- 153 Financial definitions

Annexure

- 156 Annexure 1 – Shareholders' information

Group financial statements

- 19 Group income statement
- 20 Group statement of comprehensive income
- 21 Group statement of financial position
- 22 Group statement of changes in equity
- 23 Group statement of cash flows
- 24 Index to the notes to the group financial statements
- 25 Notes to the group financial statements

The group and company financial statements were audited in terms of the Companies Act, No 71 of 2008.

The group and company annual financial statements have been prepared by the MTN Finance staff under the guidance of the group finance operations executive, Sugentharen Perumal CA(SA) and were supervised by the group chief financial officer, Ralph Mupita, BSc.Eng (Hons), MBA, GMP.

These annual financial statements were authorised on 6 March 2019 by the board of directors.

Statement of directors' responsibility

for the year ended 31 December 2018

The directors are responsible for the integrity, preparation and fair presentation of the annual separate and consolidated financial statements of MTN Group Limited (the company), its subsidiaries, joint ventures, associates and structured entities (together, the group) in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and Interpretations as issued by the IFRS Interpretations Committee (IFRIC), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee (APC), Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council (FRSC), the Johannesburg Stock Exchange (JSE) Listings Requirements and the requirements of the South African Companies Act, No 71 of 2008 (the Companies Act).

The company also subscribes in all its activities to principles of best practice and corporate governance, as set out in the King IV Report on Corporate Governance for South Africa 2016 (King IV*).

The preparation of financial statements in conformity with IFRS requires management to consistently apply appropriate accounting policies, supported by reasonable judgements and estimates. The directors are of the opinion that the information contained in the annual financial statements fairly presents the financial position at year-end and the financial performance and cash flows of the group and the company for the year then ended.

The directors have the responsibility for ensuring that accurate and complete accounting records are kept to enable the group and the company to satisfy their obligation with respect to the preparation of financial statements.

The directors are also responsible for the oversight of the group's system of internal controls. This responsibility includes designing, implementing and maintaining internal controls relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

The group operates in an established control environment, which is documented and regularly reviewed. The group risk committee plays an integral role in risk management. Risk management and internal control procedures are designed to provide reasonable, but not absolute, assurance that assets are safeguarded and that the risks facing the business are controlled.

Nothing has come to the attention of the directors to indicate that any material breakdown in the functioning of these controls, procedures and systems has occurred during the year under review.

The group's internal audit function, which operates unimpeded by operational management, and has unrestricted access to the group's audit committee, assesses and, when necessary, recommends improvements in the system of internal control and accounting practices, based on audit plans that take cognisance of the relative degrees of risk of each function or aspect of the business.

The directors have reviewed the group and the company budgets and cash flow forecasts for the year to 31 December 2019. In light of this review, the current financial position and existing borrowing facilities, the going concern basis has been adopted in preparing the group and the company annual financial statements. The directors have no reason to believe that the company or its subsidiaries will not be going concerns in the year ahead. These financial statements support the viability of the group and the company.

The group's external auditors, PricewaterhouseCoopers Inc. and SizweNtsalubaGobodo Grant Thornton Inc., jointly audited the group and the company annual financial statements and their unqualified audit report is presented on pages 12 to 17.

The external auditors were given unrestricted access to all financial records and related data, including minutes of all meetings of shareholders, the board of directors and committees of the board. The directors believe that all representations made to the independent auditors during their audit are valid and appropriate.

The group and the company annual financial statements which appear on pages 1 to 156 were approved for issue by the board of directors on 6 March 2019 and are signed on its behalf by:

RA Shuter

Group president and chief executive officer (CEO)

RT Mupita

Group chief financial officer (CFO)

Fairland

Certificate by the company secretary

for the year ended 31 December 2018

I certify that, to the best of my knowledge and belief, MTN Group Limited has filed all its returns and notices with the Registrar of Companies and Intellectual Property Commission for the year ended 31 December 2018, as required of a public company in terms of section 88(2)(e) of the Companies Act, No 71 of 2008, and that such returns and notices are true, correct and up to date.

SB Mtshali
Group secretary

Fairland
6 March 2019

Report of the audit committee

for the year ended 31 December 2018

The MTN Group audit committee is pleased to present its report for the 2018 financial year.

The report has been prepared based on the requirements of the South African Companies Act, No 71 of 2008, as amended, King IV, the JSE Listings Requirements and other applicable regulatory requirements.

TERMS OF REFERENCE

The audit committee assists the board in discharging its duties by monitoring the strength of the operational, financial and control processes. These include internal financial controls and ensuring that assurance services and functions enable an effective control environment and that these support the integrity of information produced in compliance with applicable legal and regulatory requirements.

THE YEAR UNDER REVIEW

In 2018, the operating environment was marked by regulatory matters in some key markets relating to licence conditions and renewals; certification of capital importation and repatriation; data and privacy protection; tax; SIM registration; and know your customer (KYC) requirements. In addition, ongoing conflict in Syria, Yemen, Afghanistan and South Sudan and the reinstatement of US sanctions in Iran added to the challenging operating environment.

Despite these challenges, the group has maintained its positive momentum on improving and sustaining the internal control environment in accordance with its strategy.

Key focus areas for 2018 were:

- Implementation of a revised second and third line assurance model to increase the maturity of the Risk and Compliance function and to strengthen the independence of the internal audit function in support of a stronger combined assurance model;
- Initiatives to standardise policies and procedures across the group;
- Further strengthening the internal control environment through the tone from the top, focusing on increasing the risk management maturity and resolving known areas of weakness;
- Monitor regulatory compliance and further strengthen maturity of the compliance structures;
- Review implementation of the new accounting standards effective 2018 and monitor progress on the new accounting standard on leases (IFRS 16), effective in 2019;
- Review and evaluate the independence and quality of the external audit function; and
- Evaluate and consider a fair and balanced approach to corporate reporting.

MEMBERSHIP, MEETING ATTENDANCE AND EVALUATION

Members of the committee are independent and are nominated annually by the board for re-election at the Annual General Meeting (AGM). The individual members satisfy the requirements to serve as members of an audit committee as provided in section 94 of the Companies Act and have adequate knowledge and experience. The composition of the committee and the attendance at the meetings by its members are set out below for the period January to December 2018:

Members	Attendance
KC Ramon (Chairman)	4/4
NP Mageza	4/4
J van Rooyen	4/4
P Hanratty	4/4

The committee meets at least four times a year and members' fees are included in the table of directors' emoluments and related payments in note 10.

The committee also convened special audit committee meetings to discuss critical matters that arose during the period.

The group president and CEO, the group chief financial officer, the group business risk officer (of which internal audit is a part of), joint external auditors and other assurance providers attend committee meetings by invitation. The committee also meets separately with the joint external auditors, internal auditors and senior management before or after every meeting.

The effectiveness of the individual members of the committee and of the committee as a whole is assessed on an annual basis.

EXECUTION OF FUNCTIONS OF THE AUDIT COMMITTEE

The committee is satisfied that, in respect of the period under review, it has conducted its affairs and discharged its duties and responsibilities in accordance with its terms of reference and the Companies Act.

Report of the audit committee (continued)

for the year ended 31 December 2018

The committee discharged the following responsibilities during the year under review:

EXTERNAL AUDITORS

- Considered and satisfied itself with the independence and objectivity of the joint external auditors and designated registered auditors and ensured that the scope of non-audit services rendered did not impair their independence.
- Approved the non-audit-related services performed by the joint external auditors during the year in accordance with the policy established and approved by the board.
- Fees paid for non-audit services are disclosed in note 2.4 of these annual financial statements and represents 17% of audit fees. Non-audit services provided by the group auditors during the year comprised assurance related (21%), advisory (43%), tax (29%) and other services (7%). Services assigned to the group audit firms were preapproved following an evaluation of the impact on audit independence based on the group's approved policy. Services for larger assignments are individually evaluated by the group audit committee and approved if the committee is satisfied that the independence of the audit firms will not be compromised. These appointments relate to work that will further complement the audit engagement or where the audit firm will be in a position to provide a higher quality or more cost-effective service. Larger projects during 2018 included comfort letters in preparation for the MTN Nigeria IPO on the Nigerian stock exchange and benchmarking the governance framework for network and IT spend.
- Determined the joint external auditors' terms of engagement and fees for 2018. Fees paid to auditors for the year under review are disclosed in note 2.4 of these annual financial statements.
- Satisfied itself with the performance of the joint external auditors and designated registered auditors and further that they are accredited on the JSE's list of auditors and advisers.
- Satisfied itself that the designated registered auditors are within their tenure and rotation requirements.
- Noted the merger of SizweNtsalubaGobodo Inc. with Grant Thornton Inc. The firm has now been renamed SizweNtsalubaGobodo Grant Thornton Inc. The group's joint external auditors are PricewaterhouseCoopers Inc. and SizweNtsalubaGobodo Grant Thornton Inc. PricewaterhouseCoopers (PwC) is a global auditing firm and SizweNtsalubaGobodo Grant Thornton Inc. is a local auditing firm. Both firms are level 1 BBBEE contributors.
- PwC and SizweNtsalubaGobodo Grant Thornton Inc. have been auditing the group for 25 years and 16 years, respectively. The joint group engagement partner representing PwC, JR van Huyssteen, has completed his tenure and rotated off the group audit following the

conclusion of the 2017 audit. SN Madikane has replaced him as the new joint group engagement partner from PwC in 2018. DH Manana from SizweNtsalubaGobodo Grant Thornton Inc. was appointed as the group engagement partner since the 2017 financial period. The risk to audit independence is further mitigated by the appointment of the group president and CEO and group CFO during the past two years.

- The committee assessed the respective audit firms as well as the engagement partners' suitability for appointment, taking into account the quality of the audit work and related reporting to the audit committee, industry expertise of the firm and its designated partners, findings by the Independent Regulatory Board of Auditors and statements relating to independence. The committee recommends the reappointment of the joint external auditors at the annual general meeting.

FINANCIAL STATEMENTS, ACCOUNTING PRACTICES AND OTHER FINANCIAL MATTERS

- Reviewed and approved the accounting policies and the annual financial statements of the group and the company for the year ended 31 December 2018, and based on the information provided to it, the committee considers that, in all material respects, they are appropriate and comply with the provisions of the Companies Act, IFRS, the SAICA Financial Reporting Guides as issued by the APC, Financial Reporting Pronouncements as issued by the FRSC, and the JSE Listings Requirements.
- Reviewed the processes in place for the reporting of concerns and complaints relating to financial reporting and accounting practices, internal audit, contents of the group's and the company's financial statements, internal financial controls and any related matters. The committee can confirm that there were no such complaints of substance during the year under review.
- Reviewed group tax exposures and assessed the appropriateness of the group's tax policies.
- Reviewed group treasury reports, group funding requirements, credit ratings and recommended financing proposals to the board.
- Reviewed progress on litigation and legal exposures and the related accounting applied and disclosure included in these annual financial statements.
- Received regular updates from management on the repatriation of funds from sanctioned territories.
- Considered the appropriateness of management judgement and the accounting treatment of significant transactions.
- Significant matters that the audit committee has considered in relation to the annual financial statements were:

Report of the audit committee (continued)

for the year ended 31 December 2018

FINANCIAL STATEMENTS, ACCOUNTING PRACTICES AND OTHER FINANCIAL MATTERS (continued)

Significant matter considered

Fair and balanced financial reporting

Judgement applied regarding the impairment of goodwill

Acquisitions made in prior years resulted in the recognition of goodwill. Goodwill is tested at least annually for impairment to assess whether the recoverable amounts exceed the carrying amounts. The calculation of the recoverable amounts require judgement relating to future cash flows and discount rates (refer note 1.5.1 and note 5.2.1).

Classification and measurement of the investment in a telecommunication infrastructure provider, IHS Group

The group's investment in IHS Group is classified as an investment at fair value through other comprehensive income. The calculation of fair value of R23 353 million is based on earnings multiples applied to estimated earnings (refer note 1.5.2 and note 7.1.3).

Foreign exchange rates applied in multiple exchange rate jurisdictions
MTN Iran operates in a multiple currency environment and implemented a secondary market rate (SANA rate) in August 2018. Judgement is required in determining the quoted foreign exchange rate to be used for translating and recording foreign currency transactions and balances and converting the equity-accounted results of MTN Iran (refer note 1.5.3 and note 7.6).

Judgement relating to uncertain tax, legal and regulatory matters

The group operates in a number of complex and uncertain regulatory and tax jurisdictions where judgement is required in assessing the regulatory and tax exposures (refer note 1.5, note 3 and note 6.7).

Significant matters considered include a transfer pricing dispute, a tax claim by the Nigerian Attorney General (AG) and a claim by Turkcell arising from its unsuccessful bid for a licence in Iran.

Actions and conclusions

The committee considered the appropriateness of the group's financial reporting to ensure fair and balanced reporting is achieved. The committee reviewed submissions and presentations by management on the financial results, significant transactions, critical accounting judgements and assumptions as well as views by the group's joint external auditors on key audit matters and internal auditors on internal financial controls.

The committee has recommended that the board approve both the interim and annual financial results.

The committee reviewed the annual impairment testing performed by management. It evaluated the cash generating units with impairment indicators selected for detailed impairment testing, reviewed the underlying key assumptions supporting the future cash flows in the context of the operations' business plans and considered the reasonableness of discount rates of these operations in the context of their respective operating environments. It also considered the views from the group's external auditors on the valuation methodology applied, their assessment of the reasonableness of the key assumptions and sensitivities to changes in these assumptions.

The committee was satisfied that the analysis performed by management and the related disclosure in the annual financial statements were appropriate.

The committee reviewed the appropriateness of the classification of IHS Group as an investment at fair value through other comprehensive income in accordance with IFRS 9 *Financial Instruments*. It evaluated the methodology followed to estimate earnings and evaluated the multiples applied against international earnings multiples of similar entities. It evaluated the assessment and views of the group's external auditors on management's valuation and disclosure.

The committee was satisfied that the classification and measurement of the investment in IHS Group was appropriate.

The committee reviewed management's analysis of the various applicable foreign exchange rates in Iran, taking into account approvals to remit receivables at the official exchange rate. The committee evaluated management's application of the various rates to loans, receivable balances and future dividends. The committee also considered the views of the group's external auditors on management's analysis and conclusion.

The committee was satisfied that management's approach to the use of multiple exchange rates was appropriate.

The committee reviewed risk, legal, regulatory and tax reports from management and requested opinions from independent specialists where considered appropriate. The committee considered management's assessment of possible, probable and remote exposures and the related provisions and disclosure on tax and regulatory and legal liabilities, provisions and contingent liabilities in the light of the latest correspondence on these matters by the respective authorities. The committee also considered the assessment by the group's external auditors of the appropriate recognition, measurement and disclosure of uncertain tax and regulatory matters.

The committee was satisfied that the recognition, measurement and disclosure of uncertain tax and regulatory matters by management was appropriate. With regard to the claim by the AG in Nigeria and the Turkcell matter, the committee was satisfied with management's conclusion that the claims were assessed to be remote.

Report of the audit committee (continued)

for the year ended 31 December 2018

FINANCIAL STATEMENTS, ACCOUNTING PRACTICES AND OTHER FINANCIAL MATTERS (continued)

Significant matter considered

Significant transactions for 2018 included:

- the sale of MTN Cyprus Limited (MTN Cyprus) (note 2.3);
- initial public offering by Scancom PLC (MTN Ghana) (note 9.3.1);
- dilution of the group's equity-accounted interests in Jumia Technologies AG and International Digital Services Middle East Limited (note 9.2); and
- the unsolicited offer to sell the group's 53% shareholding in Mascom Wireless Botswana (Pty) Limited, a joint venture of the group (note 9.3.2).

Resolution agreement entered with the Central Bank of Nigeria (CBN)

MTN Nigeria concluded a resolution agreement with the CBN whereby MTN Nigeria implemented a notional reversal of the 2008 private placement of shares in MTN Nigeria at a net cost of R744 million (the CBN resolution amount). This is on the basis that certain certificates of capital importation (CCIs) utilised in the private placement were not properly issued (refer note 2.4.1).

Adoption of new accounting standards
The group adopted IFRS 15 *Revenue from Contracts with Customers* and IFRS 9 *Financial Instruments* with effect from 1 January 2018 (refer note 11).

Actions and conclusions

The committee considered the accounting treatment and the disclosure of the transactions proposed by management. The committee also considered the group's external auditors' views on the transactions.

The committee was satisfied that the transactions were appropriately accounted for and disclosed by management.

The committee reviewed the resolution agreement and management's proposed accounting treatment and disclosure. The committee evaluated the views of the group's external auditors on the recognition and disclosure.

The committee was satisfied that management's proposed treatment and disclosure was appropriate.

The committee evaluated and approved the revised accounting policies following the adoption of the new standards.

It considered the disclosure provided by management in the annual financial statements on the adoption of IFRS 15 and IFRS 9, including the restatement of the 2017 results for the impact of IFRS 15. The committee considered the views of the group's external auditors on the group's application and disclosure of the new accounting standards.

The committee was satisfied that management applied and disclosed the adoption of the new standards appropriately.

Report of the audit committee (continued)

for the year ended 31 December 2018

INTERNAL FINANCIAL CONTROLS

- Reviewed the assessment, prepared by internal audit, on the effectiveness of the group's system of internal financial controls. This assessment, together with the report on the overall control environment, formed the basis of the committee's recommendation to the board in this regard. The board's report on the effectiveness of the system of internal controls, which the committee fully supports, is included in the directors' report on page 11.
- Reviewed the reports of the external auditors detailing their concerns arising from their audit and considered the appropriateness of the responses from management.
- Assessed the revenue assurance control environment and related revenue leakage exposure for the group.
- Reviewed fraud and whistleblowing reports and that appropriate management action is taken with regards to the control environment and consequence management.

GOING CONCERN STATUS

- The group's annual financial statements have been prepared on a going concern basis, and the directors are satisfied that the group is in a sound financial position to meet its foreseeable cash requirements. The board's statement on the going concern status of the group and company is contained on page 9 of the directors' report.

INTERNAL AUDIT

- Considered the effectiveness of the internal audit function and monitored adherence to the annual internal audit plan.
- Reviewed the performance of the group business risk officer to which the internal audit function reported to during the year, R Wessels, and was satisfied that he has the necessary expertise and experience to fulfil this role and that he had performed appropriately during the year under review.
- Considered the effectiveness of the combined assurance provided by all assurance providers.

FINANCE DIRECTOR AND FINANCE FUNCTION

- Reviewed the performance of the group chief financial officer, Ralph Mupita, and was satisfied that he has the necessary expertise and experience to fulfil this role and that he had performed appropriately for the year ended 31 December 2018.
- Considered, and has satisfied itself of the appropriateness of the expertise and experience of the finance function and adequacy of resources employed in this function.

SOLVENCY AND LIQUIDITY REVIEW

The committee is satisfied that the board has performed a solvency and liquidity test on the company in terms of section 46 of the Companies Act and has concluded that the company will satisfy the test after payment of the final dividend.

The committee also considered guarantees issued on behalf of subsidiaries.

KEY FOCUS AREAS FOR 2019

The committee has set the following key areas for management to focus on during 2019:

- Consider the group's approach and responsiveness to manage the impact of regulatory and other macro-environmental developments on the control environment;
- Strengthening and refining the three lines of defence model and ensuring appropriate planning, execution and reporting in terms of the combined assurance framework;
- Evaluate the group's initiatives to further strengthen the effectiveness of its internal financial controls;
- Implementation of the new accounting standard on leases (IFRS 16) and appropriate disclosure of its impact on the results of 2019; and
- Consider the group's approach to Mandatory Audit Firm Rotation that will be effective for the group's 2024 financial period.

KC Ramon

Audit committee chairman

6 March 2019

Directors' report

for the year ended 31 December 2018

NATURE OF BUSINESS

The company, incorporated in the Republic of South Africa on 23 November 1994 (company registration: 1994/009584/06), carries on the business of investing in the telecommunications industry through its subsidiary companies, joint ventures and associated companies. The company's shares are listed on the JSE Limited under JSE: MTN in the mobile telecommunications sector.

The company's registered address is 216 14th Avenue, Fairland, Roodepoort, Gauteng, 2195.

COMPLIANCE WITH FINANCIAL REPORTING STANDARDS

The group and the company annual financial statements were prepared in accordance with IFRS as issued by the IASB and Interpretations as issued by the IFRIC and comply with the SAICA Financial Reporting Guides as issued by the APC and Financial Reporting Pronouncements as issued by the FRSC, the JSE Listings Requirements and the requirements of the Companies Act.

FINANCIAL RESULTS

The group recorded a profit after tax for the year ended 31 December 2018 of R9 578 million (2017: R4 550[#] million).

Full details of the financial results of the group and the company are set out in these annual financial statements and accompanying notes for the year ended 31 December 2018.

[#] Restated for changes in accounting policies, refer to note 11 for details of restatements.

CAPITAL EXPENDITURE

Capital expenditure for the year ended 31 December 2018 amounted to R26 018 million (2017: R31 461 million) which comprise the following:

	2018 Rm	2017 Rm
Property, plant and equipment	23 601	28 004
Land and buildings	206	474
Leasehold improvements	135	165
Network infrastructure	12 377	16 520
Information systems, furniture and office equipment	1 225	1 317
Capital work-in-progress/other ¹	9 534	9 423
Vehicles	124	105
Intangible assets	2 417	3 457
Software	1 915	2 197
Capital work-in-progress	502	1 260
	26 018	31 461

¹ The majority of capital work-in-progress relates to long-term network infrastructure projects.

Licences and spectrum acquired during the year:

	2018 Rm	2017 Rm
MTN Yemen	323	–
Spacetel Benin S.A	1 370	22
MTN Zambia Limited	26	11
Scancom PLC (MTN Ghana)	285	72
Sudan	–	567
Other	92	27
	2 096	699

RELATED PARTY TRANSACTIONS

Details of related party transactions are set out in note 10.1 of these annual financial statements.

YEAR UNDER REVIEW

The results of the group and company have been set out in the attached financial statements.

LITIGATION

AG assessment of foreign tax compliance

The AG performed a high-level calculation that MTN Nigeria Communications Limited (MTN Nigeria) should have paid approximately US\$2,0 billion in taxes relating to the importation of foreign equipment and payments to foreign suppliers over the last 10 years and requested MTN Nigeria to do a self-assessment of the taxes in this regard that have been actually paid.

MTN Nigeria completed an initial assessment of the full period and submitted comprehensive documentation to the office of the AG. MTN Nigeria was notified by the office of the AG that they have not accepted the documentation presented and they have called for payment of the outstanding amount, failing which legal action would be instituted. Based on the detailed review performed, MTN Nigeria believes it has fully settled all amounts owing under the taxes in question.

The legal process initiated by MTN Nigeria for injunctive relief restraining the AG from taking further action in respect of its orders for back taxes is continuing. The AG matter came up for initial mention before the Federal High Court of Nigeria Lagos Judicial Division and has subsequently been adjourned to 26 March 2019. MTN Nigeria continues to maintain that its tax matters are up to date and no additional payment, as claimed by the AG, is due, and consequently no provision or contingent liability has been raised in the accounts of MTN Nigeria for the AG back taxes claim.

Turkcell claim

In the matter relating to Turkcell's alleged grievance arising from its unsuccessful bid to obtain a mobile licence in Iran, and the awarding of that licence to MTN Iran in 2005, MTN continues to be of the view that there is no legal merit in Turkcell's claim and the group will continue to vigorously oppose it. Consequently, no provision or contingent liability has been raised.

Directors' report (continued)

for the year ended 31 December 2018

BORROWING POWERS

In terms of the memorandum of incorporation (MOI), the borrowing powers of the company are unlimited. However, all borrowings by the company are subject to limitations set out in the treasury policy of the group. The details of borrowings are disclosed in note 6.1.

GOING CONCERN

The directors have reviewed the group's and company's budget and cash flow forecasts for the year to 31 December 2019. On the basis of this review, and the current financial position and existing borrowing facilities, the directors are satisfied that the company and the group have access to adequate resources to continue in operational existence for the foreseeable future, are going concerns, and have continued to adopt the going concern basis in preparing the annual financial statements.

SUBSIDIARY COMPANIES AND JOINT VENTURES

Details of subsidiaries and joint ventures in which the group has a direct or indirect interest are set out in note 9.1 of these annual financial statements.

All group entities have a year-end consistent to that of the company with the exception of Irancell Telecommunication Company Services (PJSC) (MTN Iran), a joint venture of the group that has a year-end of 21 December for group reporting purposes and a statutory year-end of 21 March.

DISTRIBUTION TO SHAREHOLDERS

Before declaring dividends, the board:

- applied the solvency and liquidity test; and
- reasonably concluded that the company would satisfy the solvency and liquidity test immediately after payment of the interim and final dividend.

The payments of future dividends will depend on the board's ongoing assessment of the group's earnings, financial position, cash needs, future earnings prospects and other future factors.

Final dividend

Notice is hereby given that a gross final dividend of 325 cents per share for the period to 31 December 2018 has been declared payable to shareholders. The number of ordinary shares in issue at the date of this declaration is 1 884 269 758 (including 9 791 839 treasury shares held by Mobile Telephone Networks Holdings Limited and the 2016 MTN ESOP trust and 76 835 378 shares held by MTN Zakhele Futhi).

The dividend will be subject to a maximum local dividend tax rate of 20% which will result in a net dividend of 260 cents per share to those shareholders who bear the maximum rate of dividend withholding tax of 65 cents per share.

The company's tax reference number is 9692/942/71/8. In compliance with the requirements of STRATE, the electronic settlement and custody system used by the JSE, the salient dates relating to the payment of the dividend are as follows:

Last day to trade cum dividend on the JSE	Tuesday, 26 March 2019
First trading day ex dividend on the JSE	Wednesday, 27 March 2019
Record date	Friday, 29 March 2019
Payment date	Monday, 1 April 2019

No share certificates may be dematerialised or rematerialised between Wednesday, 27 March 2019 and Friday, 29 March 2019, both days inclusive. On Monday, 1 April 2019, the dividend will be transferred electronically to the bank accounts of certificated shareholders who make use of this facility.

In respect of those who do not use this facility, cheques dated Monday, 1 April 2019 will be posted on or about that date. Shareholders who hold dematerialised shares will have their accounts held by the Central Securities Depository participant or broker credited on Monday, 1 April 2019.

The board confirms that the company will satisfy the solvency and liquidity test after the completion of the dividend distribution.

Interim dividend

A gross dividend of 175 cents per share (2017: 250 cents per share) amounting to R3 150 million (2017: R4 494 million) in respect of the half-year period ended 30 June 2018 was declared on 8 August 2018 and paid to shareholders on 3 September 2018.

Shareholders on the South African register who dematerialised their ordinary shares receive payment for their dividend electronically, as provided for by STRATE. For those shareholders who have not yet dematerialised their shareholding in the company in certificated form, the company operates an electronic funds transmission service, whereby dividends may be electronically transferred to shareholders' bank accounts. These shareholders are encouraged to mandate this method of payment for all future dividends by approaching the company's share registrar, Computershare Investor Services Proprietary Limited, whose contact details are:

Computershare Investor Services Proprietary Limited
Registration number: 2004/003647/07
Rosebank Towers, 15 Biermann Avenue, Rosebank, 2196
PO Box 61051, Marshalltown, 2107

Directors' report (continued)

for the year ended 31 December 2018

SHARE CAPITAL

Authorised share capital

There was no change in the authorised share capital of the company during the year under review. The authorised ordinary share capital of the company is 2,5 billion shares of 0,01 cents each.

Issued share capital

The issued share capital of the company is R188 427 (2017: R188 427) comprising 1 884 269 758 (2017: 1 884 269 758) ordinary shares of 0,01 cents each.

MTN Zakhele Futhi Scheme

Details of the MTN Zakhele Futhi Scheme are set out in note 8.1.

Details of participation in the MTN Zakhele Futhi Scheme by directors of the company, the group secretary, directors and the company secretaries of major subsidiaries are set out in note 10.2 of the annual financial statements.

