct and indirect) approaches. Significant assumptions related to the cost approach included inflation adjustments, replacement cost new, physical depreciation, useful lives and functional obsolescence. Significant assumptions related to the market approach included resale values. We considered this a key audit matter due to (i) the magnitude of the acquired property, plant and equipment and assets held for sale; (ii) the significant judgment used by management, including the use of management's property expert and management's plant and equipment expert (together, management's experts), when determining the fair values of the properties, plant and equipment acquired; and (iii) the high degree of auditor judgment, subjectivity and effort in performing procedures to evaluate the reasonableness of management's significant assumptions. Professionals with specialized skill and knowledge in the field of real estate and equipment valuations assisted us in performing our procedures.	- o benchmarking capitalization rates, comparable market rental rates, sales values of comparable properties and incremental borrowing rates with external market data; - o developing an independent range of value expectations for the plant and equipment based on external market data for inflation adjustments, replacement cost new, physical depreciation, useful lives, functional obsolescence and resale values; and - o compared the independent range of value expectations for the plant and equipment to management's estimate to evaluate the reasonableness of management's estimate. • Tested management's reconciliation of the equipment assets to the MCC property, plant and equipment asset subledger. • Assessed the disclosures in the consolidated financial statements in relation to the valuation of the properties, plant and equipment acquired in the MCC business combination.
Goodwill impairment assessment <i>Refer to note 2 – Material accounting policies and note 10 – Goodwill to the consolidated financial statements.</i> The carrying value of the Company's goodwill was \$22.3 million as at December 31, 2023. The Company has a single operating segment being the	Our approach to addressing the matter included the following procedures, among others: • Evaluated how management determined the level at which goodwill is monitored for impairment by considering the Company's internal organizational structure and management reporting.

Key audit matter

Company as a whole, which is the level at which goodwill is monitored for internal management purposes reflecting the way the Company manages its operations.

Management performs a goodwill impairment assessment annually at the end of each fiscal year or more frequently if events or changes in circumstances indicate that the carrying value of goodwill may be impaired. Impairment is determined by assessing if the carrying value of the Company exceeds its recoverable amount. The recoverable amount of the Company was determined based on its estimated fair value less cost of disposal using a discounted cash flow model.

Management applied considerable judgment in estimating the recoverable amount of the Company, which included the use of significant assumptions relating to revenue growth rates, gross margins and the discount rate. Management concluded that there was no impairment of the Company's goodwill carrying value as at December 31, 2023.

We considered this a key audit matter due to the magnitude of the goodwill balance and the considerable judgment by management in estimating the recoverable amount of the Company. This led to a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating management's significant assumptions. Professionals with specialized skill and knowledge in the field of valuation assisted us in performing our procedures.

How our audit addressed the key audit matter

- Evaluated how management determined the recoverable amount of the Company, which included the following:
 - Tested the mathematical accuracy of the discounted cash flow model.
 - Tested the underlying data used in the discounted cash flow model.
 - Evaluated the reasonableness of significant assumptions used by management related to revenue growth rates and gross margins by considering (i) the current and past performance of the Company; (ii) the consistency with external industry data; and (iii) whether these assumptions were consistent with evidence obtained in other areas of the audit.
 - Professionals with specialized skill and knowledge in the field of valuation assisted in evaluating the appropriateness of management's discounted cash flow model and in testing the reasonableness of the discount rate used by management.
- Assessed the disclosures in the consolidated financial statements, including management's sensitivity disclosures on significant assumptions related to revenue growth rates, gross margins and the discount rate.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis and the information in the annual report, other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or

regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Simon Kent.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

1 General information and basis of preparation

DATA Communications Management Corp ("DCM" or the "Company") is a marketing and business communications partner that helps companies simplify the complex ways they communicate and operate so they can accomplish more with fewer steps and less effort. For over 60 years, DCM has been serving major brands in vertical markets, including financial services, retail, healthcare, energy, other regulated industries, and the public sector. On April 24, 2023, DCM completed the acquisition of Moore Canada Corporation ("MCC") (see note 4 for further details).

These financial statements have been prepared using International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards") applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they become due. The Company's ability to continue as a going concern is dependent upon management's ability to meet forecast revenue and profitability targets for at least the next twelve months in order to comply with its financial covenants on its credit facilities or to obtain financial covenant waivers from its lenders if necessary. While estimated forecast compliance with financial covenants is sensitive to key assumptions used for forecast revenues, gross margins and expenses (which in turn impact earnings before interest, income taxes, depreciation and amortization (EBITDA)), management is satisfied that the Company's forecasts and projections through to March 31, 2025, taking account of reasonably possible changes in results and other uncertainties will not result in any breach of the financial covenants on its credit facilities. For this reason, management continues to believe that there is no material uncertainty regarding the ability of the Company to continue as a going concern.

The common shares of DCM are listed on the Toronto Stock Exchange ("TSX") under the symbol "DCM" and on OTC Markets Group ("OTCQX") under the symbol "DCMDF". The address of the registered office of DCM is 9195 Torbram Road, Brampton, Ontario. These consolidated financial statements were approved by the Board of Directors ("Board") of DCM, on March 20, 2024.

2 Material accounting policies

The material accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements.

BASIS OF MEASUREMENT

The consolidated financial statements have been prepared under the historical cost convention, except for the revaluation of certain financial assets, financial liabilities and employee future benefits to fair value (notes 3, 15, 16 and 17).

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, DCM takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of IFRS 2 *Share based-payments*, IFRS 16 *Leases* (as IFRS 7 does not require fair value disclosures for lease liabilities), and measurements that have some similarities to fair value but are not fair value, such as net realizable value in IAS 2 *Inventories* or value in use in IAS 36 *Impairment of assets*.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

- Level 2 inputs are inputs, other than quoted prices included within Level 1; that are observable for the asset or liability; either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of DCM and its subsidiaries. All intercompany transactions, balances and unrealized gains and losses from intercompany transactions are eliminated upon consolidation.

i. Subsidiaries

Subsidiaries are all entities (including structured entities) over which DCM has control. Control exists when DCM is exposed to, or has the rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date which control is obtained. They are unconsolidated from the date that control ceases. DCM has two wholly owned subsidiaries, being MCC and Data Communications Management (US) Corp. ("DCM USA").

ii. Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

iii. Disposal of subsidiaries

When DCM ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive loss in respect of that entity are accounted for as if DCM had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income (loss) are reclassified to the statement of operations.

BUSINESS COMBINATIONS

Business combinations are accounted for using the acquisition method, and their operating results are included in the consolidated financial statements as of the acquisition date. The consideration transferred is the total fair value of the assets transferred, equity instruments issued, liabilities incurred to the former owners of the acquired business and contingent considerations on the acquisition date in exchange for control of the acquired entity. The excess of the consideration transferred over the fair value of the identifiable assets acquired and liabilities assumed is recognized as goodwill. The transaction costs attributable to the acquisition are recognized in the statement of operations when they are incurred.

If the agreement includes a contingent consideration, it is measured at fair value as of the acquisition date and added to the consideration transferred, and a liability for the same amount is recognized. Any subsequent change to the fair value of the contingent consideration will be recognized in the statement of operations.

If the initial recognition of the business combination is incomplete when the financial statements are issued for the period during which the acquisition occurred, DCM records a provisional amount for the items for which measurement is incomplete. Adjustments to the original recognition of the business combination will be recorded as an adjustment to the assets acquired and liabilities assumed during the measurement period, and the adjustments must be applied retroactively. The measurement period is the period from the acquisition date to the date on which DCM has received complete information on the facts and circumstances that existed as of the acquisition date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

If a business combination is achieved in stages, DCM reassesses the share it held previously in the acquiree at fair value at the acquisition date and includes the gain or loss resulting, if any, to the statement of operations.

In the case of a business combination of less than 100%, a non-controlling interest is measured, either at fair value or at the non-controlling interest's share of the net identifiable assets of the acquiree. The basis of measurement is determined on a transaction-by-transaction basis.

FOREIGN CURRENCY TRANSLATION

Items included in the financial statements of each entity within DCM are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). These consolidated financial statements are presented in Canadian dollars, which is DCM's functional currency. The functional currency of DCM's United States operations is U.S. dollars.

Monetary assets and liabilities denominated in foreign currencies are translated into each entity's functional currency at rates of exchange in effect at the statement of financial position date. Revenues and expenses denominated in foreign currencies are translated into each entity's functional currency at rates prevailing on the transaction dates. Gains and losses resulting from the translation of monetary assets and liabilities denominated in currencies other than each entity's functional currency are included in the determination of income for the year.

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisitions, are translated to Canadian dollars at exchange rates at the reporting date. The income and expenses of foreign operations are translated to Canadian dollars at the average exchange rate during the period. Foreign currency differences are recognized in other comprehensive income (loss) in the foreign currency translation reserve account.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand, deposits held with banks and bank overdraft and highly liquid short-term interest-bearing securities with maturities of three months or less at the date of purchase.

TRADE RECEIVABLES

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 days and are therefore all classified as current. Trade receivables are recognized initially at the amount of consideration that is unconditional unless they contain significant financing components when they are recognized at fair value. DCM holds trade receivables with the objective of collecting the contractual cashflows and therefore measures them subsequently at amortized cost using the effective interest method, less loss allowance. See note 23 for a description of the Company's impairment policies and the calculation of the loss allowance.

INVENTORIES

Raw materials inventories, base stock finished goods and work-in-progress are recorded at the lower of cost and net realizable value. Raw materials are recorded at standard cost. The cost of finished goods and work-in-process are determined using the first-in, first-out method. Inventory manufactured includes the cost of materials, labour and production overheads (based on normal operating capacity), including applicable depreciation on property, plant and equipment. Net realizable value is the estimated selling price less cost to complete and applicable selling expenses.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are recorded at cost less accumulated depreciation and impairments. Costs include expenditures that are directly attributable to the acquisition of the asset. Subsequent costs are included in the asset's carrying value or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to DCM and the cost can be measured reliably. The carrying value of a

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

replaced asset is derecognized when replaced. Maintenance and repairs are expensed as incurred. Property, plant and equipment are depreciated from the point at which the asset is ready for use. Depreciation is computed using the methods and rates based on the estimated useful lives of the property, plant and equipment as outlined below:

	Basis	Rate
Leasehold improvements	straight-line	Shorter of life or lease term
Office furniture and equipment	straight-line	5 years
Presses and printing equipment	straight-line	3 to 10 years
Computer hardware	straight-line	2 to 5 years
Vehicles	straight-line	3 years

DCM allocates the amount initially recognized with respect to an item of property, plant, and equipment to its significant parts and depreciates each such part separately. Residual values, the method of depreciation and the useful lives of the assets are reviewed annually and adjusted if appropriate.

Gains and losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amount of the asset and are included in general and administration expenses in the statement of operations.

INTANGIBLE ASSETS

Separately acquired intangible assets are initially measured at cost. Customer relationships, trade names, trademarks and non-compete agreements acquired in a business combination are recognized at fair value at the acquisition date, which is their deemed cost. Where these assets have a finite life, they are subsequently carried at cost less accumulated amortization and impairment losses.

Research costs are recognized as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by DCM are recognized as intangible assets when the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use
- management intends to complete the software and use or sell it
- there is an ability to use or sell the software
- it can be demonstrated how the software will generate probable future economic benefits
- adequate technical, financial and other resources to complete the development and to use or sell the software are available, and
- the expenditure attributable to the software during its development can be reliably measured.

Certain configuration and customization activities undertaken in implementing a cloud computing arrangement may give rise to a separate asset in limited circumstances where DCM controls the intellectual property of the underlying software code (e.g. the development of bridging modules to existing on-premise systems or bespoke additional software capability). In all other instances, configuration and customization costs are expensed as incurred. Directly attributable costs that are capitalized as part of the software include employee costs and an appropriate portion of relevant overheads. Capitalized development costs are recorded as intangible assets and amortized from the point at which the asset is ready for use.

Management's judgment is required to determine the useful lives of intangible assets, including reviewing the length of customer relationships and other factors. These finite life assets are amortized over their estimated useful lives, as outlined below.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

	Basis	Rate
Customer relationships	straight-line	1.5 to 12 years
Software and technology	straight-line	1 to 7 years
Trademarks, trade names and non-compete agreements	straight-line	2 to 10 years

Residual values, the method of amortization and the useful lives of the assets are reviewed annually and adjusted if appropriate.

GOODWILL

Goodwill represents the excess of the aggregate of consideration transferred in a business combination and the non-controlling interest in the acquired business over the fair value of net identifiable assets and liabilities acquired. Adjustments to fair value assessments are recorded to goodwill over the measurement period, not exceeding one year from the date of acquisition. Goodwill is allocated to the cash generating unit ("CGU") or a group of CGUs to which it relates. A CGU is an identifiable group of assets that are largely independent of the cash flows from other assets or group of assets, which is not higher than an operating segment.

Goodwill is not amortized but is evaluated for impairment annually or more frequently if events or changes in circumstances indicate there may be impairment. Impairment is determined for goodwill by assessing if the carrying value of a cash generating unit, including the allocated goodwill, exceeds its recoverable amount, determined as the greater of the estimated fair value less costs to sell or the value in use. Impairment losses recognized in respect of a CGU are first allocated to the carrying value of goodwill and any excess is allocated to the carrying amount of assets in the CGU. Any goodwill impairment is charged to the consolidated statement of operations in the period in which the impairment is identified. Impairment losses on goodwill are not subsequently reversed.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Goodwill and indefinite life intangible assets are not subject to amortization and are tested annually for impairment or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets (property, plant and equipment, right-of-use assets and definite life intangible assets) are tested for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable. For the purpose of measuring recoverable amounts, assets are grouped at the lowest levels for which there are separately identifiable cash flows (CGUs). The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use (being the present value of the expected future cash flows of the relevant asset or CGU). The projections of future cash flows take into account the relevant operating plans and management's best estimate of the most probable set of conditions anticipated to prevail, including a number of estimates and assumptions such as projected revenue growth rates, gross margin and discount rates.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment losses are recorded as impairment provisions within accumulated depreciation for depreciable assets. DCM evaluates impairment losses, other than goodwill impairment, for potential reversals when events or circumstances warrant such consideration. Where an impairment loss subsequently reverses the carrying amount of the asset or CGU is increased to the lesser of the revised estimate of recoverable amount and the carrying amount that would have been recorded had no impairment loss been recognized previously.

