VOLUNTARY ANNOUNCEMENT UPDATE ON THE IMPLEMENTATION OF ARTIFICIAL INTELLIGENCE ROBOTICS BUSINESS

The board of directors of Novautek Technologies Group Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) hereby makes this announcement on a voluntary basis to provide shareholders and potential investors of the Company with the latest business update of the Group.

In 2025, the Group’s artificial intelligence (“**AI**”) robotics business has achieved a breakthrough and a leap in its initial development, officially entered into a new stage of large-scale growth, with the effectiveness of its business innovation and expansion fully evident.

As a strategic cornerstone, the Hong Kong market has achieved triple breakthroughs in new scenarios, new applications and new customers. Intelligent solutions have been successfully introduced into public housing estates such as Queen’s Hill Estate and Ka Fuk Estate, as well as multiple large residential complex, hospitals, core shopping malls, recreational parks and other diverse scenarios. In terms of innovative applications, handling robots undertake heavy physical tasks such as garbage sorting and transportation, effectively reducing the risk of worker injury and improving work efficiency. The localized design and application of robots in security, cleaning, and concierge services have also been widely recognized. Relying on its high-quality services and product strength, the Group has established in-depth cooperation with relevant departments of the HKSAR Government, major property developers, large property management companies and public service agencies. Brand recognition and customer stickiness have been continuously increasing, laying a solid foundation for the cross-scenario replication of business models and products.

Cleaning Robot – Public Housing Estate

Patrol Robot – Recreational Park

Polishing and Maintenance Robot – Large Shopping Mall

Delivery Robot – Hospital

The Group's international market presence is also accelerating. Leveraging Hong Kong's strengths as a "super connector", the Group's AI robots have officially been deployed in the Middle East, Southeast Asia and Europe, achieving commercial validation in the smart city sector. The Group is also promoting cross-sector collaboration with partners in the Middle East, Southeast Asia, Europe, North America and other regions.

The Group has strengthened its technological reserves through its base in Hong Kong Science Park. Combined with the deployment of professional overseas teams and the research and development ("R&D") advantages of the sales agent, the Group can efficiently replicate its mature experience in Hong Kong to the global market. With the rapid growth of the global AI robotics market, the Company is expected to have broad prospects for large-scale development of its AI robotics business in the near future.

By order of the Board
Novautek Technologies Group Limited
Wu Tao
Executive Director

Hong Kong, 8 October 2025