CONTROL OF UNISSUED SHARE CAPITAL

The unissued ordinary shares are the subject of a general authority granted to the directors in terms of section 38 of the Companies Act. As this general authority remains valid only until the next AGM, shareholders will be asked at that meeting to consider an ordinary resolution placing the said unissued ordinary shares, to a maximum of 10% of the company's issued share capital, under the control of the directors until the next AGM.

ACQUISITION OF THE COMPANY'S OWN SHARES

At the last AGM held on 24 May 2018, shareholders gave the company or any of its subsidiaries a general approval in terms of section 48 of the Companies Act, by way of special resolution, for the acquisition of its own shares. As this general approval remains valid only until the next AGM, to be held on 23 May 2019, shareholders will be asked at that meeting to consider a special resolution to renew this general authority until the next AGM, subject to a maximum extension of 15 months.

SHAREHOLDERS' INTEREST

Details of shareholders' interest and a shareholder spread analysis are disclosed in annexure 1 of these annual financial statements.

Details of the directors' remuneration and shareholding are set out in note 10.2 of these annual financial statements.

RETIREMENT BY ROTATION OF DIRECTORS

In accordance with the company's MOI, Mcebisi Jonas, Khotso Mokhele and Swazi Tshabalala will retire at the forthcoming AGM. The retiring directors, being eligible, offer themselves for re-election.

The directors who shall be rotating in terms of the MOI, being eligible and offer themselves for re-election, are Paul Hanratty, Stan Miller and Nkululeko Sowazi.

In accordance with the policy adopted by the board and the MOI of the company, directors who have been in office for an aggregate period in excess of nine years are required to

retire at the next AGM and at each AGM thereafter. Accordingly, Alan Harper, Koosum Kalyan, Peter Mageza, Dawn Marole, Azmi Mikati and Jeff van Rooyen who have served on the board for an aggregate period in excess of nine years, retire at the forthcoming AGM and are eligible and offer themselves for re-election following an evaluation of their independence.

The profiles of the directors retiring by rotation and seeking re-election will be set out in the notice of the AGM.

APPOINTMENTS AND RESIGNATIONS

Mcebisi Jonas and Swazi Tshabalala were appointed as independent non-executive directors with effect from 1 June 2018, and Khotso Mokhele was appointed as independent non-executive director with effect from 1 July 2018.

There were no other director appointments or resignations other than those mentioned above during the year under review.

APPOINTMENT AND RETIREMENT OF COMPANY SECRETARY

In February 2019, subsequent to the year-end, the company announced that Bongzi Mtshali had reached the group's mandatory retirement age and would be retiring as the company secretary for MTN Group and its subsidiaries, with effect from 31 March 2019. In Bongzi's stead, Thobeka Sishuba was appointed as company secretary of MTN Group and its subsidiaries, with effect from 1 April 2019.

INTERESTS OF DIRECTORS AND PRESCRIBED OFFICERS

Details of the interests of directors and prescribed officers are provided in note 10.2.

DIRECTORS' AND PRESCRIBED OFFICERS' SHAREHOLDINGS AND DEALINGS

Details of directors and prescribed officers shareholdings and dealings are provided in note 10.2.

EMPLOYEE SHARE SCHEMES

Details of the group's share schemes are provided in note 8.4.

CHANGES IN SHAREHOLDING

The group disposed of its wholly-owned subsidiary, MTN Cyprus, on 4 September 2018, refer to note 2.3.

The MTN Ghana initial public offering reduced the group's interest in the company by 12.16%, refer to note 9.3.

The group diluted its interests in International Digital Services Middle East Limited and Jumia Technologies AG and received an unsolicited offer to sell the group's 53% shareholding in Mascom Wireless Botswana (Pty) Ltd, refer to note 9.2 and note 9.3. These three entities are equity-accounted by the group.

EVENTS AFTER THE REPORTING PERIOD

Details of events after the reporting period are set out in relevant notes within these financial statements.

Directors' report (continued)

for the year ended 31 December 2018

AMERICAN DEPOSITORY RECEIPT (ADR)

A sponsored ADR facility is in place. This facility is sponsored by the Bank of New York and details of the administrators are: Cusip No 62474M108 ADR.

ANNUAL GENERAL MEETING

The AGM will be held on Thursday, 23 May 2019. Refer to the notice of the 24th AGM, when issued, for further details of the ordinary and special business for consideration at the meeting.

INTERNAL FINANCIAL CONTROLS

During the year under review, the board, through the audit committee, assessed the results of the formal documented review of the group's system of internal controls and risk management, including the design, implementation and effectiveness of the internal financial controls conducted by internal audit and considered information and explanations given by management and discussions with the external auditors on the results of the audit. Although certain weaknesses in financial controls, whether in design, implementation or execution were identified, the board does not consider these control weaknesses (individually or in combination with other weaknesses) to have resulted in actual material financial loss, fraud or material errors. Based on the above results, nothing has come to the attention of the board that caused it to believe that the group's system of internal controls and risk management is not effective and that the internal financial controls do not form a sound basis for the preparation of reliable annual financial statements. The board's opinion is supported by the audit committee.

AUDITORS

PwC and SizweNtsalubaGobodo Grant Thornton Inc. will continue in office as joint auditors in accordance with section 90 of the Companies Act.

The audit committee reviewed the independence of the auditors during the period under review and satisfied itself that the auditors were independent of the group.

Independent auditors' report to the shareholders of MTN Group Limited

REPORT ON THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Our opinion

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the consolidated and separate financial position of MTN Group Limited (the Company) and its subsidiaries (together the Group) as at 31 December 2018, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

WHAT WE HAVE AUDITED

MTN Group Limited's consolidated and separate financial statements set out on pages 19 to 155 comprise:

- the Group statement of financial position and Company statement of financial position as at 31 December 2018;
- the Group income statement for the year then ended;
- the Group statement of comprehensive income and Company statement of comprehensive income for the year then ended;
- the Group statement of changes in equity and Company statement of changes in equity for the year then ended;
- the Group statement of cash flows and Company statement of cash flows for the year then ended;
- the notes to the group financial statements, which include a summary of significant accounting policies; and
- the notes to the company financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the consolidated and separate financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

INDEPENDENCE

We are independent of the Group in accordance with the *Independent Regulatory Board for Auditors Code of Professional Conduct for Registered Auditors (IRBA Code)* and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the International Ethics Standards Board for Accountants *Code of Ethics for Professional Accountants* (Parts A and B).

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The key audit matters discussed in the table below relate to the consolidated financial statements. We have determined that there are no key audit matters to communicate in our report with regard to the audit of the separate financial statements of the Company for the current period.

Independent auditors' report to the shareholders of MTN Group Limited (continued)

Key audit matter

Measurement and Classification of the equity investment in IHS Holding Limited (IHS)

At 31 December 2018, the absence of transactions between market participants resulted in the fair value of the equity investment held in IHS being determined using models considered to be appropriate by management. The fair value was calculated using industry earnings multiples applied to management's estimates of earnings, less estimated net debt.

Given the confidentiality restrictions in the shareholders' agreement with IHS Group, the Group does not have access to the IHS group business plans or 2018 actual financial information. Any estimated earnings used to derive the fair value are therefore solely determined by management, based on market estimates and assumptions on financial growth, currency movements, costs and performance.

Management has determined that the equity interest held does not allow the Group to appoint a board member. In addition, IHS has the right to decide what strategic, financial and operational information is shared with the Group. As a result of these restrictions, the Group's vote is limited to matters that relate to fundamental changes in the business or that apply in exceptional circumstances and are considered by management to be protective in nature.

There have been no changes to the economic interest percentage or classes of shares held in IHS during the current year, and as a result the information disclosed in the relevant notes to the consolidated financial statements remains consistent with that of the prior year.

We considered this to be a matter of most significance to the current year's audit due to the significant judgements made by management and the complexity in respect of the valuation of the investment, and the fair value movement recorded through other comprehensive income at the end of the year.

This matter is disclosed in the following notes to the consolidated financial statements: note 1.5.2: Critical accounting judgements, estimates and assumptions – IHS fair value through other comprehensive income investment (FVOCI): Source of estimation uncertainty – investment measurement and Significant judgement – investment classification, note 7.1.3: Fair value estimation and note 7.2: Investments.

How our audit addressed the key audit matter

We tested the mathematical accuracy of the valuation model and found no material exceptions. With the assistance of our internal valuation experts, we assessed the approach adopted by management in the valuation model used to value the investment in IHS at year-end against the applicable requirements of IFRS 13 *Fair Value Measurement* and found it to be consistent.

We tested the reasonability of management's estimates of earnings and the estimated net debt by inspecting information published by an investor in IHS and found management's estimates to be reasonable. We also performed reasonability assessments of the valuation performed by management with the assistance of our internal valuation experts through an independent assessment of appropriate EBITDA multiples to be applied to businesses of this nature, and found the multiples applied by management to be reasonable.

With the assistance of our internal IFRS specialists, we considered whether or not the Group's rights, as embedded in the underlying agreements, constituted significant influence to participate in the financial and operating policy decisions of IHS and whether accounting for the investment in IHS as an equity investment at fair value through other comprehensive income (as opposed to an investment in an associate) was appropriate.

We enquired with management as to whether there have been any changes effected to the shareholder agreements (or any other changes to information on which our previous conclusion was based), which would warrant a reconsideration of the classification of the investment. To corroborate this, we agreed the share percentage held by the Group in IHS to the IHS share register and did not find exceptions. In addition we inspected the minutes of meetings and board resolutions and found no indicators of a change in classification.

Independent auditors' report to the shareholders of MTN Group Limited (continued)

Key audit matter

Impairment assessment of goodwill arising from business combinations

Due to the number of business combinations that the Group has historically entered into, the Group's net assets include a significant amount of goodwill at the reporting date. Some of the businesses that these balances relate to operate in countries subject to political instability, worsening economic conditions, hyperinflation and various sanctions. There is a risk that these businesses may not trade in line with expectations and forecasts, resulting in a potential impairment of the carrying amount of goodwill allocated to these businesses.

Goodwill is tested annually for impairment at the opted date of 31 December and whenever there is an impairment indicator identified by management. Such indicators were identified by management at the time of preparation of the Group's interim results for the period ended 30 June 2018 in its operations in Guinea-Bissau, Guinea-Conakry, Liberia, Congo Brazzaville, Afghanistan, Sudan, Yemen and Syria. Such indicators prevailed at year-end in respect of Yemen, Afghanistan, Liberia and Guinea-Bissau.

The goodwill impairment assessment is considered to be a matter of most significance to the current year audit due to the significant judgements and assumptions made by management when performing the impairment assessment, and in estimating discount rates, terminal growth rates and cash flow forecasts specifically for conflict markets where reliable economic data is not available.

These matters are disclosed in the following notes to the consolidated financial statements: note 1.5.1: Critical accounting judgements, estimates and assumptions – Impairment of goodwill and property, plant and equipment; note 5.1: Property, plant and equipment and note 5.2.1: Goodwill.

How our audit addressed the key audit matter

We tested the mathematical accuracy of the valuation models and found no material exceptions. We also considered the appropriateness of the valuation models applied by management. Based on procedures performed, we are satisfied that the approach adopted by management in the valuation models is principally in line with market practice and the applicable requirements of IAS 36 *Impairment of Assets*, which was also confirmed with our internal valuation experts.

We assessed the reliability of the Group's budgets included in the business plans (which form the basis of the cash flow forecasts), by comparing prior period budgets to actual results. We also agreed revenue and EBITDA used to calculate cash flow forecasts used in the valuation models to approved budgets. We further assessed the reasonability of adjustments made at Group level, to the in-country approved budgets.

The terminal growth rates as used by management were compared to long-term inflation rates obtained from independent sources by our internal valuation experts. Where differences were noted between the respective growth rates, we obtained an understanding of the reasons for these differences and incorporated the independently obtained rates as part of our stress testing to assess the impact of the differences noted on the valuation results.

With the assistance of our internal valuation experts, we independently recalculated weighted average cost of capital discount rates (which includes a country risk premium) for each territory in the Group taking into account independently obtained data such as the cost of debt, risk-free rates in the applicable market, market risk premiums, debt/equity ratios as well as the beta of comparable companies. Where differences were noted between the respective discount rates, we obtained an understanding of the reasons and incorporated the PwC rates as part of our stress testing to assess the impact of the differences noted on the valuation results.

We performed stress testing on management's valuation models, which involved an assessment of management's cash flow forecasts and assumptions made by comparison to prior years' actual results, our understanding of the industry, information obtained on the specific country economic environment and outlook from independent sources.

We further performed sensitivity analyses to determine the minimum changes in discount rates, long-term growth rates and forecast cash flows that would result in limited or no headroom being available and compared our results to that of management, in order to identify those operations considered sensitive to a change in assumptions for disclosure purposes.

Based on the above procedures performed we found that management's assessment of the impairment of goodwill fell within a reasonable range and no material differences were identified.

Independent auditors' report to the shareholders of MTN Group Limited (continued)

Key audit matter

Accounting treatment for uncertain tax exposures, regulatory and pending litigation exposures in the various markets that the Group operates in

The Group operates across multiple tax and regulatory jurisdictions and due to the inherent nature of exposures, rulings issued and assessments and sanctions by tax and regulatory authorities in developing markets, the Group recognised a significant amount of tax and/or regulatory provisions and contingencies at year-end. Management applies their judgement to estimate the potential exposure where the interpretation of the applicable tax laws and regulations could be subjective.

We considered this to be a matter of most significance to the current year's audit due to the magnitude, complexity and nature of these exposures together with a significant level of management judgement involved in interpreting specific acts, regulatory provisions or practices in determining the amounts of these liabilities.

These matters are disclosed in the following notes to the consolidated financial statements: note 1.5.4: Critical accounting judgements, estimates and assumptions – Income taxes, note 4.5: Trade and other payables, note 6.3: Provisions and note 6.7: Contingent liabilities.

How our audit addressed the key audit matter

Tax matters

We used our tax specialists to evaluate management's assessment of tax exposures relating to income tax (including transfer pricing and controlled foreign company legislation), withholding tax, VAT and other taxes.

Discussions were held between our tax specialists and Group management as well Group tax experts to evaluate the reasonableness of management's conclusions in relation to tax exposures. In-country management's tax assessment reports were also considered by our in-country tax specialists and group tax specialists (as necessary) to independently assess the conclusions reached by management.

We further inspected correspondence received by management from the tax authorities and the Group's tax advisers to evaluate the adequacy of provisions and disclosures made and to evaluate the consistency of the responses received. Where required, we performed an independent recalculation of the tax exposures.

Regulatory matters

We evaluated management's assessment of regulatory exposures relating to applicable legislation and related regulations and requirements prevalent in each of the jurisdictions in which the Group operates.

Meetings were held between ourselves and the Group's internal legal and regulatory experts and management to discuss the significant exposures and evaluate the reasonableness of management's conclusions. In-country management's assessments were also considered at a Group level through evaluation of reports provided and assessments performed by internal compliance and legal counsel at a Group level. Correspondence with external legal counsel was also inspected, as applicable.

To corroborate management's assessment against the requirements of IFRS, we also inspected correspondence received by management from the respective regulatory authorities and external counsel (where applicable), to evaluate the adequacy of provisions and disclosures made. Where required, we performed an independent recalculation of the regulatory exposures noted.

With regards to both the tax and regulatory exposures identified, we considered management's recognition, measurement and disclosure thereof in the financial statements.

No material exceptions were noted as a result of the procedures performed.

Independent auditors' report to the shareholders of MTN Group Limited (continued)

OTHER INFORMATION

The directors are responsible for the other information. The other information comprises the information included in the *MTN Group Limited Annual financial statements for the year ended 31 December 2018*, which includes the Directors' report, the Report of the audit committee and the Certificate by the company secretary as required by the Companies Act of South Africa, which we obtained prior to the date of this auditors' report, and the *MTN Group Limited Integrated Report for the year ended 31 December 2018*, which is expected to be made available to us after that date. Other information does not include the consolidated and separate financial statements and our auditors' report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not and will not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF THE DIRECTORS FOR THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and/or the Company or to cease operations, or have no realistic alternative but to do so.

AUDITORS' RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group and/or Company to cease to continue as a going concern.

Independent auditors' report to the shareholders of MTN Group Limited (continued)

- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

In terms of the IRBA Rule published in Government Gazette Number 39475 dated 4 December 2015, we report that PricewaterhouseCoopers Inc. and SizweNtsalubaGobodo Grant Thornton Inc. have been the auditors of MTN Group Limited for 25 years and 16 years, respectively.

Notes to the group financial statements

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS

1.1 Basis of preparation

The group financial statements of MTN Group Limited (the company) comprise the company and its subsidiaries and the group's interest in associates and joint ventures and controlled structured entities (together referred to as the group and individually as group entities).

The group financial statements and company financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and Interpretations as issued by the IFRS Interpretations Committee (IFRIC), and comply with the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee (APC), Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council (FRSC), the Johannesburg Stock Exchange (JSE) Listings Requirements and the requirements of the South African Companies Act, No 71 of 2008 (the Companies Act). The group and the company have adopted all new accounting standards that became effective in the current reporting period. The following standards had an impact on the group:

- IFRS 9 *Financial Instruments* (IFRS 9); and
- IFRS 15 *Revenue from Contracts with Customers* (IFRS 15).

The group also implemented a voluntary change in accounting policy on the presentation of cash flows.

Refer to note 11 for details of the change in accounting policies.

The financial statements have been prepared on the historical cost basis adjusted for the effects of inflation where entities operate in hyperinflationary economies and for certain financial instruments that have been measured at fair value, where applicable.

The Sudanese, South Sudanese and Syrian economies have been considered to be hyperinflationary. Accordingly, the results, cash flows and financial position of the group's subsidiaries, MTN Sudan Company Limited (MTN Sudan), MTN South Sudan Limited (MTN South Sudan) and MTN Syria (JSC) (MTN Syria) have been expressed in terms of the measuring unit current at the reporting date.

Amounts are rounded to the nearest million with the exception of earnings per share and the related number of shares (note 2.7), number of ordinary shares (note 8.1), share-based payments (note 8.4) and directors' emoluments and interests (note 10.2).

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in note 1.5.

1.2 Going concern

The group's and the company's forecasts and projections, taking account of reasonably possible changes in trading performance, show that the group and the company should be able to operate within their current funding levels into the foreseeable future.

After making enquiries, the directors have a reasonable expectation that the company and its subsidiaries have adequate resources to continue in operational existence for the foreseeable future. The financial statements therefore have been prepared on a going concern basis.

1.3 Principal accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out on the following pages and in the related notes to the group financial statements and should be read in conjunction with the financial definitions disclosed on pages 153 and 155 of the financial statements. Where applicable, the principal accounting policies applied in the company financial statements are consistent with those applied in the group financial statements. The principal accounting policies applied are consistent with those adopted in the prior year, except as stated above.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.3 Principal accounting policies (continued)

1.3.1 Consolidation

Business combinations

The group accounts for business combinations using the acquisition method when control is obtained by the group. A business is defined as an integrated set of activities and assets that are capable of being conducted and managed for the purposes of providing a return directly to investors or other owners, members or participants. The consideration transferred is measured at the fair value of the assets given, equity instruments issued, and liabilities incurred or assumed at the acquisition date. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are recognised in profit or loss. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any non-controlling interests.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition date fair values of the identifiable assets acquired and liabilities assumed. If, after reassessment, this amount is negative, such negative amount is recognised immediately in profit or loss as a gain on bargain purchase.

When the group ceases to have control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related non-controlling interests. Any retained interest in the entity is remeasured to its fair value. Any resulting gain or loss is recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss. The remaining other reserves related to that entity are transferred to retained earnings.

Consolidation of subsidiaries

The group financial statements incorporate the financial statements of MTN Group Limited and all its subsidiaries and controlled structured entities (SEs) for the reporting date 31 December 2018 on the basis outlined below.

Subsidiaries are fully consolidated from the date on which control is transferred to the group (acquisition date) and are deconsolidated from the date that control ceases (disposal date). The group controls an entity when it is exposed or has rights to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether control exists, the group considers all existing substantive rights that result in the current ability to direct relevant activities.

All intercompany transactions, balances and unrealised gains or losses on transactions between group companies are eliminated on consolidation. Unrealised losses are considered an impairment indicator of the asset transferred.

Where necessary, adjustments are made to the financial statements of subsidiaries to align any difference in accounting policies with those of the group.

The group does not consolidate entities where it owns more than half of the issued ordinary share capital where the contractual agreements are such that other shareholders have substantive rights that provide authority over the relevant activities of the entities.

The company accounts for investments in subsidiaries at cost, less accumulated impairment losses.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.3 Principal accounting policies (continued)

1.3.1 Consolidation (continued)

Non-controlling interests

On an acquisition-by-acquisition basis, non-controlling interests in the acquiree may initially be measured either at fair value, or at the non-controlling shareholders' proportion of the net identifiable assets acquired and liabilities and contingent liabilities assumed.

Non-controlling shareholders are treated as equity participants; therefore, all acquisitions of non-controlling interests or disposals by the group of its interests in subsidiaries, where control is maintained subsequent to the disposal, are accounted for as equity transactions. Consequently, the difference between the fair value of the consideration transferred and the carrying amount of a non-controlling interest purchased or disposed of, is recorded in equity.

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the group's equity.

Total comprehensive income is attributed to non-controlling interests even if this results in the non-controlling interests having a deficit balance.

1.3.2 Foreign currency

Functional and presentation currency

Items included in the financial statements of each entity in the group are measured using the entity's functional currency. The group financial statements are presented in South African rand, which is the functional and presentation currency of the company.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains or losses resulting from the settlement of such transactions and from the translation at reporting date exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Translation of foreign operations

The results, cash flows and financial position of group entities which are not accounted for as entities operating in hyperinflationary economies and that have a functional currency different from the presentation currency of the group are translated into the presentation currency as follows:

- Assets and liabilities, including goodwill and fair value adjustments arising on acquisition, are translated at rates of exchange ruling at the reporting date;
- Specific transactions in equity are translated at rates of exchange ruling at the transaction dates;
- Income and expenditure and cash flow items are translated at weighted average exchange rates for the period or translated at exchange rates at the date of the transaction, where applicable; and
- Foreign exchange translation differences are recognised as other comprehensive income and accumulated in the foreign currency translation reserve, except to the extent the difference is allocated to non-controlling interests.

The results, cash flows and financial position of the group entities which are accounted for as entities operating in hyperinflationary economies and that have functional currencies different from the presentation currency of the group are translated into the presentation currency of its immediate parent at rates of exchange ruling at the reporting date. As the presentation currency of the group or that of the company is that of a non-hyperinflationary economy, comparative amounts are not adjusted for changes in the price level or exchange rates in the current financial year.

An entity may have a monetary item that is receivable from a foreign operation. An item for which settlement is neither planned nor likely to occur in the foreseeable future is, in substance, a part of the entity's net investment in that foreign operation. On consolidation, exchange differences arising from the translation of the net investment in foreign operations are taken to other comprehensive income and accumulated in the foreign currency translation reserve.

The exchange rates relevant to the group are disclosed in note 7.6.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.3 Principal accounting policies (continued)

1.3.2 Foreign currency (continued)

Disposal of foreign operations

On disposal of a foreign operation, all exchange differences accumulated in equity in respect of that operation attributable to the equity holders of the group are reclassified to profit or loss.

Exchange differences accumulated in equity in respect of a monetary item that is part of the group's net investment in a foreign operation, are not reclassified to profit or loss on settlement of the monetary item.

In the case of a partial disposal that does not result in the group losing control over a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences is reattributed to non-controlling interests and is not recognised in profit or loss. For all other partial disposals, the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

For more details on judgements applied in the selection of exchange rates in countries operating in dual exchange rate economies refer to note 1.5.3.

1.3.3 Hyperinflation

The financial statements (including comparative amounts) of the group entities whose functional currencies are the currencies of hyperinflationary economies are adjusted in terms of the measuring unit current at the end of the reporting period.

As the presentation currency of the group or the company is that of a non-hyperinflationary economy, comparative amounts are not adjusted for changes in the price level in the current year. Differences between these comparative amounts and current year hyperinflation adjusted equity balances are recognised in other comprehensive income.

The carrying amounts of non-monetary assets and liabilities are adjusted to reflect the change in the general price index from the date of acquisition to the end of the reporting period. On initial application of hyperinflation, prior period gains and losses are recognised directly in equity. An impairment loss is recognised in profit or loss if the restated amount of a non-monetary item exceeds its estimated recoverable amount.

Gains or losses on the net monetary position are recognised in profit or loss.

All items recognised in the income statement are restated by applying the change in the general price index from the dates when the items of income and expenses were initially earned or incurred.

At the beginning of the first period of application, the components of equity, except retained earnings, are restated by applying a general price index from the dates the components were contributed or otherwise arose. These restatements are recognised directly in equity as an adjustment to opening retained earnings. Restated retained earnings are derived from all other amounts in the restated statement of financial position. If on initial application of hyperinflation accounting the restated value of the non-monetary assets exceed their recoverable amount, the amount in excess of the recoverable amount is recorded as a reduction in retained earnings. At the end of the first period and in subsequent periods, all components of equity are restated by applying a general price index from the beginning of the period or the date of contribution, if later.

All items in the statement of cash flows are expressed in terms of the general price index at the end of the reporting period.

The Sudanese, South Sudanese and Syrian economies have been classified as hyperinflationary. Accordingly, the results, cash flows and financial position of the group's subsidiaries; MTN Sudan, MTN South Sudan and MTN Syria, have been expressed in terms of the measuring unit current at the reporting date. For further details, refer to note 1.5.6.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.4 New accounting pronouncement – IFRS 16 Leases (IFRS 16)

The standard listed below will be effective in future reporting periods and is considered significant to the group. The group has elected not to early adopt IFRS 16. It is expected that the group will adopt IFRS 16 on its effective date.

Topic	Key requirements	Effective date
IFRS 16 <i>Leases</i>	IFRS 16 was issued in January 2016. It will result in almost all leases being recognised on the statement of financial position by lessees, as the distinction between operating and finance leases is removed. Under the new standard, an asset (the right to use the leased item) and a financial liability to pay rentals are recognised. Practical expedients are available for short-term and low-value leases. Lessors continue to classify leases as operating or finance, with IFRS 16's approach to lessor accounting substantially unchanged from its predecessor, IAS 17 <i>Lease</i> (IAS 17). The group expects that the most significant impact of the new standard will result from its current property and network site operating leases. As at the reporting date, the group has non-cancellable operating lease commitments of R129,4 billion (refer to note 6.5). Of these commitments, approximately R73,6 billion relates to non-lease components of operating leases which will continue to be recognised as an expense in profit or loss as they are incurred. For lease commitments (excluding non-lease components, short-term and low-value leases) the group will recognise lease liabilities, representing the present value of the future minimum lease payments discounted at a rate appropriate and after taking into account the lease term, value, economic environment and security over the asset applicable, on 1 January 2019, and corresponding right-of-use assets in respect of these leases, adjusted for prepayments recognised as at 31 December 2018. On adoption of IFRS 16 operating lease costs (other than short-term and low-value lease) will no longer be recognised as part of operating expenses. The group intends to apply a threshold of US\$5 000 for assessing what constitutes low-value assets. For the year ended 31 December 2018 the group has recognised lease expenses of R13,8 billion (refer to note 2.4). Of these operating lease expenses, approximately R6,3 billion relates to non-lease components of operating leases which will continue to be recognised as an expense in operating expenses as they are incurred. As a result of the new accounting rules, EBITDA¹ used to measure segment results is expected to increase, as the total operating lease payments were previously included in EBITDA¹ under IAS 17. The group will recognise depreciation on the right-of-use assets and interest on the lease liabilities over the lease term in profit or loss – these charges are excluded from EBITDA¹. Due to the impact of reducing finance charges over the life of the lease, the impact on earnings will initially be dilutive, before being accretive in later periods. Furthermore, leases denominated in currencies that are not the functional currency of the operation will increase foreign exchange exposure. Therefore, the group expects that net profit after tax may decrease for 2019 as a result of adopting the new standards. Cash generated from operations will increase, as lease costs will no longer be included in this category of cash flows. Interest paid will increase, as it will include the interest portion of the lease liability repayments. This is expected to have a net positive impact on net cash generated from operating activities. Net cash used in financing activities will increase, as the capital portion of lease liability repayments will be included within repayment of borrowings. Application of IFRS 16 will also impact the EBITDA¹:net interest, net debt and net debt:EBITDA¹ ratios significantly. The group's activities as a lessor are not material and hence the group does not expect any significant impact on the financial statements. However, some additional disclosures will be required in the next reporting period. The group will apply the standard from its mandatory adoption date of 1 January 2019. The group intends to apply the simplified transition approach and will not restate comparative amounts for the year prior to adoption. Right-of-use assets will be measured at the amount of the lease liability on adoption (adjusted for any prepaid lease expenses). The group has elected to apply the practical expedient to not reassess the lease definition.	1 January 2019

¹ EBITDA is defined in note 2.1.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.5 Critical accounting judgements, estimates and assumptions

The group makes judgements, estimates and assumptions concerning the future when preparing its financial statements. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

This note should be read in conjunction with the 'Principal accounting policies' disclosed in note 1.3.

