CEO Commentary

Rob Birmingham, CEO of GoldHaven, commented:

"This financing positions GoldHaven to aggressively advance both of our core assets. At Magno, we are now fully funded to execute and expand a significant 2026 drill program across multiple high-priority zones, while continuing to build on the strong initial drilling success at Copeçal. We believe this dual-track approach provides shareholders with near-term discovery potential and longer-term growth across two highly prospective districts."

The Company intends to use the net proceeds from the Offering for the advancement of its Magno Project in British Columbia, including permitting, geophysics, drill targeting, and continued and expanded diamond drilling, as well as for continued diamond drilling, follow-up drilling, and target advancement at the Copeçal Gold Project in Mato Grosso, Brazil, and for general working capital purposes.

Combined with the Company's recently completed flow-through financing, this Offering is expected to fully fund and expand the Company's 2026 drill program at the Magno Project.

Subject to compliance with applicable regulatory requirements and in accordance with National Instrument 45-106 – *Prospectus Exemptions* ("NI 45-106"), the Units will be offered for sale to purchasers resident in Canada, except Québec, pursuant to the listed issuer financing exemption under Part 5A of NI 45-106 (the "Listed Issuer Financing Exemption"). The securities issuable from the Offering under the Listed Issuer Financing Exemption are expected to be immediately freely tradeable in accordance with applicable Canadian securities legislation, however the Warrants will not be exercisable until the 62nd day after issuance.
