Investment objective and policy

Albion Technology & General VCT PLC's (the "Company") investment strategy is to provide investors with a regular and predictable source of dividend income combined with the prospect of longer term capital growth.

This is achieved in two ways. Firstly, by controlling the Company's exposure to technology risk through ensuring that many of the companies in the non-technology portfolio have property as their major asset, with no external borrowings. Secondly, by balancing the investment portfolio by sector, so that those areas such as leisure and business services, which are susceptible to changes in consumer sentiment, are complemented by sectors with more predictable long term characteristics, such as healthcare and the environment.

The Company offers investors the opportunity to participate in a balanced portfolio of technology and non-technology businesses. The Company's investment portfolio is intended to be split approximately as follows:

- 40 per cent. in unquoted UK technology-related companies; and
- 60 per cent. in unquoted UK non-technology companies.

This split is subject to the availability of good quality new investments arising within the UK technology and non-technology sectors.

Background to the Company

The Company is a venture capital trust which raised £14.3 million in December 2000 and 2002, and raised a further £35.0 million during 2006 through the launch of a C share issue. The Company has raised a further £20.6m under the Albion VCTs Top Up Offers since January 2011.

On 15 November 2013, the Company acquired the assets and liabilities of Albion Income & Growth VCT PLC ("Income & Growth") in exchange for new shares in the Company ("the Merger"). Each Income & Growth shareholder received 0.7813 shares in the Company for each Income & Growth share that they held at the date of the Merger.

In addition to the dividends paid above, the Board declared a fourth dividend for the year ending 31 December 2016 of 1.25 pence per Ordinary share to be paid on 31 October 2016 to shareholders on the register as at 7 October 2016.

Notes:

- (i) Excludes tax benefits upon subscription.
- (ii) The C shares were converted into Ordinary shares on 31 March 2011. The net asset value per share and all dividends paid subsequent to the conversion of the C shares to the Ordinary shares are multiplied by the conversion factor of 0.7779 in respect of the C shares' return, in order to give an accurate picture of the shareholder value since launch relating to the C shares.
- (iii) Albion Income & Growth VCT PLC was merged with Albion Technology & General VCT PLC on 15 November 2013. The net asset value per share and all dividends paid subsequent to the merger of the Income & Growth shares to the Ordinary shares are multiplied by the issue ratio of 0.7813 in respect of the Income & Growth shares' return, in order to give an accurate picture of the shareholder value since launch relating to the Income & Growth shares. Prior to the merger, Albion Income & Growth VCT PLC had a financial year end of 30 September and as such, the above dividends per share relate to the relevant period.

Interim management report

Introduction

The results for Albion Technology & General VCT PLC for the six months to 30 June 2016, showed a negative return of 1.1 pence per share. Net asset value at 30 June 2016, was 69.2 pence per share, reflecting the negative return and the 3.75 pence per share dividends paid for the year to date. This compares to 73.9 pence per share net asset value at 31 December 2015.

Performance and portfolio update

These disappointing results, on top of the negative return of 4.0 pence per share for the year ended 31 December 2015, reflect the continued need for the portfolio repositioning which began in 2014. The negative return for the six month period was driven principally by a decline in the share price of the AiM quoted Mi-Pay, a further cautious view of Blackbay, and provisions against deferred consideration due on investments sold last year. The disposal programme of the pre-2009 investments continues, with the assets within the Charnwood Pub Company now sold and discussions continuing on the sale of three further companies.

Elsewhere within the portfolio, however, there has been positive performance, with Exco Intouch (remote medical monitoring) moving strongly into profit, while Proveca (paediatric drugs) has now gained regulatory approval for its first medicine. Investments in two new companies have been made during the period, both of which should result in further investment as the companies prove themselves and grow. These are Black Swan Data (which provides data analysis to support corporate decision making) and InCrowd Sports (which provides inter-active services for sporting events) and where we are backing the management behind our previous successful investment in Opta Sports Data. Amongst our other investments, we provided a further £890,000 to Earnside Energy, to double the capacity of its anaerobic digestion plant.