1.5.1 Impairment of goodwill and property, plant and equipment

The group tests goodwill for impairment on an annual basis or whenever there is an impairment indicator identified by management, in accordance with the accounting policy disclosed in note 5.2. The group tests property, plant and equipment for impairment when there is an indication of impairment, in accordance with the accounting policy disclosed in note 5.1. The recoverable amounts of cash-generating units (CGUs) have been determined based on value in use calculations. These calculations are performed internally by the group and require the use of estimates and assumptions.

Source of estimation uncertainty

The input factors most sensitive to change are management estimates of future cash flows based on budgets and forecasts, growth rates, terminal rates and discount rates. Further detail on these assumptions has been disclosed in note 5.2. The group has performed a sensitivity analysis by varying these input factors by a reasonably possible margin and assessing whether the changes in input factors result in any of the goodwill allocated to an appropriate CGU, being impaired. Goodwill impairment in the current year amounted to R312 million (2017: R2 631 million), refer to note 5.2. Property, plant and equipment impairment reversal in the current year amounted to R172 million (2017 impairment: R2 518 million), refer to note 5.1.

1.5.2 IHS Group fair value through other comprehensive income investment

Significant judgement – investment classification

The group has an economic interest in IHS Holding Limited (IHS Group) of approximately 29%, comprising class A voting shares and class B non-voting shares. An investor is presumed to have significant influence over an investee when it owns 20% of the investee, unless it can be clearly demonstrated that this is not the case. Per the IHS Group shareholders' agreement, the group is not entitled to appoint a board member. In addition, IHS Group has the right to decide what strategic, financial and operational information is shared with the group.

As a result of these restrictions, the group's vote is limited to matters which relate to fundamental changes in the business or which apply in exceptional circumstances and are considered to be protective in nature. The group's rights do not constitute significant influence to participate in the financial and operating policy decisions of IHS Group. Consequently, the group accounts for its investment in IHS Group as an equity instrument held at fair value through other comprehensive income (FVOCI) (note 7.2).

Source of estimation uncertainty – investment measurement

Given the confidentiality restrictions in the shareholders' agreement with IHS Group, MTN does not have access to the IHS Group business plans or 2018 actual financial information. Any estimated earnings used to derive the existing fair value are therefore solely based on MTN management assumptions and market estimates on financial growth, currency movements, costs and performance. The investment has been classified at level 3 of the fair value hierarchy for the current period in terms of IFRS 13 *Fair Value Measurement* (refer to note 7.1.3).

1.5.3 Dual exchange rates

Significant judgement

The group operates in a number of foreign jurisdictions that have multiple quoted exchange rates. When several quoted exchange rates are available in a foreign jurisdiction, the group uses judgement to determine the rate at which the future cash flows represented by foreign denominated transactions or balances could have been settled if those cash flows had occurred at the measurement date in these foreign entities. For the translation of the results, cash flows and financial position of the foreign entities into the presentation currency of the group, the group uses the rate at which dividends can be remitted. If exchangeability between two currencies is temporarily lacking, the rate used is the first subsequent rate at which exchanges could be made.

Following a review of the liquidity and sustainability of quoted exchange rates introduced in Nigeria and Sudan, the group changed the rates applicable to the relevant transactions and balances as well as the translation of the results, cash flows and financial position of these operations in the last quarter of 2017. The new quoted rates applied are considered to represent more appropriately the rate at which the future cash flows on foreign denominated transactions or balances could have been settled if those cash flows had occurred at the measurement date or the rate at which dividends can be remitted in respect of the translation of foreign entities.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.5 Critical accounting judgements, estimates and assumptions (continued)

1.5.3 Dual exchange rates (continued)

In August 2018, the Central Bank of Iran (CBI) clarified that all future dividends and all future loan repayments can be expected to be repatriated at the SANA rate. Judgement is required in determining the quoted foreign exchange rate to be used for translating and recording foreign currency transactions and balances and converting the equity-accounted results of Irancell Telecommunication Company Services (PJSC) (Iran). After the introduction of the SANA rate, the group equity accounts the results and translates any receivables from Iran at the SANA rate. However, the group continues to translate any receivables that have been approved by the Iranian government under the Foreign Investment Promotion and Protection Act (FIPPA) at the CBI rate on the basis that management expects these balances to be settled at the CBI rate (refer to note 4.2).

Further information on the relevant exchange rates is provided in note 7.6.

1.5.4 Income taxes

Source of estimation uncertainty

The group is subject to income taxes in numerous jurisdictions. As a result, significant judgement is required in determining the group's provision for income taxes. There are numerous calculations and transactions for which the ultimate tax position is uncertain during the ordinary course of business.

The group recognises tax liabilities for anticipated tax issues based on estimates of whether additional taxes will be payable. In determining whether an interpretation and/or application of the various tax rules may result in a dispute of which the outcome may not be favourable to the group, the group seeks, where relevant, expert advice to determine whether an unfavourable outcome is probable or possible. Where payment is determined to be possible but not probable the tax exposure is disclosed as a contingent liability, refer to note 6.7.

Where the final outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred tax in the period in which such determination is made.

Deferred tax assets – source of estimation uncertainty

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences (as applicable) to the extent that it is probable that future taxable profits will be available against which the deferred tax assets can be used. The group is required to make significant estimates in assessing whether future taxable profits will be available.

Future taxable profits are determined based on business plans for individual subsidiaries in the group and the probable reversal of taxable temporary differences in future. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Such reductions are reversed when the probability of future taxable profits improves. The group's deferred tax assets for the current year amounted to R3 702 million (2017: R1 590 million¹), refer to note 3.2.

1.5.5 Determining whether an arrangement qualifies as an operating lease or finance lease

Significant judgement

The group applies its principal accounting policies for leases to account for arrangements which constitute or contain leases and follows the guidance of IAS 17 to determine the classification of leases as either operating or finance leases.

During previous years the group entered into sale and leaseback transactions with IHS Group that resulted in the sale of its mobile network towers in Nigeria.

The critical elements that the group considered with respect to the classification of the lease transaction were:

- whether the lease terms are for the major part of the economic life of the tower assets; and
- whether, at inception of the leases, the present value of the minimum lease payments amounts to at least substantially all of the fair value of the tower assets.

The group estimated that the lease term of the tower assets is not for a major part of the economic life of the tower assets, taking into account the non-cancellable period for which the group has contracted, and any options to renew such period where it is reasonably certain that the group will exercise the option.

The minimum lease payments were determined by separating the payments required by the lease arrangements into those pertaining to the lease and those pertaining to other elements such as services and cost of inputs on the basis of their relative fair values. Management exercised judgement in estimating the fair value of the other elements by reference to comparable cost structures of the group and other independent tower operators. The discount rate used in calculating the present value of the minimum lease payments reflects the rate of interest MTN Nigeria Communications Limited (MTN Nigeria) would incur in borrowing the funds necessary to purchase similar assets.

¹ Restated for changes in accounting policy refer to note 11 for details of the restatement.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.5 Critical accounting judgements, estimates and assumptions (continued)

1.5.5 Determining whether an arrangement qualifies as an operating lease or finance lease (continued)

The fair value of the tower assets was determined by reference to the amounts at which the tower assets were sold which represents the prices at which the assets could be sold in an orderly transaction between market participants under current market conditions. The group determined that the present value of the minimum lease payments did not equal substantially all the fair value of the underlying tower assets.

Following the group's assessment, the leaseback transactions were classified as operating leases.

1.5.6 Hyperinflation

Significant judgement

The group exercises significant judgement in determining the onset of hyperinflation in countries in which it operates and whether the functional currency of its subsidiaries, associates or joint ventures is the currency of a hyperinflationary economy.

Various characteristics of the economic environment of each country are taken into account. These characteristics include, but are not limited to, whether:

- the general population prefers to keep its wealth in non-monetary assets or in a relatively stable foreign currency;
- prices are quoted in a relatively stable foreign currency;
- sales or purchase prices take expected losses of purchasing power during a short credit period into account;
- interest rates, wages and prices are linked to a price index; and
- the cumulative inflation rate over three years is approaching, or exceeds, 100%.

Management exercises judgement as to when a restatement of the financial statements of a group entity becomes necessary. Following management's assessment, the group's subsidiaries, MTN Sudan, MTN South Sudan and MTN Syria have been accounted for as entities operating in hyperinflationary economies. The results, cash flows and financial positions of MTN Sudan, MTN South Sudan and MTN Syria have been expressed in terms of the measuring units current at the reporting date.

MTN Sudan

The economy of Sudan was assessed to be hyperinflationary effective 1 July 2018, and hyperinflation accounting was applied for the six months ended 31 December 2018¹. Upon first application of hyperinflation, net prior period gains of R625 million were recognised directly in equity. The uplift of the assets on initial adoption resulted in the net asset value of MTN Sudan exceeding its estimated recoverable amount. As a result of this, the initial adjustment was capped at the recoverable amount and the difference recorded directly to retained earnings. If the initial uplift had not been capped the related increase in opening equity would have been R1,2 billion.

As at 31 December 2017¹, the historical increase in the asset value as a result of hyperinflation accounting had been fully impaired, which resulted in a R1 690 million decrease in EBITDA² during 2017. During the six-month period ended 30 June 2018, R306 million of the impairment was reversed, resulting in an increase in EBITDA². This amount represents the full impairment recognised during 2017, translated at a significantly weaker exchange rate.

The general price index used as published by the International Monetary Fund is as follows:

Date	Base year	General price index	Inflation rate (%)
31 December 2018	2007	1 416	64

The cumulative inflation rate over three years as at 31 December 2018 is 168%. The average adjustment factor used for the period from 1 July 2018 to 31 December 2018 was 1,14.

¹ Hyperinflationary accounting was applied previously in Sudan, up until 30 June 2016.

² EBITDA is defined in note 2.1.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.5 Critical accounting judgements, estimates and assumptions (continued)

1.5.6 Hyperinflation (continued)

MTN South Sudan

The economy of South Sudan was assessed to be hyperinflationary effective 1 January 2016 and hyperinflation accounting was applied since.

The general price index used as published by the International Monetary Fund is as follows:

Date	Base year	General price index	Inflation rate (%)
31 December 2018	2011	8 975	99

The cumulative inflation rate over three years as at 31 December 2018 is 2 416%. The average adjustment factor used for 2018 was 1,5.

MTN Syria

The economy of Syria was assessed to be hyperinflationary effective 1 January 2014 and hyperinflation accounting has been applied since. Reliable inflation data could not be obtained on the inflation rate in Syria. The general price index set out below was calculated by reference to the change in the United States dollar (US\$):Syrian pound (SYP) exchange rate.

Until 30 June 2017, hyperinflation accounting was applied by estimating Syria's inflation rate using the change in the US\$:SYP exchange rate. The SYP started strengthening against the US\$ from October 2017 onwards. Syria's 2017 and 2018 estimated inflation rate using the change in US\$:SYP exchange rate, after the SYP strengthened, was negative, i.e. there was deflation.

However, the characteristics of Syria's economy continue to indicate that Syria's economy is hyperinflationary. Recognising deflation was not considered appropriate, due to lack of sufficient available information at 31 December 2018. Therefore, a hyperinflation adjustment factor of 1 was applied from 1 July 2017 to 31 December 2018.

Date	Base year	General price index	Inflation rate (%)
31 December 2018	2014	220	0

The cumulative inflation rate over three years as at 31 December 2018 is 30%. The average adjustment factor used for 2018 was 1,0.

As at 31 December 2017, R1 348 million of assets previously written up for hyperinflation have been impaired with the impact being included in EBITDA¹ during 2017.

Iran

In 2015, the Iranian economy was assessed to no longer be hyperinflationary and hyperinflation accounting was discontinued effective 1 July 2015. Accordingly, the amounts expressed in terms of the measuring unit at 30 June 2015 were treated as the basis for the carrying amounts with no further hyperinflation adjustments being passed from 1 July 2015 onwards. The group's results from Iran includes expenses resulting from the discontinuation of hyperinflation accounting mainly relating to the subsequent depreciation of assets that were historically written up under hyperinflation accounting. The additional income statement charge reduced equity-accounted earnings from Iran by R873 million for the year ended 31 December 2018 (2017: R1 328 million).

The cumulative impact of adjusting the group's results for the effects of hyperinflation is set out below:

	2018 Rm	2017 Rm
Income statement		
Increase in revenue	174	504
Increase/(decrease) in EBITDA ¹	271	(2 948)
Net monetary gain	290	264
Decrease in share of results of associates and joint ventures after tax	(873)	(1 328)
Decrease in profit after tax	(538)	(4 925)

¹ EBITDA is defined in note 2.1.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

1 ACCOUNTING FRAMEWORK AND CRITICAL JUDGEMENTS (continued)

1.5 Critical accounting judgements, estimates and assumptions (continued)

1.5.7 Consolidation of MTN Zakhele Futhi

Significant judgement

MTN implemented its BBBEE transaction through a separate legal entity, MTN Zakhele Futhi (RF) Limited (MTN Zakhele Futhi) during the 2016 financial year. MTN Zakhele Futhi is a structured entity with the sole business of holding shares of MTN Group Limited and administering the associated funding of these shares.

The group was involved in structuring MTN Zakhele Futhi, determining the level of its debt and negotiating the related debt covenants. In addition, the group holds a call option which, if exercised on the occurrence of a trigger event, entitles it to settle MTN Zakhele Futhi's debt with the third-party funders. This gives the group the ability to manage the credit risk of MTN Zakhele Futhi and consequently, the related BBBEE credentials which are dependent on the continued success of MTN Zakhele Futhi. As these activities are considered to be the relevant activities of MTN Zakhele Futhi, it is consolidated by the group.

1.5.8 Contingent liabilities

Significant judgement

The group applies judgement in assessing the potential outcome of uncertain legal and regulatory matters. The group does not recognise contingent liabilities in the statement of financial position until future events indicate that it is probable that an outflow of resources will take place and a reliable estimate can be made, at which time a provision is recognised. The group has included contingent liabilities where economic outflows are considered possible but not probable.

2 RESULTS OF OPERATIONS

2.1 Operating segments

The group has identified reportable segments that are used by the group executive committee (chief operating decision maker (CODM)) to make key operating decisions, allocate resources and assess performance. The reportable segments are largely grouped according to their geographic locations and reporting lines to the CODM.

The group's underlying operations are clustered as follows:

- South Africa;
- Nigeria;
- South and East Africa and Ghana (SEAGHA);
- West and Central Africa (WECA); and
- Middle East and North Africa (MENA).

South Africa and Nigeria comprise the segment information for the South African and Nigeria-based cellular network services providers respectively.

The SEAGHA, WECA and MENA clusters comprise segment information for operations in those regions which are also cellular network services providers in the group.

Operating results are reported and reviewed regularly by the CODM and include items directly attributable to a segment as well as those that are attributed on a reasonable basis, whether from external transactions or from transactions with other group segments.

A key performance measure of the group is EBITDA. EBITDA is defined as earnings before finance income and finance cost (which includes gains and losses on foreign exchange transactions), tax, depreciation and amortisation, and is also presented before recognising the following items:

- Impairment of goodwill;
- Loss on derecognition of a long-term loan receivable;
- Net monetary gain resulting from the application of hyperinflation; and
- Share of results of associates and joint ventures after tax.

For the purposes of the review of individual segment results by the CODM, EBITDA also excludes the following items (CODM EBITDA):

- Hyperinflation (note 1.5.6);
- Tower sale profits (note 2.3);
- MTN Zakhele Futhi share-based payment expense (note 8.1);
- Profit on exercise of exchange right in IHS Group (note 2.3);
- Gain on dilution of investment in associate and joint venture (note 2.3);
- Gain on disposal of subsidiary (note 2.3); and
- CBN resolution (note 2.4).

These exclusions have remained unchanged from the prior year, apart from the gain on disposal of subsidiary, gain on dilution of investment in associate and joint venture and CBN resolution that occurred during the year.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.1 Operating segments (continued)

Iran proportionate results are included in the segment analysis as reviewed by the CODM and excluded from reported results for revenue, EBITDA and capex due to equity accounting for joint ventures. The results of Iran in the segment analysis exclude the impact of hyperinflation accounting.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.2 Revenue from contracts with customers

The group principally generates revenue from providing mobile telecommunications services, such as network services (comprising data, voice and SMS), digital and fintech services, interconnect and roaming services, as well as from the sale of mobile devices. Products and services may be sold separately or in bundled packages. The typical length of a contract for postpaid bundled packages is 24 months.

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The group recognises revenue when it transfers control over a product or services to a customer.

For bundled packages, the group accounts for individual products and services separately if they are distinct – i.e. if a product or service is separately identifiable from other items in the bundled package and if a customer can benefit from it. The consideration is allocated between separate products and services in a bundle based on their stand-alone selling prices. The stand-alone selling prices are determined based on the list prices at which the group sells mobile devices and network services separately.

The main categories of revenue and the basis of recognition are as follows:

Network services and digital and fintech

The group provides mobile telecommunication services, including network services and digital and fintech services. Network services (comprising voice, data and SMS) are considered to represent a single performance obligation as all are provided over the MTN network and transmitted as data representing a digital signal on the network. The transmission of voice, data and SMS all consume network bandwidth and therefore, irrespective of the nature of the communication, the subscriber ultimately receives access to the network and the right to consume network bandwidth. Network services are, therefore viewed as a single performance obligation represented by capacity on the MTN network.

Digital and fintech services include value-added services, rich media services, mobile money (MoMo), insurance, airtime lending and e-commerce etc.

Customers either pay in advance for these services or pay monthly in equal instalments over the contractual period. A contract liability is recognised for amounts received in advance, until the services are provided or when the usage of services becomes remote.

The group recognises revenue from these services as they are provided. Revenue is recognised based on actual units of network services/digital and fintech services provided during the reporting period as a proportion of the total units of network services/digital and fintech services to be provided. The customer receives and uses the benefits of these services simultaneously. Units of network services/digital and fintech services outside of postpaid contracts are recognised as the service is provided.

When the group expects to be entitled to breakage (forfeiture of unused value or network services), the group recognises the expected amount of breakage in proportion to network services provided versus the total expected network services to be provided. Any unexpected amounts of breakage are recognised when the unused value of network services expire or when usage thereof becomes remote. Assessment of breakage is updated each reporting period and any resulting change is accounted for prospectively as a change in estimate in terms of IAS 8 *Accounting policies, changes in accounting estimates and errors*.

Mobile devices

The group sells a range of mobile devices. The group recognises revenue when customers obtain control of mobile devices, being when the customers take possession of the devices. For mobile devices sold separately, customers pay in full at the point of sale. For mobile devices sold in bundled packages, customers usually pay monthly in equal instalments over a period of 24 months. Contract assets are recognised when customers take possession of devices for postpaid contracts.

The group assesses postpaid contracts including handsets to determine if they contain a significant financing component. The group has elected to apply the practical expedient that allows the group not to adjust the transaction price for the significant financing component for contracts where the time difference between customer payment and transfer of goods or services is expected to be one year or less. For contracts containing significant financing components, the group reduces device revenue and recognises interest revenue over the period between satisfying the related performance obligation and payment.

The group bases the subscriber contract period on the contractual term and accounts for early upgrades as contract modifications. The effect of the modification is that the contract asset at modification date is treated as a payment to a customer and results in a reduction of the revenue from the subsequent contract.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.2 Revenue from contracts with customers (continued)

Interconnect and roaming

The group provides interconnect and roaming services. The group recognises interconnect and roaming revenue and debtors as the service is provided unless it is not probable (based on historical information) on transaction date that the interconnect revenue will be received, in which case interconnect revenue is recognised only when the cash is received or where a right of set-off exists with interconnect parties in settling amounts.

Payment for interconnect and roaming is generally received on a monthly basis. Some interconnect and roaming debtors have a historical pattern of late payment due to sanctions imposed. The group has continued to provide services to these debtors (due to regulatory requirements) where the recovery of principal is significantly delayed beyond the contractual terms. The group has considered historical payment patterns (i.e. customary business practice) in assessing whether the contract contains a significant financing component. For contracts containing a significant financing component, the group reduces interconnect and roaming revenue and recognises interest revenue over the period between satisfying the related performance obligation and payment.

Capitalisation of subscriber acquisition costs

The group expects that incremental subscriber acquisition costs for obtaining and renewing contracts are recoverable. These costs include agents' commission on postpaid contracts and SIM activation costs on prepaid contracts. The group has therefore capitalised these costs as contract costs. Capitalised contract costs are amortised on a systematic basis over the average customer life and included in selling, distribution and marketing expenses in profit or loss.

In terms of a practical expedient, the group has elected to recognise the incremental costs of obtaining contracts as a selling, distribution and marketing expense in profit or loss, when incurred, if the amortisation period of the assets that the group otherwise would have recognised is 12 months or less.

Contract costs are assessed for impairment in terms of IAS 36 *Impairment of Assets* (IAS 36) when there is an indication of impairment.

Assets and liabilities related to contracts with customers

The group has recognised the following assets and liabilities related to contracts with customers:

	2018	2017 Restated ¹
	Rm	Rm
Contract assets	3 859	3 359
Contract assets – non-current	1 055	828
Contract assets – current	2 804	2 531
Loss allowance	(388)	–
Total contract assets	3 471	3 359
Capitalised contract costs	998	708
Contract liabilities	5 862	5 606

¹ Restated for changes in accounting policies, refer to note 11 for details of the restatements.

Significant changes in contract assets and liabilities

Contract assets have increased due to an increase in handset sales included as part of postpaid contracts. The group also recognised a loss allowance for contract assets following the adoption of IFRS 9, see note 11 and 7.1.4 for further information.

Contract liabilities increased due to an increase in prepaid sales.

Revenue recognised in relation to contract liabilities

The following table shows how much of the revenue recognised in the current reporting period relates to carried-forward contract liabilities and how much relates to performance obligations that were satisfied in the prior years.

	2018	2017 Restated ¹
	Rm	Rm
Revenue recognised that was included in the contract liability balance at the beginning of the period	4 999	5 121

¹ Restated for changes in accounting policies, refer to note 11 for details of the restatements.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.2 Revenue from contracts with customers (continued)

Unsatisfied performance obligations

	2018 Rm	2017 ¹ Rm
Aggregate amount of transaction price allocated to unsatisfied performance obligations	3 536	–

¹ As permitted under the transitional provisions in IFRS 15, the transaction price allocated to unsatisfied/partially unsatisfied performance obligations as of 31 December 2017 is not disclosed.

For postpaid contracts that were effective at 31 December 2018, the above amounts reflect the transaction price for services to be provided over the remainder of the contractual periods.

Management expects that 93% of the transaction price allocated to the unsatisfied contracts as of 31 December 2018 will be recognised as revenue during the next reporting period (R3 304 million). The remaining 7% (R232 million) will be recognised in the 2020 financial year.

For contracts with a term of one year or less, the transaction price is not disclosed above as allowed by IFRS 15.

2.3 Other income

Other income is recognised when the risks and rewards of ownership of the assets are transferred to the buyer.

	2018 Rm	2017 Rm
Realisation of deferred gain on tower sale	23	27
ZTE settlement ¹	344	–
Gain on disposal of subsidiary	2 112	–
Gain on dilution of investment in joint venture and associate (note 9.2)	569	28
Profit on exercise of exchange right in IHS Group	–	6 017
Gain on modification of financial liabilities ²	–	323
Other	138	196
	3 186	6 591

¹ In 2018, MTN entered into a settlement with Zhongxing Telecommunications Equipment (ZTE) for ZTE's breach of contract. In terms of the agreement, ZTE agreed to provide property, plant and equipment at no cost to the value of US\$24 million (R344 million at an exchange rate of US\$1:ZAR14,12). The group accounted for this transaction as other income measured at the value of the property, plant and equipment received.

² In December 2017, MTN (Dubai) Limited (MTN Dubai) entered into individual agreements with various vendors of Areeba Guinea S.A. (MTN Guinea-Conakry) and Lonestar Communications Corporation LLC (MTN Liberia), in terms of which MTN Dubai purchased receivables (owing from MTN Guinea-Conakry and MTN Liberia to the respective vendors), at a discounted price. The group has accounted for this transaction as a modification of a financial liability, as the group has contractually agreed to modify the payment terms of the vendor liabilities. The group has recognised the difference between the fair value of the modified financial liabilities and the carrying amount of the original financial liabilities as a gain in profit or loss.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.3 Other income (continued)

Gain on disposal of subsidiary

In July 2018, the group entered into an agreement with Monaco Telecom S.A (Monaco Telecom), in terms of which Monaco Telecom acquired 100% of the group's interest in MTN Cyprus Limited (MTN Cyprus). The sale became effective on 4 September 2018. MTN Cyprus was presented as part of other MENA in the segment information (note 2.1).

The carrying amounts of assets and liabilities as at the date of sale were:

	2018 Rm
Property, plant and equipment	1 093
Intangible assets and goodwill	1 197
Deferred tax and other non-current assets	225
Trade receivables and other current assets	705

Total assets	3 484
Borrowings	806
Deferred tax and other non-current liabilities	135
Current liabilities	485
Total liabilities	1 426
Carrying amount of net assets sold	2 058
Total disposal consideration	4 231
Cash	4 302
Fair value of contingent consideration	(71)
Reclassification of foreign currency translation reserve	34
Transaction costs	(95)
Gain on disposal of subsidiary	2 112
Net cash:	
Cash received	4 302
Less: Cash and cash equivalents in MTN Cyprus	(264)
Less: Transaction costs paid	(52)
Net cash received on disposal	3 986

Profit on exercise of exchange right in IHS Group

In January 2017, the group exchanged its 51% interest in Nigeria Tower InterCo B.V., the parent company of INT Towers Limited (INT), the Nigerian telecom tower operator, for an additional shareholding in IHS Group. This resulted in a net impact on profit before tax of R6 017 million, a decrease of R4 452 million in investments in associates and an increase of R13 767 million in available-for-sale investments (note 7.2). The transaction had no tax impact.

2.4 Operating profit

Employee benefits

Short-term employee benefits

Salaries and wages, including non-monetary benefits and accumulated leave pay (remuneration), that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service, are recognised as a liability and are measured at the amounts expected to be paid when the liabilities are settled. Remuneration to employees in respect of services rendered during a reporting period is expensed in that reporting period.

A liability for bonuses is recognised when there is no realistic alternative other than to settle the liability, and at least one of the following conditions is met:

- there is a formal plan and the amounts to be paid can be reliably estimated; or
- achievement of previously agreed bonus criteria has created a valid expectation by employees that they will receive a bonus and the amount can be reliably estimated.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.4 Operating profit (continued)

Post-employment benefits

Group companies operate various defined contribution plans. Contributions to defined contribution plans in respect of services rendered during a period are recognised as an employee benefit expense as the related service is provided. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Share-based payment transactions

The group operates a number of share incentive schemes. For further details, refer to note 8.4.

