INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Burrell Resources Inc.

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Burrell Resources Inc. (the Company), which comprise the statements of financial position as at December 31, 2025 and 2024, and the statements of loss and comprehensive loss, statements of cash flows and statements of changes in equity for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2025 and 2024, and its financial performance and its cash flows for the years then ended, in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada, and we have fulfilled our other ethical responsibilities in accordance with those requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Relating to Going Concern

We draw your attention to Note 1 in the financial statements, which indicates that the Company incurred a comprehensive loss of \$22,364 during the year ended December 31, 2025. As stated in Note 1, these events or conditions, along with other matters as set forth in Note 1, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements for the year ended December 31, 2025. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In addition to the matter described in the Emphasis of Matter - *Material Uncertainty Related to Going Concern* section of our report, we have determined the matter described below to be the key audit matter to be communicated in our report.

Impairment Assessment of Exploration and Evaluation (E&E) Assets

Description of the matter

As described in Note 4 to the financial statements, the carrying value of the exploration and evaluation assets amounted to \$72,954 as at December 31, 2025. Management determined no such impairment charge was required for the year ended December 31, 2025.

E&E assets are assessed for impairment when facts and circumstances suggest that the carrying amount may exceed its recoverable amount. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Management groups mineral claims that are contiguous and specific to an area that encompasses the same prospective minerals, into one area of interest and assigns a name to this mineral property. Each named mineral property is considered an area of interest and subject to impairment assessment.

In undertaking this assessment, management is required to apply judgment whether the following factors would be considered an indicator of impairment:

- The period for which the entity has the right to explore in the specific area has expired during the financial statement period or will expire in the near future and is not expected to be renewed;
- Substantive expenditures on further exploration for, and evaluation of, mineral resources in the specific area is neither budgeted nor planned;
- Exploration for and evaluation of mineral resources in the specific area has not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and;
- Sufficient data exists to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or sale.

Why the matter is a key audit matter

We determined this as a key audit matter as it represented an area of significant risk of material misstatement given the magnitude of the E&E assets and the significant management judgment involved in assessing the existence of impairment indicators. In addition, significant auditor judgement, knowledge and effort were required in evaluating the results of our audit procedures.

How the matter was addressed in the audit

The following were the primary procedures we performed to address this key audit matter.

- Reviewed management's E&E impairment analysis and ensured it was reasonable and complies with IFRS 6 guidance;
- Verified the status of the Company's mining claims with governmental registries;
- Confirmed good standing of the related E&E property option agreement with property optionors;
- Considered evidence obtained in other areas of the audit to assess the Company's continued ability and plans to further develop the E&E properties; and;
- Reviewed National Instrument 43-101 Technical Reports noting the potential commercial viability of the properties.

Information Other than the Financial Statements and Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the annual management's discussion and analysis, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

CLEARHOUSE LLP
CHARTERED PROFESSIONAL ACCOUNTANTS

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because of the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Pat Kenney.

BURRELL RESOURCES INC.**NOTES TO the FINANCIAL STATEMENTS**

(Expressed in Canadian Dollars)

For the years ended December 31, 2025 and 2024

1. Nature of Operations and Going Concern

Burrell Resources Inc. (the "Company") is a company focused on the exploration of mineral assets.

The Company was incorporated on December 17, 2019 pursuant to the Business Corporations Act of British Columbia and is listed on the Canadian Stock Exchange (CSE: BURY). The registered address office of the Company is located at 750 West Pender Street, Suite 1200, Vancouver BC, V6C 2T8.

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and liquidation of liabilities during the normal course of operations. The Company's viability depends upon the acquisition and financing of mineral exploration or other projects. If mineral projects are to be successful, additional funds will be required for development and, if warranted, to place them into commercial production. The sources of financing presently available to the Company is through equity financing. The ability of the Company to raise new funds will depend, in part, on prevailing market conditions as well as the operating performance of the Company. There can be no assurance that the Company will be successful in securing the necessary financing, if needed, on terms satisfactory to the Company. If additional financing is arranged through the issuance of shares, control of the Company may change, and shareholders may suffer significant dilution. These financial statements do not include adjustments or disclosures that may result from the Company's inability to continue as a going concern. If the Company is unable to continue as a going concern, adjustments may be necessary in the carrying value of assets and liabilities, the reported net losses and statement of financial position classifications used, and such adjustments could be material. Management estimates that the Company will be able to meet its obligations and to sustain operations for at least the next twelve months.