The two key metrics that we are watching in order to effect the turnaround in performance are firstly, the proportion of the Company's assets in investments made before 2009, with a target of 30 per cent. by the year end; this currently stands at 35 per cent. Secondly, we are looking to increase the proportion of companies making an operating profit, and this now stands at 77 per cent. up from 73 per cent. at 31 December 2015. It is also worth bearing in mind that ungeared, asset-based investments account for 53 per cent. of the portfolio, whose revenue-generating capabilities support the income generated by the portfolio.

Portfolio split as at 30 June 2016

Risks, uncertainties and prospects

The prospective exit of the UK from the EU has had a negative effect on consumer and business confidence and it would be wise to prepare for a renewed economic slowdown in the UK. Meanwhile, global growth is muted and many countries are close to recession. Overall investment risk, however, is mitigated through a variety of processes, including our policies of first ensuring that the Company has a first charge over portfolio companies' assets wherever possible, and second of aiming to achieve balance in the portfolio through the inclusion of sectors that are less exposed to the business and consumer cycles.

Other principal risks and uncertainties remain unchanged and are as detailed on pages 13 to 15 of the Annual Report and Financial Statements for the year ended 31 December 2015.

Discount management and share buy-backs

It remains the Board's primary objective to maintain sufficient resources for investment in existing and new portfolio companies and for the continued payment of dividends to shareholders. Thereafter, it is still the Board's policy to buy back shares in the market, subject to the overall constraint that such purchases are in the VCT's interest. In order to ensure that this condition is satisfied, the Company will limit the sum available for buy-backs for the 6 month period to 31 December 2016 to £1m. It is the Board's intention for such buy-backs to be in the region of a 5 per cent. discount to net asset value, so far as market conditions and liquidity permit.

Albion VCTs Top Up Offers

The Company was pleased to announce on 23 March 2016 that it had reached its £6m limit under the Albion VCTs Prospectus Top Up Offers 2015/2016 which was fully subscribed and closed.

The proceeds of the Offer are being used to provide further resources to the Company at a time when a number of attractive new investment opportunities are being seen.

Transactions with the Manager

Details of the transactions that took place with the Manager in the period can be found in note 5.

Results and dividends

As at 30 June 2016, the net asset value per Ordinary share was 69.2 pence (30 June 2015: 79.2 pence; 31 December 2015: 73.9 pence) largely reflecting the uncovered dividend. Dividends are paid on a quarterly basis, the next payment being 1.25 pence per share on 31 October 2016, to those shareholders on the register at 7 October 2016.

It is hoped that the programme for repositioning the investment portfolio, which began in 2014, will be largely complete by the end of this year and, at that point, we would aim to carry out a re-assessment of the Company's prospects and its ability to generate the returns that shareholders have every right to expect. In the meantime, the difficult headwinds in the UK and global economies will not help matters, though the strength of many of our businesses, and their ability to target sectors which continue to show growth even in a tougher broader environment, gives us some cause for optimism over the medium term.

Notes to the condensed Financial Statements

1. Basis of preparation

The condensed Financial Statements have been prepared in accordance with the historical cost convention, modified to include the revaluation of investments, in accordance with applicable United Kingdom law and accounting standards, including Financial Reporting Standard 102 ("FRS 102"), Financial Reporting Standard 104 – Interim Financial Reporting ("FRS 104"), and with the 2014 Statement of Recommended Practice "Financial Statements of Investment Trust Companies and Venture Capital Trusts" ("SORP") issued by the Association of Investment Companies ("AIC").

The preparation of the Financial Statements requires management to make judgements and estimates that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The most critical estimates and judgements relate to the determination of carrying value of investments at fair value through profit and loss ("FVTPL"). The Company values investments by following the IPEVCV Guidelines and further detail on the valuation techniques used are outlined below.