Termination benefits

Termination benefits may be payable when an employee's employment is terminated before the normal retirement date due to retrenchment or whenever an employee accepts voluntary redundancy in exchange for these benefits.

The group recognises termination benefits at the earlier of the following dates:

- when the group can no longer withdraw the offer of those benefits; and
- when the group recognises costs for a restructuring that is within the scope of IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* (IAS 37) that includes the payment of termination benefits.

In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the reporting date are discounted to their present value.

2.4 Operating profit (continued)

2.4.1 CBN resolution

On 30 August 2018, MTN Group announced that MTN Nigeria received a letter on 29 August 2018 from the Central Bank of Nigeria (CBN) alleging that Certificates of Capital Importation (CCIs), issued in respect of the conversion of shareholders loans in MTN Nigeria to preference shares in 2007, had been improperly issued. The CBN claimed that historic dividends repatriated by MTN Nigeria between 2007 and 2015 amounting to US\$8,1 billion needed to be refunded to the CBN.

MTN Nigeria strongly refuted these allegations and claims, stating that no dividends had been declared or paid by MTN Nigeria other than pursuant to CCIs issued by its bankers and with the approval of the CBN as required by law.

On 27 December 2018, MTN Group announced that MTN Nigeria had held various engagements in order to find an equitable resolution to the matter. In particular, a series of meetings were held in Lagos with CBN officials during November 2018. At these meetings MTN Nigeria provided additional material documentation which satisfactorily clarified its remittances.

The CBN, upon review of the additional documentation, concluded that MTN Nigeria is no longer required to reverse the historical dividend payment made to MTN Nigeria shareholders. However, the CBN maintained that the proceeds from the preference shares in MTN Nigeria's private placement remittances of 2008 of circa US\$1 billion were irregular having been based on CCIs that only had approval-in-principle, but not final regulatory approval by the CBN.

The CBN instructed MTN Nigeria to implement a notional reversal of the 2008 private placement of shares at a net cost of circa N19,1 billion (CBN resolution amount) (the CBN resolution amount was equivalent to US\$50,6 million at the time of the announcement). This was on the basis that certain CCIs utilised in the private placement were not properly issued.

MTN Nigeria and the CBN agreed to resolve the matter on the basis that MTN Nigeria had to pay the CBN resolution amount without admission of liability. In terms of the resolution agreement, the CBN will regularise all the CCIs issued on the investment by the shareholders of MTN Nigeria of circa US\$402,6 million without regard to any historical disputes relating to those CCIs, thereby bringing to a final resolution all incidental disputes arising from this matter.

MTN Nigeria recognised an expense to the equivalent of R744 million in December 2018 and paid the CBN resolution amount on 4 January 2019.

2.5 Finance income and finance costs

Finance income

Finance income comprises interest income on funds invested, changes in the fair value of financial assets at fair value through profit or loss, net foreign exchange gains and any gains on hedging instruments that are recognised in profit or loss. Interest income is recognised as it accrues in profit or loss, using the effective interest method.

Finance costs

Finance costs comprise interest expenses on borrowings, unwinding of the discount on provisions, fair value movements, net foreign exchange losses and any losses on hedging instruments that are recognised in profit or loss. All borrowing costs are recognised in profit or loss using the effective interest method, unless the borrowing costs are directly attributable to the acquisition, construction or production of qualifying assets, in which case the directly attributable borrowing costs are capitalised.

	2018 Rm	2017 Rm
Interest income on loans and receivables	1 120	2 109
Interest income on bank deposits	872	1 379
Finance income	1 992	3 488
Interest expense on financial liabilities measured at amortised cost ¹	(8 422)	(8 400)
Net foreign exchange losses	(1 901)	(4 355)
Finance costs	(10 323)	(12 755)
Net finance costs recognised in profit or loss	(8 331)	(9 267)

¹ R812 million (2017: R1,0 billion) relates to the discount unwind on the MTN Nigeria regulatory fine liability.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

2 RESULTS OF OPERATIONS (continued)

2.6 Loss on derecognition of long-term loan receivable

With effect from 27 December 2017 MTN Nigeria Towers SPV B.V. assigned its shareholder loan of R2 840 million to IHS Group. The shareholder loan arose as part of MTN Nigeria's tower transactions whereby MTN Nigeria sold a portfolio of towers to INT in 2014 and 2015 which, through Nigeria Tower InterCo B.V., was 51% owned by MTN Nigeria Towers SPV B.V. and 49% by IHS Group. When forming INT, MTN Group (through MTN Nigeria Towers SPV B.V.) as well as IHS Group, provided proportionate shareholder loans to INT. These loans were subordinated and due for repayment in 2024 and 2025 with interest capitalised until two years prior to repayment. In return for the assignment of the loan, IHS Group has facilitated certain network volume commitments and provided more attractive terms for MTN Nigeria's future network rollout, applicable from 2018 onwards.

The cash flow benefits to be realised from the improved commercial terms of the future rollout have not been capitalised as a prepayment and will be accounted for as and when they are realised. This is due to MTN contractually not controlling the realisation of the future economic benefits referred to above. However, the group believes it will obtain economic benefits through IHS Group being incentivised economically to transact with MTN under the current master services agreement.

2.7 Earnings per ordinary share

Basic earnings per share

Earnings per share is calculated using the weighted average number of ordinary shares in issue during the period and is based on the profit after tax attributable to ordinary shareholders. For the purpose of calculating earnings per share, treasury shares are deducted from the number of ordinary shares in issue.

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares and is based on the net profit attributable to ordinary shareholders, adjusted for the after tax dilutive effect. The company has dilutive potential ordinary shares which comprise share options and share rights issued in terms of the group's share schemes, performance share plan and MTN Zakhele Futhi.

Headline earnings per share

Headline earnings per share is calculated using the weighted average number of ordinary shares in issue during the period and is based on the earnings attributable to ordinary shareholders, after excluding those items as required by Circular 4/2018 issued by the South African Institute of Chartered Accountants (SAICA).

	2018 '000	2017 '000
Weighted average number of shares (excluding treasury shares) for calculation of basic earnings per share	1 797 603	1 797 414

² Comprises interest paid which is presented as part of operating activities.

3 TAXATION

3.1 Income tax expense

The tax expense for the period comprises current, deferred and withholding tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity. For these items the tax is also recognised in other comprehensive income or directly in equity, respectively.

Current tax

Current tax is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at the reporting date in the countries where the company and its subsidiaries operate and generate taxable income, and any adjustment to tax payable in respect of previous years. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred tax is recognised using the liability method, providing for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements for financial reporting purposes. Deferred tax is not recognised if the temporary difference arises from goodwill or from the initial recognition of an asset or liability in a transaction (other than a business combination) that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is measured at tax rates (and laws) that have been enacted or substantively enacted at the reporting date and are expected to apply to temporary differences when they reverse.

Deferred tax is not provided on temporary differences arising on investments in subsidiaries, associates and joint ventures where the timing of the reversal of the temporary differences is controlled by the group and it is probable that the temporary difference will not reverse in the foreseeable future.

As the functional currencies of MTN Sudan, MTN South Sudan and MTN Syria are currencies of hyperinflationary economies, deferred tax relating to these subsidiaries is recognised using the liability method, providing for temporary differences arising between the tax bases of assets and liabilities and their restated carrying amounts.

Withholding tax

Withholding tax is payable at different rates varying between 0% and 25% on amounts paid to the group companies by certain of their subsidiaries as dividends, interest and management fees.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

Other	(5,80)	(6,42)
Effective tax rate	36,18	52,46

¹ Restated for changes in accounting policies, refer to note 11 for details of the restatements.

² This line item includes unwinding interest on the Nigeria fine liability and the amortisation of fees related to the listing of MTN Nigeria (note 2.4).

Notes to the group financial statements (continued)

for the year ended 31 December 2018

3 TAXATION (continued)

3.1 Income tax expense (continued)

The following are the corporate tax rates applicable to the various jurisdictions in which the group operates:

Country	Corporate tax rate	
	2018 %	2017 %
Afghanistan	20	20
Benin	30	30
Cameroon	33	33
Congo Brazzaville ¹	15	15
Cote d'Ivoire S.A	30	30
Cyprus	12,5	12,5
Ethiopia	30	30
Ghana	25	25
Guinea-Bissau	25	25
Guinea-Conakry	35	35
Kenya	30	30
Liberia	25	25
Namibia	32	32
Netherlands	25	25
Nigeria	30	30
Rwanda	30	30
South Africa	28	28
South Sudan	20	20
Sudan	5	5
Syria	14	14
Uganda	30	30
Yemen	50	50
Zambia	40	40

¹ The entity was granted a tax holiday until April 2016. From April 2016 the entity was granted a 50% reduction on its corporate tax rate as a result of its investment agreement with the government, in terms of this agreement, the reduction in the corporate tax rate is valid for five years.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

3 TAXATION (continued)

3.2 Deferred taxes

Deferred tax is accounted for in accordance with the accounting policy disclosed in note 3.1.

	1 January 2017 Restated ² Rm	Recognised in profit or loss Restated ² Rm	Recognised in other comprehensive income Rm
Provisions	1 508	338	–
Tax loss carried forward	215	190	–

4 WORKING CAPITAL

4.1 Inventories

Inventories mainly comprise handsets, SIM cards, accessories held for sale and consumable items.

Inventories are measured at the lower of cost and net realisable value. The cost of inventory is determined using the weighted average method. Cost comprises direct materials and, where applicable, overheads that have been incurred in bringing the inventories to their present location and condition. Net realisable value represents the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

As the functional currencies of MTN South Sudan, MTN Sudan and MTN Syria are the currencies of hyperinflationary economies, inventories relating to these subsidiaries are measured at the lower of the restated cost and net realisable value.

	2018 Rm	2017 Rm
Finished goods – at cost	3 741	3 840
Handsets	2 995	2 658
SIM cards and accessories	746	1 182
Consumables	107	61
Less: Write-down to net realisable value ¹	(853)	(901)
	2 995	3 000

¹ The write-down of inventories to net realisable value mainly relates to handsets.

Scancom PLC (MTN Ghana) has secured facilities through the pledge of its inventories amounting to R30 million (2017: R56 million) (note 6.1).

Reconciliation of write-down of finished goods

	At beginning of the year Rm	Additions ¹ Rm	Reversals ¹ Rm	Utilised Rm	Exchange and other movements Rm	At end of the year Rm
2018						
Movement in write-down	(901)	(190)	274	13	(49)	(853)
2017						
Movement in write-down	(1 152)	(297)	135	376	37	(901)

¹ A net reversal on inventories of R84 million (2017: R162 million net write-down) was recognised in the current year. This amount is included in other operating expenses in profit or loss (note 2.4).

4.2 Trade and other receivables

Trade receivables are amounts due from customers for merchandise sold or services rendered in the ordinary course of business and are accounted for at amortised cost in accordance with the accounting policy disclosed in note 7.1.

Prepayments and other receivables are stated at their nominal values.

As the functional currencies of MTN South Sudan, MTN Sudan and MTN Syria are currencies of hyperinflationary economies, prepayments relating to these subsidiaries are restated by applying the change in the general price indices from the date of payment to the current reporting date.

	2018 Rm	2017 Restated ¹ Rm
Trade receivables (note 7.1.4)	17 664	17 915
Less: Allowance for impairment of trade receivables (note 7.1.4)	(3 035)	(2 753)
Net trade receivables	14 629	15 162
Loan to Iran ²	1 730	2 071
Loan to Ghana Tower InterCo B.V. ³	884	–
Receivable from Iran ⁴	1 031	3 355
Prepayments and other receivables ⁵	2 809	3 025
Sundry debtors and advances ⁶	5 586	4 862
	26 669	28 475

¹ Restated for changes in accounting policies, refer to note 11 for details of the restatements.

² This balance relates to a loan receivable from Iran and was due on 30 September 2017 but remains outstanding at year-end. The amount outstanding was translated at the CBI rate (note 1.5.3 and note 7.6).

³ The loan to Ghana Tower InterCo B.V. attracts interest at a fixed interest rate of 21.87% per annum. The loan is repayable in 2019.

⁴ R1 296 million (2017: R6 509 million) of the outstanding balance was received during the current financial year. The amount outstanding was translated at the SANA rate (note 1.5.3 and note 7.6). Subsequent to year-end, MTN (Mauritius) Investments Limited (MTN Mauritius) and Iran signed an agreement to convert Iranian rial-denominated receivables amounting to R505 million into a loan with a two-year term accruing interest at 18% per annum.

⁵ Prepayments and other receivables include prepayments for base transceiver station (BTS) sites and other property leases.

⁶ Sundry debtors and advances include advances to suppliers and receivables from related parties (note 10.1).

Notes to the group financial statements (continued)

for the year ended 31 December 2018

4 WORKING CAPITAL (continued)

4.2 Trade and other receivables (continued)

An allowance for impairment of R549 million (2017: R836 million) was incurred in the current year. This amount is included in impairment of trade receivables and contract assets in profit or loss (note 2.4). Additionally, R261 million was written-off directly to profit or loss during the year.

MTN Ghana has secured facilities through the pledge of its trade and other receivables amounting to R959 million (2017: R1 055 million) (note 6.1).

The group does not hold any collateral for trade and other receivables.

The group's exposure to credit and currency risk relating to trade and other receivables is disclosed in note 7.1.

On 8 May 2018, the US announced its decision to withdraw from the Joint Comprehensive Plan of Action (JCPOA) agreement and to reimpose economic sanctions against Iran. The first round of these sanctions became effective on 7 August 2018 and a second phase of sanctions became effective on 5 November 2018. The sanctions may limit the ability of the group to repatriate cash from Iran, including future dividends.

4.3 Restricted cash

Restricted cash comprises short-term deposits that are not highly liquid and are accounted for at amortised cost in accordance with the accounting policy disclosed in note 7.1.

Restricted cash deposits include amounts of R145 million (2017: R182 million) and R1 469 million (2017: R1 427 million) relating to the Syrian and Nigerian operations respectively, which are not available for use by the group.

In respect of Syria, this was due to exchange control regulations and deposits required to secure letters of credit. The restricted cash balance is considered to represent excess cash not required for payment of Syrian pound denominated liabilities.

In respect of Nigeria, restricted cash mainly comprises money placed on deposit with banks to secure letters of credit.

Restricted cash also includes R623 million relating to Spacetel Benin S.A (MTN Benin) for mobile money. This is not available for use by the group.

4.4 Cash and cash equivalents

Cash and cash equivalents are accounted for at amortised cost and bank overdrafts are accounted for as financial liabilities in accordance with the accounting policy disclosed in note 7.1.

Cash and cash equivalents comprise cash on hand and deposits held on call, all of which are available for use by the group. Bank overdrafts are included within current liabilities on the statement of financial position, unless the group has a current legally enforceable right to set off the amounts and intends to settle on a net basis, or realise the asset and settle the liability simultaneously, in which case it is netted off against cash and cash equivalents on the statement of financial position.

For the purposes of the statement of cash flows, cash and cash equivalents comprise the following:

	2018 Rm	2017 Rm
Cash at bank and on hand	15 837	16 009
Bank overdrafts	(255)	(72)
Cash classified as held for sale (note 9.3.2)	(615)	–
Net cash and cash equivalents	14 967	15 937

MTN Ghana has secured facilities through the pledge of its cash and cash equivalents amounting to R1 103 million (2017: R542 million) (refer to note 6.1).

Notes to the group financial statements (continued)

for the year ended 31 December 2018

4 WORKING CAPITAL (continued)

4.5 Trade and other payables

Trade payables, sundry creditors and accrued expenses are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. They are accounted for as financial liabilities in accordance with the accounting policy disclosed in note 7.1.

Other payables are stated at their nominal values.

	2018	2017
	Rm	Restated ¹ Rm
Trade payables	13 712	11 264
Sundry creditors	2 437	3 674
Accrued expenses ²	22 182	21 999
Nigeria regulatory fine ³	4 150	3 481
Other payables ⁴	5 873	5 438
	48 354	45 856

¹ Restated for changes in accounting policies, refer to note 11 for details of the restatements.

² Includes accruals for operating expenses, inventories and capital expenditure for which supplier invoices are outstanding at year-end.

³ The accrual for the Nigeria regulatory fine comprises N110 billion (2017: N110 billion) discounted at 14,71% per annum and translated at the 31 December 2018 closing rate of R1 = N25,33 (2017: R1 = N29,05). The amount of N110 billion is payable in two final instalments of N55 billion on 31 March 2019 and 31 May 2019 respectively.

⁴ Includes dealer commissions, withholding taxes and VAT payable.

5 INFRASTRUCTURE INVESTMENTS

5.1 Property, plant and equipment

Property, plant and equipment are measured at historical cost less accumulated depreciation and impairment losses. Property, plant and equipment acquired through business combinations are initially shown at fair value (based on replacement cost) and are subsequently carried at the initially determined fair value less accumulated depreciation and impairment losses.

Property, plant and equipment under construction (capital work-in-progress) are measured at initial cost and depreciation commences from the date the assets are transferred to an appropriate category of property, plant and equipment, i.e. when commissioned and ready for their intended use. Purchased software that is integral to the functionality of the related equipment is capitalised as part of the equipment. The group capitalises general and specific borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. Other borrowing costs are expensed in profit or loss.

The present value of the expected cost for the decommissioning of an asset after its use is included in the cost of the respective asset if the recognition criteria for a provision are met. Refer to provisions (note 6.3) for further information about the recognised decommissioning provision and the accounting judgements, estimates and assumptions made.

In circumstances whereby the group enters into an exchange transaction, the group determines whether such an exchange has commercial substance. Property, plant and equipment acquired in an exchange transaction are measured at fair value unless the exchange transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up is reliably measurable. If the acquired item is not measured at fair value, its cost is measured at the carrying amount of the asset given up. Any consideration paid or payable is included in the cost of the asset received. Property, plant and equipment received for no consideration are accounted for at zero value.

As the functional currencies of MTN South Sudan, MTN Sudan and MTN Syria are currencies of hyperinflationary economies, property, plant and equipment relating to these subsidiaries are restated by applying the change in the general price indices from the date of acquisition to the current reporting date.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation is calculated on a straight-line basis to write off the cost of the assets to their residual values over their estimated useful lives. Depreciation relating to the property, plant and equipment of MTN South Sudan, MTN Sudan and MTN Syria is based on the restated amounts, which have been adjusted for the effects of hyperinflation.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

5 INFRASTRUCTURE INVESTMENTS (continued)

5.1 Property, plant and equipment (continued)

Useful lives and residual values are reviewed on an annual basis and the effect of any changes in estimate is accounted for on a prospective basis.

In determining residual values, the group uses historical sales and management's best estimate based on market prices of similar items.

Useful lives of property, plant and equipment are based on management estimates and take into account historical experience with similar assets, the expected usage of the asset, physical wear and tear, technical or commercial obsolescence and legal restrictions on the use of the assets.

The estimated useful lives of property, plant and equipment are as follows:

	2018 Years	2017 Years
Buildings – owned	5 – 50	5 – 50
Buildings – leased	1 – 20	1 – 20
Network infrastructure	2 – 20	2 – 20
Information systems equipment	1 – 10	1 – 10
Furniture and fittings	3 – 15	3 – 15
Leasehold improvements	2 – 15	2 – 15
Office equipment	2 – 12	2 – 12
Vehicles	3 – 10	3 – 10

Land is not depreciated. Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the expected term of the relevant lease.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. Repairs and maintenance costs are included in profit or loss during the financial period in which they are incurred. The gain or loss arising on the disposal or retirement of an asset is included in profit or loss.

Impairment

An impairment loss is recognised in profit or loss if the carrying amount of an asset or a CGU exceeds its estimated recoverable amount. For the purpose of impairment testing, assets are grouped together into CGUs. The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Goodwill arising from business combinations is allocated to CGUs or the group of CGUs that are expected to benefit from the synergies of the combination.

Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units, and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

An impairment loss is subsequently reversed only to the extent that the asset or CGU's carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised. A reversal of an impairment loss is recognised immediately in profit or loss.

The group annually reviews the carrying amounts of its property, plant and equipment in order to determine whether there is any indication of impairment. If any such indication exists, the recoverable amounts of the assets are estimated in order to determine the extent, if any, of the impairment loss.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

Notes to the group financial statements (continued)

for the year ended 31 December 2018

5 INFRASTRUCTURE INVESTMENTS (continued)

5.1 Property, plant and equipment (continued)

5.1.1 Impairment reversal

The following entities recognised impairment (losses)/reversals in other operating expenses in profit or loss:

	2018 Rm	2017 Rm
MTN Sudan	273	(1 518)
MTN Syria	–	(994)
Other	(101)	(6)
	172	(2 518)

MTN Sudan is operating in a hyperinflationary economy from 1 July 2018 onwards while MTN Syria and MTN South Sudan continue to operate in hyperinflationary economies (see note 1.5.6). Hyperinflation accounting resulted in the write up of non-monetary assets and a resulting increase in the carrying value of these operations. The value in use of these assets did not exceed the hyperinflated carrying values resulting in the non-monetary assets being impaired in 2017. During 2018, R306 million of the previously recorded impairment was reversed for MTN Sudan on property, plant and equipment (R273 million) as well as intangible assets (R33 million). This amount represents the full impairment recognised during 2017, translated at a significantly weaker exchange rate.

5.1.2 Leased property, plant and equipment

The group leases various premises and sites which have varying terms, escalation clauses and renewal rights. The carrying amount of the leased items of property, plant and equipment is disclosed in note 5.1.

Finance lease commitments are disclosed in note 6.6.

5.1.3 Capital work-in-progress

There are various capital work-in-progress projects under way within the group, a summary of which is set out below:

	2018 Rm	2017 Rm
Mobile Telephone Networks Proprietary Limited (MTN South Africa)	311	151
MTN Ghana	100	676
MTN Sudan	152	9
MTN Nigeria	605	519
MTN Guinea-Conakry	132	111
MTN Côte d'Ivoire S.A. (MTN Ivory Coast)	232	100
MTN Benin	233	158
MTN Dubai	2	168
MTN Yemen	288	186
MTN Syria	196	873
MTN Congo S.A. (MTN Congo Brazzaville)	139	315
MTN Cameroon Limited (MTN Cameroon)	357	728
Global Connect Solutions Limited	357	–
Other	219	532
	3 323	4 526

5.1.4 Changes in estimates

There were no material changes in the depreciation method, residual values or useful lives for any of the categories of property, plant and equipment during the current or prior year.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

5 INFRASTRUCTURE INVESTMENTS (continued)

5.1 Property, plant and equipment (continued)

5.1.5 Encumbrances

Borrowings (note 6.1) are secured by various categories of property, plant and equipment with the following carrying amounts:

	2018 Rm	2017 Rm
MTN Ghana	7 407	6 226
MTN Sudan	727	1 325
	8 134	7 551

5.2 Intangible assets and goodwill

Goodwill

Goodwill is measured at cost less accumulated impairment losses and is not amortised but tested for impairment annually.

As the functional currencies of MTN South Sudan, MTN Sudan and MTN Syria are currencies of hyperinflationary economies, goodwill relating to these subsidiaries is restated by applying the change in the general price indices from the date of acquisition to the current reporting date.

Goodwill arising on the acquisition of subsidiaries is included in intangible assets. Goodwill arising on the acquisition of an associate or joint venture is included in 'Investment in associates and joint ventures' and is tested for impairment as part of the overall balance.

Gains or losses on the disposal of an entity include the carrying amount of goodwill allocated to the entity sold.

The group annually reviews the carrying amounts of intangible assets and goodwill with indefinite useful lives for impairments. The recoverable amounts of the assets are estimated in order to determine the extent, if any, of the impairment loss.

Intangible assets with finite useful lives

The group's intangible assets with finite useful lives are as follows:

- Licences;
- Customer relationships;
- Computer software; and
- Other intangible assets.

Intangible assets with finite useful lives are measured at historical cost less accumulated amortisation and impairment losses. Intangible assets acquired through business combinations are initially shown at fair value and are subsequently carried at the initially determined fair value less accumulated amortisation and impairment losses. The initial cost incurred in respect of licences is capitalised. Contingent licence fees are expensed as they are incurred.

As the functional currencies of MTN South Sudan, MTN Sudan and MTN Syria are currencies of hyperinflationary economies, intangible assets relating to these subsidiaries are restated by applying the change in the general price indices from the date of acquisition to the current reporting date.

Amortisation is calculated on a straight-line basis to write off the cost of intangible assets over their estimated useful lives. Amortisation relating to MTN South Sudan, MTN Sudan and MTN Syria is based on the restated amounts, which have been adjusted for the effects of hyperinflation.

Useful lives are reviewed on an annual basis with the effects of any changes in estimate accounted for on a prospective basis. The residual values of intangible assets are assumed to be zero.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

5 INFRASTRUCTURE INVESTMENTS (continued)

5.2 Intangible assets and goodwill (continued)

Intangible assets with finite useful lives (continued)

The basis for determining the useful lives for the various categories of intangible assets is as follows:

Basis for determining useful lives		2018 Years	2017 Years
Licences	The useful lives are determined primarily with reference to the unexpired licence period.	3 – 25	3 – 20
Customer relationships	The useful life principally reflects management's view of the average economic life of the customer base and is assessed by reference to factors such as customer churn rates. An increase in churn rates may lead to a reduction in the estimated useful life.	5 – 10	5 – 10
Software	The useful life is determined with reference to the licence term of the computer software. For unique software products controlled by the group, the useful life is based on historical experience with similar assets as well as anticipation of future events such as technological changes, which may impact the useful life.	3 – 6	3 – 6
Other intangible assets	Useful lives are based on management's estimates and take into account historical experience as well as future events which may impact the useful lives.	3 – 10	3 – 10

The gain or loss arising on the disposal or retirement of an intangible asset is included in profit or loss.

Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the group are recognised as intangible assets when the following criteria are met:

- it is technically feasible to complete the software so that it will be available for use;
- management intends to complete the software and use or sell it;
- there is an ability to use or sell the software;
- it can be demonstrated how the software will generate probable future economic benefits;
- adequate technical, financial and other resources to complete the development and to use or sell the software are available; and
- the expenditure attributable to the software during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software include employee costs and an appropriate portion of relevant overheads. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use.

Costs associated with maintaining software programmes are recognised as an expense as incurred. Research and development expenditure that does not meet the criteria above is recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Expenditure that enhances or extends the performance of intangible assets beyond their original specifications is recognised as a capital improvement and capitalised to the original cost of the assets. Expenditure on research activities is recognised as an expense in the period in which it is incurred.

Impairment

An impairment loss is recognised in profit or loss if the carrying amount of an asset or a CGU exceeds its estimated recoverable amount. For the purpose of impairment testing, assets are grouped together into CGUs. The recoverable amount of an asset or CGU is the higher of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

An impairment loss is subsequently reversed only to the extent that the asset or CGU's carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised. A reversal of an impairment loss is recognised immediately in profit or loss.

An impairment loss in respect of goodwill is not reversed.

Other			578			416
Total			17 236			16 638

Goodwill is tested annually for impairment. The recoverable amounts of CGUs were determined based on value in use calculations. The calculations mainly used cash flow projections based on financial budgets approved by management covering a three to four-year (2017: three to five-year) period. Management is confident that projections covering periods longer than three years (MTN Yemen) are appropriate in order for terminal values to be determined using steady state cash flows. Cash flows beyond the above period were extrapolated using the estimated growth rates as mentioned above. These growth rates are in line with industry norms.

