Statement of Directors' Responsibilities in respect of the interim accounts

Company Law requires the Directors to prepare interim accounts prior to making any distribution where the distribution would be found to contravene the relevant section of the Companies Act if reference were made only to the Company's last annual accounts. These accounts are required to be properly prepared under s838 of the Companies Act 2006 and must consist of:

- A balance sheet which gives a true and fair view of the state of the Company's affairs as at the balance sheet date; and
- A profit and loss account which gives a true and fair view of the Company's profit or loss for the period. This requirement is met by the presentation of the total column in the Income Statement.

In preparing these accounts the Directors are required to:

- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent; and
- State whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the interim accounts.
- Prepare the financial statements on the going concern basis unless it is appropriate to presume that the Company will not continue in business.

The Directors are responsible for ensuring that proper accounting records are maintained, which enable them to ensure that the interim accounts comply with the Companies Act. They are also responsible for safeguarding the assets of the Company and, therefore, for taking reasonable steps for the prevention and detection of fraud and other irregularities. The accounts have been prepared on a going concern basis.

Summary Accounting Policies

BASIS OF PREPARATION

The financial statements of the Company have been prepared under UK Generally Accepted Accounting Practice ('UK GAAP') and in accordance with the Statement of Recommended Practice ("SORP") for investment trusts issued by the Association of Investment Companies (AIC). The disclosures within these financial statements have been limited to those required to meet the statutory requirements of section 838 Companies Act 2006, requisite in respect of interim accounts prepared for a proposed distribution by a public company.

The notes and financial statements are presented in pounds sterling and are rounded to the nearest thousand except where otherwise indicated.

INVESTMENTS

The Company's investments have been categorised as "financial assets at fair value through profit or loss". Purchases are recognised on the relevant trade date, inclusive of expenses which are incidental to their acquisition. Sales are also recognised on the trade date, after deducting expenses incidental to the sales. At the time of acquisition the investments are valued at cost of purchase.

Quoted investments are valued at their fair value which is represented by the bid price at the close of business on the relevant date on the exchange on which the investment is quoted.

As investments have been categorised as "financial assets at fair value through profit or loss", gains and losses arising from changes in fair value are included in the Income Statement as a capital item.

CAPITAL AND RESERVES

- (a) **Capital reserve**
 - gains and losses on realisation of investments, including losses on transactions in own shares, are dealt with in this reserve together with the proportion of management fees and taxation allocated to capital. This reserve also includes dividends of a capital nature.
 - increases and decreases in the valuation of investments held are accounted for in this reserve.
- (b) **Special reserve**
 - created from the Court cancellation of the share premium account which had arisen from premiums paid on the Income and Growth shares at launch. Available as distributable profits to be used for the buy back of Shares. The cost of any shares resold from treasury is added back to this reserve.
- (c) **Capital redemption reserve**
 - the nominal value of any shares bought back for cancellation is added to this reserve. This reserve is non-distributable.
- (d) **Revenue reserve**
 - the net profit/(loss) arising in the revenue column of the Income Statement is added to or deducted from this reserve. Available for paying dividends on the Income shares.
- (e) **Share premium**
 - the surplus of net proceeds received from the issue of new shares over the par value of such shares is credited to this account. Gains arising on the resale of shares from treasury will be credited to this reserve. The reserve is non-distributable.

INCOME

- (a) Dividends are recognised as income on the date that the related investments are marked ex-dividend.
- (b) Other investment income and deposit interest are included on an accruals basis.

F&C MANAGED PORTFOLIO TRUST PLC

EXPENSES

All expenses are accounted for on an accruals basis. Expenses are charged through the revenue column of the Income Statement except where incurred in connection with the maintenance or enhancement of the value of the Company's investment portfolio and taking account of the expected long term returns as follows:

- Management fees have been allocated 40 per cent to revenue and 60 per cent to capital in the Income Portfolio and 20 per cent to revenue and 80 per cent to capital in the Growth Portfolio;
- Performance fees will be charged wholly to capital.

Expenses charged to the Company common to both pools are allocated to the pools in the same proportion as their net assets at the quarter end immediately preceding the date on which the cost is to be accounted for. Expenses charged to the Company in relation to a specific pool are charged directly to that pool, with the other pool remaining unaffected.