TRADE PAYABLES AND ACCRUED LIABILITIES

The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognized initially at their fair value and subsequently measured at amortized cost using the effective interest method.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

BORROWINGS

Borrowings are initially recognized at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognized in the consolidated statement of operations over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in the consolidated statement of operations as other income or finance costs.

Borrowings are classified as current liabilities unless DCM has an unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

SHARE-BASED COMPENSATION

DCM has share-based compensation plans as part of DCM's long-term incentive plan, as described in note 17. All transactions involving share-based payments are recognized as an expense in the statement of operations over the vesting period.

Equity-settled share-based payment transactions, such as stock option awards, are measured at the grant date at the fair value of employee services received in exchange for the grant of options or share awards and, for non-employee transactions, at the fair value of the goods or services received at the date on which the entity recognizes the goods or services. The total amount of the expense recognized in the statement of operations is determined by reference to the fair value of the share awards or options granted, which factors in the number of options expected to vest. Equity-settled share-based payment transactions are not remeasured once the grant date fair value has been determined.

Cash-settled share-based payment transactions are measured at the fair value of the liability. The liability is remeasured at each reporting date and at the date of settlement, with changes in fair value recognized in the statement of operations.

EMPLOYEE BENEFITS

DCM maintains a hybrid defined benefit and defined contribution pension plan (the "DATA Communications Management Pension Plan") and a defined benefit plan (the "Moore Canada Corporation Pension Plan") for some of its employees. Defined benefit pension benefits are primarily based on years of service, compensation and accrued contributions with investment earnings. DCM's funding policy is to fund the annual amount required to meet or exceed the minimum statutory requirements. Actuarial valuations are required to be completed every three years.

DCM also contributes to a multi-employer defined benefit plan, the Québec Graphic Communication Pension Plan (the "GCPP") for certain employees at its Drummondville plant in Québec and a number of Unifor Local 591G union administered defined benefit employee pension and non-pension benefit plans for the unionized hourly employees of its Thistle division and Tristar division ("Unifor Pension & Benefit Plans"). The GCPP and Unifor Pension & Benefit Plans provide post-employment benefits to unionized employees in the printing industry jointly-trusted by representatives of the employers and the unions. DCM's obligation to the GCPP and Unifor Pension & Benefit Plans are limited to the amounts agreed to in the respective collective bargaining agreements of each plan.

Certain former senior executives of a predecessor corporation and certain current and former employees of DCM participate in Supplementary Executive Retirement Plans ("SERPs"). The former executives of a predecessor

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

corporation are provided with pension benefits payable as a single life annuity with a five-year guarantee. In addition, certain current and former employees of MCC, who are members of the Moore Canada Corporation Pension Plan, are provided defined benefits that are in excess of the maximum benefits allowed in accordance with the income tax act of Canada and pension regulations.

DCM also contributes to various Registered Retirement Saving Plan matching plans ("RRSP Matching Plans") which are similar to defined contribution pension plans.

DCM provides non-pension post-employment benefits, including health care and life insurance benefits on retirement to certain former employees, their beneficiaries and covered dependents ("DCM OPEB Plan"). DCM also provides other long-term employee benefit plans including pension, health care and dental care benefits for certain employees on long-term disability ("DCM OPEB LTD Plan"). Similarly, MCC provides other long-term employee benefit plans, including health care and dental care benefits for certain employees on long-term disability ("MCC OPEB LTD Plan"). Together, these plans are collectively referred to as ("OPEB LTD Plans").

(a) Defined contribution pension plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and has no legal or constructive obligation to pay further amounts. Pension benefits for defined contribution formula are based on the accrued contributions with investment earnings. DCM's annual pension expense is based on the amounts contributed in respect of eligible employees when they are due.

(b) Defined benefit pension plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. Pension benefits for the defined benefit formula are generally calculated based on the number of years of service and the maximum average eligible earnings of each employee during any period of five consecutive years. DCM accrues its obligations for the defined benefit provision and related costs, net of plan assets, where applicable. The cost of pensions earned by employees covered by these plans are actuarially determined using the projected unit credit method taking into account management's best estimate of salary escalation, retirement ages and longevity of employees, where applicable. When the calculation results in a benefit to DCM, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements that apply to any plan in DCM. An economic benefit is available to DCM if it is realizable during the life of the plan, or on settlement of the plan liabilities.

Improvements to the pension plans are recognized as past service costs in the period of the plan amendment. Current service costs are expensed in the period that the benefits are accrued. Current service costs, administration costs and past services costs are recognized as period costs in general and administration expenses in the statement of operations. Net interest is calculated by applying the discount rate at the beginning of the period to the net benefit liability or asset and is recognized in finance costs (income) in the statement of operations.

The discount rate used to determine the accrued benefit obligation is determined by reference to yields on high quality corporate bonds and that have terms to maturity approximating the terms of the related pension liability.

Actuarial gains and losses arise from the difference between actual rate of return on plan assets and the discount rate for that period, from changes in actuarial assumptions used to determine the accrued benefit obligation and from changes to accrued benefit obligation resulting from actual experience differing from long-term assumptions used to determine the accrued benefit obligation. Re-measurements, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the actual return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognized in other comprehensive income (loss) in the period in which they occur. Re-measurements recognized in other comprehensive income (loss) are reflected immediately in retained earnings (deficit) and will not be reclassified to the statement of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

The retirement benefit obligation recognized in the statement of financial position represents the actual deficit or surplus in the DCM's defined benefit plans. When the payment in the future of minimum funding requirements related to past service would result in a net defined benefit surplus or an increase in a surplus, the minimum funding requirements are recognized as a liability to the extent that the surplus would not be fully available as a refund or a reduction in future contributions to the plans.

A liability for termination benefits is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring provisions. Termination benefits that require future services are required to be recognized over the periods the future services are provided.

The SERPs are unfunded.

The GCPP and the Unifor Pension & Benefit Plans are negotiated contribution, defined benefit plans, however, the trustees of these plans are not able to provide sufficient information for DCM to account for these plans as a defined benefit plan. Notably, GCPP is a multi-employer plan, while Unifor Pension & Benefit Plans are subject to a union agreement rather than being categorized as a multi-employer plans. DCM has accounted for these plans on a defined contribution basis as DCM does not believe there is sufficient information to recognize participation on a defined benefit basis.

(c) Other post-employment and long-term employee benefit plans

DCM's net obligation in respect of its DCM OPEB Plan is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. The calculation is performed using the projected unit credit method. Any actuarial gains and losses related to non-pension post-employment benefit plans are recognized in other comprehensive loss in the period in which they arise and will not be reclassified to statement of operations.

DCM's net obligation in respect of its OPEB LTD Plans is the actuarial present value of all future projected benefits determined as at the valuation date. Any actuarial gains and losses related to other long-term employee benefit plans are recognized in the statement of operations in the period in which they arise.

The discount rate is the yield at the reporting date on yields on high quality corporate bonds that have maturity dates approximating the terms of DCM's obligations. The DCM OPEB Plan and OPEB LTD Plans are funded on a pay-as-you-go basis.

PROVISIONS

Provisions are liabilities of uncertain timing or amount. A provision is recognized if, as a result of a past event, DCM has a present legal or constructive obligation for which the amount can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are measured at management's best estimate of the expenditure required to settle the obligation. When the effect of discounting is significant, the amount of the provision is determined by discounting the expected cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Provisions are reviewed at each reporting date and any changes to estimates are reflected in the statement of operations. The unwinding of the discount is recognized as a finance cost. A provision for restructuring is recognized when DCM has approved a detailed and formal restructuring plan, and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. Future operating losses associated with plant closures are not provided for.

INCOME TAXES

Income tax expense comprises current and deferred tax. Current income tax and deferred income tax are recognized in the statement of operations except to the extent that it relates to a business combination or items recognized

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

directly in equity or in other comprehensive income (loss), in which case the current and/or deferred tax is also recognized directly in equity or other comprehensive income (loss).

Current income taxes are the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years that are expected to be paid. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. DCM establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. Deferred income tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred income tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and temporary differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred income tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred income tax is measured on a non-discounted basis at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred income tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred income tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized in the foreseeable future.

Deferred income tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity or on different tax entities but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Deferred income tax assets and liabilities are presented as non-current.

LEASES

DCM leases various offices, manufacturing facilities, warehouses and machinery and office equipment. Rental contracts are typically made for fixed periods of 1 to 15 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes. DCM has options to purchase certain manufacturing equipment for a nominal amount or the then fair market value, to extend the term, or to return the equipment at the end of the lease term. The obligations are secured by the lessors' title to the leased asset for such leases. DCM also occasionally enters into sub-leases as an intermediate lessor.

The accounting policies for leases are as follows:

AS A LESSEE

DCM assesses, at the inception of a contract, whether a contract is, or contains, a lease. A lease is a contract in which the right to control the use of an identified asset is granted for an agreed upon period of time in exchange for consideration. DCM assesses whether a contract conveys the right to control the use of an identified asset when there is both the right to direct the use of the asset and obtain substantially all the economic benefits from that use.

At the commencement of a lease contract:

- (i) a lease liability is initially measured at the present value of the non-cancellable lease payments over the lease term and discounted at DCM's incremental borrowing rate, which represents the rate DCM would pay to borrow funds to obtain the underlying asset over a similar term and with similar security. Lease payments include fixed payments and such variable payments that depend on an index or a rate; less any lease incentives receivable. In

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated). The assessment is reviewed if a significant event or a significant change in circumstances occurs which affects this assessment and that is within the control of the lessee.

- (ii) a right-of-use asset ("ROU Asset") is initially measured at cost, which comprises the initial lease liability, lease payments made at or before the lease commencement date, initial direct costs and restoration obligations less lease incentives.

The ROU Asset is depreciated in subsequent periods over the shorter of the asset's useful life and the lease term on a straight-line basis. The lease term includes periods covered by an option to extend if DCM is reasonably certain to exercise that option. The ROU Asset is assessed for impairment in accordance with the requirements of IAS 36 *Impairment of Assets*.

The lease liability is measured in subsequent periods at amortized cost using the effective interest method. Lease payments are allocated between principal and interest cost. The interest cost is charged to the consolidated statement of operations over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability each period. The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in DCM's estimate of the amount expected to be payable under a residual value guarantee, or if DCM changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount of the ROU Asset, with any difference recorded in the consolidated statement of operations. When a lease contract is modified to increase the scope of the lease and the change to the lease payments is commensurate with the stand-alone price for the increased scope the modification is accounted for as a separate lease contract. In all other cases the lease liability is remeasured using a revised discount rate for the remainder of the lease term and the ROU asset is adjusted either downwards in the case of scope decreases to reflect the partial or full termination of the lease (with any gain or loss recognized in the consolidated statement of operations) or upwards by the same adjustment to the lease liability for scope increases.

On a lease by lease basis, DCM also exercises the option available for contracts comprising lease components as well as non-lease components, not to separate these components. Payments to the lessor for variable costs associated with the lease, including variable payments to the lessor related to non-lease components, are not included in the measurement of the lease liability and are expensed as incurred in the consolidated statement of operations.

Extension and termination options exist for DCM's property leases. DCM remeasures the lease liability when there is a change in the assessment of the inclusion of the extension option in the lease term, resulting from a change in facts and circumstances.

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in the consolidated statement of operations. Short-term leases are leases with a lease term of twelve months or less. Low value assets comprise IT equipment and small items of office furniture.

AS AN INTERMEDIATE LESSOR

For sub-leases where DCM is an intermediate lessor, the head lease and sub-lease interest are accounted for separately. DCM assesses the lease classification of a sub-lease as either an operating lease or a finance lease with reference to the ROU Asset arising from the head lease.

GOVERNMENT GRANTS

Grants from the government are recognized at their fair value when there is reasonable assurance that the grant will be received and DCM will comply with all attached conditions. The Company has elected to present government grants related to income as "other income" in the consolidated statement of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

SHARE CAPITAL AND WARRANTS

Common shares and warrants are classified as equity instruments. Incremental costs directly attributable to the issue of common shares and warrants are recognized as a deduction from equity, net of any tax effects.

EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is calculated by dividing net income (loss) by the weighted average number of shares outstanding during the period. Diluted earnings (loss) per share is calculated by adjusting net income (loss) and weighted average number of shares outstanding during the period for the effects of dilutive potential shares, which includes any options granted.

REVENUE RECOGNITION

DCM recognizes revenue when control of the goods or services has been transferred. Revenue is measured at the amount of consideration to which DCM expects to be entitled to, net of incentives given to its customers, including volume-based incentives, price concessions and cash discounts.

The following is a description of the principal activities from which DCM generates its revenue, along with the corresponding revenue recognition accounting policies applied:

- (a) Product sales - DCM manufactures customized products based on specifications pre-approved by its customers. At its customers' request, DCM will also purchase product from third-party vendors and resell that to its customers (including technology-enabled hardware solutions - see (e) below). For products that DCM purchases and resells to its customers, DCM is typically a principal in these arrangements as it is responsible for making key decisions over the purchasing of product and has the economic risks and rewards that are customary with control. Accordingly, third-party product revenue is typically presented on a gross basis in revenue with the corresponding product purchase cost and associated costs recognized in costs of revenue. DCM recognizes revenue when control over the product transfers to the customer, which is effectively transferred upon the completion of production or when a resale product is purchased from a third-party vendor and inducted into DCM's warehouses or shipped directly to customers from third-party vendors due to the custom nature of the product, as it does not have an alternative use to DCM, such that DCM is entitled to payment once the quantity of product pursuant to an individual purchase order is produced or purchased from a third-party vendor and inducted into its warehouses. Given the manufactured products are customized or purchased specifically at the customer's request, product returns are insignificant.