The following key assumptions were used for the value in use calculations:

- Growth rates: the group used steady growth rates to extrapolate revenues beyond the budget period cash flows. The growth rates were consistent with publicly available information relating to long-term average growth rates for each of the markets in which the respective CGU operated. The average growth rates used ranged from 1,9% to 61,0% (2017: 2% to 15,0%); and
- Discount rates: discount rates ranged from 11,1% to 100,7% (2017: 9,7% to 41,9%). Discount rates used reflect both time value of money and other specific risks relating to the relevant CGU.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

5 INFRASTRUCTURE INVESTMENTS (continued)

5.2 Intangible assets and goodwill (continued)

5.2.1 Goodwill (continued)

Goodwill impairment

Impairment losses were recognised relating to the following entities:

	Impairment losses		Recoverable amount ¹	
	2018 Rm	2017 Rm	2018 Rm	2017 Rm
MTN Afghanistan	–	841	1 426	2 317
MTN Yemen	312	807	1 892	1 769
MTN Sudan	–	983	1 169	2 963
	312	2 631	4 487	7 049

¹ This includes any minority portion of the recoverable amount of CGU.

In a number of the group's operations in the MENA region the socio-political instability experienced in these markets resulted in suppressed revenue growth and lower operating margins in the current year, resulting in decreased forecast cash flows at 31 December 2018.

An impairment charge amounting to R312 million was recognised against the goodwill of MTN Yemen. MTN Yemen continued to be plagued by political instability and subdued economic conditions. As at 31 December 2018, the carrying value of this CGU exceeded its recoverable amount, necessitating an impairment charge. The goodwill balance for MTN Yemen at 31 December 2018 amounts to R1 123 million, after recognising cumulative impairment charges of R1 119 million.

The group performed the annual impairment assessments on all goodwill balances at 31 December 2018.

Recoverable amounts are represented by a CGU's value in use. A specific change in the discount and growth rates (see below) would result in the recoverable amount being equal to the carrying amount of the net assets of the following CGUs:

	2018		2017	
	Absolute change to discount rate (%)	Absolute change to growth rate (%)	Absolute change to discount rate (%)	Absolute change to growth rate (%)
MTN Afghanistan	0,28	(0,35)	5,25	(1,50)
MTN Liberia*	–	–	3,45	(3,10)
MTN Guinea-Bissau*	–	–	–	–
MTN Yemen*	–	–	–	–

* A minimal change in the discount and growth rates at 31 December 2018 would result in the carrying amount exceeding the recoverable amount of the net assets.

The recoverable amount of MTN Afghanistan exceeded its carrying amount by R47 million. For MTN Liberia and MTN Guinea-Bissau the recoverable amount was equal to the carrying amount.

5.2.2 Encumbrances

Borrowings are secured by intangible assets of MTN Ghana with a carrying amount of R1 216 million (2017: R934 million) (note 6.1).

¹ Negotiations with the Uganda Communications Commission is ongoing to grant a formal long-term licence extension. In the interim short-term extensions of MTN Uganda's licence has been granted with the latest expiring on 22 April 2019.

² The tenure of the licences has been extended to August 2021.

³ The Nigerian Communications Commission suspended the effective date (16 June 2018) of the licence until all encumbrances (interferences on the network) have been cleared.

⁴ Application to renew has been submitted to the Nigerian Communications Commission and is under consideration.

¹ MTN Benin and the government of Benin concluded a memorandum of understanding (MOU) in April 2018, which includes the settlement of historical frequency fees, a five-year licence extension and the addition of optical fibre to the existing licence conditions. MTN Benin made payments of CFA35 billion (R802 million) and CFA35 billion (R857 million) in May 2018 and February 2019, respectively. Part of the payment relating to the extended licence and the right to deploy optical fibre was recognised as an intangible asset (CFA55,2 billion, R1 370 billion).

² The 3G licence was terminated on 31 August 2018. At the expiry date the entity did not meet several essential obligations. The licence has subsequently been extended to 31 December 2019.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

6 FINANCING STRUCTURE AND COMMITMENTS

6.1 Borrowings

Borrowings are accounted for as financial liabilities in accordance with the accounting policy disclosed in note 7.1.

Fees paid on the establishment of loan facilities are recognised as transaction costs and capitalised to the extent that it is probable that some or all of the facility will be drawn down. When the draw down is made, the transaction costs are amortised to profit or loss using the effective interest method. To the extent that there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Details of the group's significant unsecured borrowings are provided below:

Nigeria regulatory fine	–	3 156
	1 316	4 503

¹ Relates to the deferred gain for tower sales and IRU swap transactions which occurred in previous years. The amounts are amortised to the income statement on a monthly basis.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

6 FINANCING STRUCTURE AND COMMITMENTS (continued)

6.3 Provisions

A provision is recognised when there is a present legal or constructive obligation as a result of a past event for which it is more likely than not that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A provision to pay a levy is not recognised until the obligating event specified in the legislation occurs, even if there is no realistic opportunity to avoid the obligation. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expected outflow of resources required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as a finance cost.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

6 FINANCING STRUCTURE AND COMMITMENTS (continued)

6.3 Provisions (continued)

Bonus provision

The bonus provision consists of a performance-based bonus, which is determined by reference to the overall group entity's performance with regard to a set of predetermined key performance measures. Bonuses are payable annually after the group annual results have been approved.

Decommissioning provision

This provision relates to the estimate of the cost of dismantling and removing an item of property, plant and equipment and restoring the site on which the item was located to its original condition. The group provides for the anticipated costs associated with the restoration of leasehold property to its original condition at inception of the lease, including removal of items included in property, plant and equipment that are erected on leased land.

The group only recognises these decommissioning costs for the proportion of its overall number of sites for which it expects decommissioning to take place. The expected percentage has been based on actual experience in the respective operations.

Licence obligations

The licence obligations provision represents the estimated costs to be incurred in fulfilling the Universal Services Obligation (USO) in South Africa. USOs are governed by the Electronic Communications Act.

Other provisions

The group is involved in various regulatory and direct and indirect tax matters specific to the respective jurisdictions in which the group operates. These matters may not necessarily be resolved in a manner that is favourable to the group. The group has therefore recognised provisions in respect of these matters based on estimates and the probability of an outflow of economic benefits and should not be construed as an admission of legal liability.

6.4 Capital commitments

Commitments for the acquisition of property, plant and equipment and software:

	2018 Rm	2017 Rm
Capital expenditure authorised not yet incurred at the reporting date is as follows:		
Contracted	10 280	6 958
– Property, plant and equipment	9 428	6 519
– Software	852	439
Not contracted	18 510	20 789
– Property, plant and equipment	15 649	17 787
– Software	2 861	3 002
Total commitments for property, plant and equipment and software	28 790	27 747

Capital expenditure will be funded from operating cash flows, existing borrowing facilities and, where necessary, by raising additional facilities.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

6 FINANCING STRUCTURE AND COMMITMENTS (continued)

6.5 Operating lease commitments

Leases, where substantially all of the risks and rewards of ownership are retained by the lessor, are classified as operating leases. Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease.

Sub-lease income is recognised in profit or loss on a straight-line basis over the term of the lease.

In all significant operating lease arrangements in place during the year, the group acted as the lessee.

The group leases various premises and sites under non-cancellable/cancellable operating lease agreements. The leases have varying terms, escalation clauses and renewal rights. Penalties are chargeable on certain leases should they be cancelled before the end of the agreement.

	2018 Rm	2017 Rm
The future aggregate minimum lease payments under non-cancellable operating lease arrangements are as follows:		
Not later than one year	13 155	9 066
Later than one year and no later than five years	52 068	34 576
Later than five years	64 165	51 335
	129 388	94 977

6.6 Finance lease commitments

Assets held under finance leases are capitalised at the lower of the fair value of the leased asset and the estimated present value of the minimum lease payments at the inception of the lease. The corresponding liability to the lessor, net of finance charges, is included in the statement of financial position under other non-current/current liabilities. Each lease payment is allocated between the liability and finance charges. Finance charges, which represent the difference between the total lease commitments and fair value of the assets acquired, are charged to profit or loss over the term of the relevant lease so as to produce a constant periodic rate of interest on the remaining balance of the obligation for each accounting period.

In all significant finance lease arrangements in place during the period, the group acted as the lessee.

At the reporting date, the group had outstanding commitments under non-cancellable finance leases which fall due as follows:

	Minimum lease payments Rm	Future finance charges Rm	Present value Rm
2018			
Current			
Not later than one year	75	(24)	51
Non-current (note 6.2)	758	(143)	615
Later than one year and no later than five years	326	(84)	242
Later than five years	432	(59)	373
	833	(167)	666

Notes to the group financial statements (continued)

for the year ended 31 December 2018

6 FINANCING STRUCTURE AND COMMITMENTS (continued)

6.6 Finance lease commitments (continued)

	Minimum lease payments Rm	Future finance charges Rm	Present value Rm
2017			
Current			
Not later than one year	85	(31)	54
Non-current (note 6.2)	809	(164)	645
Later than one year and no later than five years	361	(95)	266
Later than five years	448	(69)	379
	894	(195)	699

6.7 Contingent liabilities

The group does not recognise contingent liabilities in the statement of financial position until future events indicate that it is probable that an outflow of resources will take place and a reliable estimate can be made, at which time a provision is recognised.

	2018 Rm	2017 Rm
Contingent liabilities	4 747	9 847
Uncertain tax exposures	2 087	8 667
Legal and regulatory matters	2 660	1 180

Uncertain tax exposures

The group operates in numerous tax jurisdictions and the group's interpretation and application of the various tax rules applied in direct and indirect tax filings may result in disputes between the group and the relevant tax authority. The outcome of such disputes may not be favourable to the group. At year-end there were a number of tax disputes ongoing in various of the group's operating entities, the most significant of which related to a transfer pricing dispute which the group is contesting. At 31 December 2018, the contingency for the transfer pricing assessment has been significantly reduced following the group's review of the tax authority's submissions made in the course of preparing for litigation. Based on internal and external legal and technical advice obtained, the group remains confident that it has a strong legal case to contest the remaining exposure.

Legal and regulatory matters

The group is involved in various legal and regulatory matters, the outcome of which may not be favourable to the group and none of which are considered individually material.

The group has applied its judgement and has recognised liabilities based on whether additional amounts will be payable and has included contingent liabilities where economic outflows are considered possible but not probable.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK

7.1 Financial risk management and financial instruments

Adoption of IFRS 9

The group adopted IFRS 9 retrospectively on 1 January 2018, without restating comparative information. The group also adopted the consequential amendments to IFRS 7 *Financial Instruments: Disclosure*. Accordingly, information relating to 31 December 2017 does not reflect the requirements of IFRS 9 but rather those of IAS 39 *Financial Instruments: Recognition and Measurement*. Refer to note 11 for details regarding the initial application of IFRS 9 and the resulting impact. The group continues to apply the hedge accounting requirements of IAS 39.

Accounting for financial instruments

Financial instruments comprise investments in equity and debt securities, loans receivable, trade and other receivables (excluding prepayments), investments in self-insurance cell captives, cash and cash equivalents, restricted cash, borrowings, other non-current liabilities (excluding provisions), bank overdrafts, derivatives and trade and other payables.

Recognition

Financial assets and liabilities are recognised in the group's statement of financial position when the group becomes a party to the contractual provisions of the instruments. Financial assets are recognised on the date the group commits to purchase the instruments (trade date accounting).

Financial assets are classified as current if expected to be realised or settled within 12 months from the reporting date; if not, they are classified as non-current. Financial liabilities are classified as non-current if the group has an unconditional right to defer payment for more than 12 months from the reporting date.

Classification

The group classifies financial assets on initial recognition as measured at amortised cost, fair value through other comprehensive income (FVOCI) or fair value through profit and loss (FVTPL) on the basis of the group's business model for managing the financial asset and the cash flow characteristics of the financial asset.

Financial assets are classified as follows:

Measurement category	Criteria
FVTPL	Debt investments that do not qualify for measurement at amortised cost or FVOCI; and equity investments that are held for trading.
Amortised cost	The asset is held within a business model with the objective to collect the contractual cash flows; and the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.
Equity securities at FVOCI	The asset is not held for trading and the group has irrevocably elected on initial recognition to recognise the asset as at FVOCI.
Debt investments at FVOCI	The contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding however, the group's business model is to collect both the contractual cash flows and selling the financial asset.

Financial assets are not reclassified unless the group changes its business model. In rare circumstances where the group does change its business model, reclassifications are done prospectively from the date that the group changes its business model.

Financial liabilities are classified as measured at amortised cost except for those derivative liabilities that are measured at FVTPL.

Measurement on initial recognition

All financial assets (unless it is a trade receivable without a significant financing component) and liabilities are initially measured at fair value, including transaction costs, except for those classified as at FVTPL which are initially measured at fair value excluding transaction costs. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in profit or loss. A trade receivable without a significant financing component is initially recognised at the transaction price.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

Subsequent measurement: Financial assets

Subsequent to initial recognition, financial assets are measured as described below.

Category	Subsequent measurement
FVTPL	These financial assets are subsequently measured at fair value and changes therein (including any interest or dividend income) are recognised in profit or loss.
Amortised cost	These financial assets are subsequently measured at amortised cost using the effective interest method, less any impairment losses. Interest income, foreign exchange gains and losses and impairments are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Equity investments at FVOCI	These financial assets are subsequently measured at fair value. Dividends are recognised in profit or loss when the right to receive payment is established. Other net gains and losses are recognised in OCI and never reclassified to profit or loss.
Debt investments at FVOCI	These financial assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairments are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Subsequent measurement: Financial liabilities

All financial liabilities, excluding derivative liabilities, are subsequently measured at amortised cost using the effective interest method. Derivative liabilities are subsequently measured at fair value with changes therein recognised in profit or loss.

Derecognition

Financial assets are derecognised when the rights to receive cash flows from the assets have expired or have been transferred and the group has transferred substantially all risks and rewards of ownership. Financial liabilities are derecognised when the obligations specified in the contracts are discharged, cancelled or expire. On derecognition of a financial asset/liability, any difference between the carrying amount extinguished and the consideration paid is recognised in profit or loss.

Modification of financial liabilities

A substantial modification of the terms of an existing debt instrument or part of it is accounted for as an extinguishment of the original debt instrument and the recognition of a new debt instrument.

Gains or losses arising from the modification of the terms of a debt instrument are recognised immediately in profit or loss where the modification does not result in the derecognition of the existing instrument.

Offsetting financial instruments

Offsetting of financial assets and liabilities is applied when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The net amount is reported in the statement of financial position.

Impairment

Under IFRS 9 the group calculates its allowance for credit losses as expected credit losses (ECLs) for financial assets measured at amortised cost, debt investments at FVOCI and contract assets (unbilled handsets component for contract). ECLs are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the group in accordance with the contract and the cash flows that the group expects to receive). ECLs are discounted at the original effective interest rate (EIR) of the financial asset.

To calculate ECLs the group segments/groups trade receivables by customer type i.e. interconnect and roaming, Enterprise Business Unit (EBU), mobile (billed handset and network services component for contracts) etc. The group applies the simplified approach to determine the ECL for trade receivables and contract assets. This results in calculating lifetime expected credit losses for trade receivables and contract assets. ECLs for trade receivables is calculated using a provision matrix. For contract assets and mobile trade receivables relating to the South African operation, ECLs are determined using a simplified parameter-based approach. Refer to note 7.1.4 for more detail about ECLs and how this is calculated.

Risk management

Introduction

The group has exposure to the following risks from its use of financial instruments: credit risk, liquidity risk and market risk (foreign exchange, interest rate and price risk). This note presents information about the group's exposure to each of the above risks, the group's objectives, policies and processes for measuring and managing risk, and the group's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

Risk management (continued)

Risk profile

The group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the group. The group considers natural hedges that may exist and, in addition, where possible, uses derivative financial instruments such as forward exchange contracts to hedge exposures. As a matter of principle, the group does not enter into derivative contracts for speculative purposes. The group applies hedge accounting to manage its risk of currency exchange rate volatility associated with certain of its investments in foreign operations.

Risk management is carried out under policies approved by the board of directors of the group and of relevant subsidiaries. The MTN Group treasury committee identifies, evaluates and hedges financial risks in cooperation with the group's operating units. The board provides written principles for overall risk management, as well as for specific areas such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments, and investing cash. Group treasury is responsible for managing the group's exposure to financial risk within the policies set by the board of directors, under the guidance of the group CFO and group board audit and risk committees.

¹ All financial instruments at fair value through profit or loss are held for trading.

² Restated for changes in accounting policies, refer to note 11 for details of restatement.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.2 Financial assets and liabilities subject to offsetting

The following table presents the group's financial assets and liabilities that are subject to offsetting:

	Gross amount Rm	Amount offset Rm	Net amount Rm
2018			
Current financial assets			
Trade and other receivables	5 314	(2 511)	2 803
Current financial liabilities			
Trade and other payables	5 629	(2 511)	3 118
2017			
Current financial assets			
Trade and other receivables	3 839	(1 714)	2 125
Current financial liabilities			
Trade and other payables	4 525	(1 714)	2 811

The amounts subject to offsetting include interconnect receivables and payables. The group has entered into agreements with the respective counterparties which permit it to offset any payables owing to the counterparty against receivables owing to the group. This right to offset exists in all circumstances and the group intends to settle on a net basis.

7.1.3 Fair value estimation

A number of the group's accounting policies and disclosures require the measurement of fair values. The group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The table on the next page presents the group's assets and liabilities that are measured at fair value. The classification into different levels is based on the extent that quoted prices are used in the calculation of fair value and the levels have been defined as follows:

- level 1: fair value based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- level 2: fair value based on inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices); or
- level 3: fair value based on inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.3 Fair value estimation (continued)

The following table presents the fair value measurement hierarchy of the group's assets and liabilities measured at fair value:

	Level 1 Rm	Level 2 Rm	Level 3 Rm	Total Rm
2018				
Financial assets				
Investment in IHS Group	–	–	23 353	23 353
Unlisted equity investments	–	–	672	672

Forward exchange contracts	–	118	–	118
Total liabilities	–	118	2	120

¹ Refer to note 11 for details of changes in accounting policies.

Valuation methods and assumptions

The following methods and assumptions were used to estimate the respective fair values:

IHS Group unlisted equity investment – The fair value is determined using models considered to be appropriate by management, due to the absence of transactions between market participants. The fair value was calculated using an earnings multiple technique and was based on unobservable market inputs including tower industry earnings multiples of between 10x to 15x (2017: 13x to 17x) applied to MTN management's estimates of earnings, less estimated net debt of R18 599 million (2017: R17 117 million). In addition MTN has applied a 10% liquidity discount.

Given the confidentiality restrictions in the shareholders' agreement with IHS Group, MTN does not have access to the IHS Group business plans or actual financial information. Any estimated earnings used to derive the existing fair value are therefore solely based on MTN management assumptions and market estimates on financial growth, currency movements, costs and performance. The investment is therefore classified as a level 3 in the fair value hierarchy. An increase of one in the low and high end of the multiple range, keeping other inputs constant, would have resulted in an increase in the fair value of R2 316 million and a decrease of one in the low and high end of the multiple range, keeping other inputs constant, would have resulted in a decrease in the fair value by R2 316 million (2017: R2 148 million). An increase of 10% in the estimated earnings used, keeping other inputs constant, would have resulted in an increase in the fair value of R2 821 million and a decrease of 10% in the estimated earnings used, keeping other inputs constant, would have resulted in a decrease in the fair value of R2 821 million (2017: R3 201 million). An increase of 1% to the liquidity discount, keeping other inputs constant, would have resulted in a decrease in the fair value of R259 million and a decrease of 1% to the liquidity discount, keeping other inputs constant, would have resulted in an increase in the fair value by R259 million as at 31 December 2018.

A decrease of R7 770 million (2017: R4 249 million increase) has been recognised for the year under review in other comprehensive income resulting from the change in fair value that also included a liquidity discount.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.3 Fair value estimation (continued)

Valuation methods and assumptions (continued)

Other unlisted equity investments – Fair values have been estimated using a discounted cash flow model. The discounted cash flow model requires management to make assumptions about the model inputs, including forecast cash flows, the discount rate, credit risk and volatility. The probabilities of the various estimates within the range can be reasonably assessed and are used in management's estimate of fair value for these unquoted equity investments.

Derivatives – The group enters into derivative financial instruments with various counterparties. Interest rate swaps, foreign exchange contracts and equity derivatives are valued using valuation techniques, which employ the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies and interest rate curves.

Investment in insurance cell captives – The fair value of the investment in cell captives is determined based on the net asset value of the cell captive at the reporting date. The net asset value is determined from statements received from the insurer in respect of the net assets of the cell.

Investment in treasury bills – The fair value of these investments is determined by reference to published price quotations in an active market.

Fair value measurements for financial instruments not measured at fair value

Financial assets and financial liabilities at amortised cost – The carrying value of current receivables and liabilities measured at amortised cost approximates their fair value.

The fair values of the majority of the non-current receivables and liabilities measured at amortised cost, other than for the instruments listed below, are also not significantly different to their carrying values.

The group has listed long-term fixed interest rate senior unsecured notes in issue which were issued in prior years, with a carrying amount of R10 832 million (2017: R9 297 million) and a fair value of R9 850 million (2017: R9 284 million). The notes are listed on the Irish bond market and the fair values of these instruments are determined by reference to quoted prices in this market. The market for these bonds is not liquid and consequently the fair value measurement is categorised within level 2 of the fair value hierarchy.

During the 2016 year, the group issued US\$1 billion listed long-term fixed interest rate unsecured notes. Notes with a face value of US\$500 million are redeemable in 2022 (the 2022 notes), with the remaining US\$500 million redeemable in 2026 (the 2026 notes). At 31 December 2018, the carrying amount of the 2022 notes is R7 268 million (2017: R6 239 million) and the fair value is R7 019 million (2017: R6 432 million); and the carrying amount of the 2026 notes is R7 280 million (2017: R6 229 million) and the fair value is R7 057 million (2017: R6 718 million). The notes are listed on the Irish bond market and the fair value of these instruments is determined by reference to quoted prices in this market. The market for these bonds is not considered to be liquid and consequently the fair value measurement is categorised within level 2 of the fair value hierarchy.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.3 Fair value estimation (continued)

Reconciliation of level 3 financial assets

The table below sets out the reconciliation of financial assets that are measured at fair value based on inputs that are not based on observable market data (level 3):

	Insurance cell captives Rm
Balance at 1 January 2017	1 201
Contributions paid to insurance cell captives	409
Claims received by insurance cell captives	(209)
Loss recognised in profit or loss	(39)
Balance at 31 December 2017¹	1 362
Balance at 1 January 2018	1 362
Contributions paid to insurance cell captives	760
Claims received by insurance cell captives	(256)
Loss recognised in profit or loss	(269)
Balance at 31 December 2018	1 597
	Investments Rm
Balance at 1 January 2017¹	380
Transfers from level 2 (IHS Group) ²	11 240
Acquisitions	132
Exchange right exercise (IHS Group)	13 767
Gain on available-for-sale investment	4 439
Foreign exchange differences	(2 272)
Balance at 31 December 2017	27 686
Balance at 1 January 2018	27 686
Acquisitions	310
Loss on equity investments at fair value through other comprehensive income	(8 030)
Foreign exchange differences	4 059
Balance at 31 December 2018	24 025

¹ Refer to note 11 for details of changes in accounting policies.

² The group considers transfers between fair value hierarchy levels to have occurred at the beginning of the year.

7.1.4 Credit risk

Credit risk, or the risk of financial loss to the group due to customers or counterparties not meeting their contractual obligations, is managed through the application of credit approvals, limits and monitoring procedures. The group's maximum exposure to credit risk is represented by the carrying amount of the financial assets and contract assets that are exposed to credit risk.

The group considers its maximum exposure per class, without taking into account any collateral and financial guarantees, to be as follows:

	2018 Rm	2017 ¹ Rm
Loans and other non-current receivables	506	2 574
Trade and other receivables	23 306	24 881
Trade receivables	14 629	15 162
Other receivables	8 677	9 719
Contract assets	3 471	3 359
Current investments	4 455	5 552
Derivative assets	265	205
Restricted cash	2 760	2 376
Cash and cash equivalents ²	15 837	15 937
	50 600	54 884

¹ Restated for changes in accounting policies, refer to note 11 for details of restatement.

² Includes cash classified as non-current asset held for sale.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.4 Credit risk (continued)

The risk rating grade of cash and cash equivalents and restricted cash are set out below. Given these credit ratings, management does not expect any counterparty to fail to meet its obligations.

	Credit ratings of financial institution	Cash and cash equivalent Rm	Restricted cash Rm
2018			
South Africa (including head office entities)	AA+ to B	4 221	–
MTN Nigeria	ngA to CCC	2 093	1 469
MTN Dubai	A+ to B–	2 642	126
Other	Various	6 881	1 165
		15 837	2 760

The risk rating grade of current investment and trade and other receivables are set out below. Given the credit rating for the treasury bills, management does not expect any counterparty to fail to meet its obligations.

	Current investments Rm	Trade receivables Rm	Other receivables Rm
2018			
Credit ratings of financial instruments			
BBB– ¹	–	–	884
ngA to BB+(ng)	2 283	–	–
Various	2 172	14 629	7 793
	4 455	14 629	8 677

¹ The ultimate holding company of Ghana Tower InterCo B.V credit rating was used as a proxy.

Cash and cash equivalents and current investments

The group determines appropriate internal credit limits for each counterparty. In determining these limits, the group considers the counterparty's credit rating established by an accredited ratings agency and performs internal risk assessments. The group manages its exposure to a single counterparty by spreading transactions among approved financial institutions. The group treasury committee regularly reviews and monitors the group's credit exposure.

Investment in self-insurance cell captives (insurance cell captives)

The group has exposure to the credit risk of the insurance company through its investment in preference shares in its cell captive arrangements.

Trade receivables and contract assets (unbilled handset component)

A large portion of the group's postpaid market revenues are generated in South Africa. There are no other significant concentrations of credit risk, since the other operations within the group operate largely within the prepaid market. The group has policies in place to ensure that retail sales of products and services are made to customers with an appropriate credit history. Before credit is granted to a customer, the group performs credit risk assessments through credit bureaus. The group insures some of its trade receivables in its South African operation, in which instance the credit risk assessments are performed by the credit insurer prior to the granting of credit by the group. In terms of this arrangement, R6,4 billion (2017: R7,9 billion) has been insured for which the group's risk is limited to R57,5 million (2017: R25 million). In addition, some entities within the group require potential customers to obtain guarantees from banks before credit is granted. During the current year the group did not recognise ECLs amounting to R85 million as a result of collateral held.

The recoverability of interconnect receivables in certain international operations is uncertain; however, this is actively managed within acceptable limits and has been incorporated in the assessment of an appropriate revenue recognition policy (note 2.2) and the ECL of trade receivables where applicable. In addition, in certain countries there exists a right of set-off with interconnect parties to enable collection of outstanding amounts.

Expected credit losses

The group has the following financial assets subject to the ECL model:

- Trade receivables;
- Other receivables;
- Contract assets;
- Debt investments carried at amortised cost;
- Cash and cash equivalents; and
- Restricted cash.

Application of the ECL model had an immaterial impact on all financial assets except for contract assets and trade receivables.

Included in other receivables are amounts receivable from related parties (note 10.1) to which the group has applied the general impairment model. The group has considered the financial performance, external debt and future cash flows of the related parties and concluded that the credit risk relating to these receivables are limited and consequently the probability of default relating to these balances are low.

Provision Matrix – ECLs are calculated by applying a loss ratio to the aged balance of trade receivables at each reporting date. The loss ratio is calculated according to the ageing/payment profile of sales by applying historic/proxy write offs to the payment profile of the sales population. In instances where there was no evidence of historical write offs management used a proxy write off. Trade receivable balances have been grouped so that the ECL calculation is performed on groups of receivables with similar risk characteristics and ability to pay. Similarly, the sales population selected to determine the ageing/payment profile of the sales is representative of the entire population and in line with future payment expectations. The historic loss ratio is then adjusted for forward-looking information to determine the ECL for the portfolio of trade receivables at the reporting period to the extent that there is a strong correlation between the forward-looking information and the ECL.

