NI 43-101 Technical Report Info

Phillips Township Gold Property, Kenora Mining Division, Ontario, Canada. The following information regarding the Property is summarized or extracted from the Technical Report authored by the Authors in accordance with the requirements of NI 43-101. The Authors are each a "qualified person" within the meaning of NI 43-101. All photo, figure and table reference herein are numbered in accordance with the Technical Report available on the Issuer's SEDAR profile at www.sedarplus.ca

Property Description and Location

The Phillips Township Gold Property is located some 13.0 to 20.0 kilometres north of Nestor Falls, Ontario and access is by the all-weather paved Trans Canada Highway (Hwy #71) which runs through the centre of Property in a north-south direction. Highway #71 is accessed by the Trans Canada Highway #17 in the north from Winnipeg Kenora-Sioux Narrows route east and south which is 324 km or by Trans-Canada Highway #1 in the south from Thunder Bay-Fort Frances-Emo-Rainy River route which is 460 km. A major power line also crosses the Property in a north-south direction. Good local infrastructure, manpower, heavy duty equipment, hospital and local services are also nearby.

Property Particulars

Gold was first discovered on the Property during the 1894 gold rush and first worked on and off until 1905. It is comprised of eight (8) separate mineralized showings with five having seen most of the work. They are the Combined, Mascotte, Trojan Mine, the Boulder, and the Young's Bay Occurrences. Three new gold discoveries were made in 1970's and in 1999 namely the OGS, Terrell and Kuluk gold showings respectively.

All eight (8) of the occurrences have been defined by surface sampling. Shafts and/or adits and trenches are present on five (5) and only two have been previously drilled. Visible gold within the quartz veins was recorded historically from the Combined, Mascotte, Boulder and Young's Bay Gold Occurrences. This is the first time that all these gold occurrences are part of a single property, and therefore, a more comprehensive and systematic exploration program using modern exploration techniques has now become possible.

The Issuer is engaged in the business of mineral exploration and the acquisition of mineral property assets in Canada. Its objective is to locate and develop economic precious and base metal properties of merit and to conduct its exploration program on the Phillips Township Gold Property.

Other Properties

The Issuer also holds an option to acquire a 100% interest in the Fulford Township Property and will continue to meet its requirements under the Fulford Option Agreement. The Fulford Township Property will not be the focus of the Issuer's business activities over the next 12-month period.

The issuer also has a 50/50 partnership agreement with Michael Staples of South Hopkins, Minnesota, to explore the historical Bully Boy Mine's four patented mineral claims located directly adjacent to Golden Rapture's Phillips Township property, NW, Ontario. Golden Rapture will become a 50% partner by conducting exploration on the four patented mineral claims, with all exploration costs to be incurred by Golden Rapture. No cash payment or shares were issued in this agreement.

Future Performance

The Company's future performance and financial success is largely tied to the success of its exploration and development activities. The development of assets may take years to complete and the resulting income, if any, is difficult to determine with any certainty. The Company lacks mineral reserves and to date has not produced any revenues. The sales value of any minerals discovered by the Company is largely dependent upon factors beyond its control, such as the market value of the commodities produced. Current global economic conditions and financial markets are volatile and are likely to be so for the foreseeable future, reflecting ongoing concerns about the global economy and possible future COVID 19 outbreaks. This affects the mining industry, and, as it relates to the Company, affects the availability of equity financing for the purposes of mineral exploration and development.

As a result, the Company may have difficulties raising equity financing for the purposes of mineral exploration, development and property acquisitions, particularly without excessively diluting the interests of its current shareholders. With continued market volatility expected, the Company's current strategy is to continue exploring its properties and to seek out other prospective project opportunities. The Company believes this focused strategy will enable it to meet the near-term challenges presented by the capital markets while maintaining momentum on key initiatives. The Company regularly monitors economic conditions and estimates their impact on the Company's operations and incorporates these estimates in short-term operating and longer-term strategic decisions.

Off-Balance-Sheet Arrangements

As of the date of this filing, the Company does not have any off-balance-sheet arrangements that have, or are reasonably likely to have, a current or future effect on the results of operations or financial condition of the Company, including, and without limitation, such considerations as liquidity and capital resources.

Environmental Contingency

The Company's exploration activities are subject to various government laws and regulations relating to the protection of the environment. These environmental regulations are continually changing and generally becoming more restrictive. As of April 30, 2025, the Company does not believe that there are any significant environmental obligations requiring material capital outlays in the immediate future.

Discussion of Operations

During the year ended April 30, 2025, the Issuer reported \$nil (2024 - \$nil) revenue and a loss and comprehensive loss of \$639,493, and for the year ended April 30, 2024 was \$991,615.

Loss per share	\$0.01	\$0.01	\$0.01	\$0.01	\$0.05	\$0.01	\$0.01	\$0.01

Fourth Quarter Results

The variability of \$160,142 net loss during the 4th quarter results is mainly due to regular operating costs. The costs involved legal expenses from the company's lawyer and the agent's lawyers, geological costs, accounting and auditing, transfer agent, CSE and Securities Commissions costs, etc.

