The material change described in this report occurred on June 4th, 2026

3. News Release:

On June 4th, 2026, V Ten Metals Corp. ("**VTen**" or the "**Company**") issued a news release through the facilities of TMX Newsfile.

4. Summary of Material Change:

The Company Provides Update at the Tanami Property, NT, Australia

5. Full Description of Material Change:

On June 4, 2026, the Company provide the following update on the Company's Tanami Property (the "**Property**"), part of which is under an exploration farmin and joint venture agreement with a wholly owned subsidiary of Newmont Corporation ("**Newmont**"), located in the Tanami District of the Northern Territory, Australia. The Property consists of four semi-contiguous granted exploration licences ("**ELs**") EL 23848, EL 31402, EL 23874 and EL 23875, covering 1,237 sq km located in the Tanami Desert approximately 450km directly northwest of Alice Springs, Northern Territory, Australia.

The Company has been advised that a surface geochemical survey utilizing Newmont's proprietary Deep Sensing Geochemistry (DSG) was undertaken and has identified several Au anomalies that may require further interpretation and assessment. This work is currently scheduled for future reporting periods. The DSG technique is proprietary, and the data and methodology is commercial in confidence.

A HVSR passive seismic survey was carried out coincidently with the surface geochemical survey during Q3 2025. The HVSR passive seismic data was collected using a Tromino seismometer by field technicians.

Blair Way, CEO, President and Director comments: "*We are pleased with the progress to date on the Tanami project.* S*urface Geochem and passive seismic survey works have been conducted on the property. We look forward to sharing more information as exploration activities progress*."