The group used 5 – 36 months sales data to determine the payment profile of the sales. Where the group has information about actual historical write-offs, actual write-offs have been used to determine a historic loss ratio. Alternatively, management has used the proxy write-off based on management's best estimated. The group has considered quantitative forward looking information such as core inflation rate. Qualitative assessments has also been performed, of which the impact was found to be immaterial.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.4 Credit risk (continued)

Expected credit losses (continued)

The loss allowance as at 31 December 2018 for trade receivables to which the provision matrix has been applied is determined as follows:

2018	Gross carrying amount Rm	Impairment Rm	Average ECL/ Impairment ratio %
Interconnect receivables	3 998	(728)	18,21
Fully performing	1 373	(31)	2,26
Up to 90 days past due	793	(136)	17,15
120 days and above past due	1 832	(561)	30,62
Contract receivables	1 768	(769)	43,50
Fully performing	604	(5)	0,83
Up to 90 days past due	326	(28)	8,59
120 days and above past due	838	(736)	87,83
Retail receivables	6 849	(503)	7,34
Fully performing	5 865	(129)	2,20
Up to 90 days past due	267	(18)	6,74
120 days and above past due	717	(356)	49,65
EBU receivables	1 812	(425)	23,45
Fully performing	1 074	(20)	1,86
Up to 90 days past due	201	(56)	27,86
120 days and above past due	537	(349)	64,99
Other receivables	1 813	(215)	11,86
Fully performing	326	(5)	1,53
Up to 90 days past due	329	(19)	5,78
120 days and above past due	1 158	(191)	16,49
Total	16 240	(2 640)	16,26

Simplified parameter-based approach – ECL is calculated using a formula incorporating the following parameters: Exposure at Default (EAD), Probability of Default (PD), Loss Given Default (LGD) discounted using the Effective Interest Rate (EIR) (i.e. $PD \times LGD \times EAD = ECL$). Exposures are mainly segmented by customer type i.e. corporate, consumer etc., ageing, device vs. SIM only contracts and months in contract. This is done to allow for risk differentiation. The probability of a customer defaulting as well as the realised loss with defaulted accounts has been determined using historical data (12 months and 36 months respectively). The EIR represents a weighted average rate which is representative of the portfolio of customers and incorporates a risk-free rate plus a risk premium on initial recognition of the trade receivables. A qualitative assessment of the impact of forward-looking information has been performed and found to be immaterial.

For corporate customers management rebutted the presumption that a customer is in default when 90 days past due and have determined default as 180 days past due. This is on the basis of billing disputes taking time to resolve resulting in a high cure rate.

The balance of trade receivables and contract assets to which the simplified parameter-based approach has been applied is as follows:

2018	Total	Trade receivables	Contract assets ¹
Simplified parameter-based approach			
Gross balance	5 283	1 424	3 859
Expected credit loss allowance	(783)	(395)	(388)
	4 500	1 029	3 471

¹ Contract assets mainly relates to the South African operation.

7.1.4 Credit risk (continued)

Expected credit losses (continued)

Trade receivables are written off when there is no reasonable expectation of recovery. This is assessed individually by each operation and includes for example where the trade receivables have been handed over for collection and remain outstanding or the debtor has entered bankruptcy.

	2018 Trade receivables Rm	2017 Trade receivables Rm	2018 Contract assets Rm
Reconciliation of allowance for credit losses			
At the beginning of the year	(2 753)	(2 538)	–
Amounts restated through opening retained earnings	–	–	(388)
Additions ¹	(957)	(857)	–
Reversals ¹	408	21	–
Utilised	633	442	–
Net monetary gain	–	2	–
Exchange differences and other movements ²	(366)	177	–
At the end of the year	(3 035)	(2 753)	(388)

¹ A net impairment loss of R549 million (2017: R836 million) was recognised during the year. In addition to the R633 million provision utilised, R261 million was written off directly to profit or loss during the year. These amounts are included in other operating expenses in profit or loss (note 2.4).

² Including the effect of hyperinflation.

7.1.5 Liquidity risk

Liquidity risk is the risk that an entity in the group will be unable to meet its obligations as they become due.

The group's approach to managing liquidity risk is to ensure that sufficient liquidity is available to meet its liabilities when due under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the group's reputation.

Group treasury develops strategies to ensure that the group has sufficient cash on demand or access to facilities to meet expected operational expenses, and to service financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters. Group treasury performs regular cash flow forecasts, monitors cash holdings of the group, negotiates lines of credit and sets policies for maturity profiles of loans.

The following liquid resources are available:

	2018 Rm	2017 ¹ Rm
Trade and other receivables	23 306	24 881
Current investments	4 455	5 552
Cash and cash equivalents ²	15 837	15 937
	43 598	46 370

¹ Restated for changes in accounting policies, refer to note 11 for details of restatement.

² Includes cash classified as non-current asset held for sale.

The group's undrawn borrowing facilities are disclosed in note 6.1.

Although cash held by MTN Sudan, MTN Syria, MTN South Sudan and MTN Guinea-Conakry is available to settle liabilities denominated in the local currency in the respective country of operation, access to foreign currency in the country is constrained.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

¹ Restated for changes in accounting policies, refer to note 11 for details of restatement.

The group has sufficient undrawn facilities to manage shortfalls in operational cash flows. Refer to note 6.1 for details of the group's undrawn facilities.

7.1.6 Market risk

Market risk is the risk that changes in market prices (such as interest rates, foreign currencies and equity prices) will affect the group's income or the value of its financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

Derivatives are entered into solely for risk management purposes and not as speculative investments. The group treasury policy specifies approved instruments which may be used to economically hedge the group's exposure to variability in interest rates and foreign currency and to manage and maintain market risk exposures within the parameters set by the group's board of directors.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.6 Market risk (continued)

7.1.6.1 Interest rate risk

Interest rate risk is the risk that arises on an interest-bearing asset or liability, due to variability of interest rates.

Financial assets and liabilities that are sensitive to interest rate risk are cash and cash equivalents, restricted cash, trade and other receivables/payables, loans receivable/payable, current investments, borrowings, bank overdrafts and other non-current liabilities. The interest rates applicable to these financial instruments are a combination of floating and fixed rates in line with those currently available in the market.

The group's interest rate risk arises from the repricing of the group's floating rate debt, incremental funding or new borrowings, the refinancing of existing borrowings and the magnitude of the cash balances which exist. The group aims to maintain its mix of fixed and floating rate debt within internally determined parameters, however, this depends on the market conditions in the geographies where the group operates.

Holding companies' (as disclosed in note 9.1) (including MTN (Mauritius) Investments Limited) debt is managed on an optimal fixed versus floating interest rate basis, in line with the approved group treasury policy.

Debt in the majority of the group's non-South African operations is mainly at floating interest rates. This is due to the environment and availability of funding in the market in which the entity operates. The group continues to monitor developments which may create opportunities as these markets evolve in order to align each underlying operation with the group treasury policy. Group treasury reports on the interest rate profile, in particular that of the holding companies, to the group treasury, board of directors, audit and risk committees on a regular basis.

Where appropriate, the group uses interest rate derivatives and other suitable hedging tools as a way to manage interest rate risk. The group does not apply hedge accounting to these derivatives.

Profile

At the reporting date the interest rate profile of the group's interest-bearing financial instruments was:

	2018		2017	
	Fixed rate instruments Rm	Variable rate instruments Rm	Fixed rate instruments Rm	Variable rate instruments Rm
Non-current financial assets				
Loans and other non-current receivables	506	–	1 357	–
Current financial assets				
Trade and other receivables	925	3 748	5 670	1 457
Current investments	2 858	–	4 190	–
Restricted cash	1 621	174	273	183
Cash and cash equivalents	3 827	8 264	4 215	4 937
	9 737	12 186	15 705	6 577
Non-current financial liabilities				
Borrowings	31 589	40 974	28 017	42 550
Other non-current liabilities	613	336	704	250
Current financial liabilities				
Trade and other payables	1 045	576	2 423	1 255
Borrowings	2 698	9 485	2 125	6 859
Bank overdrafts	158	97	72	–
	36 103	51 468	33 341	50 914

7.1.6.2 Sensitivity analysis

The group has used a sensitivity analysis technique that measures the estimated change to profit or loss of an instantaneous increase or decrease of 1% (100 basis points) in market interest rates, from the rate applicable at 31 December, for each class of financial instrument with all other variables remaining constant. This analysis is for illustrative purposes only, as in practice market rates rarely change in isolation.

The group is mainly exposed to fluctuations in the following market interest rates: JIBAR, LIBOR, NIBOR, prime, EURIBOR and money market rates. Changes in market interest rates affect the interest income or expense of floating rate financial instruments.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.6 Market risk (continued)

7.1.6.2 Sensitivity analysis (continued)

A change in the above market interest rates at the reporting date would have increased/(decreased) profit before tax by the amounts shown below.

The analysis has been performed on the basis of the change occurring at the start of the reporting period and assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis as was used for 2017.

	2018			2017		
	(Decrease)/increase in profit before tax			(Decrease)/increase in profit before tax		
	Change in interest rate %	Upward change in interest rate Rm	Downward change in interest rate Rm	Change in interest rate %	Upward change in interest rate Rm	Downward change in interest rate Rm
JIBAR	1	(308,9)	308,9	1	(262,9)	262,9
LIBOR	1	(49,7)	49,7	1	(132,3)	132,3
Three-month LIBOR	1	(39,7)	39,7	1	1,9	(1,9)
NIBOR	1	(33,7)	33,7	1	(70,9)	70,9
EURIBOR	1	0,1	(0,1)	1	(5,0)	5,0
Money market	1	(1,6)	1,6	1	8,3	(8,3)
Prime	1	27,2	(27,2)	1	38,4	(38,4)
Other	1	15,4	(15,4)	1	(9,3)	9,3

7.1.6.3 Currency risk

Currency risk is the exposure to exchange rate fluctuations that have an impact on cash flows and financing activities.

Currency risk arises on recognised financial assets and liabilities which are denominated in a currency that is not the entity's functional currency. The group aims to maintain its foreign currency exposure within internally determined parameters, however, this depends on the market conditions in the geographies where the group operates. Group treasury reports on the status of foreign currency positions or derivatives to the group treasury committee on a regular basis.

Where possible, entities in the group use forward contracts to hedge their actual exposure to foreign currency. Refer to note 7.5 for the group's outstanding foreign exchange contracts.

Sensitivity analysis

The group has used a sensitivity analysis technique that measures the estimated change to profit or loss and to equity, of an instantaneous 10% strengthening or weakening in the rand against all other currencies, from the rate applicable at 31 December, for each class of financial instrument with all other variables remaining constant. This analysis is for illustrative purposes only, as in practice, market rates rarely change in isolation.

The group is mainly exposed to fluctuations in foreign exchange rates in respect of the US dollar, euro and Iranian rial. This analysis considers the impact of changes in foreign exchange rates on profit or loss and equity.

The analysis excludes foreign exchange translation differences resulting from the translation of group entities that have functional currencies different from the presentation currency, into the group's presentation currency, which are recognised in the foreign currency translation reserve.

The analysis has been performed on the basis of the change occurring at the reporting date and assumes that all other variables, in particular interest rates, remain constant.

Intercompany balances that are denominated in a currency other than the functional currency of the entity are reflected as either impacting profit or loss before tax, or equity in the case of loans for which settlement is neither planned nor likely to occur in the foreseeable future.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

¹ Reduced by the impact of the net investment hedge as disclosed in note 7.5.

7.1.6.4 Price risk

The group is exposed to equity price risk, which arises from equity investments at FVOCI (2017: available-for-sale investments) (see note 7.2).

Refer to note 7.1.3 for disclosure of the sensitivity of the fair values of the investments to a change in the inputs used to determine their fair values. Other comprehensive income (before tax) will be affected by the amounts disclosed in respect of these investments in note 7.1.3.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.1 Financial risk management and financial instruments (continued)

7.1.7 Capital management

The group's policy is to borrow using a mixture of long-term and short-term borrowing facilities to meet anticipated funding requirements. Borrowings are managed within the group's established debt:equity ratios. The group seeks to maximise borrowings at an operating company level, on a non-recourse basis, within an acceptable level of debt for the maturity of the local company.

Management regularly monitors and reviews net debt:EBITDA², and net interest:EBITDA² ratios.

Under the terms of the major borrowing facilities, the group is required to comply with financial covenants relating to net debt:EBITDA² and net interest:EBITDA². The group has complied with all externally imposed covenants during the current and prior year.

The group's net debt:EBITDA², net debt:equity and net interest:EBITDA² at the end of the year are set out below. Net debt is defined as borrowings and bank overdrafts less cash and cash equivalents, restricted cash and current investments (excluding investments in Insurance cell captives). Equity approximates share capital and reserves. Net interest comprises finance costs less finance income per the group income statement and EBITDA² is defined as earnings before interest (which includes gains and losses on foreign exchange transactions), tax, depreciation and amortisation and is also presented before recognising the following items:

- Impairment of goodwill;
- Loss on derecognition of a long-term loan receivable;
- Net monetary gain resulting from the application of hyperinflation; and
- Share of results of associates and joint ventures after tax.

	2018	2017 Restated ¹

⁵ Denominated in CFA franc.

* Refer to note 11 for details of changes in accounting policies.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

7 FINANCIAL RISK (continued)

7.5 Derivatives and hedges

The group uses derivative financial instruments, such as forward exchange contracts and interest rate swaps, to hedge its foreign currency risks, and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

All gains and losses from changes in the fair value of derivatives that do not qualify for hedge accounting are recognised immediately in profit or loss.

	2018 Rm	2017 Rm
Derivatives held for trading		
Current assets		
Forward exchange contracts	265	205
	265	205
Current liabilities		
Forward exchange contracts	(208)	(118)
	57	87
Gains accounted for directly in profit or loss	39	51
Notional principal amount (US\$ forward exchange contracts)	445	84

Net investment hedges

The group hedges a designated portion of its dollar net assets in MTN Dubai for forex exposure arising between the US\$ and ZAR as part of the group's risk management objectives. The group designated external borrowings (Eurobonds) denominated in US\$ held by MTN (Mauritius) Investments Limited and external borrowings denominated in US\$ held by MTN Nigeria as hedging instruments. For the period of the hedge relationship, foreign exchange movements on these hedging instruments are recognised in other comprehensive income as part of the foreign currency translation reserve (FCTR), offsetting the exchange differences recognised in other comprehensive income, arising on translation of the designated dollar net assets of MTN Dubai to ZAR. The cumulative forex movement recognised in other comprehensive income will only be reclassified to profit or loss upon loss of control over MTN Dubai.

To assess hedge effectiveness the group performs hedge effectiveness testing by comparing the changes in the carrying amount of the debt that is attributable to a change in the spot rate with changes in the net assets designated in MTN Dubai. There was no hedge ineffectiveness recognised in profit or loss during the current or prior year.

The fair value of the financial liabilities (included in borrowings) designated as net investment hedges are:

	2018 Rm	2017 Rm
US\$ denominated bonds held by MTN Mauritius	23 926	22 434
US\$ denominated loans held by MTN Nigeria	1 333	2 612

The determination of fair value of these liabilities is disclosed in note 7.1.3.

¹ SANA rate.

² CBI rate.

³ Weighted average exchange rate used to translate the results of Iran.

⁴ The financial results, positions and cash flows of foreign operations trading in hyperinflationary economies are translated as set out in note 1.3.2.

Subsidiaries and joint ventures operating in dual exchange rate economies

MTN Nigeria and MTN Sudan

During the last quarter of the prior year the group changed its reference rate for MTN Nigeria from the Interbank rate to the Nigeria Autonomous Foreign Exchange (NAFEX) rate and in MTN Sudan the group changed from the Central Bank rate to the Margin Resource Incentive Rate. During 2018 the exchange rates in Sudan converged to the Margin Resource Incentive Rate.

Iran

During the 2018 financial year the CBI clarified that all future dividends can be expected to be repatriated at the SANA rate. Consequently, the group equity accounts the results and translates any receivables from Iran at the SANA rate from August 2018.

However, the group continues to translate any receivables that have been approved by the Iranian government under the FIPPA at the CBI rate on the basis that management expects these balances to be settled at the CBI rate (note 4.2). At 31 December 2018 the ZAR to IRR exchange rate based on the CBI rate was 1 ZAR = 2 919,91 IRR.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE

8.1 Ordinary share capital and share premium

Ordinary shares are classified as equity. Incremental external costs directly attributable to the issue of new ordinary shares or share options are recognised in equity as a deduction (net of tax) from the proceeds.

Where any group company purchases the company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental external costs (net of tax), is deducted from equity attributable to the company's equity holders until the shares are cancelled or reissued. Where such ordinary shares are subsequently reissued, any consideration received, net of any directly attributable incremental transaction costs and the related income tax effects, is included in equity attributable to the company's equity holders.

	2018 Number of shares	2017 Number of shares
Ordinary share capital (par value of 0,01 cents)		
Authorised	2 500 000 000	2 500 000 000
Issued (<i>fully paid up</i>)	1 884 269 758	1 884 269 758
In issue at the end of the year	1 884 269 758	1 884 269 758
Treasury shares ¹	(9 791 839)	(9 983 286)
Options held by MTN Zakhele Futhi ²	(76 835 378)	(76 835 378)
In issue at the end of the year - excluding MTN Zakhele Futhi options and treasury shares³	1 797 642 541	1 797 451 094

¹ Treasury shares held by Mobile Telephone Networks Holdings Limited and legally owned by the 2016 MTN ESOP trust.

² These shares, although legally issued to MTN Zakhele Futhi, are not deemed to be issued in terms of IFRS as the MTN Zakhele Futhi transaction has the substance of an option and are shown as such in the share capital reconciliation.

³ There are no restrictions, rights or preferences including restrictions on dividend distributions attached to these shares.

MTN Zakhele Futhi

The group structured a BBBEE transaction through a separate legal entity in 2016, MTN Zakhele Futhi (RF) Limited (hereafter referred to as MTN Zakhele Futhi) which replaced the group's previous BEE structure known as MTN Zakhele. The transaction was designed to provide long-term, sustainable benefits to all BBBEE participants and will run for a period of eight years.

As part of the transaction MTN Zakhele Futhi acquired 76 835 378 of the company's shares at a price of R128,50 per share.

MTN Zakhele Futhi is a structured entity with the sole business of holding shares of MTN Group Limited and administering the associated funding of these shares. The group was involved in structuring MTN Zakhele Futhi, determining the level of its debt and negotiating the related debt covenants. In addition, the group holds a call option which, if exercised on the occurrence of a trigger event, entitles it to settle MTN Zakhele Futhi's debt with the third-party funders. This gives the group the ability to manage the credit risk of MTN Zakhele Futhi and consequently, the related BBBEE credentials which are dependent on the continued success of MTN Zakhele Futhi. As these activities are considered to be the relevant activities of MTN Zakhele Futhi, it is consolidated by the group.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE (continued)

8.1 Ordinary share capital and share premium (continued)

MTN Zakhele Futhi (continued)

MTN Zakhele Futhi is funded by equity contributions (comprising cash received from new investors and reinvestment by existing MTN Zakhele shareholders in MTN Zakhele Futhi), preference shares issued to third parties, a donation received from the group and notional vendor financing (NVF) from the company. MTN Zakhele Futhi must repay the preference shares and NVF before the company's shares held by it become unencumbered, while the company's shares are the only security offered by MTN Zakhele Futhi for the debt funding obtained. Until the company's shares held by MTN Zakhele Futhi become unencumbered, the ordinary shareholders of MTN Zakhele Futhi are exposed to the gains on the company's shares, while their exposure to downside risk or risk of loss is limited to their equity contributions (i.e. the purchase price paid by them for the MTN Zakhele Futhi shares). Consequently, the company does not recognise its shares issued to MTN Zakhele Futhi and does not recognise the NVF as outstanding but treats it as an option for accounting purposes.

Further, no non-controlling interest is recognised in respect of the shares held by the ordinary shareholders of MTN Zakhele Futhi. From a consolidated perspective, their equity contributions (comprising cash received from new investors and the reinvestment by existing MTN Zakhele shareholders in MTN Zakhele Futhi) are in substance treated as a premium paid for the option to acquire the company's shares in future.

During the 2017 year, an additional 24 388 294 MTN Zakhele Futhi shares were sold to external parties, that were previously acquired by the company in terms of the underwrite option during the allotment of MTN Zakhele Futhi shares in 2016. The shares were sold for a total consideration of R487 million. The total increase in equity resulting from these share-based payment transactions amounted to R921 million of which R434 million was recognised as a share-based payment expense, and R487 million as the option premium on the shares sold.

14 750 000 of the underwrite option shares were sold to PF Nhleko, non-executive chairman of the MTN group. On 29 June 2018, the parties agreed not to proceed with the sale of the shares to PF Nhleko. This is regarded as a cancellation of a share-based payment transaction. The related receivable (R295 million) was derecognised with a corresponding debit in equity. There was no profit or loss impact arising from the cancellation.

Third-party preference share funding obtained by MTN Zakhele Futhi

A reconciliation of the third-party preference share funding obtained by MTN Zakhele Futhi to purchase shares of the company is provided below:

	2018 Rm	2017 Rm
<i>Class A cumulative redeemable non-participating preference shares</i>		
Balance at the beginning of the year	1 785	2 179
Interest accrued at the effective interest rate	96	140
Accrued interest paid	(126)	(135)
Redemption of preference shares during the year	(313)	(399)
Balance at the end of the year	1 442	1 785

The class A preference shares are held by Jabisan 04 Proprietary Limited. The preference shares are mandatorily redeemable five years following the date of issue. Dividends are paid semi-annually on 30 April and 30 September. The preference share dividend rate is 75% of prime.

Net change in fair value of equity instruments through other comprehensive income (FVOCI) reserve ¹	(8 030)	–
Other	8	(229)
Balance at end of the year	(8 430)	(1 006)
Consisting of:		
Contingency reserve (as required by insurance regulations) ²	4	4
Statutory reserve (as required by Rwanda and Congo-Brazzaville legislation) ³	211	211
Transactions with non-controlling interests ⁴	(10 057)	(11 396)
Share-based payment transactions ⁵	7 200	7 124
Foreign currency translation reserve ⁶	(4 880)	(4 063)
Available-for-sale reserve ⁷	–	7 111
Equity instruments at fair value through other comprehensive income ⁸	(919)	–
Other	11	3
	(8 430)	(1 006)

¹ Net change relates to movement in previous available-for-sale category under IAS 39 of R4 439 million in 2017 and R8 030 million change under the new FVOCI classification category under IFRS 9 in 2018.

² A contingency reserve has been created in terms of the Short-term Insurance Act, 1988. Transfers to the contingency reserve are treated as an appropriation of income, and the balance of the reserve is disclosed in the statement of financial position as a non-distributable reserve, forming part of shareholders' funds. On dissolution of the structured entities to which the reserve relates, they will become available for distribution.

³ A statutory reserve has been created in terms of local legislation. Transfers to the statutory reserve are treated as an appropriation of income, and the balance of the reserve is disclosed in the statement of financial position as a non-distributable reserve, forming part of the shareholders' funds.

⁴ Non-controlling shareholders are treated as equity participants and, therefore, all acquisitions of non-controlling interests or disposals by the group of its interests in subsidiary companies where control is maintained subsequent to the disposal are accounted for as equity transactions. Consequently, the difference between the fair value of the consideration transferred and the carrying amount of a non-controlling interest purchased is recorded in equity. All profits or losses arising as a result of the disposal of interests in subsidiaries to non-controlling shareholders, where control is maintained subsequent to the disposal, are also recorded in equity. Following the sale of MTN Cyprus reserves worth R327 million were transferred to retained earnings.

⁵ Refer to the accounting policy in note 8.4 with regard to equity-settled share-based payments.

⁶ Refer to the translation and disposal of foreign operations sections in accounting policy 1.3.2 foreign currency. The group's presentation currency is rand. The weakening of the closing rate of the rand against the functional currencies of the group's largest operations contributed to an increase in assets and liabilities and the resulting foreign currency translation reserve increase of R1 700 million (2017: R8 558 million reduction) since 31 December 2017. The amount also comprises foreign currency losses arising on the translation of financial liabilities designated as net investment hedges in a foreign operation of R2 517 million (2017: R1 421 million gains). Following the exercise of the exchange right in INT Towers Limited in the prior year (note 2.3 other income), a foreign currency translation loss of R3 298 million was released to the income statement.

⁷ This comprises all fair value adjustments on all financial assets that have been classified as available-for-sale. Following the adoption of IFRS 9, the available-for-sale reserve is now the equity instruments at fair value through other comprehensive income reserve.

⁸ This comprises all fair value adjustments on all equity investments that have been classified as FVOCI. On the disposal of the FVOCI equity investments, the cumulative gains recognised on these investments are not reclassified to profit and loss.

[#] Restated for changes in accounting policies, refer to note 11 for details of the restatements.

¹ Declared at the board meeting on 6 March 2019.

² Excluding 7 606 434 (2017: 9 983 286) treasury shares held by Mobile Telephone Networks Holdings, 76 835 378 (2017: 76 835 378) shares held by MTN Zakhele Futhi and including the 2016 MTN ESOP Trust shares of 2 185 405.

8.4 Share-based payments

Equity-settled share-based payments

Equity-settled share-based payments are measured at fair value (excluding the effect of service or non-market-based vesting conditions) at the grant date. The fair value is measured using a stochastic model. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions and behavioural considerations, where applicable. The fair value determined at the grant date of the equity-settled share-based options or rights is expensed on a straight-line basis over the vesting period, with a corresponding increase in equity, based on the group's estimate of the shares that will eventually vest. The expense is adjusted to reflect the actual number of options and share rights for which the related service and non-market-based vesting conditions are met.

Where employees exercise options or share rights in terms of the rules and regulations of the schemes, new shares are issued to participants as beneficial owners. The directors procure a listing of these shares on the JSE Limited, the securities exchange on which the company's shares are listed. In terms of the Share Option Scheme, participants entitled to share options pay a consideration equal to the option price when the options are exercised. The nominal value of shares issued is credited to share capital and the difference between the nominal value and the option price is credited to share premium. Settlement of the performance share plan (PSP) awards are done through the acquisition of shares in the open market and the subsequent delivery to participants.

Cash-settled share-based payments

The fair value of the amount payable to employees in respect of cash-settled share-based payments is recognised as an expense with a corresponding increase in liabilities, over the period during which the employees become unconditionally entitled to payment. The liability is remeasured to fair value at each reporting date and at settlement date. Any changes in the liability are recognised in profit or loss.

The MTN Group share options, share appreciation rights and share rights schemes and performance share plan

The group operates a number of equity-settled share-based payment schemes for the benefit of eligible employees, including executive directors, in accordance with the schemes' rules. The schemes are designed to retain and recognise the contributions of executive directors and eligible employees and to provide additional incentives to contribute to the group's continued growth.

The performance share plan is the active scheme which superseded the Share Option Scheme, the Share Appreciation Rights and the Share Rights Scheme. The superseded schemes will be wound up once all unvested and/or unexercised awards previously made have run their remaining course.

The vesting periods under the Share Rights Scheme, Share Option Scheme and Share Appreciation Rights Scheme are as follows: 20%, 20%, 30% and 30% on the anniversary of the second, third, fourth and fifth years, respectively, after the grant date. The strike price for these schemes is determined as the closing market price for the MTN Group Limited shares on the day prior to the date of allocation. Unexercised options and rights lapse 10 years from the date of grant and are forfeited if the employee leaves the group before they vest.

The vesting period for the PSP is three years and the awards vest in full based on set performance targets. Employees are not entitled to receive dividends on the shares during the vesting period.

The total number of shares which may be allocated for the purposes of the schemes shall not exceed 5% of the total issued ordinary share capital of the company, being 94 213 488 shares as approved by shareholders in 2001.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE (continued)

8.4 Share-based payments (continued)

MTN Group Share Appreciation Rights Scheme and Share Rights Scheme (the rights schemes)

The Share Appreciation Rights Scheme was implemented on 31 May 2006.

