- Transaction volume increased **35.2% year-over-year in February 2026**
- Transaction volume increased **17% year-over-year in January 2026**

VANCOUVER, B.C., March 12, 2026 – Inverite Insights Inc. (“Inverite”) (CSE: INVR) (OTC: INVRD) (FSE: 2V0), a Canadian risk infrastructure company providing real-time financial data and decisioning signals, specializing in real-time bank verification, income and affordability analytics, and AI-driven risk modeling and fraud prevention solutions, is pleased to announce strong revenue and transaction volume performance in the first two months of 2026. The Company continues to benefit from a strong pipeline of new financial industry partners and favorable market trends supporting increased adoption among both existing and new platform partners. Inverite’s proprietary AI analytics platform has also delivered its strongest start to a year on record, reflecting continued growth in platform usage across lenders and fintech partners.

Performance to date in 2026, reflects continued commercial traction as Inverite scales its platform. The Company is experiencing strengthening demand for its real-time financial intelligence and risk decisioning signals among lenders and fintechs. Increased platform activity supported both revenue growth and higher transaction volumes as lenders and fintech partners expanded their use of Inverite’s platform. As platform adoption continues to expand, Inverite’s data-driven risk signals become increasingly robust, helping lenders and fintech partners make faster and more informed financial decisions.

The result is also significant in the context of broader Canadian market trends. As Canada advances toward consumer-driven banking and the financial ecosystem places greater emphasis on secure, permissioned data sharing, lenders, fintechs, and financial institutions are increasingly seeking trusted infrastructure to access financial data and generate reliable risk signals for verification, adjudication, and fraud mitigation. At the same time, rising fraud pressures and increasingly sophisticated financial crime are driving demand for stronger risk decisioning tools.

“Revenue performance to date is another encouraging signal that Inverite’s risk infrastructure is gaining traction,” said Karim Nanji, CEO of Inverite. “As financial institutions focus more on fraud prevention, secure data access, and better underwriting signals, the need for real-time, permissioned financial intelligence continues to grow. Our focus remains on building the infrastructure that helps lenders and fintechs make better decisions using real-time financial data.”

**About Inverite Insights Inc.**
