CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This presentation contains “forward-looking information” under applicable Canadian securities legislation and “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995 (collectively, “forward looking statements”). Forward-looking statements and information generally can be identified by the use of forward-looking terminology such as “outlook”, “objective”, “may”, “will”, “expect”, “intend”, “estimate”, “anticipate”, “believe”, “should”, “plans”, “budget”, “continue” or similar expressions suggesting future outcomes or events. Forward-looking statements and information include, but are not limited to, statements regarding the operations, business, financial condition, expected financial results, performance, opportunities, strategies, outlook and guidance of Algoma Steel Group Inc. (the “Company” or “Algoma”), Algoma’s strategic objectives, its plate mill modernization project, potential purchases under its normal course issuer bid, and Algoma’s transformation to electric arc furnace steelmaking (the “EAF Transformation”), including the expected timing for completion of the EAF Transformation, and full EAF transition and the resulting effects on the Company, expectations regarding future economic conditions, including the price of steel, tariffs and/or trade wars, inflation and interest rates, Algoma’s capitalization and ability to create value for its shareholders.

Although we believe that our anticipated future results, performance or achievements expressed or implied by the forward-looking statements and information are based upon reasonable assumptions and expectations, the reader should not place undue reliance on forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors, many of which are beyond our control, which may cause the actual results, performance or achievements of the Company to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements and information. Readers should consider the other risks and uncertainties set forth in the section entitled “Risk Factors” and “Cautionary Note Regarding Forward-Looking Information” in Algoma’s Annual Information Form for the 9 months ended December 31, 2024, filed by Algoma with applicable Canadian securities regulatory authorities (available under the company’s SEDAR+ profile at www.sedarplus.ca) and with the U.S. Securities and Exchange

Commission (the “SEC”), as part of Algoma’s Annual Report on Form 40-F (available at www.sec.gov), as well as in Algoma’s current reports with the Canadian securities regulatory authorities and the SEC.

Given these risks, uncertainties and other factors, readers should not place undue reliance on forward-looking statements or information as a prediction of actual results. The forward-looking statements and information reflects management’s current expectations and beliefs regarding future events and operating performance and is based on information currently available to management. Although we have attempted to identify important factors that could cause actual results to differ materially from the forward-looking statements and information contained herein, there are other factors that could cause results not to be as anticipated, estimated or intended. The forward-looking statements and information contained herein is current as of the date hereof and, except as required under applicable law, we do not undertake to update or revise it to reflect new events or circumstances.

Certain information in this presentation may be considered as “financial outlook” within the meaning of applicable securities legislation. The purpose of this financial outlook is to provide readers with disclosure regarding the Company’s reasonable expectations as to the anticipated results of its proposed business activities for the periods indicated. Readers are cautioned that the financial outlook may not be appropriate for other purposes.

PRESENTATION OF FINANCIAL INFORMATION

The Company’s fiscal year runs from January 1st to December 31st. The Company and its subsidiaries’ functional currency is the United States dollar (“US dollar” or “US\$”). The US dollar is the currency of the primary economic environment in which the Company and subsidiaries operate. The items included in the unaudited condensed interim financial statements are measured using the US dollar.

For reporting purposes, the unaudited condensed interim consolidated financial statements are presented in millions of Canadian dollars (“C\$” or “\$”). The assets and liabilities are translated into the reporting currency using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at average exchange rates for the reporting period. Exchange differences arising are

recognized in other comprehensive (loss) income and accumulated in equity under the heading ‘Foreign exchange on translation to presentation currency.’

The Company’s financial statements have been prepared in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board (“IASB”) (“IFRS Accounting Standards”). The financial information presented herein may differ in certain material respects from U.S. generally accepted accounting principles (“U.S. GAAP”). As such, the Company’s financial statements are not comparable to the financial statements of U.S. companies prepared in accordance with U.S. GAAP.

This presentation should be read in conjunction with, the Company’s September 30th, 2025 unaudited condensed interim consolidated financial statements and the accompanying notes, and the related management’s discussion & analysis.

NON-GAAP MEASURES

To supplement our financial statements, we use certain non-GAAP measures to evaluate the performance of Algoma. These terms do not have any standardized meaning prescribed within IFRS Accounting Standards and, therefore, may not be comparable to similar measures presented by other companies. Rather, these measures are provided as additional information to complement those IFRS Accounting Standards by providing a further understanding of our financial performance from management’s perspective and providing management and investors with additional information for comparison of our operating results across different time periods and to the operating results of other companies. Accordingly, they should not be considered in isolation nor as a substitute for analysis of our financial information reported under IFRS Accounting Standards. Please refer to the Company’s most recent MD&A for further discussion of these non-GAAP financial measures, including Adjusted EBITDA, and for a reconciliation to comparable IFRS Accounting Standards, including net (loss) income. See also Annex: Adjusted EBITDA Reconciliation on slide 15.