On 26 August 2008, the board approved the Share Rights Scheme, which superseded the Share Appreciation Rights Scheme. Both the rights schemes operate under the same provisions with the exception that the Share Rights Scheme was extended to allow participation by junior managers.

Share rights under the rights schemes are granted to eligible employees by the relevant employer subsidiary company.

Exercised rights are equity settled whereby the relevant subsidiary purchases the required MTN shares in the open market.

Details of the outstanding Share Appreciation Rights are as follows:

	Strike price R	Number outstanding at 31 December 2017	Forfeited during 2018	Exercised during 2018	Number outstanding at 31 December 2018
Offer date					
19 March 2008	126,99	52 400	(1 400)	(51 000)	–
Total		52 400	(1 400)	(51 000)	–

Details of the outstanding Share Rights are as follows:

	Strike price R	Number outstanding at 31 December 2017	Forfeited during 2018	Exercised during 2018	Number outstanding at 31 December 2018
Offer date					
1 September 2008	118,64	86 810	(86 810)	–	–
28 June 2010	107,49	220 050	(10 290)	(420)	209 340
Total		306 860	(97 100)	(420)	209 340

The share rights outstanding at the end of the year have a weighted average remaining contractual life of one year (2017: two years).

There were no new grants during the current and prior year.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE (continued)

8.4 Share-based payments (continued)

MTN PSP

During prior financial years the group granted eligible employees share rights under the PSP, established in 2010. The rights were granted to employees on levels 3, 4, 5 and 6. The PSP was established in order to attract, retain and reward selected employees who are able to contribute to the business of the employer companies and to stimulate their personal involvement thereby encouraging their continued service and encouraging them to advance the interests of the relevant employer company and the group in general.

The share rights generally vest after three years from date of grant. For the grants made between 2014 and 2016, the following performance conditions must be fulfilled to qualify for the percentage of the shares granted as stated in the table below:

	Proportion of grant	
	Employee level	Employee level
	3 – 4 %	5 – 6 %
Vesting conditions for shares granted		
Total shareholder return	37,5	50,0
Adjusted free cash flow growth	37,5	50,0
Individual retention (guaranteed, subject to remaining on the PSP for the duration of the award fulfilment period)	25,0	–

For the total shareholder return vesting condition, vesting is based on a sliding scale that ranges from 25% vesting at the median to 100% vesting at the 75th percentile of the performance of a comparable group of companies listed on the JSE. For the adjusted free cash flow vesting condition, vesting is based on a sliding scale between 6% and 10% compound annual growth in the adjusted free cash flow for the three years before the grant date compared to the three years after the grant date, for all grants made in 2014 and thereafter. The individual return retention condition is guaranteed subject to the employee remaining employed by the group for the duration of the vesting period.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE (continued)

8.4 Share-based payments (continued)

MTN PSP (continued)

The performance conditions were revised during 2017 and apply to new grants issued on and after 29 September 2017. The following performance conditions must be fulfilled to qualify for the percentage of the shares granted as stated in the table below:

	Proportion of grant	
	Employee level 3 – 4 %	Employee level 5 – 6 %
Vesting conditions for shares granted		
Total shareholder return	25,0	25,0
Cumulative operating free cash flow	25,0	25,0
Individual retention (guaranteed, subject to remaining on the PSP for the duration of the award fulfilment period)	25,0	25,0
Return on average capital employed	25,0	8,33 – 25,0
Compliance to dti and ICASA	–	8,33 – 12,5
Black Economic Empowerment	–	8,33

For the total shareholder return vesting condition, vesting is based on a sliding scale that ranges from 25% vesting at the median to 100% vesting at the 75th percentile of the performance of the MSCI Emerging Markets Telecoms Index¹ comparator group. For the cumulative operating free cash flow vesting condition, vesting is based on a sliding scale that ranges from 25% vesting at 90% of the target to 100% vesting at 110% of the target cumulative operating free cash flow over the measurement period. The individual return retention condition is guaranteed subject to the employee remaining employed by the group for the duration of the vesting period. The return on average capital employed is based on a sliding scale that ranges from 25% vesting at 90% of the budget to 100% vesting at 100% of the budgeted return on average capital employed. The vesting conditions with regards to compliance to the dti and ICASA are based on reasonable efforts made to ensure compliance with the relevant targets and codes. For the black economic empowerment vesting condition, vesting is based on the achievement of previously agreed upon deliverables as applicable in South Africa.

Details of the outstanding equity-settled performance share plan rights are as follows:

	Number outstanding at 31 December 2017	Offered	Forfeited	Exercised during 2018	Number outstanding at 31 December 2018
Offer date					
19 December 2014	1 546 753	–	(1 355 306)	(191 447)	–
30 June 2016	3 254 216	–	(164 184)	–	3 090 032
28 December 2016	4 981 444	–	(458 444)	–	4 523 000
09 March 2017	66 500	–	–	–	66 500

28 December 2018	–	11 887 900	(34 838)	–	11 853 062
Total	16 082 213	11 953 100	(2 470 672)	(191 447)	25 373 194

¹ In November 2018 the MSCI Emerging Markets Telecoms index was re-constituted and now consists of the MSCI Emerging Markets Communications index. This has been used in the 2018 grants.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

8 EQUITY STRUCTURE (continued)

8.4 Share-based payments (continued)

MTN PSP (continued)

A valuation has been prepared using a stochastic model to determine the fair value of the performance share plan and the expense to be recognised for share rights granted during the current and prior year.

The range of inputs into the stochastic model used for rights granted during the year was as follows:

		June 2018	December 2018
Share price (R)		104,58	88,06
Expected life		2 years	3 years
Risk-free rate		7,43% – 7,54%	6,87% – 8,03%
Expected volatility		23,83% – 32,14%	26,32% – 30,48%
Dividend yield		5,67%	6,41%
	March 2017	September 2017	December 2017
Share price (R)	120,80	124,38	134,46
Expected life	3 years	2 years	3 years
Risk-free rate	7,36% – 7,57%	7,09% – 7,93%	7,60% – 7,93%
Expected volatility	32,55% – 36,55%	26,14% – 35,44%	24,08% – 32,88%
Dividend yield	9,17%	7,16%	6,33%

The risk-free rate was estimated using the nominal bond curve as compiled by the JSE of South Africa and obtained from I-Net Bridge for the 2017 and 2018 share rights granted.

Volatility was estimated using the weekly closing share price as provided by I-Net Bridge. An annualised standard deviation of the continuously compounded rates of return of the share and the daily dividend yield was used for the 2017 and 2018 share rights granted.

Employee share ownership programme

During 2018, 369 965 (2017: 2 million) shares were granted to qualifying employees for no consideration and subject to a service condition. The shares will vest in three tranches, i.e. a third will vest on the third, fourth and fifth anniversary of the grant date respectively. The plan is facilitated through a structured entity (the 2016 MTN ESOP trust). MTN provides shares and funding to the 2016 MTN ESOP trust to enable the trust to satisfy its objectives.

Cash settled share-based payment transactions

During the prior year, the group granted newly appointed executives cash-settled onboarding incentives to compensate the executives in respect of the actualised pre-tax amount of stocks or equity relinquished by the executives with their previous employers. The value of each incentive will be determined based on the market value of the specified number of ordinary listed shares in MTN Group Limited at the end of the incentive period for each respective executive. The remaining incentive period at 31 December 2018 is approximately one year (2017: two years). The total number of MTN Group shares on which the incentives are based is 837 664. The fair value of these incentives was determined as at 31 December using a Black-Scholes valuation methodology and a cash-settled share-based payment expense of R16 million (2017: R30 million) was accounted for. None of the incentives granted have been forfeited since the respective grant dates. In addition, throughout the group there are various notional share schemes. The total expense recorded for these schemes in the current year is R12 million (2017: R74 million (income)).

	2018 Rm	2017 Rm
Expense arising from equity-settled share-based payment transactions	371	237
Expense/(income) arising from cash-settled share-based payment transactions	28	(44)

MTN Group Limited

Notes to the group financial statements (continued)

for the year ended 31 December 2018

9 GROUP COMPOSITION (continued)

9.2 Investment in associates and joint ventures

Associates and joint ventures are accounted for using the equity method and are recognised initially at cost.

The group's investment in associates and joint ventures includes goodwill identified on acquisition, net of any accumulated impairment losses. The consolidated financial statements include the group's share of post-acquisition accumulated profits or losses of associated companies and joint ventures in the carrying amount of the investments, which are generally determined from their latest audited annual financial statements or management accounts and the annual profit attributable to the group is recognised in profit or loss. The group's share of any post-acquisition movement in reserves is recognised in other comprehensive income. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment.

Where an associate or joint venture's functional currency is the currency of a hyperinflationary economy, the results and financial position of the associate or joint venture are restated in order to calculate the group's share of net assets and profit or loss.

The carrying amount of the group's investments in associates and joint ventures is reduced to recognise any potential impairment in the value of individual investments. When the group's share of losses in an associate or joint venture equals or exceeds its interest in the associate or joint venture, the group does not recognise further losses, unless the group has an obligation, issued guarantees or made payments on behalf of the associate or joint venture.

Dilution gains or losses arising on investments in associates and joint ventures are recognised in profit or loss. If the ownership interest in an associate or joint venture is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss. Profits or losses resulting from upstream and downstream transactions between the group and its associates and joint ventures are recognised in the group's financial statements only to the extent of unrelated investors' interests in the associates and joint ventures. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Adjustments have been made where necessary to bring the accounting policies of the associates and joint ventures in line with those of the group.

The group applies equity accounting up until the date the investment meets the requirements to be classified as held for sale. Thereafter it is measured at the lower of carrying value and fair value less cost to sell in accordance with IFRS 5.

Investment in associates

Significant judgement

The group, together with another shareholder, holds the shares in Uganda Tower InterCo B.V. and Ghana Tower InterCo B.V. The group does not have substantive rights that give it power over the relevant activities of these entities. However, the group participates in the significant financial and operating decisions and consequently it has determined that it has significant influence over these entities, resulting in them being classified as associates of the group.

Unless otherwise stated, the group's associates' countries of incorporation are also their principal place of operation.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

9 GROUP COMPOSITION (continued)

9.2 Investment in associates and joint ventures (continued)

Investment in associates (continued)

Significant judgement (continued)

The group has the following effective interests in associates:

Associate	Principal activity	Country of incorporation	Effective % interest in issued ordinary share capital	
			2018	2017
Belgacom International Carrier Services SA (BICS)	Telecommunications	Belgium	20	20
Uganda Tower InterCo B.V.	Management of telecommunication infrastructure	Netherlands	49	49
Ghana Tower InterCo B.V.	Management of telecommunication infrastructure	Netherlands	49	49
Number Portability Company Proprietary Limited	Porting	South Africa	20	20
Content Connect Africa Proprietary Limited	Telecommunications	South Africa	36	36
International Digital Services Middle East Limited (iME) ¹	Telecommunications	United Arab Emirates	29,5	33,3

¹ The entity operates in Iran. During March 2018, iME issued shares to a new investor. The group and Iran each owned a 33,3% shareholding in iME prior to this transaction. After the new investor was introduced, the group and Iran's shareholding decreased to 29,5% each. The group recognised a R304 million gain on dilution, which is included in other income (note 2.3). The group's share of Iran's gain on dilution (R134 million) is included in the share of results of associates and joint ventures after tax.

¹ Summarised financial information presented with regard to the group's interest in iME is as per the latest available management accounts at 30 November 2018. Preparation of financial statements at 31 December 2018 by iME was impracticable. Appropriate adjustments have been made to the group's interest and share of results for the effects of significant transactions and events that occurred for the one month up to the reporting date.

² Translated at rates of exchange ruling at the reporting date.

There are no significant contingent liabilities relating to the group's interests in these associates at the end of the current or prior year.

Investment in joint ventures

Classification of significant joint arrangements

Joint arrangements are all arrangements where two or more parties contractually agree to share control of the arrangement, which only exists when decisions about the relevant activities require unanimous consent of the parties sharing control. Joint ventures are joint arrangements whereby the parties that have joint control of the arrangement have rights to the net assets of the arrangement.

The group exercises judgement in determining the classification of its joint arrangements. The group's joint arrangements provide the group and the other parties to the agreements with rights to the net assets of the entities. The group has joint control over these arrangements as, under the contractual arrangements, unanimous consent is required for all decisions made with regards to the relevant activities. Judgement has been applied in determining that the following entities should be classified as joint ventures of the group:

- Irancell Telecommunication Company Services (PJSC) (49%).
- Mascom Wireless Botswana Proprietary Limited (Mascom) (53,1%).
- Middle East Internet Holding S.A.R.L (MEIH) (50%).
- Africa Internet Holding GmbH (AIH) (29,69%).
- TravelLab Global AB (Travelstart) (43,67%).

Notes to the group financial statements (continued)

Investment in joint ventures (continued)

Commitments relating to joint ventures

Commercial commitments

Irancell Telecommunication Company Services (PJSC)

The investment in Iran is subject to a number of sovereign, regulatory and commercial risks, which could result in the group failing to realise full market value of its investment should it be required to dispose of any portion thereof. In this regard, 21% of Iran is required to be offered to members of the Iranian public within approximately three years from the date of the licence. Such offering could have a proportional dilutory effect on the company's 49% shareholding, effectively reducing its shareholding by 10,3% to 38,7%. Local management together with the shareholders continue to engage the regulator on this matter.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

9 GROUP COMPOSITION (continued)

9.3 Changes in shareholding

Changes in shareholding of subsidiaries are transactions that result in increases or reductions in the interest held in a subsidiary of the group, but which do not result in a loss of control and are accounted for as transactions with non-controlling interest as disclosed in note 1.3.1.

9.3.1 Current year changes in shareholding

During the current year MTN Ghana completed an initial public offering of its shares which resulted in a change in the group's shareholding in the company. The company issued 1 530 474 360 shares for localisation as part of the public offering which resulted in a change in the group's shareholding from 97,65% to 85,49%. The investment in MTN Ghana is held by Investcom Consortium Holdings S.A. and MTN Dubai, which are indirect subsidiaries of the group. Proceeds generated from the sale of shares, net of transaction cost, amounted to GHS 1 096 million (R 3 057 million) which has been included in cash flows from financing activities. The share allocation was finalised on 29 August 2018. This was a transaction with shareholders and had no impact on profit and loss.

The group also disposed of 100% of its interest in MTN Cyprus (which was a wholly owned subsidiary of the group) in the current year (note 2.3).

9.3.2 Non-current assets held for sale

Non-current assets (or disposal groups) are classified as non-current assets held for sale and are stated at the lower of their carrying amounts and fair value less cost to sell when their carrying amounts are to be recovered principally through sale rather than continued use and the sale is considered to be highly probable.

In December 2018, the group received an unsolicited offer to sell its interest in Mascom Wireless Botswana Proprietary Limited and its holding companies. Accordingly, the investment in joint venture and related assets in holding companies have been presented as non-current assets held for sale. Any transactions will be subject to the execution of definitive transaction agreements and applicable governance and regulatory approvals. The sale is expected to be concluded in the first half of 2019.

The assets held for sale at carrying value as at 31 December 2018 are:

	2018 Rm
Investment in joint venture (note 9.2)	1 832
Intangible and other non-current assets (note 5.2)	312
Cash and cash equivalents ¹ (note 4.4)	615
	2 759

¹ This will be distributed to the group, prior to the conclusion of the sale.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

9 GROUP COMPOSITION (continued)

9.4 Joint operations

In respect of its interest in joint operations, the group recognises in its financial statements its share of the assets jointly held, classified according to the nature of the assets, any liabilities that it has incurred, its share of any liabilities incurred jointly with the other joint operators in relation to the joint operation, any income from the sale or use of its share of the output of the joint operation, together with its share of any expenses incurred by the joint operation and any expenses that it has incurred in respect of its interest in the joint operation.

When the group acquires an interest in a joint operation in which the activity of the joint operation constitutes a business, identifiable assets acquired and liabilities assumed are measured initially at their fair values at the acquisition date. Acquisition-related costs are recognised in profit or loss. Goodwill is measured as the excess of the sum of the consideration transferred over the net of the acquisition date amounts of the identifiable assets acquired and liabilities assumed.

When the group increases its interest in a joint operation in which the activity of the joint operation constitutes a business, by acquiring an additional interest in the joint operation, the group's previously held interests in the joint operation are not remeasured if the joint operator retains joint control.

The group has entered into agreements with several other companies to construct high-capacity fibre-optic submarine cable systems.

The group has the following interests in jointly controlled operations:

	Ownership interest held	
	2018 %	2017 %
Joint operation		
Europe India Gateway Submarine Cable System	6,88	6,89
West Africa Cable System	11,19	11,06
Eassy Cable System	16,13	16,26
Africa Coast to Europe Cable system	8,87	8,67

9.5 Interest in subsidiaries

The subsidiaries in which MTN Group Limited has direct and indirect interests are set out in note 9.1. A summary of the group's subsidiaries with material non-controlling interests is presented below.

		Non-controlling interests	
		2018 Rm	2017 ¹ Rm

10 RELATED PARTIES

10.1 Related party transactions

Related party transactions constitute the transfer of resources, services or obligations between the group and a party related to the group, regardless of whether a price is charged. For the purposes of defining related party transactions with key management, key management has been defined as directors and the group's executive committee and includes close members of their families and entities controlled or jointly controlled by these individuals.

	2018 Rm	2017 Rm
Key management compensation		
Salaries and other short-term employee benefits	127	123
Post-employment benefits	9	7
Other benefits	32	26
Bonuses	103	113
Total	271	269

Details of directors' remuneration are disclosed in note 10.2 of the financial statements.

Subsidiaries

Details of investments in subsidiaries are disclosed in note 9.1 of the financial statements.

Changes in shareholding

The group had a material transaction with non-controlling interest relating to MTN Ghana's initial public offering (note 9.3.1).

There were no material transactions with non-controlling shareholders or changes in shareholding in any of the group's subsidiaries in the prior year.

Joint ventures and associates

Details of the group's investments in and share of results and dividend income from its joint ventures and associates are disclosed in note 9.2 of the financial statements.

Details of other transactions and balances with joint ventures and associates are set out below:

	Joint ventures		Associates	
	2018 Rm	2017 Rm	2018 Rm	2017 Rm

Notes to the group financial statements (continued)

for the year ended 31 December 2018

10 RELATED PARTIES (continued)

10.1 Related party transactions (continued)

Transactions between members of the group

MTN Ghana entered into operating lease agreements with Ghana Tower InterCo B.V. in prior years. The operating lease commitments amount to R9 468 million (2017: R8 446 million). The expense recorded amounted to R1 016 million (2017: R627 million). The rental amounts escalate every year by inflation and the initial term is 10 years, followed by four times five-year renewal periods.

MTN Uganda entered into operating lease agreements with Uganda Tower InterCo B.V. in prior years. The operating lease commitments amount to R1 988 million (2017: R1 636 million). The expense recorded amounted to R439 million (2017: R558 million). The rental amounts escalate every year by inflation and the initial term is 10 years, followed by four times five-year renewal periods.

Transactions with an entity associated with a director

On 28 December 2017, 14 750 000 MTN Zakhele Futhi shares, acquired by the group in terms of the 2016 MTN Zakhele Futhi underwrite option, were sold for a total consideration of R295 million. The shares were purchased by Main Street 1561 Proprietary Limited, a wholly owned company of PF Nhleko, non-executive chairman of MTN Group.

On 29 June 2018, the group and Mainstreet 1561 Proprietary Limited, a wholly owned company of PF Nhleko, non-executive chairman of MTN Group, agreed not to proceed with the sale of 14 750 000 MTN Zakhele Futhi shares.

Shareholders

The principal shareholders of the company are disclosed in Annexure 1, which is unaudited.

11 CHANGE IN ACCOUNTING POLICIES

The group has adopted the following new accounting pronouncements as issued by the International Accounting Standards Board (IASB), which were effective for the group from 1 January 2018:

- IFRS 15 *Revenue from Contracts with Customers* (IFRS 15); and
- IFRS 9 *Financial Instruments* (IFRS 9).

The group also implemented a voluntary accounting policy change relating to a change in the presentation of cash flows.

The changes in accounting policies were applied retrospectively. Comparative numbers have been restated for the adoption of IFRS 15 and the change in the presentation of cash flows.

11.1 Adoption of IFRS 15

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognised. It replaced IAS 18 *Revenue*, IAS 11 *Construction Contracts* and related interpretations. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled for transferring goods or services to a customer. For additional information about the group's accounting policies relating to revenue recognition, refer to note 2.2.

On adoption of IFRS 15, the group restated its retained earnings at 1 January 2017 as follows:

	Note	2017 Rm
Retained earnings – as previously reported		64 831
Earlier recognition of mobile device revenue	11.1.1	1 177
Earlier recognition of breakage	11.1.2	180
Capitalisation of subscriber acquisition costs	11.1.4	694
Increase in current and deferred tax liabilities		(566)
Less: Non-controlling interests portion		(38)
Adjustment to retained earnings on adoption of IFRS 15		1 447
Opening retained earnings 1 January – IFRS 15		66 278

Notes to the group financial statements (continued)

for the year ended 31 December 2018

11 CHANGE IN ACCOUNTING POLICIES (continued)

11.1 Adoption of IFRS 15 (continued)

The nature of the changes in the accounting policies were as follows:

Type of product/ service	Nature of change in accounting policy	Impact
11.1.1 Mobile devices	<i>Earlier recognition of mobile device revenue</i> The group previously anticipated early contract upgrades and based the subscriber contract period on the expected term and accounted for any consideration received beyond the anticipated upgrade period as network services revenue as it was earned (mainly in its South African operation). Following the adoption of IFRS 15, the group bases the subscriber contract period on the contractual term and accounts for early upgrades as contract modifications. The effect of the modification is that the contract asset at modification date is treated as a payment to a customer and results in a reduction of the revenue from the subsequent contract.	The transaction price in postpaid contracts and revenue allocated to devices has increased. As device revenue has increased and is recognised upfront, this has resulted in a larger contract asset balance that is impaired when customers default on payments on their postpaid contract, i.e. an increase in impairment of trade receivables and contract assets.
11.1.2 Mobile telecommunication services	<i>Earlier recognition of breakage</i> When the group expects to be entitled to breakage (forfeiture of unused value of network services), the group recognises the expected amount of breakage in proportion to network services provided versus the total expected network services to be provided. Previously, the group only accounted for breakage when it became remote that customers would use these services.	This has resulted in lower revenue recognised upfront on the devices and the recognition of interest revenue over the contract period. The group has recognised revenue from breakage earlier and therefore revenue has increased and unearned revenue (which is now named contract liabilities) has decreased.
11.1.3 Interconnect and roaming	Some interconnect and roaming debtors have a historical pattern of late payment due to sanctions imposed. The group has continued to provide services to these debtors (due to regulatory requirements) where the recovery of principal is significantly delayed beyond the contractual terms. The historical pattern of late payments (i.e. customary business practice) should be taken into account in measuring interconnect and roaming revenue and in assessing whether the contract contains a significant financing component.	This change has resulted in a reduction of interconnect and roaming revenue and an increase in interest revenue over the expected payment period. As this change mainly affects an equity-accounted operation, it has resulted in a decrease in the share of results of associates and joint ventures after tax in 2017. There was no change to retained earnings at 1 January 2017 as the group did not restate for completed contracts at 1 January 2017 as per note 11.1.5.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

11 CHANGE IN ACCOUNTING POLICIES (continued)

11.1 Adoption of IFRS 15 (continued)

11.1.4 Capitalisation of subscriber acquisition costs

IFRS 15 introduced specific guidance on accounting for incremental costs of obtaining contracts with customers. Under IAS 18, the group expensed subscriber acquisition costs at inception of the contract.

The group expects that incremental subscriber acquisition costs for obtaining and renewing contracts are recoverable. These costs include agent's commission on postpaid contracts and SIM activation costs on prepaid contracts. The group has therefore capitalised these costs as contract costs. Capitalised contract costs are amortised on a systematic basis over the average customer life and included in selling, distribution and marketing expenses in profit or loss.

In terms of a practical expedient, the group has elected to recognise the incremental costs of obtaining contracts as a selling, distribution and marketing expense in profit or loss, when incurred, if the amortisation period of the assets that the group otherwise would have recognised is 12 months or less.

The impact of this change is a decrease in selling, distribution and marketing expenses and the recognition of a new asset: capitalised contract costs.

11.1.5 Transition to IFRS 15

In accordance with the transition provisions in IFRS 15, the group has adopted the new rules retrospectively and has restated comparative numbers for the 2017 financial year. The group applied the following practical expedients when applying IFRS 15 retrospectively:

- The group did not restate comparative numbers for contracts that were completed contracts at 1 January 2017;
- The group did not restate comparative numbers for contracts that began and ended in the same annual reporting period; and
- For modified contracts, the group used the contractual terms that existed at 1 January 2017.

11.2 Adoption of IFRS 9

The adoption of IFRS 9 had the following impact on the group:

- Change from the IAS 39 incurred loss model to the ECL model to calculate impairments of financial instruments;
- Change in classification of the measurement categories for financial instruments.

More detail on the impact from the adoption of IFRS 9 is provided below.

11.2.1 Impairment

Before the adoption of IFRS 9 the group calculated the allowance for credit losses using the incurred loss model. Under the incurred loss model, the group assessed whether there was any objective evidence of impairment at the end of each reporting period. If such evidence existed the allowance for credit losses in respect of financial assets at amortised cost were calculated as the difference between the asset's carrying amount and its recoverable amount, being its present value of the estimated future cash flows discounted at the original EIR.

Under IFRS 9 the group calculates the allowance for credit losses based on ECLs for financial assets measured at amortised cost, debt investments at FVOCI and contract assets. ECLs are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the group in accordance with the contract and the cash flows that the group expects to receive). ECLs are discounted at the original EIR of the financial asset.

The group applies the simplified approach to determine the ECL for trade receivables and contract assets. This results in calculating lifetime ECLs for trade receivables and contract assets. ECLs for trade receivables is mainly calculated using a provision matrix. For contract assets and mobile trade receivables ECLs are determined using a simplified parameter-based approach.

Refer to 7.1.4 for more detail on the application of the provision matrix and the simplified parameter-based approach.

The table below reconciles the loss allowance as reported at 31 December 2017 in accordance with IAS 39 to the ECL as determined under IFRS 9 per class of financial instrument that has been impacted by the adoption of IFRS 9:

	Contract assets Rm
Loss allowance	
Closing balance at 31 December 2017	–
Adjustment on adoption of IFRS 9	388
Opening loss allowance as at 1 January 2018	388

Refer to 7.1.4 for more detail on the calculation of ECLs.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

11 CHANGE IN ACCOUNTING POLICIES (continued)

11.2 Adoption of IFRS 9 (continued)

11.2.2 Classification, initial recognition and subsequent measurement

IFRS 9 introduces new measurement categories for financial assets. The impact of the measurement categories of IFRS 9 on the group's financial instruments is illustrated in the table below. From 1 January 2018 the group classifies financial assets in each of the IFRS 9 measurement categories based on the group's business model for managing the financial asset and the cash flow characteristics of the financial asset.

	Measurement category		Carrying amount	
	IAS 39	IFRS 9	31 December 2017 IAS 39 Rm	1 January 2018 IFRS 9 Rm
Non-current financial assets				
Loans and other non-current receivables	Loans and receivables	Amortised cost	2 574	2 574
Investments*	Available for sale	FVOCI	27 686	27 686
Current financial assets				
Trade receivables	Loans and receivables	Amortised cost	15 162	15 189
Other receivables	Loans and receivables	Amortised cost	9 719	9 719
Current investments**	Loans and receivables	Amortised cost	2 040	2 040
Current investments***	FVTPL	FVTPL	1 669	1 669
Current investments**	Held-to-maturity	Amortised cost	1 500	1 500
Current investments****	Available for sale	FVOCI	343	343
Derivative assets	FVTPL	FVTPL	205	205
Restricted cash	Loans and receivables	Amortised cost	2 376	2 376
Cash and cash equivalents	Loans and receivables	Amortised cost	16 009	16 009
Non-current financial liabilities				
Borrowings	Amortised cost	Amortised cost	70 567	70 567
Nigeria regulatory fine	Amortised cost	Amortised cost	3 156	3 156
Other non-current liabilities	Amortised cost	Amortised cost	964	964
Other non-current liabilities	FVTPL	FVTPL	2	2
Current financial liabilities				
Trade and other payables	Amortised cost	Amortised cost	40 483	40 483

Borrowings	Amortised cost	Amortised cost	9 081	9 081
Derivative liabilities	FVTPL	FVTPL	118	118
Bank overdrafts	Amortised cost	Amortised cost	72	72

* The group has designated the investment in IHS and other unlisted equity investments as at FVOCI as these instruments are not held for trading.