FOREIGN CURRENCY

Transactions denominated in foreign currencies are recorded in the local currency at actual exchange rates as at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the period end are reported at the rates of exchange prevailing at the period end. Any gain or loss arising from a change in exchange rates subsequent to the date of the transaction is included as an exchange gain or loss in either the capital or revenue column of the income statement depending on whether the gain or loss is of a capital or revenue nature respectively.

TAXATION

Tax is computed for each Portfolio separately, however the Company is the taxable entity. A Portfolio which generates taxable revenues in excess of tax deductible expenses may benefit from the excess of tax deductible expenses in the other portfolio. In return, by way of compensation, there would be a transfer from the Portfolio with taxable profits to the Portfolio with taxable losses.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more, or right to pay less, tax in future have occurred at the balance sheet date. This is subject to deferred tax assets only being recognised if it is considered more likely than not there will be suitable profits from which the future reversal of the underlying timing differences can be deducted.

Timing differences are differences arising between the Company's taxable profits and its results as stated in the financial statements which are capable of reversal in one or more subsequent periods.

Investment trusts which have approval under Chapter 4, Part 24 of the Corporation Tax Act 2010 (previously section 842 Income and Corporation Taxes Act 1988) are not liable for taxation on capital gains.

TRANSFER OF CAPITAL AND REVENUE

All net revenue of the Company attributable to the Growth Portfolio is, immediately following recognition in accordance with the Company's accounting policies, reallocated, applied and transferred to, and treated as revenue attributable to, the Income Portfolio. Contemporaneously with any such reallocation, application and transfer of any revenue to the Income Portfolio, such assets comprising part of the Income Portfolio as have a value equal to the net revenue so reallocated, applied and transferred shall be reallocated, applied, transferred and treated as capital attributable to the Growth Portfolio.

ISSUE COSTS

Issue costs were deducted from the share premium account, prior to its cancellation and the creation of a special reserve.

The Company's investment manager is F&C Investment Business Limited. F&C Investment Business Limited receives an investment management fee comprising a base fee and, if certain conditions are met a performance fee.

The base fee is a management fee at the rate of 0.65 per cent per annum of the total assets of each Portfolio payable quarterly in arrears, subject to being reduced to 0.325 per cent per annum on any assets which are invested in other investment vehicles managed by the Manager.

For the purposes of the revenue and capital columns in the income statement, the management fee has been allocated 60 per cent to capital and 40 per cent to revenue in the Income Portfolio. In respect of the Growth Portfolio, the base management fee has been charged 80 per cent to capital and 20 per cent to revenue.

A performance fee may be payable annually and will be equal to ten per cent of the monetary amount by which the total rate of return of the relevant Portfolio over that year (after all costs and expenses excluding the Performance fee) exceeds the rate of total return on the FTSE All-Share Index (in each case with dividends reinvested).

The performance fee payable in respect of any one year is capped at 0.35 per cent of the total assets of the relevant portfolio and is charged wholly to capital.

F&C MANAGED PORTFOLIO TRUST PLC

Notes to the Accounts

2. INVESTMENT MANAGEMENT FEE (continued)

In the event that a Portfolio has outperformed the benchmark index such that a performance fee would be payable as described above, but the NAV per share for the relevant Portfolio at the end of the financial year is less than (i) the NAV per share at the start of the financial year or (ii) the NAV per share immediately following Admission, whichever is the higher, (the "Watermark NAV") payment of the Performance fee in respect of that financial year shall be deferred until the end of the next financial year when the NAV per share for the relevant Portfolio is in excess of the Watermark NAV. If the Watermark NAV is not reached by the end of the fourth financial year subsequently, it will no longer be payable. Any underperformance of the relevant Portfolio in relation to the FTSE All-Share Index in any financial year must be made up in any subsequent financial year before any Performance fee is payable, thereby creating a "high watermark" for the relative performance against the FTSE All-Share Index.

At 31 May 2010 the total return of the Income Portfolio for the year exceeded that of the FTSE All-Share Index, and a Performance fee of £7,000 has been recognised; however, as the NAV per Income share is less than 98p (NAV per Income share immediately following Admission) payment shall be deferred as described above.

At 31 May 2010 the total return of the Growth Portfolio since launch did not exceed that of the FTSE All-Share Index.

The Investment Management Agreement between the Company and F&C Investment Business Limited is terminable by either party on six months' notice. The Company may terminate the Agreement early upon payment of an amount equal to the Base fee which would have been payable had the notice period been complied with plus any Performance fee accrued at termination.
