ARBOR METALS CORP.

NEWS RELEASE

ARBOR METALS COMPLETES PHASE 2 DRILLING AT JARNET LITHIUM PROJECT

Vancouver, Canada – March 20th, 2025 – Arbor Metals Corp. ("**Arbor**" or the "**Company**") (TSXV: ABR, FWB: 432) is pleased to announce the completion of its 2025 phase 2 diamond drilling program at its wholly owned Jarnet Lithium Project, located in the Corvette Lake Lithium Camp, Eeyou-Istchee Baie-James territory in Quebec North region.

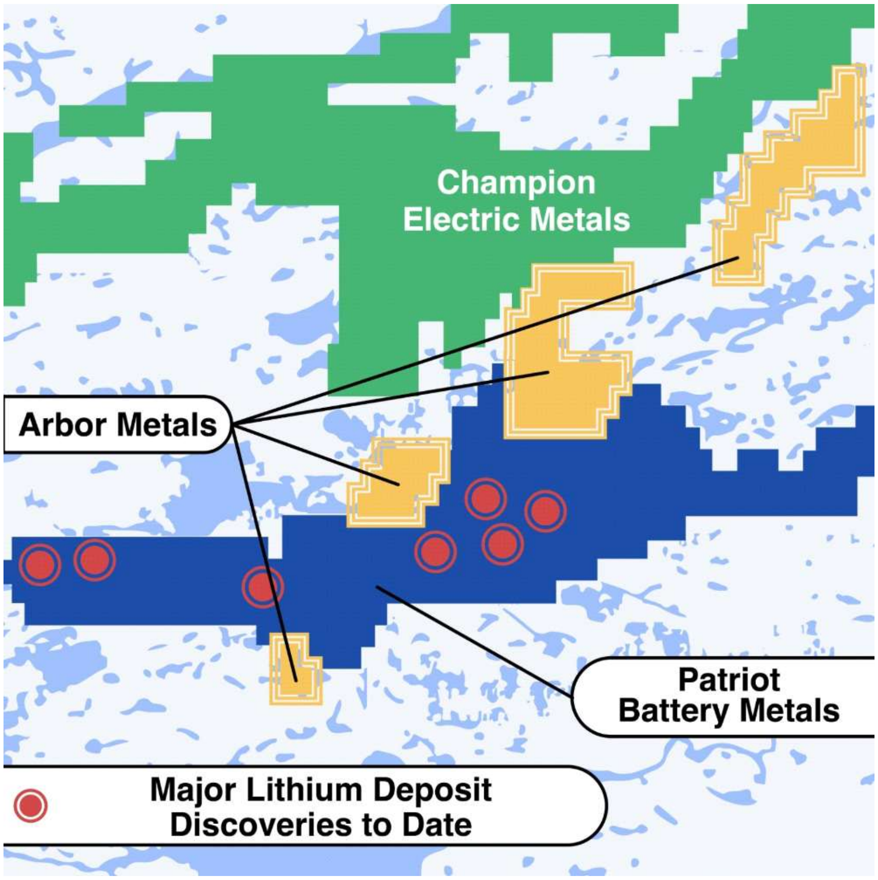
The Phase 2 drilling campaign completed a total of 16 NQ2 holes, for a combined drilling length of 3792 meters. Four distinct target areas were investigated based on results of the 2024 drill program. Drilling depths varied from 152m to 369m in length. All holes were drilled by Fusion drilling. Approximately 1300 samples have been sent for analysis, including blanks and standards to confirm lab quality.

Granitic pegmatites were noted and sampled in all 16 holes covering all target areas. Molybdenite was noted and pegmatite related in five drill holes. Molybdenite was recorded in three separate target zones. The host rock for the pegmatites is quartz monzonite and/or greywacke.

Mark Ferguson, President of Arbor, stated, "We are pleased to complete this important phase of our drilling program at the Jarnet Lithium Project. The results are promising, and we look forward to continuing our work in this highly prospective region as we move toward advancing the project. Our focus remains on delivering shareholder value while adhering to best practices in sustainability and responsible exploration."

Arbor is committed to conducting all of its exploration activities with a strong focus on environmental stewardship. The Company adheres to industry-leading environmental guidelines and strives to minimize its environmental footprint. Furthermore, Arbor continues to work collaboratively with local communities and other stakeholders to ensure its activities are aligned with the needs and concerns of the communities in which it operates, including ongoing engagement with indigenous groups to ensure their perspectives are respected and integrated into the project's development.

Martin Demers, PGeo, registered in the Province of Québec (OGQ No. 770), a consultant to Arbor and a qualified person under National Instrument 43-101 – *Standards of Disclosure for Mineral Projects*, has reviewed the technical contents of this news release and has approved the disclosure of the technical information contained herein.



About Arbor Metals Corp.

Arbor Metals Corp. is a mining exploration company focused on developing high-value, geographically significant mineral projects worldwide. Arbor is paving the way for advanced mineral exploration as it oversees world-class mining projects. The Company is confident that combining quality projects with proven strategies and a dedicated team will yield exceptional outcomes.

The **Jarnet, Corvette Lake and St. Pierre lithium projects**, located in the James Bay region of Quebec, comprises 83 map-designated claims, covering an area of approximately 5,606 hectares. The projects are contiguous to the Corvette-FCI property, where diamond drilling has confirmed significant lithium mineralization representing one of the highest-profile lithium exploration projects in the sector.

The **Kemlee Lake Lithium** project is strategically located three kilometers east of Rock Tech Lithium Inc.'s Aumacho claim blocks and twelve kilometers south of the Georgia Lake Project. The Project shares many geological similarities with the prolific Georgia Lake deposit, including bedrock geology and the presence of massive intrusive dykes. The primary target at the Project will be spodumene-bearing pegmatites hosted in metasediments.