The half-yearly report has not been audited, nor has it been reviewed by the auditor pursuant to the FRC's guidance on Review of interim financial information.

2. Accounting policies

Fixed asset investments

The Company's business is investing in financial assets with a view to profiting from their total return in the form of income and capital growth. This portfolio of financial assets is managed and its performance evaluated on a fair value basis, in accordance with a documented investment policy, and information about the portfolio is provided internally on that basis to the Board.

In accordance with the requirements of FRS 102, those undertakings in which the Company holds more than 20 per cent. of the equity as part of an investment portfolio are not accounted for using the equity method. In these circumstances the investment is measured at FVTPL.

Upon initial recognition (using trade date accounting) investments, including loan stock, are classified by the Company as FVTPL and are included at their initial fair value, which is cost (excluding expenses incidental to the acquisition which are written off to the income statement).

Subsequently, the investments are valued at 'fair value', which is measured as follows:

- Investments listed on recognised exchanges are valued at their bid prices at the end of the

accounting period or otherwise at fair value based on published price quotations;

- Unquoted investments, where there is not an active market, are valued using an appropriate valuation technique in accordance with the IPEVCV Guidelines. Indicators of fair value are derived using established methodologies including earnings multiples, the level of third party offers received, prices of recent investment rounds, net assets and industry valuation benchmarks. Where the Company has an investment in an early stage enterprise, the price of a recent investment round is often the most appropriate approach to determining fair value. In situations where a period of time has elapsed since the date of the most recent transaction, consideration is given to the circumstances of the portfolio company since that date in determining fair value. This includes consideration of whether there is any evidence of deterioration or strong definable evidence of an increase in value. In the absence of these indicators, the investment in question is valued at the amount reported at the previous reporting date. Examples of events or changes that could indicate a diminution include:
 - the performance and/or prospects of the underlying business are significantly below the expectations on which the investment was based;
 - a significant adverse change either in the portfolio company's business or in the technological, market, economic, legal or regulatory environment in which the business operates; or
 - market conditions have deteriorated, which may be indicated by a fall in the share prices of quoted businesses operating in the same or related sectors.

Investments are recognised as financial assets on legal completion of the investment contract and are de-recognised on legal completion of the sale of an investment.

Dividend income is not recognised as part of the fair value movement of an investment, but is recognised separately as investment income through the Other distributable reserve when a share becomes ex-dividend.

Debtors and creditors and cash are carried at amortised cost, in accordance with FRS 102. There are no financial liabilities other than creditors.

Notes to the condensed Financial Statements (continued)

Investment income

Unquoted equity income

Dividend income from investments is included in revenue in the period in which the dividend is paid or approved by the portfolio company.

Unquoted loan stock and other preferred income

Fixed returns on non-equity shares and debt securities are recognised when the Company's right to receive payment and expect settlement is established. Where interest is rolled up and/or payable at redemption then it is recognised as income unless there is reasonable doubt as to its receipt.

Bank interest income

Interest income is recognised on an accruals basis using the rate of interest agreed with the bank.

Investment management fees and expenses

All expenses have been accounted for on an accruals basis. Expenses are charged through the other distributable reserve except the following which are charged through the Realised capital reserve:

- 75 per cent. of management fees are allocated to Realised capital reserve. This is in line with the Board's expectation that over the long term 75 per cent. of the Company's investment returns will be in the form of capital gains; and
- expenses which are incidental to the purchase or disposal of an investment are charged through the Realised capital reserve.

Performance incentive fee

Any performance incentive fee will be allocated between Other distributable and Realised capital reserves based upon the proportion to which the calculation of the fee is attributable to revenue and capital returns.

Taxation

Taxation is applied on a current basis in accordance with FRS 102. Current tax is tax payable (refundable) in respect of the taxable profit (tax loss) for the current period or past reporting periods using the tax rates and laws that have been enacted or substantively enacted at the financial reporting date. Taxation associated with capital expenses is applied in accordance with the SORP.

