CRITICAL INFRASTRUCTURE TECHNOLOGIES EXECUTES A CONFIDENTIALITY AGREEMENT WITH AQURA TECHNOLOGIES

Vancouver, BC – November 14, 2025 – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (OTC: CITLF) (FRA: X9V) ("CiTech" or the "Company"), a leading developer of autonomous, high-capacity mobile communications and security platforms, is pleased to announce the signing of a Mutual Non-Disclosure Agreement (NDA**)** with Aqura Technologies, an industry leader in advanced communications, private 4G/5G networks, industrial IoT, and unified communications solutions across Australia's critical industries.

The NDA provides a framework for the confidential exchange of technical, commercial, and engineering information between CiTech and Aqura, enabling detailed collaborative discussions on potential integration of Aqura's advanced communications capabilities into CiTech's rapidly deployable Nexus platform**.**

The Nexus platform — a 20-metre autonomous, relocatable tower system — is designed to support mission-critical communications, surveillance, and digital infrastructure for defence, mining, emergency services, and remote industrial operations. Aqura's proven expertise in private 4G/5G, edge compute, enterprise connectivity, and remote-site digital solutions positions them as an ideal partner for advanced communications integration.

"The signing of this NDA marks an important next step in strengthening CiTech's domestic partnerships," said Brenton Scott, CEO, CiTech. "Aqura is a recognised leader in delivering high-performance communications solutions across some of the most demanding environments in Australia. We look forward to working closely with them to explore new levels of connectivity and capability across the Nexus platform."

As a subsidiary within the Telstra Purple group, Aqura brings robust national-scale experience and a strong digital innovation foundation. This collaboration will allow both parties to assess opportunities for next-generation mobile connectivity, IoT integration, edge networking, and high-bandwidth backhaul to enhance the performance of Nexus deployments in Australia and international markets.

The NDA reflects CiTech's ongoing strategy to partner with leading technology providers in communications, energy, and advanced sensing to deliver a globally competitive, fully integrated capability across Nexus platforms deployed worldwide.

About Critical Infrastructure Technologies Ltd.
Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released. To learn more about the Company, visit www.citech.com.au.

FORWARD-LOOKING INFORMATION

*This news release contains "forward-looking information" and "forward-looking statements" (collectively, "**forward-looking information**") within the meaning of applicable securities laws. Forward-looking information is generally identifiable by use of the words "believes," "may," "plans," "will," "anticipates," "intends," "could", "estimates", "expects", "forecasts", "projects" and similar expressions, and the negative of such expressions. Forward-looking information in this news release.*

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is based on the reasonable assumptions, estimates, analysis and opinions of management made in light of its experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances at the date such statements are made. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.