In some instances, DCM's customers obtain the product directly from DCM following the completion of production or directly from third-party vendors. In other instances, DCM's contracts involve the provision of warehousing and shipment services, in addition to manufacturing or purchasing of third-party products. Based on DCM's contractual arrangements with its customers related to product, certain of DCM's contracts with customers include the provision of warehousing, freight and financing services, in addition to manufacturing or purchase from third-parties of customized products based on specifications pre-approved by its customers. For bundled pricing arrangements, DCM allocates the transaction price to each performance obligation based on their relative stand-alone selling prices. Management applied judgment and assumptions in determining the stand-alone selling prices in allocating revenue between the various performance obligations based on non-bundled pricing arrangements and comparable market data, where applicable. DCM stores customized or purchased product at the request of the customer; the product is identifiable as the customer's product; the product is ready for transfer to the customer upon the customer's request; and DCM cannot re-direct the product nor use the product to fulfill another customer's product order under the contract. DCM recognizes product revenues when control has transferred over the product upon product manufacture by DCM or upon receipt of third-party product into DCM's warehouses. Based on the contractual terms with its customers, DCM either issues an invoice when product that is manufactured by DCM or purchased from third-party vendors is inducted into DCM's warehouse, or alternatively, the invoice is issued for some customers when the product is dispatched from its warehouses. In

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

instances where DCM issues an invoice on dispatch of product from its warehouses, rather than at the date of transfer of control, DCM is still entitled to payment for the purchased or manufactured product. Accordingly, revenue is recognized for the product manufactured by DCM or purchased from third parties and a corresponding balance for “unbilled receivables” are recognized within trade receivables in the consolidated statement of financial position. Unbilled receivables are transferred to accounts receivables when the invoices are issued to the customers. Deferred revenue represents amounts that have been invoiced to the customer but not yet recognized as revenue, including advance payments and billings in excess of revenue. Deferred revenue is recognized as revenue when DCM completes the production of product or upon receipt of third-party product in its warehouses or when warehousing and freight services are provided (see (b) and (c) below).

- (b) Warehousing services - DCM provides custodial services to store customer product in its warehouse over a specified agreed upon period of time. For non-bundled pricing arrangements, warehousing revenues are recognized over the period that warehousing services are provided to the customer. For bundled pricing arrangements, DCM allocates a portion of the initial transaction price for warehousing services and recognizes revenue on a straight-line basis over the agreed period of the warehousing as it best represents the pattern of performance. Amounts are typically invoiced as warehousing services are performed in accordance with agreed upon contractual terms at periodic intervals. When DCM receives advance payments or issues billings in excess of revenue, these are recognized as deferred revenue in the statement of financial position. Deferred revenue is recognized as revenue when or as DCM provides custodial services over the agreed upon warehouse term.
- (c) Freight services - DCM has identified it has a distinct performance obligation for the shipment of product for certain contracts where it has an obligation to arrange shipment services where control of the product has been transferred to the customer prior to shipment. DCM frequently contracts with third parties to deliver product. DCM is typically a principal for such shipment services as it is responsible for making key decisions over the shipment arrangements and has the economic risks and rewards associated with such control as a principal. DCM recognizes shipment revenues when the performance of the shipping service has occurred as products are shipped.
- (d) Marketing and other services - Marketing services include fee-for-service marketing strategy, creative and other marketing services fees, and other ancillary services include fees related to financing charges associated with customers where DCM stores customer product in the warehouse over a period of time and invoices the customer when the product is dispatched from DCM's warehouse. Revenue from marketing services is recognized over time as the services are performed. Revenue for other ancillary services is recognized upon completion of the performance obligations to its customers. Financing income is recognized as DCM provides custodial services to its customers over the agreed upon warehouse term.
- (e) Technology-enabled hardware solutions - We procure certain products and services from third-party providers to ensure that our clients' complete business and marketing communications needs are met while providing comprehensive vendor management strategies. Technology-enabled hardware solutions include scanners, printers, tablets, and other technology applications, often with barcoding and RFID functionality, and digital signage applications. Such products typically complement our product sales, and other services, and are sold to clients as part of an integrated offering. Technology-enabled hardware solutions represent a distinct performance obligation (from our product sales and other services), and revenue is recognized when the product is shipped from the vendor or inducted into DCM's warehouse.
- (f) Technology-enabled subscription services and fees - Our technology-enabled subscription services and fees include the provision of marketing technology workflow applications and digital asset management (“DAM”) solutions, software subscription fees, managed technology services, program management services, professional services fees, content management fees, and implementation and development fees. Typically, these services and fees are contracted on either a project basis in the case of professional services, implementation, and development services fees or for periods of three to five-year terms, with one to two-year renewal options in the case of software subscription fees and managed technology services. Revenue is measured based on the consideration DCM expects to be entitled to in exchange for providing services as they are delivered, or ratably over the term of the contract, and represent a distinct performance obligation.

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

VARIABLE CONSIDERATION

Some contracts with customers provide volume-based incentives specific to product sales. In addition, price concessions (adjustments to the amount charged to a customer made outside of the initial contract terms) are sometimes provided to customers if there are billing disputes or customers have experienced some level of dissatisfaction in order to encourage customers to pay for previous purchases and continue making future purchases. Such incentive offerings and price concessions give rise to variable consideration and are required to be estimated at contract inception by using either the expected value or the most likely amount, depending on which method better predicts the amount of consideration to which the customer will be entitled. The estimates are based on various assumptions, including past experience with customers and other relevant factors. DCM uses the most likely amount when determining the expected amount of volume-based incentives and price concessions it will give to its customers and records these as a reduction to revenue in the consolidated statement of operations. DCM reduces the transaction price for any price concessions expected to be provided to customers, as revenue can only be recognized to the extent that it is highly probable that a significant reversal in the amount of revenue will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

CONTRACT COSTS

Contract costs represent incremental costs incurred, such as sales commissions for sales made to certain customers. Contract costs are deferred and included within prepaid expenses and other assets for contracts expected to be delivered after more than one year and then amortized over their estimated useful lives. Contract costs are carried at cost less accumulated amortization. For the years ended December 31, 2023 and 2022, DCM did not have any significant contract cost balances or transactions.

FINANCIAL INSTRUMENTS**CLASSIFICATION AND MEASUREMENT**

Financial assets are classified and measured based on these categories: amortized cost, fair value through other comprehensive income ("FVTOCI"), and fair value through profit and loss ("FVTPL").

Financial liabilities are classified and measured based on two categories: amortized cost or FVTPL. Derivatives embedded in contracts where the host is a financial asset in the scope of the standard are not separated, but the hybrid financial instrument as a whole is assessed for classification. DCM currently has no derivatives.

Financial assets and liabilities at FVTPL: A financial asset or liability is classified in this category if acquired principally for the purpose of selling or repurchasing in the short-term. Derivatives are also included in this category unless they are designated as hedges. Financial instruments in this category are recognized initially and subsequently at fair value. Transaction costs are expensed in the consolidated statement of operations and are included in finance costs. Gains and losses arising from changes in fair value are presented in the consolidated statement of operations within expenses in the period in which they arise. Financial assets and liabilities at FVTPL are classified as current except for the portion expected to be realized or paid beyond twelve months of the statement of financial position date, which is classified as non-current.

Financial assets and liabilities at amortized cost: Financial assets and liabilities at amortized cost are initially recognized at fair value, except for trade receivables that do not contain a significant financing component which are measured at the transaction price, plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets through other comprehensive income: Financial assets carried at FVOCI are measured at fair value. Interest, dividends and impairment gains and losses are recognized in the consolidated statement of operations on the same basis as for amortized cost assets. Changes in fair value are recognized initially in other comprehensive income. When the assets are derecognized or reclassified, the cumulative changes in fair value are reclassified to the consolidated statement of operations (except where they relate to investments in equity instruments). DCM currently has no financial instruments measured at fair value through other comprehensive loss.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

DCM determines the classification of financial assets and liabilities at initial recognition. The classification of DCM's financial assets and liabilities is disclosed in note 23.

IMPAIRMENT OF FINANCIAL ASSETS

DCM applies the 'expected credit loss' ("ECL") model to assess the impairment of its financial assets at each balance sheet date. The ECL model requires considerable judgment, including consideration of how changes in economic factors affect ECLs, which are determined on a probability-weighted basis. DCM measures loss allowance at an amount equal to lifetime ECLs.

DCM applies the simplified approach to determine ECLs on trade receivables by using a provision matrix based on historical credit loss experiences. The historical results were used to calculate the run rates of default, which were then applied over the expected life of the trade receivables, adjusted for forward looking information of economic and other factors. Trade receivables are written off when there is no reasonable expectation of recovering the asset or a portion thereof.

Impairment losses are recorded in general and administration expenses in the consolidated statements of operations. Where there is a change that will cause a significant reduction in the loss, the impairment loss previously recognized is reversed through the consolidated statements of operations.

DERECOGNITION

Financial Assets: The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in the consolidated statements of operations.

Financial liabilities: The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. Generally, the difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in the consolidated statements of operations.

ASSETS HELD FOR SALE

Pursuant to IFRS 5, non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset or disposal group is available for immediate sale in its present condition, subject only to terms that are usual and customary for sales of such an asset, the appropriate level of management must be committed to a plan to sell the asset and an active program to locate a buyer and complete the plan must have been initiated. Further, the asset must be actively marketed for sale at a price that is reasonable in relation to its current fair value, and the sale is highly probable to complete within one year from the date of classification, except as permitted under certain events and circumstances. If the aforesaid criteria are no longer met, DCM ceases to classify the asset as held for sale.

Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell and are presented separately in the Statement of Financial Position. DCM does not depreciate or amortize a non-current asset while it is classified as held for sale. Immediately before the initial classification of the assets as held for sale, the carrying amounts of the asset are measured in accordance with applicable IFRS Accounting Standard. Non-current assets are not classified as held for sale within the comparative period presented for the Statement of Financial Position.

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

USE OF ESTIMATES, MEASUREMENT UNCERTAINTY AND JUDGMENTS

The preparation of consolidated financial statements requires management to make critical judgments, estimates and assumptions that affect the reported amount of certain assets and liabilities and the disclosure of the contingent assets and liabilities at the date of the consolidated financial statements and revenues and expenses for the period reported. Management must also make estimates and judgments about future results of operations, related specific elements of the business and operations in assessing the recoverability of assets and recorded value of liabilities. Significant areas of estimates, measurement uncertainty and judgments are summarized below. For each item, actual results could differ from estimates and judgments made by management.

BUSINESS COMBINATIONS

On April 24, 2023, DCM acquired MCC for a total purchase price of \$135,757 after adjusting for the post-closing working capital adjustments. The identifiable assets acquired and liabilities assumed, with limited exceptions are measured at their fair values at the acquisition date with the excess of the consideration transferred over the fair value of the identifiable assets acquired and liabilities assumed being recognized as goodwill. The fair value of the identifiable assets acquired included \$41,385 related to properties (including \$25,800 classified as assets held for sale) and \$26,139 related to plant, equipment, presses and printing equipment, office furniture and equipment and leasehold improvements (notes 4, 7 and 20). Management applied significant judgment in estimating the fair values of the acquired properties, plant and equipment.

The fair value of the properties acquired was estimated with the assistance of a third-party appraiser (management's property expert) using a combination of the income (direct capitalization) method and market (direct comparison) method. Significant assumptions related to the direct comparison method included the sales values of comparable properties, and subsequent sale and leaseback transactions (including market rental rates and incremental borrowing rates). Significant assumptions related to the direct capitalization approach included capitalization rates and comparable market rental rates.

The fair value of the plant and equipment assets acquired was estimated with the assistance of a third-party appraiser (management's plant and equipment expert) using a combination of the market and cost (direct and indirect) approaches. Significant assumptions related to the cost approach included inflation adjustments, replacement cost new, physical depreciation, useful lives and functional obsolescence. Significant assumptions related to the market approach included resale values.

IMPAIRMENT OF GOODWILL

Goodwill is tested for impairment annually at the end of each fiscal year or more frequently if events or changes in circumstances indicate there may be impairment. The determination of the impairment of goodwill is impacted by the determination of the CGUs, estimates of the recoverable value of those CGUs, assumptions of future cash flows, and achieving forecasted business results.

The acquisition of MCC brought together two similar sized businesses with similar economic characteristics particularly in terms of the nature of the products and services, production processes, types of customers and methods used to provide these product and services to customers. These businesses have been integrated into one consolidated operation and senior management team under the leadership of the Chief Executive Officer ("CEO") as the Company operates as an integrated marketing communications and business solutions provider to its customers. Consequently in management's judgment DCM has a single goodwill CGU, being the Company as a whole, reflecting the manner in which the operating results are being reviewed by the chief operating decision maker ("CODM") to make decisions about resources to be allocated and to assess the Company's performance as an integrated marketing and business solutions provider to its customers. This is the level at which goodwill is monitored for internal management purposes.

The recoverable amount of this CGU was determined based on its estimated fair value less the cost of disposal using a discounted cash flow model. Management applied considerable judgment in estimating the recoverable amounts of

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

the Company, which included the use of significant assumptions relating to revenue growth rates, gross margins and the discount rate. While the recoverable amount from the discounted cash flow model is sensitive to key assumptions used for forecast revenues, gross margins and the discount rate, management is satisfied that the Company's forecasts and assumptions, taking account of reasonably possible changes in results and other uncertainties, will not change the result of DCM's impairment analysis (see also note 10 for the sensitivity of the model to changes in these significant assumptions).

3 Change in accounting policies

(a) New and amended standards adopted

IFRS 7 NET FAIR VALUE (GAINS) LOSSES ON FINANCIAL LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS

In accordance with IAS 8, to provide more reliable and relevant information about the effects of transactions, other events or conditions on the entity's financial position, financial performance or cash flows, DCM applied IFRS 7 paragraph 20 to disclose net gains or net losses on financial assets or financial liabilities measured at fair value through profit or loss separately on the consolidated statement of operations.

