COMPANIES HOUSE

Statement of Directors' Responsibilities in Respect of the Interim Accounts

Section 838 of the Companies Act 2006 requires the Directors to prepare interim accounts for the period from 1 May 2009 to 31 July 2009 for the purpose of determining the amount the Company may distribute by way of interim dividends. The interim accounts are required to give a true and fair view of the state of the Company's affairs and profit or loss for the period and to be properly prepared in terms of Section 838 of the Companies Act 2006 subject to matters which are not material for determining whether the proposed distribution would contravene the relevant requirements of the Companies Act 2006.

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Midas Income & Growth Trust

Total Shareholders' funds		<u><u>40,305</u></u>

These accounts were approved by the Directors on 20 August 2009 and signed on behalf of the Board of Directors by :

H V Reid
Chairman

Notes to the Accounts

For the period 1 May 2009 to 31 July 2009

1. Accounting policies

(a) The financial statements have been prepared in accordance with UK Generally Accepted Accounting Practice ('UK GAAP') and with the Statement of Recommended Practice 'Financial Statements of Investment Trust Companies and Venture Capital Trusts' (issued in January 2009). They have also been prepared on the assumption that approval as an investment trust will continue to be granted. The financial statements have been prepared on a going concern basis.

(b) Revenue, expenses and interest payable - Income from investments (other than special dividends), including taxes deducted at source, is included in revenue by reference to the date on which the investment is quoted ex dividend. Special dividends are credited to capital or revenue, according to the circumstances. Short term deposits, expenses and interest payable are treated on an accruals basis. All expenses are charged to revenue except where (i) they directly relate to the acquisition or disposal of an investment, in which case, they are added to the cost of the investment or deducted from the sale proceeds, and (ii) expenses are charged to capital reserve - realised where a connection with maintenance or enhancement of the value of the investments can be demonstrated. In this respect the management fee and loan interest on the £7.00m bank loan have been allocated 50% to capital and 50% to the revenue account.

(c) Investments - Investments have been designated upon initial recognition as fair value through the profit or loss. Investments are recognised and de-recognised at trade date where a purchase or sale is under a contract whose terms require delivery within the time frame established by the market concerned, and are initially measured as fair value. Subsequent to initial recognition, investments are valued at fair value. For listed investments, this is deemed to be bid market prices or closing prices for SETS (London Stock Exchange's electronic trading service) stocks sourced from The London Stock Exchange. Unlisted investments are included at valuations determined by the Directors using primary valuation techniques, such as earnings multiples, recent transactions and net assets, which equated to their fair value.

(d) Dividends payable - Interim and final dividends are recognised in the period in which they are paid.

(e) Deferred taxation - The charge for taxation is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred taxation is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in future against which the deferred tax asset can be offset.

Due to the Company's status as an investment trust company, and the intention to continue meeting the conditions required to obtain approval in the foreseeable future, the Company has not provided deferred tax on any capital gains and losses arising on the revaluation or disposal of investments.

Midas Income & Growth Trust
