1.2 – Overall Performance

Nature of Business

GSP Resource Corp. (“GSP” or the “Company”) was incorporated as “GSP Resource Corp.” under the Business Corporations Act (British Columbia) on February 19, 2018.

The Company’s principal business activity is the exploration of mineral properties. The Company currently conducts substantially all of its operations in Canada in one business segment.

The head office and principal address of the Company is 1619 - 777 Dunsmuir Street, Vancouver B.C., V7Y 1K4.

On February 23, 2018, the Company entered into the Olivine Option Agreement with Platinum Belt Resources Inc., the Optionor, to acquire a 100% interest in 25 mineral claims comprising the Olivine Property located in the Similkameen Mining Division in the Province of British Columbia.

On January 30, 2020, the Company signed an option agreement to acquire 100% of the Alwin copper gold-silver project located in the Similkameen Mining Division, British Columbia.

On April 15, 2024, the Company entered into an acquisition agreement to acquire a 100% interest in the Mer Claims in the Highland Valley Copper Camp of British Columbia. The two Mer claims are comprised of 185 hectares in the Kamloops Mining Division. See “Exploration and Evaluation Assets”.

The Company has never generated revenue or positive cash flows from operations. For the Nine months ending February 28, 2026, the Company reported a net loss of \$(510,004), cash used in operating activities of \$(378,425), and an accumulated deficit of \$(3,264,468). For the Fiscal year ended May 31, 2025, the Company reported a net loss of \$(551,260), cash used in operating activities of \$(572,202), and an accumulated deficit of \$(3). The Company’s ability to continue its operations as intended is dependent on its ability to obtain necessary financing and raise capital sufficient to cover its operating costs.

Operations during the Nine months ended February 28, 2026, and during the fiscal year ended May 31, 2025, were primarily related to obtaining the necessary financing, as well as conducting exploration programs on the Alwin Property.

During the Nine months ended February 28, 2026, the Company incurred exploration and evaluation assets expenditures in the amount of \$85,883, and during the fiscal year ended May 31, 2025, the Company incurred exploration and evaluation assets expenditures in the amount of \$814,005. See “Exploration and Evaluation Assets”.

The Company has a history of no operating earnings. The Company had a negative operating cash flow in its most recently completed financial year and will continue to for the foreseeable future.

An investment in a natural resource company involves a significant degree of risk. The degree of risk increases substantially where the company’s properties are in the exploration stage as opposed to the development stage. The mineral exploration and mining business is competitive in all of its phases.

In the event that the Company’s exploration program is successful, the Company will require additional financing in order to further develop the Company’s property. The Company may not have enough funds to carry out its Phase II exploration program on the Olivine Property and additional financing may be required.

Management Discussion and Analysis For the Nine Months ended February 28, 2026

1.2 – Overall Performance (cont'd...)

Nature of Business (cont'd...)

The property of the Company does not contain any known body of commercial ore. The marketability of natural resources which may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. The grade of any ore ultimately mined from a mineral deposit may differ from that produced from drilling results. Mining operations generally involve a high degree of risk.

There is a degree of uncertainty attributable to the calculation of reserves, resources and corresponding grades being dedicated to future production. See “RISK FACTORS AND UNCERTAINTIES”.

Financing

During the Nine months ended February 28, 2026, the Company issued 2,000,000 flowthrough common shares pursuant to a non-brokered private placement. and an additional 200,000 common shares pursuant to the exercise of warrants. During the fiscal year ended May 31, 2025, the Company issued common shares of the Company pursuant to private placements of flow through and non-flowthrough common shares, for the acquisition of mineral interests, and for the exercise of stock options. See “Share Capital”.

1.7 – Capital Resources

The capital resources of the Company as of February 28 2026, are primarily its cash of \$164,130 (May 31, 2025 - \$428,023). The Company has raised sufficient funds to conduct any anticipated operating expenses, to conduct exploration programs or for future acquisitions. The Company will require additional financing to fund future projects. The Company anticipates funding future expenditures additional equity subscriptions, such as private placements or through the exercise of warrants and options. In light of the continually changing financial markets, there is no assurance that funding by equity subscriptions will be possible at the times required or for the amounts desired or that it can be obtained on terms acceptable to the Company and its shareholders.

If additional funds are raised through the issuance of equity securities, the percentage ownership of current shareholders will be reduced, and such equity securities may have rights, preferences, or privileges senior to those of the holders of the Company's Common Shares

1.13 – Changes in Accounting Policies

Adoption of new accounting standards

The new standards, or amendment to standards and interpretations that were adopted by the Company, effective June 1, 2025, are as follows:

Disclosure of Accounting Policies (Amendments to IAS 1)

In January 2020, the IASB issued amendments to IAS 1, Presentation of Financial Statements, to provide a more general approach to the presentation of liabilities as current or non-current based on contractual arrangements in place at the reporting date.

These amendments:

- specify that the rights and conditions existing at the end of the reporting period are relevant in determining whether the Company has a right to defer settlement of a liability by at least twelve months.
- provide that management's expectations are not a relevant consideration as to whether the Company will exercise its rights to defer settlement of a liability; and
- clarify when a liability is considered settled.

