

Hybrid Power Solutions Announces Sale of Hybrid Spark Cube Unit for Haiti through Distribution Partner The Solar Store

Toronto, Ontario – December 4, 2025 – Hybrid Power Solutions Inc. (CSE: HPSS) (OTC: HPSIF) (FSE: E092) ("Hybrid" or the "Company") is proud to announce that its new distribution partner, The Solar Store, has completed the sale of a Spark Cube 30 kWh rugged mobile power system destined for embassy infrastructure in Haiti. The purchase was made on behalf of the Canadian Department of Foreign Affairs, Trade and Development to support essential services in regions affected by ongoing infrastructure challenges.

The Spark Cube 30kWh is a rugged, fuel-free battery power station engineered for demanding industrial environments. Delivering silent operation, zero emissions, and safe indoor/outdoor performance, it is built for mission-critical applications - from construction sites and transit yards to telecom, utilities, and emergency response operations. The Spark Cube 30kWh also provides best-in-class solar capability, supporting up to 36kW of solar.

François Byrne, CEO of Hybrid Power Solutions, commented: "This deployment represents exactly the type of real-world impact we strive for. Providing clean, reliable power to communities in Haiti through a trusted Canadian government program and our valued partner The Solar Store demonstrates how Canadian clean-energy technology can directly improve lives in the most challenging conditions."

The Solar Store, a BBB-accredited solar contractor and EPC provider based in London, Ontario, facilitated the transaction, technical specification, and logistics coordination under the newly announced distribution partnership (December 2, 2025).

This sale further validates growing demand for Hybrid's industrial-grade, zero-fuel power systems in government, NGO, and humanitarian applications across North America and internationally.

About Hybrid Power Solutions

Hybrid Power Solutions Inc. is a Canadian clean energy innovator listed on the Canadian Securities Exchange under the symbol "HPSS." The Company specializes in developing portable power systems that eliminate the need for fossil fuels in off-grid and remote applications. With a focus on environmental responsibility and technological innovation, Hybrid Power Solutions is committed to leading the clean energy transition.

On behalf of the Company,

Francois Byrne, CEO and Director
