For Immediate Release

Arcology Releases Sourcecode for Public Review on Github

Debut of Arcology's Public Code Repository is a Show of Confidence in Team's Work-To-Date and Ongoing Fulfillment of 2021 Roadmap

VANCOUVER, BC, CANADA (Feb 16th, 2021) – Codebase Ventures Inc. ("Codebase" or the "Company") (CSE: CODE - FSE: C5B – OTCQB: BKLLF) announces that the Company's holding, Arcology, a next-generation AI blockchain ecosystem with proven scalability and speed, has published a portion of its source code on Github.

The public release of this code demonstrates the team's confidence and commitment to openness, and broadcasts that they welcome feedback by third-party developers and other experts in the blockchain community.

The news follows January's announcement that Arcology's Testnet 2.0 was successfully tested for speed, scale and stability.

"With trust and transparency so important to the blockchain community, it's critical that Arcology operate fully in the open," says Laurent Zhang, Arcology's founder and president. "That's why this is such an important step. We look forward to creating a community of active developers who will build their applications with us.

Arcology is a revolutionary blockchain system designed to compete with market leader Ethereum and other ecosystems that employ smart contracts to host decentralized apps for finance, gaming and other commercial sectors. Tests-to-date support Mr. Zhang's claims that Arcology will outperform Ethereum, et al, for speed and scale.

In addition to portions of Arcology's sourcecode, the Github repository includes the benchmark suite that was featured in earlier tests.

As a live production repository, Arcology's code will be revised and updated frequently as the team releases new features and further meets the company's 2021 roadmap.

The repository can be reached via Arcology's website, https://arcology.network.

Forward Looking Statements

Certain information set forth in this news release may contain forward-looking statements that involve substantial known and unknown risks and uncertainties. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding future financial position, business strategy, use of proceeds, corporate vision, proposed acquisitions, partnerships, joint-ventures and strategic alliances and co-operations, budgets, cost and plans and objectives of or involving the Company. Such forward-looking information reflects management's current beliefs and is based on information currently available to management. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "predicts", "intends", "targets", "aims", "anticipates" or "believes" or variations (including negative variations) of such words and phrases or may be identified by statements to the effect that certain actions "may", "could", "should", "would", "might" or "will" be taken, occur or be achieved. A number of known and unknown risks, uncertainties and other factors may cause the actual results or performance to materially differ from any future results or performance expressed or implied by the forward-looking information. These forward-looking statements are subject to numerous risks and uncertainties, certain of which are beyond the control of the Company including, but not limited to, the impact of general economic conditions, industry conditions and dependence upon regulatory approvals. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements. The Company does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by securities laws.
