Clarmin Explorations Inc. Announces Geochemical Program to Commence at its Arlington Property, British Columbia

May 29, 2018 – Vancouver, British Columbia. **Clarmin Explorations Inc.** (“**Clarmin**”) (TSXV: CX) is pleased to announce that it will commence a geochemical soil and rock sampling program on the Arlington Property in late May 2018. The Arlington Property consists of three mineral tenures (covering 649.3056ha) and is situated in the Arrow Boundary District of South central British Columbia and is 17km north of Beaverdell and 67km south of Kelowna, B.C.

The purpose of the 2018 geochemical program will be to carry out infill soil and rock samples on the identified targets from the 2017 working program. In 2017, at the northern grid Clarmin discovered a new historical mineral occurrence, returning attractive precious and base metal results including samples of 22.7g/t Ag & 1.07% Cu, and of 5.2g/t Ag & 0.14% Cu. Soil results from the 2017 program highlight elevated and anomalous Cu-Ag soil geochemical anomalies which remain open to extension. Also in 2017, at the southern grid, soil lines from the 2017 field program will be extended to the south to cover open anomalous soil and rock geochemical results, highlighted by newly discovered historical mineral occurrences returning up to 211.0 g/t Ag, 11.7 g/t Au and 3.22% Cu.

Clarmin also plans to undertake additional sampling on the Arlington 3 claim in order to locate the Black Minfile occurrence, where a composite chip sample collected in 1988 returned 52.69g/t Ag, 0.68g/t Au, 1.72% Cu and 1.19% Mo from a quartz vein.

About Clarmin

Clarmin is engaged in the acquisition and exploration of its mineral property located in British Columbia, Canada. Clarmin currently has an option to acquire a one hundred percent (100%) undivided interest in the Arlington Property, which is situated approximately 67 kilometres south of Kelowna, British Columbia.

The Proceeds will be used by Clarmin to fund its exploration program on the Arlington Property and for general working capital purposes.

Richard Kemp, P. Geo, a Qualified Person and consultant of Clarmin, has reviewed and approved the technical information contained in this news release.

Forward Looking Information

Information set forth in this press release contains forward-looking statements relating to the use of proceeds, are made as of January 10, 2018 and are based on assumptions as of that date. These statements reflect management’s current estimates, beliefs, intentions and expectations; they are not guarantees of future performance. Clarmin cautions that all forward looking statements are inherently uncertain and that actual performance may be affected by a number of material factors, many of which are beyond Clarmin’s control. Such factors include, among other things: risks and uncertainties relating to exploration and development; the ability of Clarmin to obtain additional financing; Clarmin’s limited operating history; the need to comply with environmental and governmental regulations; potential defects in title to Clarmin’s properties, fluctuations in currency exchange rates; fluctuations in the prices of commodities; operating hazards and risks; competition and other risks and uncertainties, including those described in Clarmin’s Prospectus dated December 11, 2017 filed with the Canadian Securities Administrators and available on www.sedar.com. Accordingly, actual and future events, conditions and results may differ materially from the estimates, beliefs, intentions and expectations expressed or implied in the forward looking information. Except as required under applicable securities legislation, Clarmin undertakes no obligation to publicly update or revise forward-looking information.
