Toronto, Ontario--(Newsfile Corp. - August 14, 2024) - [EarthLabs Inc.](#) (TSXV: SPOT) (OTCQX: SPOFF) (FSE: 8EK0) ("EarthLabs" or the "Company") proudly announces the launch of *EarthLabs Expeditions*, a bold new reality documentary series set to revolutionize how audiences experience the junior mining and exploration industry. The series debuts with its first featured company, Surge Battery Metals (TSXV: NILI) (OTCQX: NILIF) (FSE: DJ5C), offering an in-depth, unfiltered and behind-the-scenes look at their project and the broader world of mineral exploration.

EarthLabs Expeditions is an industry-first, 'off-the-beaten-path' travel documentary meets junior mining, exploration video series. It's an epic journey into the unknown, where:

- Adventure has no script.
- Discovery has no limits.
- The truth is raw, real, and riveting.

Limited to just 10 Expeditions per year, *EarthLabs Expeditions* spotlights companies with significant discoveries, impactful projects, and compelling stories. Hosted by the charismatic and fearless Jonathan Brazeau, the show takes viewers on a journey that goes beyond boardrooms and polished presentations to explore the real, gritty work of the junior mining industry. Jonathan travels the world, getting his boots on the ground, meeting with industry leaders, workers, and the people who make up this dynamic sector.

EarthLabs Expeditions highlights not just the challenges but also the pride and dedication of those whose work is essential yet often goes unnoticed.

Episode 1 - Surge Battery Metals

The inaugural episode of EarthLabs Expeditions features a visit to [Surge Battery Metals](#) (TSXV: NILI) (OTCQX: NILIF), a company dedicated to securing the domestic lithium supply chain through its Nevada North Lithium Project. This project focuses on exploring high-grade, near-surface lithium deposit in Nevada, USA—a crucial resource for powering the electric vehicles of tomorrow. As global demand for sustainable energy solutions grows, Surge Battery Metals is at the forefront, actively exploring and developing battery-grade metals that could power the future of green energy.
