MineHub Partners with CargoGo a Leading Chinese Visibility Platform

- MineHub partners with CargoGo to enhance shipment tracking capabilities in Asia.

Vancouver, B.C., November 26, 2024. **MineHub Technologies Inc.** (TSXV**: MHUB,** OTCQB**: MHUBF**) ("**MineHub**" or the "**Company**"), a leading provider of digital supply chain solutions for the commodity markets, is pleased to announce that it has signed an agreement with Elane Technology Co. Limited ("Elane"), a prominent logistics technology provider based in Beijing, China, and owner of CargoGo, a major visibility platform serving 57 China based Fortune Global 500 companies.

This strategic partnership will leverage the strengths of both companies to unlock enhanced shipment tracking and visibility capabilities across commodity markets in Asia. MineHub has partnered with one of Elane's premier visibility platforms, CargoGo, to enable its ability to serve its increasing customer base in Asia. The integration of MineHub's cloud-based platform with CargoGo's advanced logistics solutions will enable seamless, secure sharing of data between the two platforms.

Andrea Aranguren, CEO of MineHub explains, "This partnership with CargoGo represents an exciting step forward in our mission to bring digital innovation and improved transparency to the global supply chain. Our combined strengths will deliver valuable shipment tracking capabilities to companies operating in Asia, helping them make informed decisions, with real-time data."

As a dominant force in the global non-ferrous metals industry, China has solidified its position as a leader, producing a record 74.698 million tons in 2023 and achieving a trade volume of US$ 331.54 billion. This partnership enables MineHub to tap into Asia's dynamic metals flow, particularly crucial as China's sector grew 10.8% year-on-year in H1 2024[1]. Amid ongoing supply chain challenges, this collaboration offers timely, reliable tracking solutions to meet intensifying market demands.

Elane has more than 20 years of experience in shipping and logistics data development, with a robust technology infrastructure that includes access to global satellite data as well as direct connectivity with Asian and global shipping companies. Through this partnership, MineHub and CargoGo will leverage their complementary technologies to unlock new tracking capabilities in Asia, empowering companies with deeper insights and control over their shipments.

About Elane

ELANE TECHNOLOGY CO., LIMITED, was established in 2003 as a global leader in shipping big data. With its unique data empowerment and high-quality services, it has won the favor of numerous Fortune Global 500 companies. Elane serves 57 China based Fortune Global 500 companies, representing a significant majority (43%) of total Fortune 500 Chinese enterprises. This not only reflects Elane's strong capabilities in data technology but also demonstrates the professional competence of its data products and solutions.

About CargoGo

CargoGo is a product under Elane that leverages the company's own data resources and big data integration to provide enterprises with end-to-end supply chain visibility and collaboration. It helps achieve supply chain real-time visibility of logistics processes, alerts for exceptions throughout the entire process, and industry insights. Currently, CargoGo covers various modes of transportation, including containers, general cargo, RoRo, air freight, rail, trucking, and express delivery, supporting the digital transformation of supply chain management for enterprises to adapt to the challenges posed by globalization. About MineHub

MineHub is the digital supply chain platform for the commodity markets, making raw material supply chains more efficient, resilient and sustainable. MineHub provides enterprise-grade digital solutions that connect buyers, sellers, laboratories and financiers within physical commodities supply chains in a digitally integrated workflow powered by data that is useable, shareable, verifiable and unforgeable. Users of MineHub solutions are in full control of their supply chains, enabling them to optimize their use of resources, respond better and faster to disruptions, and provide a better customer service. Global enterprises already use MineHub solutions as part of their logistics, compliance, trade management and financing operations.