The following table summarizes the impact on DCM's consolidated statement of operations for the year ended December 31, 2022:

	Year ended December 31, 2022 prior to the adoption		Impact	Year ended December 31, 2022 after the adoption	
Selling, commissions and expenses	\$	29,198	\$	(157)	\$ 29,041
General and administration expenses		27,952		(2,554)	25,398
Net fair value losses on financial liabilities at fair value through profit or loss		—		2,711	2,711

AMENDMENTS TO IAS 1, PRESENTATION OF FINANCIAL STATEMENTS AND IAS 8, ACCOUNTING POLICIES, CHANGES IN ACCOUNTING ESTIMATES AND ERRORS

These standards were amended to introduce the definition of an accounting estimate and include other amendments to IAS 8 to help entities distinguish changes in accounting estimates from changes in accounting policies. The amendments were adopted effective January 1, 2023 and did not have an impact on the consolidated financial statements.

AMENDMENTS TO IAS 12, DEFERRED TAXES: RELATED TO ASSETS AND LIABILITIES ARISING FROM A SINGLE TRANSACTION

This standard was amended to require companies to recognize deferred tax on particular transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences. The amendments were adopted effective January 1, 2023 and did not have an impact on the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

(b) Future accounting standards not yet adopted

IAS 1 PRESENTATION OF FINANCIAL STATEMENTS: CLASSIFICATION OF LIABILITIES AS CURRENT OR NON-CURRENT

In January 2020, the IASB issued Classification of Liabilities as Current or Non-current (Amendments to IAS 1). The amendments aim to promote consistency in applying the requirements by helping companies determine whether debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity. On October 31, 2022, the IASB published an amendment to clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The amendments are effective for reporting periods beginning on or after January 1, 2024. DCM is currently evaluating the impact on the consolidated financial statements.

AMENDMENTS TO IFRS 16 LEASES: LEASE LIABILITY IN A SALE AND LEASEBACK

The IASB has issued narrow-scope amendments to the requirements for sale and leaseback transactions in IFRS 16 explaining how a seller-lessee accounts for a sale and leaseback after the date of the transaction. Sale and leaseback transactions where some or all the lease payments are variable lease payments that do not depend on an index or a rate are most likely to be impacted. The amendments are effective from January 1, 2024. DCM does not expect these amendments to have any significant impact on the consolidated financial statements.

AMENDMENTS TO IAS 7 STATEMENT OF CASH FLOWS AND IFRS 7 FINANCIAL INSTRUMENTS: SUPPLIER FINANCING AGREEMENTS

In May 2023, the IASB issued amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures, addressing the presentation of liabilities and the associated cash flows arising out of supplier finance arrangements. The disclosure requirements in the amendments enhance the current requirements and are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. The amendments are effective for annual reporting periods beginning on or after January 1, 2024. DCM does not expect these amendments to have any significant impact on the consolidated financial statements.

There are no other IFRS Accounting Standards or International Financial Reporting Interpretations Committee ('IFRIC') interpretations that are not yet effective that would be expected to have a significant impact on DCM.

4 Business Acquisition**ACQUISITION OF MOORE CANADA CORPORATION (MCC)**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

On April 24, 2023 (the "Closing Date"), DCM acquired 100% of the share capital of MCC for a total cash purchase price of \$130,835, subject to post-closing working capital adjustments. During the year ended December 31, 2023, the post-closing working capital adjustments to the purchase price were \$4,922 for a total cash purchase price of \$135,757. With the completion of the acquisition, MCC is a wholly-owned subsidiary of DCM. The acquisition of MCC provides a strategic opportunity to accelerate DCM's growth plans. Bringing together two similar sized businesses, DCM has a significantly larger presence in the Canadian market, an enhanced portfolio of products and services, and an expanded customer base across a broad range of industry vertical markets. The acquisition was funded through an expanded revolving, floating rate credit facility from a Canadian chartered bank, which includes up to \$90,000 of revolving credit capacity; a \$30,000 floating rate bridge facility from the bank; and a new \$50,000 fixed rate credit facility from Fiera Private Debt (see note 13 for further information).

The acquisition is being accounted for as a business combination using the acquisition method and the consideration paid and the allocation of the consideration to the fair values of the assets acquired and liabilities assumed in the acquisition as of the Closing Date were as follows:

Recognized amounts of identifiable assets acquired and liabilities assumed	Total as at December 31, 2023
Cash and cash equivalents	\$ 4,804
Trade receivables	58,240
Inventories	22,981
Prepaid expenses and other assets	1,542
Other non-current assets	704
Property, plant and equipment	41,724
Assets held for sale (note 20)	25,800
Right-of-use assets	45,525
Intangible assets	10,863
Income taxes receivable	1,391
Trade payables and accrued liabilities	(28,016)
Bank overdraft	(1,282)
Deferred revenue	(1,688)
Lease liabilities	(30,034)
Provisions	(680)
Deferred income tax liabilities	(5,018)
Pension obligations	(14,092)
Other post-employment benefits plans	(848)
Asset retirement obligation	(1,451)
Total identifiable net assets	130,465
Goodwill	5,292
Total	\$ 135,757

The accounting for the business combination was finalised during the fourth quarter. The significant adjustments to the previously disclosed in the third quarter of 2023 purchase price allocations were a \$5,321 reduction to the provisional valuation of the acquired property, plant and equipment assets (and reclassification of \$25,800 to assets held for sale relating to the Oshawa warehouse facility for which a planned sale and lease-back agreement was completed on June 8, 2023), a \$1,837 reduction to the provisional valuation of intangible assets, and the deferred tax impact thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

The fair value of trade receivables acquired is \$58,240. The gross contractual amount of trade receivables due is \$59,011, of which \$771 was deemed uncollectible. The identifiable intangible assets acquired primarily relate to customer relationships and trademarks, which will be amortized over an expected useful life of nine to ten years.

Acquisition and integration costs recognized during the year ended December 31, 2023 were \$10,903 (year ended December 31, 2022 – \$1,870). Of this \$10,903 of acquisition and integration costs incurred during the year ended December 31, 2023, \$5,640 relates specifically to acquisition costs. Goodwill of \$5,292 arising from the acquisition is attributable to the company's workforce and is not deductible for tax purposes.

The revenue and net loss contributed by MCC and included in the consolidated statement of operations for the year ended December 31, 2023, were \$173,600 and \$28,359 (inclusive of \$18,328 of restructuring expenses), respectively.

If the acquisition had occurred on January 1, 2023, the estimated proforma consolidated revenue and net loss for the year ended December 31, 2023 would have been approximately \$538,149 and \$9,023, respectively, adjusting net income for additional depreciation and amortization that would have been charged assuming the fair value adjustments to property, plant and equipment and intangible assets had applied from January 1, 2023 together with the consequential tax effect.

5 Trade receivables

	December 31, 2023	December 31, 2022
Trade receivables	\$ 119,676	\$ 56,195
Provision for expected credit losses (note 23)	(1,720)	(1,565)
	\$ 117,956	\$ 54,630

As at December 31, 2023, trade receivables include unbilled receivables of \$32,490 (2022 – \$13,491), net of an expected credit loss allowance of \$1,197 (2022 – \$1,150).

6 Inventories

	December 31, 2023	December 31, 2022
Raw materials	\$ 22,051	\$ 14,719
Work-in-progress	4,392	2,827
Finished goods	2,397	2,674
	\$ 28,840	\$ 20,220

Raw materials inventory amount is net of obsolescence reserves of \$1,040 (2022 – \$629). Finished goods consist of base stock items.

During the year ended December 31, 2023, DCM modified certain leases by entering into renewal and/or amending agreements to extend a lease term and/or increase/reduce the lease payments.

During the year ended December 31, 2023, DCM executed renewal agreements for its Brampton and Toronto facilities. The lease term for the Brampton facility, set to expire on December 31, 2025, was extended by an additional 15 years. This extension includes 10 years of the lease term and an additional 5 years of an extension option, now expiring on December 31, 2040. Similarly, the lease terms for the Toronto facility, originally set to expire on December 18, 2026, was also extended by an additional 10 years, now expiring on December 18, 2036.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

In June 2023 and December 2023, DCM completed sale and leaseback transactions of its Oshawa, Ontario warehouse facility and Fergus, Ontario manufacturing facility, respectively, that were acquired as part of the Company's acquisition of MCC (note 4). Gross proceeds received on the sale of these properties were \$30.5 million, and, after deducting closing commissions, rent deposit, and other expenses, net proceeds of \$29.5 million were applied towards the \$30 million Real Estate Bridge Loan with a Canadian chartered bank (note 13). In addition, proceeds of \$1.5 million are being held in escrow by the landlord of the Oshawa, Ontario warehouse facility (which is included in other non-current assets on the consolidated statement of financial position) to secure the completion by DCM of certain identified building maintenance, repairs and capital improvements that are to be completed by DCM within 3 years of the lease commencement date. The Oshawa, Ontario warehouse facility leaseback has a lease term of 20 years (an initial lease term of 10 years and two additional 5 year extension options). The Fergus, Ontario manufacturing facility leaseback has a lease term of 2 years (an initial lease term of 1 year and two additional 6 month extension options) to allow the Company sufficient time to complete the closure of this facility (see also note 11). No gain or loss was recognized on these sale and leaseback transactions. The related closing costs and other expenses associated with these transactions of \$859 were reflected in general and administrative expenses in the consolidated statement of operations for the year ended December 31, 2023.

In the fourth quarter of 2023, DCM closed the Edmonton, Alberta manufacturing facility (see note 11) which is subject to a long-term lease arrangement ending in September 2027. A \$464 impairment provision has been recorded against the carrying amount of the right of use asset for this leased facility. The impairment charge is recorded in acquisition and integration costs in the consolidated statement of operations. DCM is seeking to sublease the property for the remaining lease term.

During the year ended December 31, 2022, DCM entered into a sublease agreement and recognized an asset which is recorded under prepaid expenses and other current assets on the statement of financial position.

10 Goodwill

	December 31, 2023	December 31, 2022
Opening balance	\$ 16,973	\$ 16,973
Acquisition of MCC (note 4)	5,292	—
Ending balance	\$ 22,265	\$ 16,973

DCM has a single operating segment, being the Company as a whole, which is the level at which goodwill is monitored for internal management purposes reflecting the way DCM manages its operations. As at January 1, 2023, there was \$16,973 goodwill in the DCM CGU. However, during the year ended December 31, 2023, DCM recognized an additional \$5,292 of goodwill which was derived from the acquisition of MCC.

At December 31, 2023, DCM performed its annual review for impairment of goodwill to determine if the carrying amount of the Company exceeds its recoverable amount. DCM did not make any changes to the valuation methodology used to assess for impairment since its last annual impairment test. The recoverable amount of its CGU has been determined based on the fair value less cost of disposal. DCM uses the income approach to estimate the recoverable amount of its CGU considering estimated cash flows from the perspective of an independent market participant, which would be classified within Level 3 of the fair value hierarchy. The income approach is predicated on the value of the future cash flows that a business will generate going forward. A discounted cash flow model was used which involves projecting cash flows and converting them into a present value through discounting. The discounting uses a rate of return that is commensurate with the risk associated with the business and the time value of money. This approach required significant assumptions about projected revenue growth rates, gross margins and discount rate.

Revenue growth rates and gross margins were based on the 2024 budget internally approved and presented to the Board and further projected over a five-year forecast period. The average annual cumulative revenue growth rates over the forecast period of 2.4% (2022 – 2.9%) was applied to revenue over the forecast period in consideration of the current economic conditions that existed as at December 31, 2023 and the specific trends of the business services and marketing solutions industries. A perpetual long-term growth rate of 0% (2022 – 0%) was used thereafter to derive the recoverable amount of the CGU. The forecasted gross margin over the five-year forecast period is 27.8% (2022 – 31.8%).

Furthermore, DCM derived an after-tax discount rate to calculate the present value of the projected cash flows using a weighted average cost of capital ("WACC"). This represents an estimate of the total overall required rate of return on an investment for both debt and equity owners. Determination of the WACC requires separate analysis of cost of equity and debt, and considers a risk premium based on the assessment of risks related to the projected cash flows. A discount rate of 14.5% was used (2022 – 13.5%). The change in discount rate reflect management's judgment as to the specific risks relating to the CGU and industry in which it operates.

The estimated recoverable amount exceeded its carrying value by \$204,891 (2022 – \$143,004). While the recoverable amount from the discounted cash flow model is sensitive to key assumptions used for forecast revenues, gross margins and discount rate, management are satisfied that the Company's forecasts and assumptions, taking account of reasonably possible changes in results and other uncertainties will not change the result of DCM's impairment analysis. As a result of these tests, it was concluded that there was no impairment of goodwill during the year.

The recoverable amount would equal its carrying value if the key assumptions were changed to the following (in each case with all other assumptions remaining unchanged).

TERMINATION PROVISIONS

During the year ended December 31, 2023, DCM commenced initiatives to drive synergies in connection with the acquisition of MCC, including initiatives to align its organizational structure and optimize its operational footprint (note 4), and announced its decision to close MCC's manufacturing facilities in Edmonton, Alberta, Fergus, Ontario and Trenton, Ontario (and transfer the production to its other manufacturing facilities in Calgary, Alberta, Drummondville, Quebec and Brampton, Ontario respectively) and to close DCM's Thistle manufacturing facility in North York, Toronto, Ontario (and transfer the employees and production to MCC's nearby manufacturing facility in North York, Toronto, Ontario).

In the fourth quarter of 2023 DCM closed the Edmonton, Alberta manufacturing facility, completed the sale of the Fergus property and entered into an agreement to sell the Trenton property that closed in January 2024 (notes 20 and 27). Both of these sales transactions included a one-year leaseback agreement with extension options for up to an additional six to twelve months to allow DCM sufficient time to complete the closure of these facilities (note 8). The Edmonton property is subject to a long-term lease arrangement ending in September 2027. A \$464 impairment provision has been recorded against the carrying amount of the right of use asset for this leased facility (note 8). DCM is seeking to sublease the property for the remaining lease term. The Fergus, Trenton and Thistle facilities are expected to close in 2024-2025.

During the year ended December 31, 2023, these initiatives resulted in \$19,788 of termination provisions due to expected headcount reduction across DCM's operations and \$520 of plant closure costs for costs associated with

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

closure of Edmonton manufacturing facility. These costs are included in the restructuring expenses in the consolidated statement of operations. During the year ended December 31, 2023, cash payments of \$4,975 (2022 - \$3,160) were made to former employees for severances and other restructuring costs. The remaining severance and restructuring accruals of \$16,809 at December 31, 2023 are expected to be paid in 2024, 2025 and 2026.