On October 31, 2022, the IASB issued a deferral of the effective date for the new guidance by one year to annual reporting periods beginning on or after January 1, 2025, and is to be applied retrospectively. There was no impact on the Company's financial statements upon the adoption of these amendments.

New accounting standards issued but not yet effective

IFRS 18, Presentation and Disclosure in Financial Statements, which will replace IAS 1, Presentation of Financial Statements aims to improve how companies communicate in their financial statements, with a focus on information about financial performance in the statement of profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7 Statement of Cash Flows. IFRS 18 is effective from January 1, 2027. Companies are permitted to apply IFRS 18 before that date. The Company is currently assessing the impact of adopting this new pronouncement.

1.14 – Financial Instruments

Fair value of financial instruments

The Company applied the following fair value hierarchy which prioritizes the inputs used in the valuation methodologies in measuring fair value into three levels:

The three levels are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 – inputs to valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The Company's financial instruments consist of cash, marketable securities, accounts payable and accrued liabilities and due to related parties. The carrying value of cash, accounts payable and accrued liabilities and due to related parties are carried on the statements of financial position at amortized cost and the fair values of these financial instruments approximate their carrying value due to their short-term nature. Marketable securities are recorded at fair value based on the quoted market price in active markets at the recording date, which is consistent with Level 1 of the fair value hierarchy.

The Company's financial instruments are exposed to certain financial risks, including liquidity risk, credit risk and interest rate risk.

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. The Company is exposed to credit-related losses in the event of non-performance by the counterparties. The carrying amounts of financial assets best represent the maximum credit risk exposure at the reporting date. Cash is held with reputable banks in Canada. The long-term credit rating of these banks, as determined by Standard and Poor's, was A+.

Liquidity risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they become due. Refer to Note 1 of the Company's February 28, 2026, and May 31, 2025, financial statements for further details related to the ability of the Company to continue as a going concern. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As of February 28, 2026, the Company had a cash balance of \$237,252 (May 31, 2025 - \$428,023) to settle due to related parties, accounts payable and accrued liabilities of \$16,483 (May 31, 2025 - \$25,973). All of the Company's financial liabilities have contractual maturity of less than 30 days and are subject to normal trade terms. Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of financial instruments will fluctuate because of changes in market interest rates. An immaterial amount of interest rate exposure exists in respect of cash balances on the statement of financial position. As a result, the Company is not exposed to material cash flow interest rate risk on its cash balances.

Share Capital (cont'd...)

Stock options (cont'd...)

During the Nine months ended February 28, 2026

- On August 16, 2025, 100,000 incentive stock options exercisable at \$0.10 per share expired, and on August 17, 2025, 490,000 incentive stock options exercisable at \$0.32 expired.
- On June 24, 2025, the Company granted 2,050,000 incentive stock options to officers, directors and to consultants, exercisable on or before June 24, 2030, at a price of \$0.10 per share. The fair value of the options granted was calculated using Black-Scholes option pricing model for a cumulative total of \$147,000, which was recorded as a stock-based compensation expense in the statements of loss and comprehensive loss.

During the fiscal year ended May 31, 2025:

- On February 14, 2025, 75,000 options exercisable at \$0.12 expired.
- On October 4, 2025, 50,000 options exercisable at \$0.20 expired.
- On June 4, 2025, the Company granted 300,000 incentive stock options to a consultant at \$0.12 per common share, exercisable on or before June 4, 2026, vesting immediately. The fair value of the options granted was calculated using Black-Scholes option pricing model for a cumulative total of \$15,412, which was recorded as a stock-based compensation expense in the statements of loss and comprehensive loss. On July 10, 2025, the 300,000 options were fully exercised, for proceeds in the amount of \$36,000

The following assumptions were used in the Black-Scholes model to determine the fair value of the options granted:

	Nine months ended February 28, 2026	Year ended May 31, 2025
Risk-free interest rate	2.90%	4.08%
Expected dividend yield	-	-
Expected volatility	84.78%	103.87%

RISK FACTORS AND UNCERTAINTIES

The Company is in the business of acquiring, exploring and, if warranted, developing and exploiting natural resource properties, currently in British Columbia, Canada. Due to the nature of the Company's business and the present stage of exploration of its mineral properties (which are primarily early-stage exploration properties with no known resources or reserves), many risk factors will apply. The risks described below are not the only ones facing the Company. Additional risks not presently known to the Company may also impair the business operations.

Going Concern and Financing Risks

The Company has limited financial resources, had no source of operating cash flow and had no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under any applicable agreements. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that it will be able to obtain adequate financing in the future or that the terms of such financing will be favorable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with the possible loss of such properties.

Insufficient Financial Resources

The Company does not presently have sufficient financial resources to meet obligations when they become due, undertake by itself the acquisition, exploration and development of all its planned acquisition, exploration and development programs. Future property acquisitions and the development of the Company's properties will therefore depend upon the Company's ability to obtain financing through the joint venturing of projects, private placement financing, public financing, short or long-term borrowings or other means. There is no assurance that the Company will be successful in obtaining the required financing. Failure to raise the required funds could result in the Company losing, or being required to dispose of, its interest in its properties.

