MineHub Announces New Commercial Agreement with Sumitomo Metal Mining to Enhance Real-Time Supply Chain Visibility

- Agreement strengthens MineHub's presence in Asia and expands digital transparency for global metals supply chains.

Vancouver, B.C., May 13, 2026. **MineHub Technologies Inc.** (TSXV**: MHUB,** OTCQB**: MHUBF**) ("**MineHub**" or the "**Company**"), a leading provider of digital supply chain solutions for the commodity markets, is pleased to announced a new commercial agreement with Sumitomo Metal Mining Co., Ltd. ("Sumitomo Metal Mining"), one of Japan's leading mining and metals companies. Under the agreement, Sumitomo Metal Mining will leverage MineHub's supply chain visibility platform to provide its internal teams with enhanced oversight of shipments and improve delivery transparency for its global customers.

Andrea Aranguren, CEO of MineHub, commented: "Sumitomo Metal Mining is widely recognized as a global leader in the metals industry, and we are proud to support their efforts to modernize and digitize their supply chain operations. This agreement highlights the increasing importance of real-time visibility in the movement of critical raw materials and reflects the strong momentum we are seeing across Asia, particularly in Japan. As mining companies and manufacturers continue to prioritize supply chain transparency, MineHub is well positioned to serve as the digital backbone for these critical workflows."

Platform Deployment and Operational Impact

Through MineHub's platform, Sumitomo Metal Mining will gain access to capabilities designed to strengthen operational coordination across its global logistics network, including:

- **Real-time shipment visibility:** Carrier-agnostic tracking across key metal shipments, providing comprehensive oversight from origin to destination.
- **Improved customer communication:** Enhanced delivery transparency enabling Sumitomo Metal Mining to provide its global customers with timely, accurate shipment updates.
- **Streamlined logistics management:** Digitized workflows that replace manual tracking processes with scalable, data-driven tools for more efficient management of complex supply chains.
- **Cross-functional coordination:** A centralized digital view of shipment data enabling procurement, logistics, and operations teams to collaborate more effectively.

Market Expansion and Strategic Significance

This agreement represents an important milestone in MineHub's continued expansion across Asia's metals and mining sector. Japan remains one of the world's largest importers and processors of non-ferrous metals, and the country's leading enterprises are increasingly adopting digital platforms to enhance supply chain resilience and transparency.

The addition of Sumitomo Metal Mining to MineHub's growing network of global enterprise users further strengthens the Company's position in the Japanese market and reinforces the demand for digital solutions that increase efficiency, traceability, and collaboration across commodity supply chains.

MineHub continues to expand its commercial footprint globally as mining companies, traders, and manufacturers prioritize the adoption of digital tools to replace manual, error-prone processes with scalable digital infrastructure — supporting disciplined execution of the Company's core strategy to become the digital supply chain platform of choice for the commodity markets.

About Sumitomo Metal Mining Co., Ltd

Sumitomo Metal Mining is a global mining and metals company headquartered in Tokyo, Japan. The company is engaged in the development of mineral resources, smelting and refining of non-ferrous metals, and the production of advanced materials used in a wide range of industrial and technological applications. With operations spanning resource development, smelting, and advanced materials manufacturing, Sumitomo Metal Mining is recognized as one of Japan's foremost integrated metals enterprises.

About MineHub

MineHub is the digital supply chain platform for the commodity markets, making raw material supply chains more efficient, resilient and sustainable. MineHub provides enterprise-grade digital solutions that connect buyers, sellers, laboratories and financiers within physical commodities supply chains in a digitally integrated workflow powered by data that is useable, shareable, verifiable and unforgeable. Users of MineHub solutions are in full control of their supply chains, enabling them to optimize their use of resources, respond better and faster to disruptions, and provide a better customer service. Global enterprises already use MineHub solutions as part of their logistics, compliance, trade management and financing operations.