Liquidity and Financial Resources

The activities of the Company, principally the acquisition and exploration of mineral properties, are financed through the completion of equity transactions such as equity offerings. There is no assurance that equity capital will be available to the Company in the amounts or at the times desired or on terms that are acceptable to the Company, if at all.

As of April 30, 2025, the company had \$544,635 in cash in its bank account which is sufficient to meet its next 12 months of general administration and exploration expenses.

The Issuer estimates that the aggregate annual cost of general administration for its operations will be approximately \$250,000.

Administrative Expenses	Funds to be used
Management and Administration Fees	\$150,000
Miscellaneous Office and Supplies	\$10,000
Transfer Agent	\$15,000
Legal	\$10,000
CSE Yearly Maintenance Fees	\$10,000
Accounting and Audit	\$50,000
SEDAR Disclosure and Filings	\$5,000
Total	\$250,000

In addition, a cash payment will be due for \$10,000 on September 25 as a property payment under the new Amended Phillips Option Agreement. There are no other capital expenditures to be incurred by the Issuer during the period. As the Issuer is less active at the present, expenditures should decrease in the remainder of 2025.

The Issuer has no long-term debt. The Issuer has no financial commitments or obligations except to fund those costs related to the care and maintenance of some of its mineral property titles. There are no contingent liabilities of which the Issuer is aware of at this time. As the Issuer has not begun production on any of its properties, the Issuer does not have any cash flow from operations. The Issuer's main source of cash will be the money received from the issuance of securities (new issues, exercise of outstanding warrants and possibly options which none have been issued as of yet).

The Issuer will require additional equity financing in the coming years in order to fund its working capital requirements, maintain and explore its mineral properties. If the Issuer is not successful in raising sufficient capital, the Issuer will have to curtail or otherwise limit its operations and exploration activities.

Status of Operations

The issuer has met all its financial commitments and all its filings with the CSE and sedar are in order. On August 11, 2025 – the company announced that it had granted Mine CA Gold Ltd an option to acquire up to a 75% undivided interest in the mining claims known as the Phillips Township Gold Project, Ontario.

The Option was granted under an earn-in and joint venture agreement signed by both parties on July 30, 2025. Under the terms of the Agreement, Mine CA Gold Ltd will now be the operator and can earn up to a 75% interest in the Phillips Township Gold Project by making certain cash payments and issuing shares to Golden Rapture, plus funding expenditures. Details of the agreement can be seen on the company's website at <https://goldenrapturemining.com/>

The company will need to raise additional funds if it decides to conduct exploration on its other two properties.

Adoption of new and amended accounting standards

There were no new and amended accounting standards adopted during the year ended April 30, 2025 which have not already been disclosed in the audited financial statements of the Company for the year ended April 30, 2025.

Critical Accounting Estimates

The estimates and associated assumptions are based on historical experience and various factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

Financial instruments and financial risks

(a) Risk management and hedging activities

In the normal course of operations, the Company is exposed to various financial risks. Management's close involvement in the operations allows for the identification of risks and variances from expectations. The Company does not meaningfully participate in the use of financial instruments to mitigate these risks. The Company has no designated hedging transactions. The financial risks and management's risk management objectives and policies are as follows:

(i) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Company. The Company is exposed to credit risk on certain of its financial assets which are cash which is held with an established Canadian financial

institution which management believes the risk of loss to be remote. The Company does not have any derivatives or similar instruments that mitigate its maximum exposure to credit risk.

(ii) Liquidity risk

Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. Management monitors the Company's liquidity by assessing forecast and actual cash flows and by maintaining adequate cash on hand. It is management's opinion that it is unlikely that the Company will encounter difficulty in raising funds to meet commitments associated with its financial instruments. As at April 30, 2025, the Company has working capital in the amount of \$623,042.

Related Party Transactions

Related parties include the Board of Directors, close family members and enterprises that are controlled by these individuals as well as certain persons performing similar functions. Related party transactions conducted in the normal course of operations are measured at the amount established and agreed to by the related parties.

The Company incurred the following transactions during the year ended April 30, 2025.

Richard Rivet, an officer of the Company for management and exploration consulting services \$167,500 (2024 - \$128,100).

Disclosure of Internal Controls

Management has established processes to provide them sufficient knowledge to support representations that they have exercised reasonable diligence that (i) the unaudited condensed interim financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the unaudited condensed interim financial statements; and (ii) the unaudited condensed interim financial statements fairly present in all material respects the financial condition, results of operations and cash flows of the

Company, as of the date of and for the periods presented. In contrast to the certificate required for non-venture issuers under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109"), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("DC&P") and internal control over financial reporting ("ICFR"), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- i) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP (IFRS).

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Risks and Uncertainties An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position.