** This comprises treasury bills whose cash flows represent solely payment of principal and interest and is held within a business model to collect contractual cash flows.

*** This represents investments in cell captives and treasury bills held for trading.

**** This comprises treasury bills whose cash flows are solely principal and interest and are held within a business model of collecting contractual cash flows and selling these assets.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

11 CHANGE IN ACCOUNTING POLICIES (continued)

11.2 Adoption of IFRS 9 (continued)

11.2.2 Classification, initial recognition and subsequent measurement (continued)

The reclassification into the new measurement categories of IFRS 9 did not have a significant impact on the group.

The total impact of the reclassifications on the financial asset measurement categories are as follows:

	FVTPL Rm	FVOCI (Available for sale under IAS 39) Rm	Held-to- maturity Rm	Amortised cost (Loans and receivables under IAS 39) Rm
Financial assets				
Closing balance at 31 December 2017	1 874	28 029	1 500	47 880
Change in carrying amount due to change in measurement under IFRS 9	–	–	–	27
Change in carrying amount due to change in measurement category under IFRS 9	–	–	(1 500)	1 500
IFRS 9 Opening balance	1 874	28 029	–	49 407

11.2.3 Transition to IFRS 9

Changes in accounting policies from the adoption of IFRS 9 have been applied retrospectively however, the group has elected not to restate comparative information. Differences between the carrying amounts as at 31 December 2017 and 1 January 2018 resulting from the initial application of IFRS 9 are recognised in retained earnings. Accordingly, information relating to 31 December 2017 does not reflect the requirements of IFRS 9 but rather those of IAS 39.

The group has elected as an accounting policy choice to not adopt the hedge accounting requirements of IFRS 9, but to continue applying the hedge accounting requirements of IAS 39.

11.3 Presentation of cash flows

During 2018, the group reviewed the classification of cash flows and aligned the external presentation of cash flows with the internal presentation applied to manage the business and used for performance management. The group voluntarily changed its accounting policy and reclassified:

- Dividends paid to equity holders of the company from cash flows from operating activities to cash flows from financing activities; and
- Interest paid in the group's head office treasury function from cash flows from financing activities to cash flows from operating activities.

Comparative numbers have been restated accordingly.

Notes to the group financial statements (continued)

for the year ended 31 December 2018

11 CHANGE IN ACCOUNTING POLICIES (continued)

11.4 Impact on the financial statements

The following tables show the restatements recognised for each individual line item. Line items that were not affected by the changes have not been included. As a result, the sub-totals and totals disclosed cannot be recalculated from the numbers provided. The adjustments are explained in more detail by standard above.

		Year ended 31 December 2017

Notes to the company financial statements

for the year ended 31 December 2018

1 REVENUE

Revenue comprises dividend income and management fees received. Dividend income is recognised when the right to receive payment is established. Management fees received are recognised as and when the services are rendered.

	2018 Rm	2017 Rm
Dividend income – other revenue	11 797	12 500
Management fees received – revenue from contracts with customers	195	208
	11 992	12 708

2 FINANCE INCOME AND FINANCE COSTS

Finance income

Finance income mainly comprises amortisation of the financial guarantee contracts and the related net foreign exchange gains.

Finance cost

Finance cost comprises of net foreign exchange losses on financial guarantee contracts and remeasurements of financial guarantee contracts.

	2018 Rm	2017 Rm
Finance income		
Interest income on bank deposits	18	31
Amortisation of financial guarantee contracts	612	581
Net foreign exchange gains	–	282
Finance income	630	894
Finance cost		
Losses on remeasurement of financial guarantees	(35)	–
Net foreign exchange losses	(369)	–
Finance costs	(404)	–
Net finance income recognised in profit or loss	226	894

3 OPERATING EXPENSES

The following disclosable items have been included in arriving at profit before tax:

	2018 Rm	2017 Rm
Directors' emoluments (refer to note 10.2 of the group financial statements)	(37) ¹	(19)
Fees paid for services	(198)	(227)
– Professional fees	(21)	(38)
– Management fees paid (note 12)	(177)	(189)
Auditors' remuneration	(11)	(8)
– Audit fees	(11)	(8)

¹ Includes reimbursement of expenses.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

8 ORDINARY SHARE CAPITAL AND SHARE PREMIUM (continued)

Share-based payment transaction

The group structured a BBBEE transaction through a separate legal entity in 2016, MTN Zakhele Futhi (RF) Limited (hereafter referred to as MTN Zakhele Futhi) which replaced the group's previous BEE structure known as MTN Zakhele. The transaction is designed to provide long-term, sustainable benefits to all BBBEE participants and will run for a period of eight years.

MTN Zakhele Futhi acquired 76 835 378 of the company's shares at a price of R128,50 per share. The BBBEE transaction with MTN Zakhele Futhi has the substance of an option for accounting purposes. MTN Zakhele Futhi must repay the preference shares and NVF before the company's shares held by it become unencumbered, while the company's shares are the only security offered by MTN Zakhele Futhi for the debt funding obtained. Until the company's shares held by MTN Zakhele Futhi becomes unencumbered, the ordinary shareholders of MTN Zakhele Futhi are exposed to the gains on the company's shares, while their exposure to downside risk or risk of loss is limited to their equity contributions (i.e. the purchase price paid by them for the MTN Zakhele Futhi shares). Consequently, although legally issued the company does not recognise its shares issued to MTN Zakhele Futhi and does not recognise the NVF as outstanding for accounting purposes. Equity contributions from external parties comprising cash received from new investors (including amounts funded from the preference shares) and the re-investment by existing MTN Zakhele shareholders, are in substance a premium paid for the option to acquire the company's shares in future. The resultant premium recognised by the company in the share-based payment reserve amounted to R4 036 million. Securities transfer tax of R10 million was paid by MTN on the acquisition of shares from MTN Zakhele, which was recognised in the share-based payment reserve.

The transaction with MTN Zakhele Futhi's shareholders is an equity-settled share-based payment transaction among group entities in terms of which the company will issue shares in future to MTN Zakhele Futhi's shareholders in exchange for BBBEE benefits received by Mobile Telephone Networks Proprietary Limited (note 5).

During the 2017 year, an additional 24 388 294 MTN Zakhele Futhi shares were sold to external parties, that were previously acquired by the company in terms of the underwrite option during the allotment of MTN Zakhele Futhi shares in 2016. The shares were sold for a total consideration of R487 million. The total increase in equity resulting from these share-based payment transactions amounted to R921 million of which R434 million was recognised as a share-based payment expense, and R487 million as the option premium on the shares sold.

14 750 000 of the underwrite option shares were sold to PF Nhleko, non-executive chairman of the MTN group. On 29 June 2018, the parties agreed not to proceed with the sale of the shares to PF Nhleko. This is regarded as a cancellation of a share-based payment transaction. The related receivable (R295 million) was derecognised with a corresponding debit in equity. There was no profit or loss impact arising from the cancellation.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

9 TRADE AND OTHER PAYABLES

Refer to note 4.5 of the group financial statements for the applicable accounting policy.

12 RELATED PARTY TRANSACTIONS

Refer to note 10.1 of the group financial statements for the applicable accounting policy.

Various transactions were entered into by the company during the period with related parties.

The following is a summary of significant transactions with subsidiaries during the year and significant balances at the reporting date:

	2018 Rm	2017 Rm
Dividends paid		
– Mobile Telephone Networks Holdings Limited	(48)	(70)
– MTN Zakhele Futhi (RF) Limited	(480)	(538)
Dividends received		
– Mobile Telephone Networks Holdings Limited	11 797	12 500
Management fees paid		
– MTN Group Management Services Proprietary Limited	(177)	(189)
Management fees received		
– MTN International Proprietary Limited	195	208
Receivables		
– Mobile Telephone Networks Holdings Limited	93	93
– MTN Group Management Services Proprietary Limited	172	29
– Mobile Telephone Networks Proprietary Limited	7	7
– MTN (Dubai) Limited ¹	*	*
– MTN International Proprietary Limited	35	66
– MTN (Mauritius) Investments Limited ²	*	*
– MTN International (Mauritius) Limited	*	*
Payables		
– MTN Group Management Services Proprietary Limited	(40)	(68)
– MTN (Dubai) Limited ¹	(33)	(31)
Share dealings		
– Main Street 1561 Proprietary Limited ³	–	295

¹ The balances result from transactions whereby MTN (Dubai) Limited and the company extinguished liabilities on behalf of each other.

² The balance results from transactions whereby the company extinguished liabilities on behalf of MTN (Mauritius) Investment Limited.

³ During the prior year, Mainstreet 1561 Proprietary Limited, a wholly owned company of PF Nhleko, non-executive chairman of MTN group, acquired 14 750 000 MTN Zakhele Futhi shares from MTN Group Limited for R295 million. On 29 June 2018, the company and Main Street 1561 Proprietary Limited agreed not to proceed with the sale of MTN Zakhele Futhi shares. This is regarded as a cancellation of a share-based payment transaction. The related receivable from Main Street 1561 Proprietary Limited was derecognised with a corresponding debit in equity. There was no profit or loss impact arising from the cancellation.

* Amounts less than R1 million

Financial guarantee contracts

Details of financial guarantee contracts are disclosed in note 13 of the company financial statements.

Directors

Details of directors' remuneration are disclosed in note 3 of the company financial statements and note 10.2 of the group financial statements.

Shareholders

The principal shareholders of the company are disclosed in Annexure 1 which is unaudited.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

13 FINANCIAL GUARANTEE CONTRACTS

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the company are initially measured at their fair values and are subsequently measured at the higher of:

- The expected credit loss (ECL) in accordance with IFRS 9; or
- the amount initially recognised less, where appropriate, cumulative amortisation recognised in accordance with IFRS 15.

The ECLs are a probability weighted estimate of credit losses (the cash shortfalls) over the expected life of the guarantee. Accordingly, the cash shortfalls are the expected payments to reimburse the holder for a credit loss that it incurs less any amounts that the company expects to receive from the holder, debtor or any other party.

Where guarantees in relation to loans to related parties are provided for no compensation, the fair values are accounted for as capital contributions and recognised as part of the cost of the investment.

The company along with other subsidiaries has guaranteed the bonds, revolving credit facilities, long term loans and general banking facilities of Mobile Telephone Networks Holdings Limited and MTN (Mauritius) Investments Limited. Under the terms of the guarantee, the company will make payments to reimburse the lenders upon failure of the guaranteed entity to make payments when due.

	Face value		Drawn down balance ²	
	2018 Rm	2017 Rm	2018 Rm	2017 Rm
Bond guarantees				
Bonds ¹ and commercial paper	20 000	20 000	7 400	5 957
Syndicated and other loan facilities				
US\$ revolving-credit-facility	17 980	–	3 164	–
ZAR long-term loan	21 675	23 738	21 175	18 238
US\$ long-term loan	5 034	24 748	5 034	10 518
General banking facilities				
ZAR facilities	3 000	2 000	1 800	–
	67 689	70 486	38 573	34 713

¹ R18 850 million of the bonds are listed on the Bond Exchange of South Africa.

² Includes interest accrued.

In addition, the company has provided unrestricted suretyship with regards to the cash management facility of Mobile Telephone Networks Holdings Limited and suretyship to the amount of R5 850 million (2017: R5 850 million) with regard to the banking facilities of Mobile Telephone Networks Proprietary Limited, MTN International (Mauritius) Limited, MTN International Proprietary Limited, Mobile Telephone Networks Holdings Proprietary Limited and MTN Service Provider Proprietary Limited.

The company together with other subsidiaries in the group guaranteed senior unsecured notes issued by MTN (Mauritius) Investment Limited on the Irish Stock Exchange amounting to US\$1 750 million (2017: US\$1 750 million). A financial liability was recognised at the fair value of the guarantees issued. A fee was not charged by the company providing the guarantee and therefore the benefit provided by the company to its subsidiaries was recognised as a capital contribution.

The company, together with other subsidiaries in the group guaranteed US\$ syndicated loan facilities with Citibank amounting to US\$1 billion (2017: US\$1 billion). An amount of US\$450 million was drawn down by MTN International (Mauritius) Limited during prior years. During the current financial year US\$400 million of the facilities were repaid, resulting in US\$50 million remaining outstanding at year-end. A financial liability was initially recognised at the fair value of the guarantee issued. A fee was not charged by the company providing the guarantee and therefore the benefit provided by the company to its subsidiaries was recognised as a capital contribution.

The company, together with other subsidiaries in the group guaranteed US\$ revolving credit facilities with Citibank amounting to US\$1 250 million during the current financial year of which US\$220 million was drawn down at year end. A fee was not charged by the company providing the guarantee and therefore the benefit provided by the company to its subsidiary was recognised as a capital contribution.

The company's financial liability relating to financial guarantee contracts amounts to R2 606 million (2017: R2 631 million) as at 31 December 2018 and R612 million (2017: R581 million) was amortised to profit or loss for the year.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

13 FINANCIAL GUARANTEE CONTRACTS (continued)

In addition to the financial guarantees issued over the cash management facility, senior unsecured notes and Citibank facilities, the company has also issued various financial guarantees over the bonds, revolving credit facilities, long-term loans and banking facilities of Mobile Telephone Networks Holdings Limited. Limited value was attached to these financial guarantee contracts which resulted in immaterial fair values being ascribed on initial recognition (limited value guarantees). At 31 December 2018 the limited value guarantees were measured at the ECL amount and an additional R35 million has been recognised in profit or loss.

MTN group's credit rating as determined by Standard and Poor (S&P) have been used to assess whether there has been a significant increase in credit risk. For guarantees issued after September 2016 twelve month ECLs have been calculated whereas for guarantees issued before September 2016 lifetime ECLs have been calculated.

The following formula was used to determine the ECL: Exposure at Default x Probability of Default (PD) x Loss Given Default (LGD) x discount rate. PDs have been determined with reference to S&Ps published historical PD experience by credit rating category. The LGD specific to MTN has been determined by S&P at 51% and the original effective interest rate of the underlying borrowing is used as the discount rate.

Credit losses relating to 12 months ECL amounted to R60 million and credit losses relating to lifetime ECL amounted to R107 million.

14 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

Refer to note 7.1 of the group financial statements for the applicable accounting policy and the adoption of IFRS 9 and consequential amendments to IFRS 7.

14.1 Categories of financial instruments

	Assets	Liabilities		
	Amortised cost Rm	Amortised cost Rm	Total carrying amount Rm	Fair value Rm
2018				
Trade and other receivables	324	–	324	#

Financial guarantee contracts	–	2 631	2 631	1 432
	–	2 910	2 910	1 432

¹ Comparatives have not been restated for the adoption of IFRS 9, consequently the categories represent IAS 39 categories as per prior year company financial statements.

The carrying amount of the financial instrument approximates its fair value.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

14 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (continued)

14.1 Categories of financial instruments (continued)

14.1.1 Fair value estimation

Refer to note 7.1.3 of the group financial statements for the applicable accounting policy.

The following table presents the fair value measurement hierarchy of the company's liabilities that are materially different from the carrying amount:

	Total carrying amount Rm	Level 1 Rm	Level 2 Rm	Level 3 Rm	Total Rm
2018					
Current financial liabilities					
Financial guarantee contracts	2 606	–	–	1 364	1 364
2017					
Current financial liabilities					
Financial guarantee contracts	2 631	–	–	1 432	1 432

Valuation methods and assumptions

The following methods and assumptions were used to estimate the fair values:

The fair value of the financial guarantee contract is determined using the discounted cash flow method. The valuation requires management to make certain assumptions about the model inputs, which include the probability of default and the maximum recovery amount and interest rate curve.

14.2 Credit risk

Refer to note 7.1.4 of the group financial statements for an explanation on credit risk and how it is managed.

The company considers its maximum exposure per class, without taking into account any collateral and financial guarantees, to be as follows:

	2018 Rm	2017 Rm
Cash and cash equivalents	220	380
Trade and other receivables	324	508
Financial guarantee contracts	38 573	34 713
	39 117	35 601

Credit risk is mitigated to the extent that the majority of trade receivables consist of related party receivables of R307 million (2017: R491 million).

The company holds its cash balances in financial institutions with a rating of AA-. Given this rating, management does not expect the counterparty to fail to meet its obligations.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

14 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (continued)

14.4 Market risk

14.4.1 Interest rate risk

Refer to note 7.1.6.1 of the group financial statements for an explanation on interest rate risk and how it is managed.

At the reporting date, the interest rate profile of the company's interest bearing financial instruments was:

	Variable rate instruments Rm
2018	
Financial assets	
Cash and cash equivalents	220
Trade and other receivables	307
	527
Financial liabilities	
Trade and other payables	73
2017	
Financial assets	
Cash and cash equivalents	380
Trade and other receivables	196
	576
Financial liabilities	
Trade and other payables	99

Sensitivity analysis

The company has used a sensitivity analysis technique that measures the estimated change to profit or loss of an instantaneous increase or decrease of 1% (100 basis points) in market interest rates, from the rate applicable at 31 December, for each class of financial instrument with all other variables remaining constant. This analysis is for illustrative purposes only, as in practice market rates rarely change in isolation.

The company is mainly exposed to fluctuations in the following market interest rates: JIBAR, prime and LIBOR rates. Changes in market interest rates affect the interest income or expense of floating rate financial instruments. Changes in market interest rates only affect profit or loss in relation to financial instruments with fixed interest rates if these financial instruments are subsequently measured at their fair value.

A change in the above market interest rates at the reporting date would have increased/(decreased) profit before tax by the amounts shown below.

The analysis has been performed on the basis of the change occurring at the start of the reporting period and assumes that all other variables, in particular foreign exchange rates, remain constant. The analysis is performed on the same basis as was used for 2017.

	2018 Increase/(decrease) in profit before tax			2017 Increase/(decrease) in profit before tax		
	Change in interest rate %	Upward change in interest rate Rm	Downward change in interest rate Rm	Change in interest rate %	Upward change in interest rate Rm	Downward change in interest rate Rm
JIBAR	1	2,7	(2,7)	1	1,3	(1,3)
Prime	1	2,2	(2,2)	1	3,8	(3,8)
LIBOR	1	(0,3)	0,3	1	(0,3)	0,3

Notes to the company financial statements (continued)

for the year ended 31 December 2018

14 FINANCIAL RISK MANAGEMENT AND FINANCIAL INSTRUMENTS (continued)

14.4 Market risk (continued)

14.4.2 Currency risk

Refer to note 7.1.6.3 of the group financial statements for an explanation on currency risk and how it is managed.

Included in the company statement of financial position are the following amounts denominated in currencies other than the functional currency of the company.

	2018 Rm	2017 Rm
Current assets		
United States dollar	*	*
Current liabilities		
United States dollar	2 471	2 662

* Amount less than R1 million.

Sensitivity analysis

A change in the foreign exchange rates to which the company is exposed at the reporting date would have (decreased)/increased profit before tax by the amounts shown below:

	Change in exchange rate %	Weakening in functional currency Rm	Strengthening in functional currency Rm
Denominated: functional currency			
2018			
US\$:ZAR	10	(247)	247
2017			
US\$:ZAR	10	(266)	266

Notes to the company financial statements (continued)

for the year ended 31 December 2018

15 CHANGE IN ACCOUNTING POLICIES

15.1 Adoption of IFRS 15

The revenue streams of the company include management fees and dividend revenue. Due to dividend revenue not being considered as revenue from contracts with customers and management fees being immaterial, the adoption of IFRS 15 did not have a material impact on the company. Consequently, no adjustments were made to the amounts previously disclosed.

15.2 Adoption of IFRS 9

The adoption of IFRS 9 had the following impact on the company:

- Change the subsequent measurement of financial guarantee liabilities to the higher of the ECL; and the amount initially recognised less accumulated amortisation recognised in accordance with IFRS 15; and
- Change in the measurement categories for financial instruments.

Refer to note 11.2.3 of the group financial statements for the transition to IFRS 9.

15.2.1 Subsequent measurement of financial guarantee liabilities

Before the adoption of IFRS 9 financial guarantees were measured, subsequent to initial recognition at the higher of the amount of the obligation under the contract, as determined in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and the amount initially recognised less cumulative amortisation. Under IFRS 9 the company subsequently measures financial guarantee liabilities at the higher of the ECL and the amount initially recognised less accumulated amortisation.

The company has issued various financial guarantees over the bonds, revolving credit facilities, long-term loans and banking facilities of Mobile Telephone Networks Holdings Limited (limited value guarantees). The measurement requirements of IAS 39 resulted in immaterial fair values attributable to these guarantees on initial recognition and no adjustment subsequent to initial recognition. On the adoption of IFRS 9, ECLs relating to these guarantees were calculated and resulted in an adjustment to the carrying value of the limited value guarantees to the ECL (higher value). Consequently, an adjustment was made to retained earnings and financial guarantee liabilities on 1 January 2018 (date of initial application of IFRS 9). The impact on the financial statements as at 1 January 2018 was as follows:

	31 December 2017		1 January 2018
	As previously reported Rm	IFRS 9 Rm	Restated Rm
Statement of financial position (extract)			
Shareholders equity			
Accumulated loss	(22 923)	(132)	(23 055)
Total equity	21 736	(132)	21 604
Current liabilities			
Financial guarantee contracts	2 631	132	2 763
Total equity and liabilities	24 647	132	24 779

Refer to note 13 for methods and assumptions used to determine the ECL of the limited value guarantees on 1 January 2018.

Notes to the company financial statements (continued)

for the year ended 31 December 2018

15 CHANGE IN ACCOUNTING POLICIES (continued)**15.2 Adoption of IFRS 9 (continued)****15.2.2 Classification, initial recognition and subsequent measurement**

Refer to note 11.2.2 of the group financial statements for the change in accounting policy.

	Measurement category		Carrying amount	
			31 December 2017	1 January 2018
	IAS 39	IFRS 9	IAS 39 Rm	IFRS 9 Rm
Current financial assets				
Trade and other receivables	Loans and receivables	Amortised cost	508	508
Cash and cash equivalents	Loans and receivables	Amortised cost	380	380
Current financial liabilities				
Trade and other payables	Amortised cost	Amortised cost	279	279
Financial guarantee contracts	Amortised cost	Amortised cost	2 631	2 763

15.3 Presentation of cash flows

Refer to note 11.3 of the group financial statements for the change in accounting policy.

	Year ended 31 December 2017		
	As previously reported Rm	Change in accounting policy Rm	Restated Rm
Net cash (utilised in)/generated from operating activities	(1 179)	13 173	11 994
Dividends paid	(13 173)	13 173	–
Net cash (generated from)/used in financing activities	192	(13 173)	(12 981)
Dividends paid	–	(13 173)	(13 173)

Financial definitions

The following financial terms are used in the annual financial statements with the meanings specified:

Amortised cost	The asset is held within a business model with the objective to collect the contractual cash flows; and the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.
Asset exchange transactions	Transactions where one or more items of property, plant and equipment are acquired in exchange for non-monetary assets, or a combination of monetary and non-monetary assets.
Associates	All entities over which the group has significant influence, but not control, over the financial and operational policies.
Cash-generating unit (CGU)	The smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or group of assets.
Carrying amount	Is the amount at which the asset is recognised after deducting any accumulated depreciation/amortisation and accumulated impairment losses there on.
Commercial substance	A transaction has commercial substance if the difference in either of the points below is significant relative to the fair value of the assets exchanged: - the configuration of the cash flows of the asset received differs from the configuration of the cash flows of the asset given up; or - the entity-specific value of the part of the operations affected by the transaction changes as a result of the exchange.
Contingent liabilities	Represent possible obligations that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of uncertain future events not wholly within the control of the group. Contingent liabilities also represent present obligations that arise from past events but are not recognised because an outflow of resources is not probable or a reliable estimate cannot be made.
Control	Control exists when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The group has power over an entity when it has existing rights that gives it the current ability to direct the relevant activities that significantly affect the entity's returns.
Defined contribution plan	A post-employment benefit plan (such as a pension plan) under which the group pays a fixed percentage of employees' remuneration as contributions into a separate entity (a fund), and will have no further legal or constructive obligations to pay additional contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.
dti	Department of Trade and Industry.
EBITDA	Earnings before interest (which includes gains and losses on foreign exchange transactions), tax, depreciation and amortisation and is also presented before recognising the following items: - Impairment of goodwill; - Loss on derecognition of a long-term loan receivable; - Net monetary gain resulting from the application of hyperinflation; and - Share of results of associates and joint ventures after tax.

Financial definitions (continued)

Equity investments at fair value through other comprehensive income (FVOCI)	The asset is not held for trading and the group has irrevocably elected on initial recognition to recognise the asset as at FVOCI.
Financial assets at fair value through profit or loss (FVTPL)	A financial asset that is held for trading (acquired principally for the purpose of selling the item in the short term) or designated upon initial recognition as at FVTPL.
Finance leases	Leases over property, plant and equipment are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee.
Functional currency	The currency that best reflects the primary economic environment in which the entity operates.
Gain or loss on disposal of an asset	The difference between the proceeds from the disposal and the carrying amount of the asset.
Goodwill	The excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition date amounts of the identifiable assets acquired and liabilities assumed.
ICASA	Independent Communications Authority of South Africa.
Interconnect revenue	Revenue derived from other operators for local and international incoming voice minutes, short messaging (SMS) and multimedia services (MMS).
Joint arrangement	A contractual arrangement whereby the company and other parties undertake an economic activity which is subject to joint control.
Joint operation	Joint arrangements whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the arrangement.
Joint ventures	Joint arrangements whereby the parties that have joint control of the arrangement by unanimous consent have rights to the net assets of the arrangement.
Measurement period adjustments	Adjustments that arise from additional information obtained during the "measurement period" about facts and circumstances that existed at the acquisition date. The measurement period constitutes the period after the acquisition date during which the acquirer may adjust the provisional amounts recognised for a business combination. This period shall not exceed one year from the acquisition date.
Non-controlling interests	The amount of those interests at the date of the business combination and the non-controlling interests' share of changes in equity since the acquisition date.
Postpaid product	The sale of a handset and a service contract.
Prepaid product	The sale of a subscriber identification module (SIM) card and airtime.
Presentation currency	The currency in which the financial statements are presented.

Financial definitions (continued)

Qualifying asset	An asset which takes more than 12 months to acquire, construct or produce.
Recoverable amount	The greater of an asset's value in use and its fair value less costs to sell.
Revenue	Income arising in the course of an entity's ordinary activities. Income is an increase in economic benefits during the accounting period in the form of inflows or enhancements of assets or decrease of liabilities that result in an increase in equity, other than those relating to contributions from equity participants.
Roaming revenue	Revenue generated from subscribers making calls when using other networks, including MTN networks outside the country of operation.
Significant influence	The power to participate in the financial and operating policy decisions of an entity. It is presumed to exist when the group holds between 20% and 50% of the voting power of an entity.
Structured entities (SEs)	Entities that have been designed so that voting or similar rights are not the dominant factor in deciding who controls the entities, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.
Subsidiaries	Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity.
Termination benefits	Benefits that may be payable when an employee's employment is terminated before the normal retirement date due to death or retrenchment or whenever an employee accepts voluntary redundancy in exchange for these benefits.
Value-in-use	The present value of the future cash flows expected to be derived from an asset or CGU.