General Economic Conditions

The recent events in global financial markets have had a profound impact on the global economy. A continued or worsened slowdown in the financial markets or other economic conditions, including but not limited to, consumer spending, employment rates, business conditions, inflation, fuel and energy costs, consumer debt levels, lack of available credit, the state of the financial markets, interest rates, and tax rates may adversely affect the Company's growth and profitability. These factors could have a material adverse effect on the Company's financial condition and results of operations.

Share Price Volatility

There can be no assurance that an active trading market in our securities will be established and sustained. The market price for our securities could be subject to wide fluctuations. Factors such as commodity prices, government regulation, interest rates, share price movements of our peer companies and competitors, as well as overall market movements, may have a significant impact on the market price of the securities of our Company. The stock market has from time-to-time experienced extreme price and volume fluctuations, particularly in the mining sector, which have often been unrelated to the operating performance of companies.

Management Discussion and Analysis For the Nine Months ended February 28, 2026

Dependence on Others and Key Personnel

The success of the Company's operations will depend upon numerous factors, many of which are beyond the Company's control, including (i) the ability to design and carry out appropriate exploration programs on its mineral properties; (ii) the ability to produce minerals from any mineral deposits that may be located; (iii) the ability to attract and retain additional key personnel in exploration, marketing, mine development and finance; and (iv) the ability and the operating resources to develop and maintain the properties held by the Company. There can be no assurance of success with any or all these factors on which the Company's operations will depend, or that the Company will be successful in finding and retaining the necessary employees, personnel and/or consultants to be able to successfully carry out such activities.

Government Regulation

The Company is subject to the laws and regulations relating to environmental matters in all jurisdictions in which it operates, including provisions relating to prospecting, development, production, environmental protection, mining taxes, labor standards, property reclamation, discharge of hazardous material and other matters. The Company may also be held liable should environmental problems be discovered that were caused by former owners and operators of its properties and properties in which it has previously had an interest. The Company conducts its mineral exploration activities in compliance with applicable environmental protection legislation. The Company is not aware of any existing environmental problems related to any of its current or former properties that may result in material liability to the Company.

Competition

The Company's business of the acquisition, exploration and development of mineral properties is intensely competitive. The Company may be at a competitive disadvantage in acquiring additional mining properties because it must compete with other individuals and companies, many of which have greater financial resources, operational experience and technical capabilities than the Company. Increased competition could adversely affect the Company's ability to attract necessary capital funding or acquire suitable producing properties or prospects for mineral exploration in the future.

Fluctuation of Metal Prices

Even if commercial quantities of mineral deposits are discovered by the Company, there is no guarantee that a profitable market will exist for the sale of the metals produced. There can be no assurance that the price of any commodities will be such that any of the properties in which the Company has, or has the right to acquire, an interest may be mined at a profit.

Title Matters

Although the Company has taken steps to verify the title to the mineral properties in which it has or has a right to acquire an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee title (whether of the Company or of any underlying vendor(s) from whom the Company may be acquiring its interest). Title to mineral properties may be subject to unregistered prior agreements or transfers and may also be affected by undetected defects or the rights of indigenous peoples. Company has investigated title to all its mineral properties and, to the best of its knowledge, title to all its properties for which titles have been issued are in good standing.

Uncertainty of Resource Estimates/Reserve

Unless otherwise indicated, mineralization figures presented in the Company's filings with securities regulatory authorities, press releases and other public statements that may be made from time to time are based upon estimates made by Company personnel and independent geologists. These estimates are imprecise and depend upon geological interpretation and statistical inferences drawn from drilling and sampling analysis, which may prove to be unreliable.

Limited Experience

The Company has very limited experience in placing mineral resource properties into production, and its ability to do so will be dependent upon using the services of appropriately experienced personnel or entering into agreements with other major resource companies that can provide such expertise. There can be no

assurance that the Company will have available to it the necessary expertise when and if it places its resource properties into production.

Speculative Business

Resource exploration and development is a speculative business and involves a high degree of risk, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but from finding mineral deposits which, though present, are insufficient in size to return a profit from production. The marketability of natural resources that may be acquired or discovered by the Company will be affected by numerous factors beyond the control of the Company. These factors include market fluctuations, the proximity and capacity of natural resource markets, government regulations, including regulations relating to prices, taxes, royalties, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. There is no known resource, and there are no known reserves on any of the Company's properties.

Permits and Licenses

The operations of the Company will require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out its projects, on reasonable terms or at all. Delays, or a failure to obtain such licenses and permits, or a failure to comply with the terms of any such licenses and permits that the Company does obtain, could have a material adverse effect on the Company.

Dilution to the Company's Existing Shareholders

The Company will require additional equity financing to be raised in the future. The Company may issue securities at less than favorable terms to raise sufficient capital to fund its business plan. Any transaction involving the issuance of equity securities or securities convertible into common shares would result in dilution, possibly substantial, to present and prospective holders of common shares.
