

NOP PR #25-29

Nevada Organic Phosphate Announces OTCQB Listing

Vancouver, British Columbia, December 29, 2025, Nevada Organic Phosphate Inc. ("NOP" or the "Company") (CSE: NOP), a B.C. based leader in organic sedimentary phosphate exploration, is pleased to announce that, further to its news release dated December 8, 2025, the Company's common shares (the "**Shares**") have commenced trading on the OTCQB Venture Market (the "**OTCQB**") at the market open on December 29, 2025, under the symbol "NOPFF".

Robin Dow, Chief Executive Officer, stated: *"Today's listing on the OTCQB® Venture Market represents another meaningful milestone in our strategy to increase visibility, improve liquidity, and expand our investor reach. Listing on the OTCQB positions NOP with increased visibility among the American investment community and improved liquidity for our current and prospective shareholders."*

The Shares will continue to trade on the Canadian Securities Exchange (the "**CSE**") under the symbol "NOP". The OTCQB listing represents a significant milestone in the Company's long-term capital markets strategy, increasing accessibility and visibility among US based retail and institutional investors.

About OTCQB Venture Market

The OTCQB, operated by OTC Markets Group Inc., is designed for developing and entrepreneurial companies in the United States and abroad. Companies must be current in their financial reporting and undergo an annual verification and management certification process, including meeting a minimum bid price and other financial conditions. With more compliance and quality standards, the OTCQB provides investors improved visibility to enhance trading decisions. The OTCQB is recognized by the United States Securities and Exchange Commission as an established public market providing public information for analysis and value of securities.

Nevada Organic Phosphate Inc.

NOP is a junior exploration company with an organic sedimentary raw rock phosphate bed, 6.6 kilometres long, in northeast Nevada. Additional applications extend the potential strike of rock phosphate to over 30 kilometres. This is believed to be the only known large-scale organic sedimentary phosphate project in North America. It is situated close to the main highway to Montello/Elko, Nevada, and near the rail head to California.