The Company has not yet realized profitable operations, has relied on non-operational sources of financing to fund operations, on December 31, 2025 has an accumulated deficit of \$226,674 (2024 - \$204,310) and has working capital of \$607,358 as at December 31, 2025 (2024 - \$633,680). These events and conditions indicate the existence of material uncertainties that cast significant doubt on the Company's ability to continue as a going concern.

2. Basis of Presentation**Statement of compliance**

These financial statements, including comparatives, have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Boards ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC") for the periods presented. The financial statements have been prepared on a historical cost basis, except for financial instruments classified as financial instruments at fair value through profit or loss, which are stated at their fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information. These financial statements were reviewed, approved, and authorized for issuance by the Board of Directors (the "Board") of the Company on January 23, 2026.

Functional Currency

These financial statements are presented in Canadian dollars, which is the functional currency of the Company, unless otherwise noted. The functional currency is the currency of the primary economic environment in which the Company operates.

BURRELL RESOURCES INC.
NOTES TO the FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
For the years ended December 31, 2025 and 2024

Critical accounting judgments, estimates and assumptions

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amount of expenses during the reporting period. Actual outcomes could differ from these estimates. These financial statements include estimates that, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Information about significant areas of estimation uncertainty in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are noted below with further details of the assumptions contained in the relevant note.

Critical accounting judgment

The preparation of these financial statements requires management to make judgments regarding the going concern of the Company as discussed in Note 1.

Key sources of estimation uncertainty

Share Based Compensation

Determining the fair value of stock options requires judgments related to the choice of a pricing model, the estimation of stock price volatility, the expected forfeiture rate and the expected term of the underlying instruments. Any changes in the estimates or inputs utilized to determine fair value could result in a significant impact on the Company's future operating results or on other components of shareholders' equity.

Exploration and evaluation assets

The Company capitalizes mining property acquisition costs and deferred exploration costs which are to be amortized when production is attained or the balance thereof written off should the property be disproven through exploration or abandoned. The carrying value of the Company's mineral property is reviewed by management at least annually, or whenever events or circumstances indicate that its carrying value may not be recovered. If impairment is determined to exist, a formal estimate of the recoverable amount is performed and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount.

Deferred tax assets and liabilities

The measurement of a deferred tax provision is subject to uncertainty associated with the timing of future events and changes in legislation, tax rates and interpretations by tax authorities. The estimation of taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. Management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future tax provisions or recoveries could be affected.

BURRELL RESOURCES INC.
NOTES TO the FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
For the years ended December 31, 2025 and 2024

Determination of functional currency

Foreign currency translation under IFRS requires each entity to determine its own functional currency, which becomes the currency that entity measures its results and financial position in. Judgment is necessary in assessing each entity's functional currency. In determining the functional currencies of the Company, the Company considered many factors, including the currency that mainly influences sales prices for goods and services, the currency of the country whose competitive forces and regulations mainly determine the sales prices, and the currency that mainly influences labour, material and other costs.

3. Material Accounting Policies

a) Financial Instruments

Classification

The Company classifies its financial instruments in the following categories: at fair value through profit and loss ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI"), or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company's business model for managing the financial assets and their contractual cash flow characteristics. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has opted to measure them at FVTPL.

Measurement

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment. The Company's cash and cash equivalents and accounts payables and accrued liabilities are classified as amortized cost.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transaction costs are expensed to profit or loss. Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are included in profit or loss. There are no financial assets and liabilities carried at FVPL.

Financial assets at FVTOCI

Fair value through other comprehensive income ("FVTOCI") - Investments in equity instruments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently, they are measured at fair value, with gains and losses arising from changes in fair value recognized in other comprehensive income. There is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment.