Overview of Net Working Capital Seasonality¹

Accelerating EAF Transformation

We are accelerating retirement of our blast furnace and coke oven operations as we ramp up EAF production through 2025 and 2026.

Market Update

Macroeconomic Drivers

- Trade Policy and Tariffs
- Global Supply Chain Disruptions
- Economic Indicators – Canada
- Automotive Industry Dynamics
- Inflation
- Central Bank Policy

Key Market Drivers

- Steel tariffs of 50% persist on imported steel into the US.
- Current oversupply of the Canadian coil market due to US market being cut off from Canadian steel mills.

Historical Hot Rolled Coil (HRC) and As Rolled Plate Prices (ARP) (US\$/ton)

Committed to our Path Forward

We are positioning Algoma for a new era in steel, well-capitalized to make critical investments that enhance long-term performance and create value for our shareholders.

STRATEGIC DIRECTION

OPERATIONAL & CAPITAL IMPROVEMENTS Algoma has developed and executed numerous operational and capital projects that add long term value to the business.	EAF APPROVAL Received Board approval to begin construction of Electric Arc Furnace. <i>Nov 2021</i>	PMM PHASE 1 Enhancing quality and expanding grade range on Canada's only discrete plate mill. <i>2022</i>	LSP POWER PLANT Installation of new turbines to support power generation for EAF project. <i>Jun 2023</i>	PMM PHASE 2 Final installation of key elements substantially complete. <i>2024</i>	EAF 2 First heat achieved July 2025. <i>2025</i>	EAF 1 Construction progressing, commissioning activities expected in early 2026. <i>2026E</i>	OPERATIONAL PIVOT Accelerate EAF transformation with a plate – first strategy focusing primarily on the Canadian market. <i>2025E</i>
FINANCIAL DISCIPLINE Algoma has focused on streamlining its balance sheet, finding effective sources of capital to fund its strategic initiatives and providing long-term value to stakeholders.	RETURN TO PUBLIC MARKETS Including Equity injection of \$306M USD. <i>Oct 2021</i>	SUBSTANTIAL ISSUER BID Algoma buys back approximately 1/3 of outstanding shares. <i>Aug 2022</i>	NORMAL COURSE ISSUER BID Algoma renewed its NCIB for share repurchases. <i>2023/24</i>	ABL RENEWAL Amend and extend Algoma's now upsized US\$300M asset-based loan. <i>May 2023</i>	DEBT OFFERING Opportunistically raised \$350M USD to strengthen balance sheet and mitigate risk. <i>Apr 2024</i>	ABL UPSIZE Algoma amended and upsized it's asset-based loan from US\$300M to US\$375. <i>2025</i>	LIQUIDITY FUNDING SUPPORT Algoma secured a binding term sheet for \$500 million of financing from the Governments of Canada and Ontario. <i>2025</i>
STRATEGIC PARTNERSHIPS Algoma continues to develop partnerships focused on de-risking the organization and creating long-term value for stakeholders.	ATM METALS JV with Triple M Metals for committed supply of scrap and metallic units. <i>Ongoing</i>	DANIELI Technology partner for OEM Equipment for Algoma's Transformation to Electric Arc Steelmaking. <i>2021-2025E</i>	IESO Provides Conditional Approval of Phase 1 & 2 System Impact Assessment. <i>2023</i>	ONTARIO GOVERNMENT Issued Order in Council to expedite transition lines construction <i>2029E</i>	PROJECT VIGILANCE Partnering with Ontario Shipyards to support the next chapter of Canada's Shipbuilding Strategy <i>Ongoing</i>	TRANSPOD Partnering with TransPod and Supreme Steel to build Canada's first ultra-high-speed TransPod line between Calgary and Edmonton. <i>Ongoing</i>	SEASPAN Signed MoU with Seaspan and Stigterstaal to explore strategic partnership on expanding shipbuilding in Canada. <i>Ongoing</i>
ESG FOCUS Algoma is committed to initiatives geared at driving performance, reducing risk and developing a culture of organizational excellence that improve our ESG performance.	FOCUS ON SAFETY TRIR improved from 2.35 in FY2022 to 1.45 in 2024, reflecting stronger training, engagement, and safety focus. <i>Ongoing</i>	STRONG BOARD GOVERNANCE An active, well-informed board with diverse perspectives and experience. <i>Ongoing</i>	ENTERPRISE RISK MANAGEMENT Develop a culture of risk management. <i>Nov 2019</i>	ESG POSITION STATEMENT Published Algoma's approach to ESG. <i>Apr 2023</i>	INTEGRATED BUSINESS PLANNING Planning process to enhance operational efficiency and improve ship-on-time performance. <i>Ongoing</i>	SUSTAINABILITY REPORT Published its third annual Sustainability Report. <i>2025</i>	EMISSION REDUCTION EAF project expects to reduce emissions 70% and improve GHG performance.