12 Lease liabilities**(i) LEASE LIABILITIES**

DCM currently leases manufacturing, warehouse and office space, office equipment and production equipment. A lease liability has been recognized equal to the present value of remaining lease payments discounted at the interest rate implicit in the lease, or if that rate cannot be readily determined, DCM's weighted average incremental borrowing rate.

		Property	Office Equipment	Production Equipment	Total

CREDIT AGREEMENTS**BANK FACILITIES**

DCM has established a revolving credit facility (the "New Bank Credit Facility") pursuant to a third amended and restated credit agreement (the "Bank Credit Agreement") with a Canadian chartered bank (the "Bank") as part of the financing of the acquisition of MCC on April 24, 2023. Under the terms of the amended Bank Credit Agreement, the maximum principal amount available under the New Bank Credit Facility was increased from \$15,000 to \$90,000. The New Bank Credit Facility also includes an "accordion" feature, which can provide up to an additional \$20,000 of capacity under the revolving facility. The New Bank Credit Facility matures on April 24, 2026. The New Bank Credit Facility is available to be drawn by way of either Prime Rate loans, Base Rate loans, Canadian Dollar Offered Rate ("CDOR") loans, Secured Overnight Financing Rate ("SOFR loans"), and/or Letters of Credit. Prime rate loans charge interest based on the prime rate plus a margin whereby the prime rate is the greater of the Bank's published reference rate on Canadian Dollar denominated commercial loans and the CDOR rate for a period of 30 days plus 100 basis points per annum. Under the Bank Credit Agreement, the Canadian Overnight Repo Rate Average ("CORRA") plus 0.3% will replace the CDOR rate when the CDOR rate ceases at the end of June 2024. Currently, advances under the New Bank Credit Facility may not, at any time, exceed the lesser of \$90,000 and a fixed percentage of DCM's aggregate accounts receivable and inventory (less certain amounts). Advances under the New Bank Credit Facility are subject to floating interest rates based upon the Canadian prime rate plus an applicable margin of 1.25% for a rate of 8.45% as at December 31, 2023. The amendment to the revolving credit facility was accounted for as an extinguishment of the previous facility which was derecognized along with the remaining unamortized balance of prior transaction costs and unamortized debt premium and the new debt was then recorded at fair value along with associated transaction costs of \$1,087.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

As part of the refinancing of the MCC acquisition, DCM also established a \$30,000, one-year committed senior secured credit facility (the "Real Estate Bridge Loan"). The Real Estate Bridge Loan was available by way of Prime Rate loans and CDOR loans and was subject to a floating interest rate based upon the Canadian prime rate plus an applicable margin of 1.5% increasing to 1.75% by the time the loan was fully repaid in December from the proceeds of the sale and leaseback of the Oshawa and Fergus properties.

DCM also entered into a sale and leaseback agreement of its Trenton, Ontario facility, which was completed in January 2024 (note 27) and the proceeds from the sale of \$8,500 were applied towards paying down the New Bank Credit Facility.

On November 8, 2021, DCM established a term loan ("Bank Term Loan") with the Bank for \$10,000 as part of a refinancing of a credit facility previously with Crown Credit Partners. The Bank Term Loan was subject to a floating interest rate based upon the Canadian prime rate plus an applicable margin of 3.50% and was repaid as part of the acquisition (note 4).

As at December 31, 2023, DCM had access to \$26,188 of available credit under the New Bank Credit Facility and had cash and cash equivalents, net of bank overdraft, of \$17,652 as shown on the consolidated statement of financial position as at December 31, 2023.

FPD FACILITIES

DCM has two amortizing term loan facilities (the "FPD VI Credit Facilities") with Fiera Private Debt VI L.P. ("FPD VI"), which is a fund managed by Fiera Private Debt Fund GP Inc. ("FPD") pursuant to an amended and restated credit agreement dated as of April 24, 2023 (the "FPD Credit Agreement").

DCM established a new \$50,000 committed term loan with FPD VI ("FPD VI New Term Loan" and, together with the New Bank Credit Facility and the Bank Term Loan, the "Credit Facilities") at an interest rate of 8.08% to partially finance the acquisition of MCC (see note 4). 71.5% of the FPD VI New Term Loan must be repaid in fifty-nine (59) equal monthly payments of principal plus accrued interest on the outstanding principal amount and the remaining 28.5%, together with accrued interest, must be repaid on the maturity date on April 21, 2028. DCM elected to defer principal payments on this facility for the first twelve months following the closing of the MCC acquisition. The associated transaction costs of this new loan was \$714.

As part of the MCC acquisition, in April 2023, the maturity dates of pre-existing loans with FPD IV and FPD V, two other funds managed by Fiera Private Debt GP Inc. were extended to December 31, 2023 at an interest rate of 8.08%. These loans were fully repaid during the year using the proceeds from the Offering (as defined in note 17).

COVENANT REQUIREMENTS

Each of the Bank Credit Agreement and the FPD Credit Agreement contains customary representations and warranties, certain financial covenant requirements, as well as certain restrictive covenants which limit the discretion of the Board and management with respect to certain business matters, including the declaration or payment of dividends on the common shares of DCM without the consent of the Bank and FPD VI, as applicable. As of December 31, 2023, DCM was in compliance with all of its financial covenants.

The continued ability to comply with financial covenants under the Company's credit facilities for at least the next twelve months is contingent on management's ability to meet budgeted revenue, profitability and working capital targets. The estimate of future cash flows in the Company's 2024 budget and forecasts through to March 31, 2025 include a number of key assumptions to support the financial covenant calculations, specifically related to forecast revenues and gross margins (which in turn impact earnings before interest, income taxes, depreciation and amortization (EBITDA)). Management are satisfied that the Company's forecasts and projections, taking account of reasonably possible changes in results and other uncertainties will not result in any breach of the financial covenants on its credit facilities within the next fifteen months.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

For purposes of the Bank Credit Agreement, the FPD Credit Agreements, "EBITDA" means net income or net loss for the relevant period, calculated on a consolidated basis, plus amounts deducted, or minus amounts added, in calculating net income or net loss in respect of: (a) the aggregate expense incurred for interest on debt and other costs of obtaining credit; (b) income taxes, whether or not deferred; (c) depreciation and amortization; non-cash expenses resulting from employee or management compensation, including the grant of stock options or restricted options to employees; any gain or loss attributable to the sale, conversion or other disposition of property out of the ordinary course of business; interest or dividend income; foreign exchange gain or loss; gains resulting from the write-up of property and losses resulting from the write-down of property (except allowances for doubtful accounts receivable and non-cash reserves for obsolete inventory); any gain or loss on the repurchase or redemption of any securities (including in connection with the early retirement or defeasance of any debt); goodwill and other intangible asset write-downs; lease payments to convert on a pre-IFRS 16 basis; and any other extraordinary, nonrecurring or unusual items such as restructuring costs (as agreed to by the lender) provided the amounts added back pursuant to clause (c) above in respect of cash expenses (other than acquisition, integration and restructuring costs related to the MCC acquisition) are capped at 15% of unadjusted EBITDA. The pro forma financial results from any acquisitions completed by DCM during a given year are included on a trailing twelve month basis effective as of the closing date of the acquisitions for the purposes of DCM's covenant calculations.

A failure by DCM to comply with its obligations under the Bank Credit Agreement or the FPD Credit Agreement, together with certain other events, including a change of control of DCM and a change in DCM's Chief Executive Officer, President or Chief Financial Officer (unless a replacement officer acceptable to FPD, acting reasonably, is appointed within 60 days of the effective date of such officer's resignation), could result in an event of default which, if not cured or waived, could permit acceleration of the indebtedness outstanding under each of those agreements.

INTER-CREDITOR AGREEMENT

DCM's obligations under the New Bank Credit Facility and the FPD VI Credit Facility are secured by conventional security charging all of the property and assets of DCM and its subsidiaries. DCM has entered into an inter-creditor agreement between the Bank and FPD VI, which, among other things, establishes the rights and priorities of the respective liens of the Bank and FPD VI on the present and after-acquired property of DCM and its subsidiaries.

The movement in credit facilities during the years ended December 31, 2023 and 2022 are as follows:

The scheduled principal repayments on the long-term debt are as follows:

		December 31, 2023
2024	\$	6,333
2025		8,714
2026		55,867
2027		7,143
2028		23,809
	\$	101,866

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

14 Income taxes

Significant components of DCM's deferred income tax assets and liabilities as of December 31, 2023 and 2022 are as follows:

December 31, 2023	Assets	Liabilities	Net
Pension obligations and other post-employment benefit plans	\$ 7,320	\$ —	\$ 7,320
Property, plant and equipment, ROU assets and lease liabilities	—	(5,327)	(5,327)
Deferred finance fees and debt premiums	1,304	—	1,304
Deductible reserves	5,793	—	5,793
Intangible assets	973	—	973
Other	—	(262)	(262)
Total deferred income tax assets (liabilities)	\$ 15,390	\$ (5,589)	\$ 9,801
Set-off of deferred income tax assets (liabilities) pursuant to set off provisions	(5,589)	5,589	—
Net deferred income tax assets (liabilities)	\$ 9,801	\$ —	\$ 9,801
December 31, 2022	Assets	Liabilities	Net
Pension obligations and other post-employment benefit plans	\$ 1,618	\$ —	\$ 1,618
Property, plant and equipment, ROU assets and lease liabilities	1,071	—	1,071
Benefit of income tax loss and other carry-forwards	65	—	65

Set-off of deferred income tax assets (liabilities) pursuant to set off provisions	(19)	19	—
Net deferred income tax assets (liabilities)	\$ 4,830	—	\$ 4,830

As at December 31, 2023, DCM recorded net deferred income tax assets of \$9,801 (2022 – \$4,830) and net deferred income tax liabilities of nil (2022 – nil) in its consolidated statements of financial position. The deferred income tax assets are only offset against deferred income tax liabilities where DCM has a legally enforceable right to offset these amounts, and the deferred income tax assets and deferred income tax liabilities are related to income taxes levied by the same taxation authority.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

Changes in deferred income tax assets and liabilities during the years ended December 31, 2023 and 2022 are as follows:

	Balance at January 1, 2023	Acquisition of MCC (note 4)	Recognized in statement operations	Recognized in comprehensive income	Recognized in equity (note 17)	Balance at December 31, 2023

Deferred income tax assets (liabilities), net	\$ 5,465	\$ (473)	\$ (162)	\$ —	\$ —	\$ 4,830

The realization of the deferred income tax assets is dependent on the generation of future taxable income during the years in which those temporary differences become deductible. Based on management's projections of future taxable income and tax planning strategies, management expects to realize these net deferred income tax assets in advance of expiry. As at December 31, 2023, DCM has US Federal tax loss carryforwards of \$623 and US state tax loss carryforwards of \$1,293 for which no deferred tax asset has been recognized. The loss carryforwards expire in varying amounts starting in 2039 (2023 – 2039).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

In the ordinary course of business, DCM and its subsidiaries and predecessors have entered into transactions where the ultimate tax determination may be uncertain. These uncertainties require management to make estimates of the ultimate tax liabilities and, accordingly, the provision for income taxes. Since there are inherent uncertainties, additional tax liabilities may result if tax matters are ultimately resolved or settled at amounts different from those estimates. As at December 31, 2022, DCM had provided for \$1,407 included in income taxes payable related to past transactions where the ultimate tax determination is unclear. During 2023, that balance became statute barred and the amount was reversed through the current income tax balance during the year.

The major components of income tax expense (recovery) for the years ended December 31, 2023 and 2022 are set out below:

	For the year ended December 31, 2023	For the year ended December 31, 2022
Current income tax expense:		
Current tax on profits for the year	\$ 2,616	\$ 5,456
Adjustment for current tax of prior periods	(1,407)	—
Total current income tax expense	\$ 1,209	\$ 5,456
Total deferred income tax expense (recovery)	(7,799)	473
Total income tax expense for the year	\$ (6,590)	\$ 5,929

For the year ended December 31, 2023, deferred income tax expense (recovery) on the recognition of actuarial gains (losses) related to DCM's defined benefit plans of \$1,712 (2022 – \$162) were recognized in the statements of comprehensive income.

The following are reconciliations of income tax expense (recovery) calculated at the statutory rate of Canadian corporate income taxes to the income tax expense (recovery) for the years ended December 31, 2023 and 2022.

	For the year ended December 31, 2023	For the year ended December 31, 2022
Income before income taxes	\$ (22,444)	\$ 19,895
Expected income tax expense calculated at statutory income tax rate ⁽¹⁾	(5,652)	5,028
Adjustment to income taxes resulting from:		
Difference between Canadian rates and rates applicable to subsidiary in another country or rates applicable to wholly owned Canadian subsidiaries	(223)	9
Unrecognized tax losses and temporary differences	(256)	248
Adjustment for current tax of prior periods and other	(1,407)	35
Non-deductible expenses and other items	948	609
Total income tax expense for the year	\$ (6,590)	\$ 5,929

(1) The calculation of the current income tax is based on a combined federal and provincial statutory income tax rate of 25.18% (2022 – 25.28%).

The combined federal and provincial statutory income tax rate for the current year is 0.10% lower than 2022 due to the effect of changes in statutory tax rates and the allocation of taxable income between provinces. Deferred income tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled. Deferred income tax assets and liabilities have been measured using an expected average

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

combined statutory income tax rate of 25.18% (2022 – 25.28%) based on the tax rates in years when the temporary differences are expected to reverse.

15 Pension obligations, assets and expenses

DCM sponsors defined benefit and defined contribution pension plans for its employees, including the employees of MCC. Certain employees and former employees are provided defined benefit pensions under the DATA Communications Management Pension Plan or are provided defined benefit pensions and in some cases an unfunded Supplementary Executive Retirement Plan ("SERP") under the Moore Canada Corporation Pension Plan. Certain former senior executives of a predecessor corporation participated in a SERP, which provides for pension benefits payable as a single life annuity with a five-year guarantee.