Impairment

An 'expected credit loss' impairment model applies which requires a loss allowance to be recognized based on expected credit losses. The estimated present value of future cash flows associated with the asset is determined and an impairment loss is recognized for the difference between this amount and the carrying amount as follows: the carrying amount of the asset is reduced to estimated present value of the future cash flows associated with the asset, discounted at the financial asset's original

BURRELL RESOURCES INC.**NOTES TO the FINANCIAL STATEMENTS**

(Expressed in Canadian Dollars)

For the years ended December 31, 2025 and 2024

effective interest rate, either directly or through the use of an allowance account and the resulting loss is recognized in profit or loss for the period.

In a subsequent period, if the amount of the impairment loss related to financial assets measured at amortized cost decreases, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

Derecognition**Financial assets**

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in the statements of operations and comprehensive loss.

b) Exploration and evaluation assets

Pre-exploration costs are expensed as incurred. Direct costs related to the acquisition and exploration and evaluation of mineral properties held or controlled by the Company are capitalized on an individual property basis until the property is put into production, sold, abandoned, or determined to be impaired.

When the technical feasibility and commercial viability of extracting a mineral resource are demonstrable, the exploration and evaluation costs are tested for impairment and subsequently transferred to property and equipment. When a property is placed into commercial production, capitalized costs will be depleted using the units-of-production method.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers, or title may be affected by undetected defects.

c) Decommissioning obligations

The Company recognizes liabilities for statutory, contractual, legal or constructive obligations associated with the retirement of property, plant and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. Initially, a provision for a decommissioning obligation is recognized at its net present value in the period in which it is incurred, using a discounted cash flow technique with market-based risk-free discount rates and estimates of the timing and amount of the settlement of the obligation.

Upon initial recognition of the liability, the corresponding decommissioning cost is added to the carrying amount of the related asset. Following initial recognition of the decommissioning obligation, the carrying amount of the liability is increased for the passage of time and adjusted for changes to significant estimates including the current discount rate, the amount or timing of the underlying cash flows needed to settle the obligation and the requirements of the relevant legal and regulatory framework. Subsequent changes in the provisions resulting from new disturbance, updated cost estimates, changes to estimated lives of operations and revisions to discount rates are also capitalized to the related assets. Amounts capitalized are depreciated over the lives of the assets to which they relate. The amortization or unwinding of the discount applied in establishing the net present value of provisions is charged to expense and is included within finance costs in profit or loss.

BURRELL RESOURCES INC.**NOTES TO the FINANCIAL STATEMENTS**

(Expressed in Canadian Dollars)

For the years ended December 31, 2025 and 2024

d) Taxation

Current tax is the expected taxes payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to taxes payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

e) Share capital

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects. Common shares issued for consideration other than cash, are valued based on their market value at the date the shares are issued.

The Company uses the residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less measurable component. The Company considers the fair value of common shares issued in a unit private placement to be the more easily measurable component and the common shares are valued at their fair value, as determined by the closing quoted bid price on the issued date. The balance, if any, is allocated to the attached warrants. Any value attributed to the warrants is recorded as reserves.

f) Share-based compensation

The Company's stock option plan allows the Company's directors, officers, employees, and consultants to acquire shares of the Company. The fair value of options granted is recognized as share-based compensation expense with a corresponding increase in reserves. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee. Where options are subject to vesting, each vesting tranche is considered a separate award with its own vesting period and grant date fair value. The fair value of each tranche is measured at the grant date using the Black-Scholes option pricing model, taking into account the terms and conditions upon which the options were granted. Share-based compensation expense is recognized over the tranche's vesting period by a charge to profit or loss. For employees, the compensation expense is amortized on a straight-line basis over the requisite service period which approximates the vesting period. Share based compensation expense for share options granted to non-employees is recognized over the contract services period or, if none exists, from the date of grant until the options vest. Share based compensation associated with unvested options granted to non-employees is re-measured on each statement of financial position date.