1 - For fiscal year ended December 31, 2025 and onwards, period end date refers to the following: "Q1" - March 31, "Q2" - June 30, "Q3" - September 30, and "Q4" - December 31. Effective for fiscal year ended December 31, 2024, the Company changed its year end from March 31 to December 31. Therefore, for fiscal years prior to December 31, 2025, period end date refers to the following: "Q1" - June 30, "Q2" - September 30, "Q3" - December 31, and "Q4" - March 31.

2 - The definition and reconciliation of these non-IFRS measures are included in the "Non-IFRS Financial Measures" section of this MD&A.

3 - Pursuant to the Merger with Legato, on October 19, 2021, the Company effected a reverse stock split retroactively, such that each outstanding common share became such number of common shares, each valued at \$10.00 per share, as determined by the conversion factor of 71.76775% (as defined in the Merger Agreement), with such common shares subsequently distributed to the equity holders of the Company's former ultimate parent company.

Further, on February 9, 2022, the Company issued 35,883,692 common shares in connection with the earnout rights granted to non-management shareholders that existed prior to the Merger.

4 - On March 3, 2022, the Company commenced a normal course issuer bid for which the Company purchased and cancelled 3,364,262 common shares as at March 31, 2023.

5 - On June 21, 2022, the Company commenced a substantial issuer bid in Canada and a Tender Offer (the "Offer") in the United States. On July 27, 2022, the Offer was completed and 41,025,641 common shares were purchased for cancellation.

6 - During the year ended March 31, 2024, the Company converted 70,920 deferred share units to common shares and issued 464,268 common shares upon exercise of earnout rights, Replacement LTIP units and Omnibus Plan LTIP units.

7 - During the nine month period ended December 31, 2024, the Company issued 755,730 common shares upon exercise of earnout rights, Replacement LTIP units and Omnibus Plan LTIP units.

8 - During the three month period ended March 31, 2025, the Company issued 75,000 common shares upon exercise of earnout rights.

As at September 30, 2025, 104,933,802 common shares were outstanding.

Glossary

Term	Definition
Basic Oxygen Furnace (BOF)	Vessel used to convert liquid hot metal from a blast furnace into steel.
Blast Furnace (BF)	Metallurgical furnace combining fuel, ores and flux to smelt iron ore to produce pig iron, which is fed downstream into a BOF.
Cogeneration	Also known as combined heat and power (CHP), a cogeneration plant uses gas generated from the steelmaking process to create electricity.
Coke	Fuel for a Blast Furnace that is made by heating coal in the absence of air.
Cold Rolled Sheet	Hot rolled steel that has been further processed to increase its strength and strength-to-weight ratio, providing better overall surface finish.
Continuous Casting	Process whereby molten metal is solidified into a "semi-finished" billet, bloom, or slab for subsequent rolling in the finishing mills.
CRU Index	Price index which is widely used throughout the steel industry. Prepared by CRU, a leading steel data provider (cruindices.com).
Electric Arc Furnace (EAF)	Method for producing steel with primary inputs of scrap steel and electricity. EAFs form new steel by heat charging material with an electric arc.
Hard Coking Coal (HCC)	A category of metallurgical coal that is converted to coke and used as fuel for the blast furnace in an integrated steel mill.
Hot Briquetted Iron (HBI)	Compacted form of direct reduced iron (DRI) that serves as a supplement for pig iron and scrap in electric arc furnace steel mills.
Hot Metal	Blast furnace iron ore that is charged to the BOF in hot liquid form.

Term	Definition
Hot Rolled Sheet	Carbon steel product commonly used for applications in which dimensional tolerances and surface finish quality is not critical (e.g. automotive accessories, stampings).
Iron Ore Pellets	Pellets are small balls of iron ore used in the production of steel that are agglomerated from fines.
Limestone	Also referred to as flux, limestone is an essential input in a blast furnace.
Ladle Metallurgy Furnace (LMF)	Holding furnace for hot metal coming out of the BOF or EAF, increases capacity of melt shop and allows for improvements to steel grade.
Metallics	Iron ore or similar products that are used to produce raw steel.
NOx	Nitrous oxide (NOx) is a greenhouse gas that traps heat in the atmosphere.
Net Sales Realization (NSR)	The average selling price of steel excluding costs of freight.
Pig Iron	Intermediate solid input made by smelting iron ore with a high-carbon fuel and reductant, such as coke, with flux for use as a feedstock in the BOF.
Plate	Includes steel sheet metal that is 5mm or thicker used for construction or structural purposes due to its low maintenance versatility (e.g. shipping containers, roofing, heavy equipment).
Prime Scrap	High quality, clean scrap metal that tends to trade at a premium to lower quality shredded scrap.
Slab	Thick semi-finished (intermediate) steel that is further converted into hot rolled sheet or plate.
Service Center	Wholesalers that may further process steel purchased from manufacturer (e.g. cutting or forming).
SOx	Sulfur oxide (SOx) is an air pollutant that has negative health consequences.
