Equity shareholders' funds		<u>114,993</u>

The unaudited interim accounts were approved by the directors on 19 April 2012 and signed on their behalf by

Hugh Twiss
 Director

NOTES TO THE ACCOUNTS

The accounts cover the period from 1 January 2012 to 29 February 2012

1 Accounting policies

(a) Basis of accounting

The accounts have been prepared under the historical cost basis except for the measurement at fair value of investments and in accordance with applicable UK accounting standards and with the Statement of Recommended Practice Financial Statements of Investment Trust Companies ("the SORP") dated January 2009. All of the Company's operations are of a continuing nature.

(b) Going concern

The Company's Articles of Association require that at the annual general meeting of the Company held in 2010 and at every fifth year thereafter an ordinary resolution be put to shareholders to approve the continuation of the Company. The resolution put to the annual general meeting in 2010 was duly

The assets of the Company consist of securities that are readily realisable and accordingly, the directors believe that the Company has adequate resources to continue in operational existence for the foreseeable future. Therefore the Board has determined that it is appropriate for the financial statements to be prepared on a going concern basis.

(c) Valuation of investments

The Company's business is investing in financial assets with a view to profiting from their total return in the form of income and capital growth. This portfolio of financial assets is managed and its performance evaluated on a fair value basis in accordance with a documented investment strategy and information about the portfolio is provided internally on that basis to the Company's Board of directors and other key management personnel. Accordingly upon initial recognition the investments are designated by the Company as 'held at fair value through profit or loss'. They are included initially at fair value which is taken to be their cost. Subsequently the investments are valued at fair value which is measured as follows:

- UK listed investments are valued at quoted bid prices
- Investments listed overseas are valued at bid prices (where a bid price is available) or otherwise at fair value based on published price quotations

All fair value movements in investments are taken to the income statement. In accordance with the SORP the Company's profit and loss account is split between revenue and capital elements as can be seen in the income statement. Fair value movements on investments are taken to the capital column in the income statement.

(d) Capital gains and losses

Profits less losses on disposal of investments and investment holding gains and losses are taken to the capital column in the income statement and transferred to other capital reserves.

(e) Income

preference shares with no fixed maturity date is recognised on a time apportionment basis. Income from other fixed interest securities is recognised so as to reflect the effective interest rate on these securities. In accordance with FRS 16 – Current Taxation franked investment income is shown net of the related tax credits.

(f) Expenses

All expenses are accounted for on an accruals basis. The Board's expectation is that over the long term three-quarters of the Company's investment returns will be in the form of capital gains. The directors have determined that the proportion of the annual management fees that relates to the maintenance or enhancement of the valuation of investments is 80%. On this basis the Company charges to capital 75% of that proportion (i.e. 60% of total annual management fees) and 75% of its finance costs. The balance of the management fees are charged to revenue. All performance fees are charged to capital. Expenses which are incidental to the acquisition of an investment are charged to the income statement and included within gains/losses on investments. Expenses which are incidental to the disposal of an investment are deducted from sale proceeds and go to the income statement indirectly.

(g) Taxation

The tax effect of different items of expenditure is allocated between the capital return and revenue return using the Company's effective rate of tax for the year. In line with the recommendations of the SORP, the allocation method used to calculate tax relief on expenses presented against capital returns in the income statement is the 'marginal basis'. Under this basis, if taxable income is capable of being offset entirely by expenses presented in the revenue column of the income statement, then no tax relief is transferred to the capital return column.

Deferred taxation is provided on all timing differences that have originated but not been reversed by the balance sheet date other than those differences regarded as permanent. Timing differences arise from the inclusion of items of income and expenditure in taxation computations in periods different from those in which they are included in financial statements. Any liability to deferred tax is provided at the average rate of tax expected to apply. Deferred tax assets and liabilities are not discounted to reflect the time value of money. The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

(h) Foreign currency

Transactions denominated in overseas currencies during the year are translated into sterling at the appropriate daily exchange rate. Assets and liabilities denominated in overseas currencies at the balance sheet date are translated into sterling at the exchange rate ruling at that date. Differences arising from translation at this rate of exchange are dealt with in the income statement as a capital item and then transferred to capital reserves.

(i) Bank borrowings

Interest-bearing bank loans and overdrafts are recorded as proceeds received net of direct issue costs. Finance costs including premiums payable on settlement or redemption and direct issue costs are accounted for on an accruals basis in the income statement using the effective interest rate method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

	Revenue return £'000	Capital return £'000	Total £'000
2 Taxation			
Irrecoverable withholding tax	-	-	-
Tax on expenses charged to capital	52	(52)	-
	<u>52</u>	<u>(52)</u>	<u>-</u>

3 Return per share

The return per share is based on the net gain attributable to the shares of £7 856 000 and on the 89 732 411 weighted average number of shares in issue during the period

The revenue return per share is based on the net revenue attributable to the shares of £980,000 and on the 89 732 411 weighted average number of shares in issue during the period

The capital return per share is based on the net capital gain attributable to the shares of £6,876,000 and on the 89 732 411 weighted average number of shares in issue during the period

4 Investments held at fair value through profit or loss	£'000
