

Kinaxis Recognized as One of Canada's Top Small & Medium Employers for 2016

Supply Chain Management Cloud Provider Wins Award for the Third Straight Year

Ottawa, Canada, March 29, 2016 – Kinaxis®, provider of RapidResponse®, delivering cloud-based SCM and S&OP applications, has again been named one of **Canada's Top Small & Medium Employers**.

First created in 2014 by the editorial team at Canada's Top 100 Employers, Kinaxis has won the national honor every year since its inception. Designed to recognize outstanding private-sector commercial organizations with fewer than 500 employees, the award helps Canadians learn what the most innovative small and medium employers have to offer.

"Given our recent rapid growth, we're thrilled to again be recognized as one of Canada's Top Small & Medium Employers," says Megan Paterson, Vice President of Human Resources at Kinaxis. "We believe no matter the size of the business, employee satisfaction should always be a priority. We aim to provide our team ample opportunity to be adventurous and self-empowered in their roles, encourage them to be real in their interactions with each other and our customers, and to laugh often—after all, it is a key ingredient to a happy, healthy life!"

This year's winners are featured in a special magazine published nationally in today's issue of The Globe and Mail. They will also be recognized at a special awards presentation this afternoon at the Toronto Region Board of Trade.

A full list of recipients, including the reasons why Kinaxis and other companies were chosen, can be found online at canadastop100.com/sme. For more information on career opportunities at Kinaxis, visit kinaxis.com/careers.

About Kinaxis

Kinaxis is a leading provider of cloud-based subscription software that enables our customers to improve and accelerate analysis and decision-making across their supply chain operations. The supply chain planning and analytics capabilities of our product, RapidResponse, create the foundation for managing multiple, interconnected supply chain management processes. By using the single RapidResponse product instead of combining individual disparate software solutions, our customers gain visibility across their supply chains, can respond quickly to changing conditions, and ultimately realize significant operating efficiencies.