BURRELL RESOURCES INC.**NOTES TO the FINANCIAL STATEMENTS**

(Expressed in Canadian Dollars)

For the years ended December 31, 2025 and 2024

At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of options that are expected to vest. In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at the fair value of the share-based compensation. Otherwise, share-based compensation is measured at the fair value of goods or services received.

g) Loss per share

Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the reporting period. Diluted loss per share is computed similarly to basic loss per share except that the weighted average common shares outstanding are increased to include additional shares for the assumed exercise of share options and share purchase warrants, if dilutive. The number of additional common shares is calculated by assuming that outstanding share options and share purchase warrants were exercised and that the proceeds from such exercises were used to acquire common shares at the average market price during the reporting periods.

h) Impairment of long-lived assets

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

i) Foreign currency translation

In preparing the financial statements of each individual entity, transactions in currencies other than the entity's functional currency are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items are recognized in profit or loss in the period in which they arise.

j) Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand, demand deposits, and short-term investments with original maturities of three months or less. These investments have been assessed to meet the amortized cost criteria under IFRS 9 and are measured using the effective interest rate method.

Interest income on these investments is recognized in the statement of profit or loss under "Other Income", as they are not considered part of the Company's principal revenue-generating activities.

For the years ended December 31, 2025 and 2024

k) Accounting standards and interpretations issued but no effective

The Company has reviewed the accounting standards or amendments to existing accounting standards that have been issued but have future effective dates and determined that these are either not applicable or are not expected to have a significant impact on the Company's Financial Statements.

4. Exploration and evaluation assets

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristics of many mineral properties. The Company has investigated title to its mineral properties, to the best of its knowledge, title to the mineral property assets remains in good standing.

Antelope Project, Nevada, United States

As of December 31, 2025, the Antelope project consists of one property option agreement:

Antelope Property

On November 2, 2020, and as amended, the Company entered into the Antelope Option Agreement in the Antelope area ("Antelope"). The Company agreed to lease a 100% interest in certain surface and mineral rights in consideration as follows:

- (i) US\$2,500 on signing (paid);
- (ii) Completing a 43-101 technical report by May 2, 2021 (completed)
- (iii) US\$10,000 and \$10,000 in common shares of the Company's stock divided by the weighted average of the last 10 trading days on or before November 2, 2026;
- (iv) US\$15,000 on or before November 2, 2027;
- (v) US\$20,000 on or before November 2, 2028;
- (vi) US\$25,000 on or before November 2, 2029; and
- (vii) US\$30,000 on each subsequent November 2nd anniversary.

Pursuant to the Antelope agreement, the property owner also agreed to grant to the Company an option to acquire the property, prior to production on the property, in consideration for US\$4,000,000.

As further consideration for the lease, the Company will pay to the property owner a NSR between 2% and 3% dependent on the price of gold (US\$1,000 to US\$2,500 per ounce), provided that the Company may re-purchase half the NSR in consideration for US\$750,000.

On August 13, 2020, the Company entered into another Antelope Option Agreement, pursuant to which the Company agreed to lease a 100% interest in certain surface and mineral rights situated in the Antelope area, in White Pine County, Nevada in consideration of certain payments. On June 17, 2023, the Company terminated this option agreement and has no further obligations to this option agreement.

Exploration and evaluation expenditures

5. Financial Instruments

Financial instruments recognized on the statement of financial position consist of cash and accounts payable and accrued liabilities.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following summarizes fair value hierarchy under which the Company's financial instruments are valued:

- Level 1 – fair values based on unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – fair values based on inputs that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – fair values based on inputs for the asset or liability that are not based on observable market data.

The carrying amounts on the statement of financial position for accounts payable and accrued liabilities approximate their fair values due to the immediate or short-term maturities of these financial instruments.

The Company's other financial instrument, cash and cash equivalents, under the fair value hierarchy are based on level one quoted prices in active markets for identical assets.

The Company, through its financial assets and liabilities, is exposed to various risks. The following analysis provides a measurement of risks as at December 31, 2025:

(a) Credit risk

Financial instruments that potentially subject the Company to significant concentrations of credit risk consist primarily of cash and cash equivalence. The Company's sales tax receivable consists of input tax credit refunds from the federal government and as such, the Company believes the risk to be minimal. The Company limits its exposure to credit risk by placing its cash and cash equivalence with high a quality financial institution. Cash equivalence consists of a short-term investment certificate with a quality financial institution earning an average interest at 1.80% per year. The Company's cash and cash equivalents consists of the following:

As at December 31,	2025	2024
Cash	\$ 1,111	\$ 1,282
Cash equivalents	621,525	645,767
Total cash and cash equivalents	\$622,636	\$647,049

(b) Currency risk

Foreign exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company is not exposed to significant foreign exchange risk on its cash and accounts receivable or its obligations under accounts payable and accrued liabilities.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. As at December 31, 2025, the Company had working capital of \$607,359 including cash of \$622,636 to settle current liabilities of \$15,445.