Deferred tax is provided in full on all timing differences at the reporting date. Timing differences are differences between taxable profits and total comprehensive income as stated in the financial statements that arise from the inclusion of income and expenses in tax assessments in

periods different from those in which they are recognised in the financial statements. As a VCT the Company has an exemption from tax on capital gains. The Company intends to continue meeting the conditions required to obtain approval as a VCT in the foreseeable future. The Company therefore, should have no material deferred tax timing differences arising in respect of the revaluation or disposal of investments and the Company has not provided for any deferred tax.

Reserves

Share premium account

This reserve accounts for the difference between the price paid for shares and the nominal value of the shares, less issue costs and transfers to the Other distributable reserve.

Capital redemption reserve

This reserve accounts for amounts by which the issued share capital is diminished through the repurchase and cancellation of the Company's own shares.

Unrealised capital reserve

Increases and decreases in the valuation of investments held at the year end against cost are included in this reserve.

Realised capital reserve

The following are disclosed in this reserve:

- gains and losses compared to cost on the realisation of investments, or permanent diminutions in value;
- expenses, together with the related taxation effect, charged in accordance with the above policies; and
- dividends paid to equity holders.

Other distributable reserve

The Special reserve, Treasury share reserve and the Revenue reserve were combined in 2012 to form a single reserve named Other distributable reserve.

This reserve accounts for movements from the revenue column of the Income statement, the payment of dividends, the buy-back of shares and other non-capital realised movements.

Dividends

Dividends by the Company are accounted for in the period in which the dividend is paid or approved at the Annual General Meeting.

During the period, services for a total value of £732,000 (30 June 2015: £818,000; 31 December 2015: £1,543,000) were purchased by the Company from Albion Ventures LLP. At the financial period end, the amount due to Albion Ventures LLP in respect of these services was £384,000 (30 June 2015: £412,000; 31 December 2015: £310,000). The total annual running costs of the Company are capped at an amount equal to 2.75 per cent. (reduced from 3.0 per cent. in 2015 to help improve the performance of the Company and increase the net income) of the Company's net assets, with any excess being met by Albion by way of a reduction in management fees.

During the period, the Company was not charged by Albion Ventures LLP in respect of Patrick Reeve's services as a Director (30 June 2015 and 31 December 2015: nil).

Albion Ventures LLP, the Manager, holds 22,384 Ordinary shares in the Company.

Albion Ventures LLP is, from time to time, eligible to receive transaction fees and Directors' fees from portfolio companies. During the period to 30 June 2016, fees of £88,000 attributable to the investments of the Company were received pursuant to these arrangements (30 June 2015: £181,000; 31 December 2015: £273,000).

9. Commitments and contingencies

As at 30 June 2016, the Company had the following financial commitments in respect of investments:

- DySIS Medical Limited; £216,000
- Proveca Limited; £22,000

There are no contingencies or guarantees of the Company as at 30 June 2016 (30 June 2015 and 31 December 2015: nil).

10. Post balance sheet events

Since 30 June 2016, the Company has completed the following material transactions:

- Investment of £410,000 in Secured by Design Limited;
- Investment of £216,000 in DySIS Medical Limited; and
- Investment of £165,000 in Oviva AG.

11. Related party transactions

Other than transactions with the Manager as described in note 5, there are no other related party transactions.

12. Going concern

The Board's assessment of liquidity risk remains unchanged since the last Annual Report and Financial Statements for the year ended 31 December 2015 and is detailed on page 56 of those accounts. The Company has adequate cash and liquid resources. The portfolio of investments is diversified in terms of sector, and the major cash outflows of the Company (namely investments, dividends and share buy-backs) are within the Company's control. Accordingly, after making diligent enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the foreseeable future. For this reason, the Directors have adopted the going concern basis in preparing this Half-yearly Financial Report and this is in accordance with the Guidance on Risk Management, Internal Control and Related Financial and Business Reporting issued by the Financial Reporting Council in September 2014.
