

# FIDELITY ASIAN VALUES PLC

## SEEKING UNRECOGNISED GROWTH POTENTIAL

Fidelity Asian Values PLC aims to produce long-term capital growth through investment in an actively managed portfolio of equities primarily in the South East Asian region (excluding Japan). The portfolio manager uses a bottom-up investment approach in the stock selection and portfolio construction process.

Ordinary shares in issue:	59,191,261
Launch date:	13/06/1996
Portfolio Manager:	John Lo
Appointed to trust:	01/09/2001
Years at Fidelity:	19

Investment available via ISA and Share Plan

### PORTFOLIO MANAGER

*This year markets have been impacted by heightened volatility, weak macro economic data and poor investor sentiment. Having maintained my general positioning and growth tilt the fund's performance has been hurt. Looking forward, the chase for defensiveness and yield is beginning to look stretched and there are signs that the market is moving back in-line with fundamentals. Furthermore the impact of QE3 and bond buying programmes by the ECB have been positive. Even as the momentum of growth in China is slowing, the region remains in the fast lane of a two-speed global economy and continues to offer compelling investment opportunities in quality companies.*

John Lo, Portfolio Manager

### INVESTMENT HIGHLIGHTS

The trust continued to outperform its benchmark this month as high conviction holdings within the information technology sector rose owing to the twin impact of rising demand for smartphone devices, which benefited component manufacturers, and increased internet usage, which bolstered internet-based service providers. The underweight exposure telecommunications services also helped as providers ended the period in negative territory. Structural growth drivers such as rising domestic consumption, urbanisation and intra-regional trade continue to support the region. Furthermore, recent policy stimulus measures unveiled by major central banks around the world, including China, are likely to support economic activity.

### FIVE YEAR PERFORMANCE COMPARISON

### SINGLE YEAR PERFORMANCE (5 YEARS ENDING OCTOBER)

## GLOSSARY

## NAV

The total value of a company's assets less the total value of its liabilities is its net asset value (NAV). For valuation purposes it is common to divide net assets by the number of shares in issue to give the net assets per share. NAV calculations can include or exclude current financial year income. For the purposes of this factsheet, they are valued with assets including income and costs and with debt valued at the market.

## DISCOUNT

If the share price of an investment company is lower than the net asset value (NAV) per share, the company is said to be trading at a discount. The discount is shown as a percentage of the NAV.

## GEARING EXPOSURE

Investment trusts have the ability to borrow additional money to invest, known as gearing. The trust has the ability to use bank loans and bank overdrafts to increase its exposure to stocks.

## OVERWEIGHT/UNDERWEIGHT

If a stock is deemed "overweight" this indicates that the portfolio has a higher exposure to a stock compared to its benchmark. If a stock is deemed "underweight" this indicates that portfolio has a lower exposure to a stock compared to its benchmark.

## TOP 10 INVESTMENTS

The ten largest investments by value are valued at fair value and shown as a percentage of total assets less current liabilities, excluding loans.

## SECTOR/GEOGRAPHICAL BREAKDOWNS

These are expressed as a percentage of total portfolio and cash.

## FAIR VALUE

The fair value of the listed investments is measured at bid prices or last prices quoted, depending on the convention of the exchange on which they are listed. Where permitted, unlisted investments, where there is not an active market, are valued using an appropriate valuation technique so as to establish what the transaction price would have been and derivative instruments are valued at the quoted trade price for the contract.