BURRELL RESOURCES INC.**NOTES to the FINANCIAL STATEMENTS**

(Expressed in Canadian Dollars)

For the years ended December 31, 2025 and 2024

The Company monitors its ability to meet its short-term administrative expenditures by raising additional funds through share issuance when required. The Company does not have investments in any asset backed deposits.

(d) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company is exposed to interest rate risk given the Company's holds interest bearing investment at year end.

(e) Price risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company is exposed to negligible price risk.

6. Capital Stock**(a) Authorized****Common shares**

The Company is authorized to issue an unlimited number of common shares without par value. At December 31, 2025, the Company had 17,400,333 common shares issued and outstanding (2024 – 17,400,333).

Escrow

At December 31, 2025 and 2024, there were no common shares held in escrow.

(b) Share Purchase Options

The Company has established a rolling stock option plan ("Option Plan") enabling the directors to grant options to employees, officers, directors, and consultants of the Company. From time to time, shares may be reserved by the Board, in its discretion, for options under the Option Plan, provided that the total number of shares reserved for issuance by the Board shall not exceed 10% of the issued and outstanding listed shares (on a non-diluted basis) as at the date of grant. Options are non-assignable and may be granted for a term not exceeding that permitted by the CSE, currently ten years. All stock options issued are subject to vesting terms and vest at the discretion of the Board. Exercise prices on options granted under the plan cannot be lower than the greater of the last closing price for the shares as quoted on the CSE, the trading day prior to the grant date and the grant date. The Company did not grant any stock options during the years ended December 31, 2025 and 2024. No stock-based compensation expense was recorded in the respective periods. As at December 31, 2025, the Company has outstanding stock options exercisable as follows:

Issuance Date	Expiry Date	Exercise Price	Issued	Exercisable	Weighted Average Remaining Life (years)
July 12, 2021	July 12, 2026	\$0.15	700,000	700,000	0.53
Total			700,000	700,000	0.53

7. Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of equity comprising issued capital stock, reserves and deficit.

The Company is not subject to externally imposed capital requirements. The Company does not pay dividends. There were no changes to the Company's capital management strategies during the year ended December 31, 2025.

The Company intends to raise additional working capital as required by the issuance of its common shares or units consisting of common shares and warrants to purchase common shares in the future.

8. Related Party Transactions

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers.

The remuneration of directors and key management personnel during the year ended December 31, 2025 was \$nil (2024 - \$nil). As at December 31, 2025, there was \$nil owing to related parties (2024 - \$nil).

9. Segmented Information

The Company operates in one business segment, being the exploration of mineral properties. The Company's mineral property assets are all in the United States.

10. Income taxes

A reconciliation of current income taxes at statutory rates with the reported taxes is as follows:

	Year Ended December 31, 2025	Year Ended December 31, 2024
Net loss before income taxes	\$ (22,364)	\$ (6,977)
Expected income tax recovery at statutory tax rates	(6,038)	(1,884)
Permanent differences	10,444	10,383
Share issue costs	(10,333)	(10,333)
Change in unrecognized deductible temporary differences	5,927	1,834
Total deferred tax recovery	\$ -	\$ -

Significant components of deductible and taxable temporary differences, unused tax losses and unused tax credits that have not been included on the statements of financial position are as follows:

	December 31, 2025	Expiry Dates	December 31, 2024	Expiry Dates
Share issue costs	\$ Nil	N/A	\$ 38,271	2024-2025
Non-capital losses	\$ 350,947	2025-2045	\$ 290,618	2024-2044

Tax attributes are subject to review, and potential adjustment, by tax authorities.