Both the DATA Communications Management Pension Plan and Moore Canada Corporation Pension Plan are frozen and no further service credits are accruing under the defined benefit provision of the DATA Communications Management Pension Plan and under the Moore Canada Corporation Pension Plan, respectively.

Actuarial valuations are typically performed at least every three years. Based on those valuations, the annual cash contributions in respect of the defined benefit provision of these pension plans are dependent on the plan's investment performance and changes in long-term interest rates, estimates of the price of annuities, and other elements of pension plan experience such as demographic changes and administration expenses, among others. Under applicable pension regulations, the plan's solvency deficiency can be funded over a maximum period of five years.

During the year ended December 31, 2022, DCM engaged actuaries to complete an updated actuarial valuation of the defined benefit provision of the DATA Communications Management Pension Plan, which confirmed that, as at December 31, 2021, the solvency position of the defined benefit provision of the DATA Communications Management Pension Plan had improved since the previous valuation. Based upon the December 31, 2021 actuarial report, DCM's annual minimum funding obligation for the defined benefit provision of the DATA Communications Management Pension Plan for 2023 and 2024 is \$322 each year.

During the year ended December 31, 2023, DCM engaged actuaries to complete an updated actuarial valuation of the Moore Canada Corporation Pension Plan, which confirmed that, as at January 1, 2023, the solvency position of the Moore Canada Corporation Pension Plan had improved since the previous valuation. Based upon the January 1, 2023 actuarial report, DCM's annual minimum funding obligation for the Moore Canada Corporation Pension Plan for 2023 to 2025 is \$nil each year.

The following is a summary of DCM's net pension obligations for the defined benefit provisions and unfunded SERPs, including plans assumed on the acquisition of Moore Canada Corporation:

	DCM	MCC	Total December 31, 2023	December 31, 2022

DCM manages its pension plans by meeting with an actuarial consultant and the fund managers on a regular basis and reviews periodic reports outlining changes in the plan liabilities and the return on pension assets relative to the market. Assumptions are reviewed on an ongoing basis and adjustments are made whenever management believes that conditions have materially changed.

SIGNIFICANT ACTUARIAL ASSUMPTIONS ADOPTED IN MEASURING DCM'S DEFINED BENEFIT OBLIGATIONS

	December 31, 2023	December 31, 2022
Defined Benefit Pension Plans		
Discount rate	4.60 %	5.30 %
Rate of compensation increase	3.00 %	3.00 %
SERPs		
Discount rate	4.60 %	5.20 %

DCM decreased the discount rate that was used to calculate its defined benefit obligations as at December 31, 2023 to reflect current Canadian economic conditions and long-term interest rates. The salary increase assumption remained unchanged at December 31, 2023.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

Assumptions regarding future mortality are set based on actuarial advice in accordance with published statistics and experience in Canada. These assumptions translate into an average life expectancy in years for a pensioner retiring at age 65:

	December 31, 2023	December 31, 2022
Retiring at the end of the reporting period:		
Male	22.0-21.9	22.0
Female	24.4-24.6	24.3
Retiring in 25 years after the end of the reporting period:		
Male	23.3-23.7	23.2
Female	25.5-26.2	25.5

Through its defined benefit plans, DCM is exposed to a number of risks, the most significant of which are detailed below:

ASSET VOLATILITY

For a defined benefit pension plan, fluctuations in the value of plan assets are assessed in the context of fluctuations in the plan liabilities. The plan liabilities are calculated using a discount rate set with reference to high quality corporate bond yields. As discount rates change, the value of the plan liabilities will fluctuate, if the growth of plan liabilities exceeds that of plan assets a deficit will result.

The defined benefit provision of the DATA Communications Management Pension Plan and Moore Canada Corporation Pension Plan are closed to new membership, which means the investment time horizon is shrinking as the plans matures.

The defined benefit provision of the DATA Communications Management Pension Plan currently holds a small proportion of equities, approximately 21% of total assets, which are expected to outperform corporate bonds in the long-term while providing volatility and risk in the short-term. The defined benefit provision of the DATA Communications Management Pension Plan's investment time horizon and financial position are key inputs in deciding on the proportion of equities held.

The investment strategy for the DATA Communications Management Pension Plan reflects an ongoing (rather than solvency) focus following a duration matching strategy using pooled funds in an attempt to match the interest rate sensitivity of plan assets to plan liabilities. The equity and bond target allocations are 20% and 80%, respectively, and the equity portfolio structure did not change relative to the previous year.

Prior to the acquisition by DCM, the Moore Canada Corporation Pension Plan funded ratio was in the 90% funded target category and 50% of the plan's assets were invested 50% in a growth portfolio and the other 50% of the plan's assets were invested in a liability hedging portfolio. During the remainder of 2023, the plan's funded ratio improved to the 95% funded target category and the plan's assets allocation was revised to be 45% invested in a growth portfolio and 55% invested in a liability hedging portfolio. During the fourth quarter of 2023, DCM developed an alternative derisking strategy to enhance the plan's asset return while reducing interest rate risk. Beginning in 2024 and as the plan matured, the Moore Canada Corporation Pension Plan's level of investment risk will be reduced by lowering the proportion of equities and increasing the proportion of bonds which are a better match to the plan liabilities. This de-risking glide path will dynamically shift the plan's assets from equities to bonds to better match liabilities commenced and will be concluded when the solvency ratio reaches 105%.

Through the derisking schedule, the Moore Canada Corporation Pension Plan is expected to lower its interest rate risk, inflation risk and equity risk. In 2024, the Moore Canada Corporation Pension Plan will have 45% equities and 55% bonds. When the solvency ratio reaches 105%, the Moore Canada Corporation Pension Plan is expected to

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

have 20% equities and 80% bonds. This derisking strategy is reviewed annually to consider the current environment and may be revised at any point in time.

CHANGES IN BOND YIELDS

A decrease in corporate bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plan's bond holdings.

SALARY RISK

The present value of the pension benefit obligations is calculated by reference to the future salaries of plan participants, so salary increases of the plan participants greater than assumed will increase plan liabilities.

LIFE EXPECTANCY

The majority of the plans' obligations provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities.

The sensitivity of the defined benefit obligations for the DATA Communications Management Pension Plan, Moore Canada Corporation Pension Plan and their respective SERPs to changes in assumptions at December 31, 2023 and at December 31, 2022 are set out below. The effects on each plan of a change in an assumption are weighted proportionately to the total plan obligations to determine the total impact for each assumption presented.

December 31, 2023			
Impact on defined benefit obligations			
	Change in assumption	Increase in assumption	Decrease in assumption
Discount rate	0.25%	\$ (5,759)	\$ 6,019
Salary growth rate	0.25%	612	(595)
		Increase by 1 year in assumption	Decrease by 1 year in assumption
Life expectancy		\$ 6,123	\$ (5,763)
December 31, 2022			
Impact on defined benefit obligations			
	Change in assumption	Increase in assumption	Decrease in assumption
Discount rate	0.25%	\$ (1,207)	\$ 1,261
Salary growth rate	0.25%	113	(106)
		Increase by 1 year in assumption	Decrease by 1 year in assumption
Life expectancy		\$ 1,301	\$ (1,331)

Each sensitivity analysis disclosed in this note is based on changing one assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligations to variations in significant actuarial assumptions, the same method (present value of the defined benefit obligations calculated with the projected unit credit method at the end of the reporting period) has been applied as for calculating the liability recognized in the statements of financial position.

The weighted average duration of the defined benefit obligations is 10.62 years (2022 – 9.65 years).

Expected maturity analysis of undiscounted pension benefits:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

		Less than a year	Between 1 to 2 years	Between 3 to 5 years	Between 5 to 10 years
At December 31, 2023	\$	15,033	\$ 15,274	\$ 47,106	\$ 79,836
At December 31, 2022	\$	3,498	\$ 3,533	\$ 10,983	19,197

The annual pension expense for the defined contribution provision of the DATA Communications Management Pension Plan and RRSP Matching Plans are based on the amounts contributed in respect of eligible employees. The annual pension expense for the GCCP and Unifor Pension & Benefit Plans, which are accounted for as a defined contribution plan, is based on amounts contributed based on a percentage of wages of unionized employees who are covered by the respective collective bargaining agreements, all of whom are employed at DCM facilities located in the Province of Québec and Ontario.

DCM's pension expense related to DCM's defined contribution plans are as follows:

		For the year ended December 31, 2023	For the year ended December 31, 2022
Defined contribution plan	\$	1,350	\$ 948
Defined benefit multi-employer plans	\$	395	\$ 372

DCM expects that, in 2024, contributions to the defined benefit provision of the DATA Communications Management Pension Plan will be approximately \$322, contributions to the defined contribution provision of the DATA Communications Management Pension Plan and RRSP Matching Plans will be approximately \$1,700, contributions to the SERPs will be approximately \$932, contributions to the GCCP will be approximately \$445 and contributions to the Unifor Pension & Benefit Plans will be approximately \$171.

16 Other post-employment benefit plans

Costs related to the DCM OPEB Plan and the OPEB LTD Plans are actuarially determined using the projected unit credit method. The actuarial present value of all future projected benefits determined as at the valuation date and management's best assumptions.

The following summarizes the change in the obligations related to the DCM OPEB Plan and OPEB LTD Plans, including the plan assumed on the acquisition of Moore Canada Corporation:

	December 31, 2023	December 31, 2022
Balance – Beginning of year	\$ 2,695	\$ 2,971
Current service cost	385	179
Interest expense	176	92
Benefits paid	(471)	(365)
Balance - Acquired from acquisition of MCC	848	—
Re-measurements:		
- Loss from change in demographic assumptions	36	21
- Loss (gain) from change in financial assumptions	109	(312)
- Experience losses (gains)	(172)	109
Balance – End of year	\$ 3,606	\$ 2,695

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

SENSITIVITY ANALYSIS ON OTHER POST-EMPLOYMENT BENEFIT OBLIGATIONS

The effects on the DCM OPEB Plan and OPEB LTD Plans of a change in an assumption are weighted proportionately to the total plan obligations to determine the total impact for each assumption presented.

	Impact on other post-employment benefit obligations			
	Change in assumption	Increase in assumption	Decrease in assumption	
At December 31, 2023				
Discount rate	0.25%	\$ (52)	\$ 54	
Health care cost trend rates	1.00%	198	(180)	
		Increase by 1 year in assumption	Decrease by 1 year in assumption	
Life expectancy		\$ 50	\$ (49)	
		Impact on other post-employment benefit obligations		
	Change in assumption	Increase in assumption	Decrease in assumption	
At December 31, 2022				
Discount rate	0.25%	\$ (39)	\$ 41	
Health care cost trend rates	1.00%	144	(131)	
		Increase by 1 year in assumption	Decrease by 1 year in assumption	
Life expectancy		\$ (47)	\$ 49	

Expected maturity analysis of undiscounted other post-employment benefits:

	Less than a year	Between 1 to 2 years	Between 3 to 5 years	Between 5 to 10 years
At December 31, 2023	\$ 502	\$ 474	\$ 1,309	\$ 2,326
At December 31, 2022	\$ 390	\$ 329	\$ 804	\$ 1,025

DCM expects that, in 2024, contributions to its DCM OPEB Plan and OPEB LTD Plans will be approximately \$502.

17 Shares and warrants

SHARES

DCM is authorized to issue an unlimited number of common shares. The common shares have a stated capital of one dollar. Each common share is entitled to one vote at any meeting of shareholders. Each holder of the common shares will be entitled to receive dividends if, as and when declared by the Board. In the event of the liquidation, dissolution, winding up of DCM or other distribution of assets of DCM among its shareholders for the purpose of winding up its affairs, the holders of the common shares will be entitled to receive assets of DCM upon such a distribution. Such distribution will be made in equal amounts per share on all the common shares at the time outstanding without preference or distinction.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

The following summarizes the change in number of issued and outstanding common shares during the year:

	Number of Common shares	Amount
Balance – January 1, 2022 and December 31, 2022	44,062,831	\$ 256,478
Exercise of warrants – April 3, 2023	138,157	167,000
Exercise of warrants – April 21, 2023	1,510,000	1,191,000
Exercise of options – May 23, 2023	604,695	1,422,000
Shares issued – May 25, 2023	8,707,200	\$ 24,480
Balance – December 31, 2023	55,022,883	\$ 283,738

During the year ended December 31, 2023, DCM completed a private placement (the “Offering”) of common shares of the Company (“Common Shares”). Upon closing of the Offering, the Company issued 8,707,200 Common Shares at a price per share of \$3.00 for gross proceeds of \$26,121 (or \$24,221 after closing costs). A total of \$478 was recorded in equity as the deferred tax impact on the share issue costs. In connection with the Offering, the Company issued Agent broker warrants (see further discussion below).

WARRANTS

A summary of warrant activities for the year ended December 31, 2023 and the year ended December 31, 2022 is as follows:

	2023		2022	
	Number of Warrants	Weighted average Exercise Price	Number of Warrants	Weighted average Exercise Price
Warrants outstanding - beginning of year	1,648,157	\$ 0.30	1,863,607	\$ 0.28
Granted	261,216	3.16	—	—
Expired	—	—	(215,450)	0.19
Exercised	(1,648,157)	0.30	—	—
Warrants outstanding - end of year	261,216	\$ 3.16	1,648,157	\$ 0.30

The outstanding warrants had an exercise price range as follows:

	December 31, 2023 Number of Warrants	December 31, 2022 Number of Warrants
\$3.16	261,216	—
\$0.99	—	77,078
\$0.32	—	61,079
\$0.26	—	1,510,000
Warrants outstanding	261,216	1,648,157

During the year ended December 31, 2023, 1,648,157 warrants were exercised for total proceeds of \$489.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

In connection with the Offering, DCM issued 261,216 broker warrants. Each warrant entitles the holder to acquire one Common Share at an exercise price of \$3.16 for a period of 2 years, commencing on May 25, 2023. The total fair value of the warrants issued was estimated to be \$219 using the Black-Scholes option-pricing model, assuming a risk-free interest of 4.23%, a weighted average life of 2.0 years, a dividend yield of nil and an expected volatility of 55.95% based on comparable companies.

