**7. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

As at January 31, 2025, the Company's financial instruments comprise cash and accounts payable and accrued liabilities. The fair values of cash and accounts payable and accrued liabilities approximate their carrying values due to the short-term nature of these instruments. Fair values of financial instruments are classified in a fair value hierarchy based on the inputs used to determine fair values. The levels of the fair value hierarchy are as follows:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 – Inputs that are not based on observable market data (unobservable inputs).

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit risk*

Credit risk is the risk of loss arising from a customer or third party to a financial instrument failing to meet its contractual obligations. The Company's credit risk is primarily attributable to its cash. The Company limits exposure to credit risk by maintaining its cash with a large Canadian financial institution.

*Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at January 31, 2025, the Company had a cash balance of \$147,098 which is sufficient to settle current liabilities of \$1,671 and anticipated short-term cash requirements, but additional funding may be required to meet long-term requirements should a Qualifying Transaction not be completed on a timely basis. The Company's financial liabilities include trade payables that have contractual maturities of 30 days or are due on demand and are subject to normal trade terms.

*Market risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and equity prices. As the Company does not currently hold and does not expect to hold interest-bearing financial instruments other than cash, assets or liabilities denominated in a foreign currency, and marketable securities or other financial instruments subject to fluctuations in equity prices, it currently does not have and is not expected to have exposure to these market risks.

**8. CAPITAL MANAGEMENT**

The Company defines capital as its shareholders' equity, which was \$145,427 as at January 31, 2025. The Company's objectives when managing capital are to maintain a low level of on-going operating costs and to continue as a going concern until a Qualifying Transaction can be completed. The Company's current capital was received from the issuance of common shares (Note 5) and will only be sufficient to identify and evaluate a limited number of assets and businesses for the purpose of identifying and completing a Qualifying Transaction.

The Company is not subject to any externally imposed capital requirements other than the expenditure restrictions applicable under Policy 2.4. These expenditure restrictions limit the Company's on-going expenditures to reasonable expenditures relating to a proposed Qualifying Transaction, assurance and audit fees, escrow agent and transfer agent fees, regulatory filing fees and a maximum of \$3,000 per month for other general and administrative costs.
