

Hybrid Power Solutions Signs Distribution Agreement with Meyer Distributing to Expand Clean Power Access for North American Vehicle Upfitters

Meyer Distributing Stocks Initial 4 Batt Pack Energy + 4 Batt Pack Pro Units

Toronto, Ontario – February 18, 2026 – Hybrid Power Solutions Inc. (CSE: HPSS) (OTC: HPSIF) (FSE: E092) ("Hybrid" or the "Company"), an emerging leader in the delivery of fuel-free clean power solutions, is pleased to announce that it has entered into a distribution agreement with Meyer Distributing, one of North America's leading wholesale distributors of automotive specialty products, parts, and accessories.

Under the agreement, Meyer Distributing will add Hybrid's innovative, portable, fuel-free power systems to its extensive product lineup. These clean energy solutions are ideally suited for off-grid and remote vehicle applications, including upfitting for work trucks, contractor vehicles, RV and towing setups, Jeep and off-road builds, and other specialty automotive uses where dependable, emissions-free power is essential.

To kick off the partnership, Meyer Distributing has placed opening orders for initial stocking, totaling 4 Batt Pack Energy units, 4 Batt Pack Pro units, and 4 high-speed vehicle charging kits (2 per model). These freight-free orders are shipping to Meyer's warehouses, enabling immediate availability and fast distribution to vehicle upfitters nationwide.

Meyer Distributing, a leader in automotive, RV, towing, powersports, and contractor product distribution since the 1930s, serves thousands of customers nationwide, including vehicle upfitters, aftermarket retailers, dealers, and wholesalers, through its strategically positioned warehousing facilities. The company offers fast and reliable delivery, with capabilities to reach most locations quickly, often next-day or within short timeframes from its multiple warehouses. Meyer will stock initial inventory of Hybrid Power Solutions products at key facilities to support rapid fulfillment.

Meyer's robust online B2B eCommerce platform (Meyer Online) provides real-time access to inventory, pricing, and ordering for its extensive network of customers. Thousands of vehicle upfitters and related professionals can now discover, quote, and purchase Hybrid's clean power systems directly through this platform. Additionally, Meyer will promote Hybrid products through its online and offline marketing channels, including catalogs, email campaigns, and targeted outreach to its broad dealer and upfitter network, helping expand awareness and adoption across North America.

"This distribution agreement with Meyer Distributing represents a major step forward in bringing our fuel-free power solutions to the vehicle upfitting and specialty automotive markets," said Francois Byrne, CEO and Director of Hybrid Power Solutions. "Meyer's scale, fast delivery network, and direct access to thousands of upfitters and installers align perfectly with our mission to accelerate the adoption of clean, portable energy in remote and mobile applications. We are excited to leverage their expertise and reach to drive growth."

Meyer Distributing's focus on diversification, customer service, and technology makes it an ideal partner to introduce Hybrid's products to a wide range of professionals who demand dependable power solutions for their upfitted vehicles.