SHARE-BASED COMPENSATION

DCM has adopted a Long-Term Incentive Plan ("LTIP") to: recruit and retain highly qualified directors, officers, employees and consultants (the "Participants"); provide Participants with an incentive for productivity and an opportunity to share in the growth and the value of DCM; and, align the interests of Participants with those of the shareholders of DCM. Awards to Participants are primarily based on the financial results of DCM and services provided. The aggregate maximum number of common shares available for issuance from DCM's treasury under the LTIP is 5,502,288 common shares, or 10% of the issued and outstanding common shares of DCM. The shares to be awarded will be authorized and unissued shares.

DCM's share-based compensation plan consists of five types of awards: restricted share unit ("RSUs"), options, deferred share unit ("DSUs"), restricted shares or stock appreciation right ("SARs") awards. No restricted shares or SARs have been granted to date.

(a) *Restricted share unit ("RSU")*

Under the RSU portion of the LTIP, selected employees are granted RSUs where each RSU represents the right to receive a distribution from DCM in an amount equal to the fair value of one DCM common share. RSUs granted are performance and non-performance based. The performance component is based on Company specific financial targets approved by the Board, and the non-performance component is based on continued employment. RSUs generally vest over three years, require continued employment with DCM for the duration of the vesting period and settle in cash upon final vesting.

A liability for RSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The liability is recognized on a graded vesting basis over the vesting period, with a corresponding charge to compensation expense as a component of costs of revenues, selling, commissions and expenses, and general and administration expenses. The RSUs payable are included in trade payables and accrued liabilities. Compensation expenses for RSUs incorporate an estimate for expected forfeiture rates based on which the fair value is adjusted.

	December 31, 2023	December 31, 2022
	Number of RSUs	Number of RSUs
Balance - beginning of year	3,154,305	2,400,715
Units granted	348,110	904,207
Units forfeited	(115,920)	—
Units paid out	(1,188,558)	(150,617)
Balance - end of year	2,197,937	3,154,305

During the year ended December 31, 2023, the CEO and President of DCM was granted 143,506 RSUs (2022 – 357,985 RSUs) and a total of 204,604 RSUs (2022 – 546,222 RSUs) were awarded to other members of DCM's management.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

Of the total outstanding RSUs at December 31, 2023, nil (December 31, 2022 – nil) have vested and are payable. The carrying amount of the liability relating to the RSUs at December 31, 2023 included in accounts payable and accruals was \$4,814 (2022 – \$3,501).

During the year ended December 31, 2023, compensation expense of \$3,762 (2022 – \$1,740) was recognized in the consolidated statement of operations related to vesting of RSUs granted, and fair value adjustments. RSUs and DSUs are categorized as level 2 inputs in the fair value hierarchy given their valuations include inputs other than quoted prices for which all significant inputs are observable, either directly or indirectly. There were no transfers between levels 1, 2 or 3 during the period.

(b) *Options ("Options")*

A summary of Options activities for the year ended December 31, 2023 and the year ended December 31, 2022 is as follows:

	2023		2022	
	Number of Options	Weighted average Exercise Price	Number of Options	Weighted average Exercise Price
Options outstanding - beginning of year	4,700,886	\$ 0.97	3,950,886	\$ 0.91
Granted	750,000	3.42	750,000	1.30
Forfeited	(250,000)	3.42	—	—
Exercised	(671,886)	1.38	—	—
Options outstanding - end of year	4,529,000	\$ 1.18	4,700,886	\$ 0.97
Exercisable	2,987,333	\$ 0.89	2,867,553	\$ 0.99

The outstanding Options had an exercise price range as follows:

	December 31, 2023 Number of Options	December 31, 2022 Number of Options
\$0.69	2,500,000	2,500,000
\$0.85	125,000	125,000
\$1.29	654,000	654,000
\$1.30	750,000	750,000
\$1.38	—	671,886
\$3.42	500,000	—
Options outstanding	4,529,000	4,700,886

The Black-Scholes option-pricing model inputs used to compute compensation expense for the options granted under the fair value-based method are as follows:

	April 27, 2023	April 4, 2022
Expected life (years)	7.0	7.0
Expected volatility	60 %	40 %
Dividend yield	— %	— %
Risk free rate of return	2.92 %	2.41 %
Weighted average fair value of options granted	\$ 2.09	\$ 0.58
Forfeiture rate	10 %	10 %

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

On April 27, 2023, options to purchase up to 750,000 common shares were awarded to a member of key management. Once vested, the options are exercisable for a period of seven years from the grant date at an exercise price of \$3.42 per share, representing the fair value of the Common Shares on the date of grant. 250,000 of these options were forfeited during the year and the remaining 500,000 options vest at a rate of 1/2 each year beginning on April 27, 2024.

During the year ended December 31, 2023, 671,886 options were exercised in exchange for 604,695 common shares (as a result of the net settlement of certain options) for total proceeds of \$751.

During the year ended December 31, 2023, compensation expense of \$675 (2022 – \$328) was recognized in the consolidated statement of operations related to the vesting of options granted.

(c) Deferred share unit ("DSU")

Each director is required to receive at least half of his or her annual retainer in DSUs and has the option to elect to receive all or any other part of his or her other compensation in DSUs.

Each DSU represents the right to receive a distribution from DCM in an amount equal to the fair value of one DCM common share on the date of the termination of service of the respective director. The number of DSUs payable to each director is determined by multiplying the total Director Fees payable by the percent elected to be paid in DSUs and dividing the product by the Fair Value of one DCM common share on the grant date. A liability for DSUs is measured at fair value on the grant date and is subsequently adjusted for changes in fair value. The DSUs payable is included in trade payables and accrued liabilities.

During the year ended December 31, 2023, 195,701 DSUs (2022 – 358,582 DSUs) were granted, and nil DSUs were paid out (2022 – nil). The carrying amount of the liability included in accounts payable and accruals relating to the 2,629,404 DSUs outstanding at December 31, 2023 was \$6,889 (December 31, 2022 – \$3,529 and 2,433,703 DSUs outstanding).

During the year ended December 31, 2023, an expense of \$3,360 (2022 – \$971) was recognized in the consolidated statement of operations related to DSUs granted of \$492 (2022 - \$573), and fair value adjustments of \$2,821 (2022 - \$398).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

18 Earnings per share

	For the year ended December 31, 2023	For the year ended December 31, 2022
BASIC EARNINGS PER SHARE		
shareholders	\$ (15,854)	\$ 13,966
Weighted average number of shares	50,832,543	44,062,831
Basic (loss) earnings per share	\$ (0.31)	\$ 0.32
DILUTED EARNINGS PER SHARE		
Net (loss) income for the year attributable to common shareholders	\$ (15,854)	\$ 13,966
Weighted average number of shares	50,832,543	44,062,831
Adjustments for calculation of diluted earnings per share:		
Options	—	1,235,008
Warrants	—	1,274,227
Weighted average number of shares in calculating diluted earnings per share	50,832,543	46,572,066
Diluted (loss) earnings per share	\$ (0.31)	\$ 0.30

For the year ended December 31, 2023, options to purchase up to 4,029,000 common shares were excluded from the computation of diluted earnings per share as their effect would have been anti-dilutive. Options to purchase up to 500,000 common shares and warrants to purchase up to 261,216 common shares were excluded from the computation of diluted earnings per share as they were out-of-the-money as of December 31, 2023.

During the year ended December 31, 2022, options to purchase up to 671,886 common shares and warrants to purchase up to nil common shares were excluded from the computation of diluted earnings per share as their effect would have been anti-dilutive.

19 Changes in working capital

Deferred revenue	591	673
	\$ 5,863	\$ (3,632)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

20 Assets Held for Sale

	Trenton, Ontario
At December 31, 2022	\$ 0
Acquisition of MCC (note 4)	25,800
Disposal	(25,800)
Reclassification from property, plant and equipment (note 7)	8,650
	\$ 8,650

On March 30, 2023 DCM entered into a sale and leaseback agreement to sell the MCC Oshawa warehouse facility subject to closing the acquisition. The transaction closed on June 8, 2023 (see notes 4 and 8).

As mentioned in note 11, during the year ended December 31, 2023, DCM announced its decision to close the Trenton, Ontario manufacturing facility and transfer production to its Brampton, Ontario manufacturing facility. In October 2023, DCM entered into an agreement to sell the facility subject to customary closing conditions and completed the sale in January 2024 (note 27). This sales transaction includes a one year leaseback arrangement with extension options for up to an additional six months to allow the Company sufficient time to complete the closure of this facility.

A summary of cost and accumulated depreciation of the Trenton facility as of December 31, 2023 is as follows:

	Trenton, Ontario
Cost	\$ 8,928
Accumulated Depreciation	(278)
	\$ 8,650

As the carrying amounts of this facility will be recovered through a sale transaction, this facility has been classified as an asset held for sale as of December 31, 2023. As of December 31, 2023, DCM measured the asset held for sale at the lower of its carrying amount and estimated fair value less cost to sell (level 3 fair value) of \$8,650.

21 Commitments and Contingencies

DCM and its subsidiaries are subject to various claims, potential claims and lawsuits. While the outcome of these matters is not determinable, DCM's management does not believe that the ultimate resolution of such matters will have a material adverse impact on DCM's financial position.

Directors and officers are indemnified by the Company for various items including, but not limited to, costs to settle lawsuits or actions due to their association with the Company, subject to certain restrictions. DCM has purchased directors' and officers' liability insurance to mitigate the costs of any potential future lawsuits or actions. The term of the indemnification covers the period during which the indemnified party served as a director or officer of the Company.

In the normal course of business, DCM has entered into agreements that include indemnities in favour of third parties, such as purchase and sale agreements, confidentiality agreements, engagement letters with advisors and consultants, leasing contracts and license agreements. These indemnification arrangements may sometimes require

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

such third parties to compensate counterparties for losses as a result of breaches in representations, covenants and warranties provided by the Company or as a result of litigation or other third-party claims or statutory sanctions that may be suffered by the counterparties as a consequence of the relevant transaction. In some instances, the terms of these indemnities are not explicitly defined. No accruals have been required to be made as at December 31, 2023 with respect to these agreements.

Executive employment agreements allow for additional payments of approximately \$4,940 if the individuals are terminated without cause, and approximately \$4,940 in the event of a change in control.

DCM makes contributions to the Québec Graphic Communication Pension Plan (the "GCPP"), based on a percentage of the wages of its unionized employees covered by the respective collective bargaining agreements, all of whom are employed at DCM facilities located in the Province of Québec.

The GCPP is a negotiated contribution defined benefit multi-employer pension plan which provides retirement benefits to unionized employees in the printing industry. The GCPP is administered by a joint Board of Trustees composed of representatives of participating employers and of the unions representing plan members in collective bargaining. Based upon the terms of those applicable collective agreements, DCM's estimated annual negotiated contribution to the GCPP for 2024 is \$445.

The GCPP's most recent funding actuarial report (as at December 31, 2022) disclosed a going concern surplus of 107.3% and that negotiated contributions are in excess of the current service cost of the plan. On a solvency basis (or wind up basis) the valuation shows a deficit on a solvency or wind up basis of 11.2%.

Bill 34 was adopted by Québec in April 2015 to clarify Québec pension legislation for negotiated contribution defined benefit multi-employer pension plans to, among other things:

- limit required employer contributions only to those amounts specified in the applicable collective agreements negotiated with the relevant unions;
- eliminate the employer's obligation to fund deficiencies; and
- require the Board of Trustees to develop and implement a recovery plan when the negotiated contributions are not sufficient to fund the plan, including the reduction of accrued benefits of all members.

22 Capital structure

DCM's objectives when managing its capital structure are:

- To seek to ensure sufficient liquidity to safeguard DCM's ability to continue as a going concern;
- To maintain a strong capital base so as to maintain shareholders', creditors', customers', suppliers' and market confidence; and
- To deploy capital to provide an appropriate investment return to its shareholders

DCM's capital structure consists of long-term debt (including the current portion) and shareholders' equity. DCM's primary uses of capital are to finance increases in working capital, make payments towards its long-term obligations, and fund investments in capital expenditures and business acquisitions.

DCM manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure in line with its present strategic plan, DCM may issue new shares. Management anticipates that any major acquisition or significant growth initiatives would be financed in part with additional equity and debt.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

DCM is not subject to any externally imposed capital requirements other than the covenants and restrictions under the terms of its Credit Facilities, including the requirement to meet certain financial ratios and financial conditions pertaining to permitted investments, acquisitions, lease agreements, dividends and subordinated debt.

DCM's capital structure is as follows:

	December 31, 2023	December 31, 2022
Credit facilities (note 13)	\$ 100,251	\$ 27,047
Lease liabilities (note 12)	155,315	39,802
Total long-term debt	\$ 255,566	\$ 66,849
Total equity	\$ 28,764	\$ 22,847

23 Financial instruments

DCM's financial instruments consist of cash, trade receivables, bank overdraft, trade payables and accrued liabilities, credit facilities, and lease liabilities, as indicated in DCM's statements of consolidated financial position as at December 31, 2023 and 2022. DCM does not enter into financial instruments for trading or speculative purposes.

FAIR VALUE OF FINANCIAL INSTRUMENTS

DCM's non-derivative financial instruments are comprised of cash, trade receivables, bank overdraft, trade payables and accrued liabilities, credit facilities, and lease liabilities. Non-derivative financial instruments are recognized initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs. Subsequent to initial recognition non-derivative financial instruments are measured as described below.

Non-derivative financial instruments at fair value through the profit and loss include restricted share units and director share units, which are recorded as a liability at fair value on the grant date and are subsequently adjusted for changes in the price of DCM's common shares through the consolidated statements of operations.

The fair value for other non-derivative financial instruments such as cash, trade receivables, bank overdraft, trade payables and accrued liabilities approximates their carrying value because of the short-term maturity of these instruments. Credit facilities are initially recognized at the discounted present value of the amounts required to be paid to derive their fair value and are then measured at amortized costs using the effective interest method. The fair values are not materially different from their carrying amounts since the interest payable on these borrowings is close to market rates.

