ABOUT INPUT

Input is an agriculture commodity streaming company with a focus on canola, the largest and most profitable crop in Canadian agriculture. The Company has developed several flexible and competitive forms of financing which help western Canadian canola farmers solve working capital, mortgage finance and canola marketing challenges and improve the financial position of their farms. Under a streaming contract, Input provides capital in exchange for a stream of canola via multi-year fixed-volume canola purchase contracts. To a farmer, Input is like a virtual grain company, buying canola and providing financial solutions. To canola buyers, Input is like a large virtual farm which produces and sells canola over a large geographically diverse footprint, but does not own the land, or equipment or operate the farm. In production terms, Input is the largest canola farm in the world.

Input plans to continue to grow and diversify its low cost canola production profile by entering into streaming contracts with canola farmers across western Canada. Input is focused on farmers with quality production profiles, excellent upside yield potential, and strong management teams.
