Tokenwell Adds Single-Coin Trading Capabilities and Expands Exchange Support

New trading features and Binance integration designed to give users more flexibility to trade single coins and manage assets across centralized exchanges.

Toronto, ON / Access Newswire / January 28th, 2026 / Tokenwell Platforms Inc. (CSE: TWEL) (OTCQB: TWELF) (FWB: Y920) ("Tokenwell" or the "Company") today announces the launch of new trading functionality within the Tokenwell app, including single-coin trading capabilities and expanded exchange support with the addition of Binance.

This enhancement builds on Tokenwell's January 2026 Community Access announcement, which introduced a structured onboarding program designed to collaborate with approved content creators, crypto communities, and ecosystem partners.

Single-Coin Trading Capabilities

Users can now execute market and limit orders for any individual cryptocurrency from the Tokenwell app, giving them control over buying or selling specific coins. This enhancement is designed to allow users to augment existing basket portfolio strategies by making precise, coin-specific trades.

All trades are executed directly on the user's connected centralized exchange account, with the Tokenwell app operating as the interface layer. Users' assets always remain in the custody of their selected exchange.

Expanded Exchange Support

The Tokenwell app now also allows users to connect their Binance account using an API key, expanding trading and management capabilities beyond its current Coinbase and Crypto.com Exchange integrations.

With the integration of Coinbase, Crypto.com Exchange, and Binance, users can monitor and execute orders, set price alerts, and track portfolio assets across multiple exchanges from a single platform. Exchange functions depend on local access rules and regulations.

Update Highlights

- Single-coin trading with market and limit orders
- Binance exchange integration via API key connection
- Price alerts for Binance-supported assets (no exchange connection required)
- EUR currency display
- User interface enhancements

The Tokenwell app is available on the **Apple App Store** and **Google Play Store**.

Roadmap in Progress

In February 2026, Tokenwell expects to roll out additional product enhancements on an ongoing basis, including new engagement features, guided in-app journeys, integration with a mobile measurement partner, expanded exchange support, and user interface updates.

In late February 2026, Tokenwell expects to release advanced trading features designed for more experienced users, including enhanced order types and professional-grade trading tools that build upon the app's single-coin trade functionality.

Additional product updates are expected to be rolled out incrementally as Tokenwell continues to build out its platform roadmap.
