

Orefinders Announces Investor Webinar February 15, 2018 at 11am EST

TORONTO, Feb. 5, 2018 /CNW/ - Orefinders Resources Inc. ("Orefinders" or the "Company") (TSX.V: ORX) is pleased to announce that it will be hosting an investor webinar on Thursday, February 15, 2018 at 11:00 am Eastern time. The webinar will be led by Orefinders' CEO Stephen Stewart, where he will be presenting the Company's corporate presentation and detailing its recent milestones including:

1. Acquisition and consolidation of the nine Knight Project assets, including the former producing Tyrenite, Minto, Porphyry Lake, Duggan and Mann projects (see January 5, 2018 news release),
2. Mirado's Open Pit Preliminary Economic Assessment (see January 15, 2018 news release), and
3. Battery metals project aggregator spin off company anchored by Orefinders 100% owned former producing silver-cobalt Mann Mines near Cobalt, Ontario (see January 30, 2018 news release).

"2018 year to date has seen Orefinders reach three major milestones, with the consolidation of the Knight Project assets, our PEA on the Mirado and most recently the announcement of a new company to capitalize on the huge demand within the Canadian battery metals sector. Each milestone was a long time in the making, however they all came to fruition in early 2018.

Consequently, there is a lot of information to absorb and we see the need to detail our plans and explain the inherent value that each of these initiatives provides to shareholders. The junior market is full of inefficient valuations, both to the upside and the downside. When investors take the time to listen to Management and then do their own due diligence, a well-informed investor can then identify the arbitrage opportunities between price paid and value received. Accordingly, direct management to market communication is critical as it is the most accurate source of information for investors to make such well-informed decisions." said Stephen Stewart Orefinders' CEO.

To register for the webinar, please follow this link:
