About the Integrous Big Hearts, Big Ideas Growth Conference

Welcome to the 2024 Integrous Big Hearts, Big Ideas Growth Virtual Conference, where the nexus of innovation, ***big investment ideas*** and charitable giving all converge in a dynamic digital space.
The focus of this conference is to present smaller market cap companies that we believe are poised to be much bigger due to innovation, positioning, and increased visibility.
At the same time, we want to demonstrate compassion and realize that while we can pursue profits in our portfolios, ***giving back*** pays dividends in ways that benefit humanity and society. We truly believe that the two do go hand in hand.
Step into the future with us at the 2024 Integrous Big Hearts, Big Ideas Growth Conference, an unparalleled gathering where the ***pulse*** of innovation ***harmonizes*** with the ***rhythm*** of investment and charitable giving on a virtual platform.

Our carefully curated agenda features thought leaders, industry pioneers, and visionaries who will share insights on the latest trends, disruptive technologies, and emerging market dynamics that are shaping the future.

The conference will consist of company presentations (Public, and a select few Private), 1x1's, as well as presentations from some selected charities that we would like to highlight.
As we navigate the intersection of innovation, investment and ***giving***, the conference aims to spark opportunities for growth. Join us in this digital format where ideas take flight, investments find purpose, and the future unfolds in real-time.
Welcome to a revolution in connectivity, where the 2024 Integrous Big Hearts, Big Ideas Growth Conference sets the stage for a new era of investment, inspiration, and progress.

About Nanalysis Scientific Corp. (TSXV: NSCI, OTCQX: NSCIF, FRA: 1N1)

Nanalysis Scientific Corp. operates two primary businesses: Scientific Equipment and Security Services. Within its Scientific Equipment business is what the Company terms "MRI and NMR for industry". The Company develops and manufactures portable Nuclear Magnetic Resonance (NMR) spectrometers or analyzers for laboratory and industrial markets. The NMReady-60™ was the first full-feature portable NMR spectrometer in a single compact enclosure requiring no liquid helium or any other cryogens. The Company has followed-up that initial offering with new products and continues to have a strong innovation pipeline. In 2020, the Company announced the launch of its 100MHz device, the most powerful and most advanced compact NMR device ever brought to market.

The Company's devices are used in many industries (oil and gas, chemical, mining, pharma, biotech, flavor and fragrances, agrochemicals, law enforcement, and more) as well as numerous government and university research labs around the world. The Company continues to exploit new global market opportunities independently and with partners. With its partners, the Company provides scientific equipment sales and maintenance services globally.

In 2022, through its subsidiary KPrime, the Company was awarded a five-year, $160 million contract with the Government of

Canada to provide maintenance services for passenger screening equipment in Canadian airports. This has resulted in the expansion of the Company's Security Services business. The Company is providing airport security equipment maintenance services for the Government of Canada in each province and territory of Canada. In addition, the Company provides commercial security equipment installation and maintenance services to a variety of customers in North America.