CATEGORIES OF FINANCIAL ASSETS AND LIABILITIES

The carrying values and the fair values of DCM's financial instruments are classified into the categories listed below in accordance with IFRS 9.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

Financial liabilities at amortized cost ⁽²⁾	102,193	102,724
Financial liabilities FVTPL ⁽³⁾	7,030	7,030

*(1) Includes cash and cash equivalents, and trade receivables.**(2) Includes trade payables and accrued liabilities (excluding financial liabilities related to commodity taxes that are not contractual and that arise as a result of statutory requirements imposed by governments and, therefore, do not meet the definition of financial assets or financial liabilities), bank overdrafts, credit facilities, and lease liabilities (as IFRS 7 does not require disclosure of the fair value of leases, the fair value column in the table above reflects their carrying value).**(3) Includes RSUs and DSUs.*

Credit facilities are categorized as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs including own credit risk. RSUs and DSUs are categorized as level 2 inputs in the fair value hierarchy, given their valuations include inputs other than quoted prices for which all significant inputs are observable, either directly or indirectly. There were no transfers between levels 1, 2 or 3 during the year.

RISKS ARISING FROM FINANCIAL INSTRUMENTS

DCM is exposed to various risks as it relates to financial instruments. These risks and the processes for managing the risk are set out below.

CREDIT RISK

Credit risk is the risk of an unexpected loss if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments that potentially subjected DCM to credit risk consisted of cash and trade receivables. The carrying amount of assets included in the consolidated statements of financial position represents the maximum credit exposure.

DCM grants credit to customers in the normal course of business. DCM typically does not require collateral or other security from customers; however, credit evaluations are performed prior to the initial granting of credit terms when warranted and periodically thereafter. Normal credit terms for amounts due from customers call for payment within 0 to 60 days.

DCM has trade receivables from clients engaged in various industries, including financial institutions, insurance, healthcare, lottery and gaming, retailing, not-for-profit, energy and governmental agencies that are not concentrated in any specific geographic area. DCM does not believe that any single industry or geographic region represents significant credit risk. Credit risk concentration with respect to trade receivables is mitigated by DCM's large client base.

To measure the ECLs, trade receivables, including unbilled receivables, have been grouped based on similar credit risk characteristics, past due status and other relevant factors. The expected default rates are calculated based on management's estimate as well as historical credit losses. The historical loss rates are adjusted to reflect current and forward-looking information on economic factors affecting the ability of the customers to settle the trade receivable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

On that basis, the loss allowance as at December 31, 2023 was determined using default rates under the provision matrix for an amount of \$1,720 (2022 – \$1,565), of which \$1,197 (2022 – \$1,150) relates to unbilled receivables.

The following default rates are used to calculate the ECLs on billed receivables as at December 31, 2023 and December 31, 2022, respectively:

December 31, 2023	Total	Less than 30 days	Over 30 days	Over 60 days	Over 90 days
Default rates		0.11%	0.22%	0.30%	9.66%
Billed receivables balance	\$85,989	\$49,828	\$23,055	\$9,048	\$4,058
Billed receivables ECL ⁽¹⁾	\$523	\$54	\$50	\$27	\$392

December 31, 2022	Total	Less than 30 days	Over 30 days	Over 60 days	Over 90 days
Default rates		0.13%	0.13%	0.33%	22.60%
Billed receivables balance	\$41,554	\$26,316	\$10,369	\$3,291	\$1,578
Billed receivables ECL	\$415	\$34	\$13	\$11	\$357

The following default rates are used to calculate the ECLs on unbilled receivables as at December 31, 2023 and December 31, 2022, respectively:

December 31, 2023	Total	Less than 30 days	Over 30 days	Over 60 days	Over 90 days
Default rates		0.81%	0.91%	1.03%	13.44%
Unbilled receivables balance	\$33,687	\$22,308	\$2,753	\$1,358	\$7,268
Unbilled receivables ECL	\$1,197	\$181	\$25	\$14	\$977

December 31, 2022	Total	Less than 30 days	Over 30 days	Over 60 days	Over 90 days
Default rates		0.86%	1.56%	1.28%	15.75%
Unbilled receivables balance	\$14,641	\$3,840	\$2,765	\$1,327	\$6,709
Unbilled receivables ECL	\$1,150	\$33	\$43	\$17	\$1,057

At the end of each reporting period, management reassesses the default rates. Default rates are applied to the billed and unbilled receivable balances to calculate the credit default reserve. Management assesses the adequacy of this reserve quarterly, taking into account historical experience, current collection trends, the age of receivables and, when warranted and available, the financial condition of specific counterparties. When collection efforts have been reasonably exhausted, specific balances are written off. As at December 31, 2023 the Company has \$4,058 (5%) of its billed receivables that are over 90 days old (2022 - \$1,578 or 5%).

Judgment by management is required to determine both (a) the revenue and billed receivables to be recognized, where price concessions may need to be given to encourage customers to settle older amounts promptly as a result of billing issues under IFRS 15 (as revenue can only be recognized to the extent that it is highly probable that a significant reversal in the amount of revenue will not occur when the uncertainty associated with the variable consideration is subsequently resolved), and (b) ECL provisions required under IFRS 9 to reflect impairments of its trade receivables as a result of customers inability to settle the billed receivables. DCM has recorded a provision of \$400 within the billed receivable balance (and against revenue) for potential price concessions that may need to be given to customers, separately from the expected credit losses in the table above.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

The movement in DCM's expected credit loss provision for 2023 and 2022 are as follows:

	For the year ended December 31, 2023	For the year ended December 31, 2022
Balance – Beginning of year	\$ 1,565	\$ 1,283
Acquisition of MCC	384	—
Net reversals (write offs) of receivables during the year	861	648
Increase (decrease) in loan loss allowance	(1,090)	(366)
Balance – End of year	\$ 1,720	\$ 1,565

LIQUIDITY RISK

Liquidity risk is the risk that DCM may encounter difficulties in meeting obligations associated with financial liabilities as they become due.

The contractual undiscounted cash flows of DCM's significant financial liabilities are as follows:

December 31, 2023	Less than a year	1 to 3 years	4 years and greater	Total
Trade payables and accrued liabilities	\$ 75,766	\$ —	\$ —	\$ 75,766
Lease liabilities (note 12)	16,578	66,136	198,331	281,045
Credit facilities (note 13) ⁽¹⁾	14,440	86,467	24,736	125,643
Total	\$ 106,784	\$ 152,603	\$ 223,067	\$ 482,454

December 31, 2022	Less than a year	1 to 3 years	4 years and greater	Total
Trade payables and accrued liabilities	\$ 44,133	\$ —	\$ —	\$ 44,133
Lease liabilities	9,094	21,245	26,192	56,531
Credit facilities ⁽¹⁾	13,183	17,164	—	30,347
Total	\$ 66,410	\$ 38,409	\$ 26,192	\$ 131,011

- (1) Credit facilities as at December 31, 2023 subject to floating interest rates consisting of the Bank Credit Facility, expiring on April 24, 2026. As at December 31, 2023, the outstanding balances totaled \$44,009 and bore interest at a floating rate of 8.45% per annum. The amounts at December 31, 2023 include estimated interest totaling \$3,719 for 2024, \$3,719 for 2025 and \$1,859 for 2026. The estimated interest was calculated based on the total borrowings outstanding at the end of the year and the annual floating interest rate in effect as at December 31, 2023. Credit facilities at December 31, 2023 subject to fixed interest rates consisting of the FPD VI Credit Facility, expiring on December 17, 2026 and the FPD VI New Credit Facility expiring on April 21, 2028. As at December 31, 2023, the outstanding balances totaled \$57,857, of which \$7,857 bore interest at a fixed rate of 5.95% and \$50,000 bore interest at a fixed rate of 8.08% per annum. The amounts at December 31, 2023 include estimated interest totaling \$4,388 for 2024, \$3,778 for 2025, \$3,105 for 2026 and \$3,210 for 2027/2028.
- (2) Credit facilities at December 31, 2022 subject to floating interest rates consisting of the Bank Credit Facility, expiring on November 8, 2024, and the Bank Term Loan, expiring on May 8, 2024. As at December 31, 2022, the outstanding balance totaled \$5,869 for 2023 and \$5,913 for 2024, respectively, and bore interest at a floating rate of 6.95% and 9.95%, respectively, per annum. The amounts at December 31, 2022 include estimated interest totaling \$875 for 2023, and \$494 for 2024. The estimated interest was calculated based on the total borrowings outstanding at the end of the year and the annual floating interest rate in effect as at December 31, 2022. Credit facilities at December 31, 2022 subject to fixed interest rates consisting of the FPD IV Credit Facility, expiring on March 10, 2023, the FPD V Credit Facility, the FPD V Credit Facility expiring on May 15,

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

2023 and the FPD VI Facility expiring on December 15, 2026. As at December 31, 2022, the outstanding balances totaled \$15,536, of \$6,107 bore interest at a fixed rate of 6.95% per annum and \$9,429 bore interest at a fixed rate of 5.95% per annum. Monthly blended principal and interest payments of \$422 and of \$91, are due on the FPD IV and FPD V facilities respectively, and \$131 on the FPD VI facility. The amounts at December 31, 2022 include estimated interest totaling \$647 for 2023, \$432 for 2024, \$338 for 2025 and \$244 for 2026.

DCM also has contingent obligations in the form of letters of credit. DCM believes that the currently projected cash flow from operations and cash on hand will be sufficient to fund its currently projected operating requirements, including expenditures related to its growth strategy, payments associated with provisions as a result of on-going productivity improvement initiatives, payment of income tax liabilities, contributions to its pension plans, maintenance or investment in new capital expenditures, and interest and scheduled repayments of borrowings under its credit facilities.

While estimated forecast compliance with financial covenants is sensitive to key assumptions used for forecast revenues, gross margins and expenses (which in turn impact earnings before interest, income taxes, depreciation and amortization (EBITDA)), management are satisfied that the Company's forecasts and projections through to March 31, 2025 taking account of reasonably possible changes in results and other uncertainties will not result in any breach of the financial covenants on its credit facilities. As a result, the Company has concluded that it will have adequate access to liquidity to satisfy its obligations within the next fifteen months (note 1).

MARKET RISK**INTEREST RATE RISK**

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the financial instrument will fluctuate due to changes in market interest rates. Interest rate risk arises from interest bearing financial assets and liabilities. DCM's interest rate risk arises from credit facilities issuances at floating interest rates.

At December 31, 2023, \$44,009 of DCM's indebtedness outstanding was subject to floating interest rates of 8.45% per annum; a 1% increase/decrease in interest rates would have resulted in an increase/decrease in the loss by \$440 for the year ended December 31, 2023 (2022 – \$118), respectively. At December 31, 2023, \$7,857 was subject to a fixed interest rate of 5.95% per annum and \$50,000 was subject to a fixed interest rate of 8.08 per annum.

CURRENCY RISK

Currency risk is the risk that the fair value of future cash flows arising from a financial instrument will fluctuate because of changes in foreign currency exchange rates. In the normal course of business, DCM does not have significant foreign exchange transactions, and accordingly, the amounts and currency risk are not expected to have an adverse material impact on the operations of DCM. Management considers the currency risk to be low and does not hedge its currency risk; therefore, sensitivity analysis is not presented.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

* The net fair value (gains) losses on financial liabilities at fair value through profit or loss (RSUs and DSUs) was previously presented within wages and benefits in the prior years financial statements and has been disclosed separately this year in the table above (see also note 3).

25 Segmented information

The CEO of DCM is the CODM.

DCM has a single operating segment, being the Company as a whole, reflecting the manner in which the operating results are being reviewed by the CODM to make decisions about resources to be allocated and to assess the Company's performance. The recently acquired MCC business brought together two similar sized businesses with similar economic characteristics, particularly in terms of the nature of the products and services, production processes, type of customers and methods used to provide these products and services to customers.

Management evaluates the performance of its reportable segment based on income before finance costs, other income and income taxes. Certain corporate expenses, certain non-recurring expenses, interest expense, finance costs and income taxes are not taken into account in the evaluation of the performance of the reporting segment.

Revenue by geographical location of our customers is set out below:

26 Related party transactions

On March 15, 2018, DCM entered into a loan agreement with a key member of management, of \$107 to finance the purchase of Common Shares. The original maturity date was March 15, 2023, the loan term was subsequently extended by an additional three years. Interest will accrue at a rate of 3% per annum on the unpaid balance. The loan is unsecured and repayable upon maturity. As at December 31, 2023, the balance owing of \$114 (2022 – \$110) was included within other non-current assets in the consolidated statement of financial position.

COMPENSATION OF KEY MANAGEMENT

Key management personnel are deemed to be Directors on DCM's Board, the CEO, the President, the Chief Financial Officer and other members of the senior executive team. Compensation awarded to key management personnel, excluding compensation awarded to Directors, which are described below, included:

		For the year ended December 31, 2023		For the year ended December 31, 2022
Salaries and other short-term employee benefits	\$	3,473	\$	4,227
Termination and retirement benefits		1,567		—
Post-employment benefits		10		14
Share-based compensation expense		2,978		1,055
Total	\$	8,028	\$	5,296

During the year ended December 31, 2023, key management personnel (excluding compensation awarded to Directors) were granted 252,260 RSUs (2022 – 707,333 RSUs). Key management personnel (excluding compensation awarded to Directors) were issued 750,000 options to purchase Common Shares in 2023 (2022 - nil).

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2023 and 2022

(in thousands of Canadian dollars, except percentages, shares and per share amounts)

During the year ended December 31, 2023, DCM's general and administration expenses included an expense of \$2,978 (2022 – \$1,055) for these share-based compensation awards.

During the year ended December 31, 2023, DCM's general and administration expenses include a charge of \$3,360 (2022 – \$971) for DSU's issued to directors for the duties performed by DCM's Board, of which \$2,715 (2022 – \$398) relates to a fair value adjustment (note 17).

27 Subsequent event

On January 11, 2024, DCM completed the sale and leaseback of its Trenton, Ontario manufacturing facility, which was acquired as part of the Company's acquisition of MCC (note 4) and was classified on the consolidated balance sheet as an asset held for sale at the year end (note 20). Gross proceeds realized on the sale were \$9 million, and after deducting closing commissions, rent deposit, and other expenses, net proceeds were \$8.5 million.
