Therefore, the respective cash and bank balances, which will not be lower than HK$140 million, will be retained by the Remaining Group upon the completion of the Proposed DB Disposal.

As a result of the above, the net asset value of the disposal group will be reduced by not less than HK$140 million upon the completion of the Proposed DB Disposal. The cash and bank balances will be reduced by the same amount and will not be transferred to the Purchaser.

6 EARNINGS/(LOSS) PER SHARE

The calculation of the basic earnings/(loss) per share for the period is based on the Group's earnings/(loss) from continuing operations and discontinued operations attributable to the ordinary equity holders of the Company and the weighted average number of ordinary shares in issue during the period.

The calculation of the diluted earnings/(loss) per share for the period is based on the Group's earnings/(loss) from continuing operations and discontinued operations attributable to the ordinary equity holders of the Company and the weighted average number of ordinary shares in issue during the period assuming the conversion of the exchangeable preference shares and the exercise of the outstanding share options, the dilutive potential ordinary shares of the Company. A calculation is made to determine the number of ordinary shares that could have been acquired at fair value (determined as the average market share price of the Company's ordinary shares over the period) based on the monetary value of the exchange price of the exchangeable preference shares and the subscription rights attached to the outstanding share options. The weighted average number of ordinary shares for the calculation of the diluted earnings/(loss) per share is set out as follows:

	Six months ended 30 June

Revenue

	Six months ended 30 June	
	2012	2011
	HK$'000	*HK$'000*
Digital broadcasting business	**155,136**	226,671
Advertising agency business	**17,899**	1,322
Financial market information business	**14,382**	14,964
	187,417	242,957

The Group recorded a consolidated revenue of HK$187,417,000 in the first half of 2012, representing a decrease of 23% when compared to the corresponding period of 2011. The decrease was attributable mainly to the decrease in the revenue of digital broadcasting business as a result of the gradual completion of the backlog shipment of set top boxes ("STB") subsequent to the disposal of the Group's STB business in 2010.

The advertising agency business has recorded a promising increase in revenue in the first half of 2012 since the acquisition of the business in June 2011.

Gross Profit and Gross Profit Margin

The Group recorded gross profit of HK$118,246,000 in the first half of 2012, representing an increase of 26% when compared to the corresponding period of 2011. Overall gross margin increased from 39% to 63% as more sales of higher margin products, such as smart cards and software, and advertising agency services, were recorded in 2012.

Other Income

The Group recorded a decrease of 36% in other income in the first half of 2012, when compared to the corresponding period of 2011, because last period's figure included a non-recurring gain on bargain purchase of the Group's advertising agency business of HK$12,967,000.

Marketing, Selling and Distribution Costs/Administrative Expenses

The Group recorded an increase of 23% in the marketing, selling and distribution costs and administrative expenses in the first half of 2012, when compared to the corresponding period of 2011. The increase was attributable mainly to the inclusion of the expenses incurred by the Group's advertising agency business acquired in June 2011 and the wholly-owned subsidiary, 雷科通技術(杭州)有限公司, acquired in September 2011.

Other Operating Expenses

	Six months ended 30 June	
	2012	2011
	HK$'000	*HK$'000*
Provision for impairment of trade receivables and other receivables	**188,540**	1,552
Provision for inventories	**10,283**	683
Amortisation of deferred development costs	**7,152**	7,121

Provision for impairment of property, plant and equipment	**2,243**	–
Others	**367**	557
	215,121	11,789

The substantial increase in other operating expenses was mainly resulted from the impairment provisions made for the trade receivables and other receivables, inventories, and deferred development costs related to the Group's digital broadcasting business. The impairment provision for the trade receivables was made after taking into account of financial difficulties of the trade debtors, delinquency in payments, business relationship and transaction volumes with the trade debtors, and the past due aging analysis of trade receivables.

Share of Loss of Jointly Controlled Entities

The increase in the share of loss of jointly controlled entities was mainly resulted from the loss of a jointly controlled entity, which has preliminary commenced its operation of advertising agency business in January this year.

Income Tax Expenses

The increase in income tax expenses in the first half of 2012 was mainly resulted from the under-provision of income tax in prior years and the reversal of deferred income tax assets.

Review of Operating Segments

Digital Broadcasting Business

On 3 July 2012, the Group reached a conditional agreement (the "Conditional Agreement") to sell substantially all of its digital broadcasting business, which will be presented for shareholders' approval at an upcoming special general meeting. Despite growth in China's general digital broadcasting market, business operating environment continues being very challenging caused by intense competition, heavy pricing pressure, and increasing demand for working capital to finance longer trade receivables required by cable TV operators. As a result, a divesture decision was made after a thorough management assessment of the Group's business operations and future development strategy. Upon the completion of the Conditional Agreement, only a small fraction of the Group's digital broadcasting business will remain including the operation of the DVN Business Operation Support System (the "DBOSS Business"). The Group has committed to an active programme to locate buyer to acquire the Group's operation of the DBOSS Business. Details of the disposal including the terms of the Conditional Agreement and the reasons for the disposal are set out in the Company's announcement of 10 July 2012 titled "Very Substantial Disposal".

Advertising Agency Business

For the six-month period ended 30 June 2012, the gross amount of advertisement placed by the Group's clients and the net advertising agency fee earned by the Group grew near 14% and 51% respectively from the same period in 2011. Earning was pre-dominantly generated from sourcing advertising spaces on behalf of clients, including both international 4A firms (American Association of Advertising Agencies) and actual end advertisers. Contribution from end advertising companies was the main growth driver in the first half of 2012, as earnings from international 4A firms stayed almost flat with shrinking gross margins.

The advertising market was quite challenging for the first half of 2012 in light of economic slowdowns both domestically and internationally. A cross-the-board deceleration in spending was taking place including key advertising stables such as real estate, auto, home appliance, and retailing. For the first 4 months of 2012, advertising at traditional media grew only 1.9%, falling drastically from 16.5% in 2011 or even 4.3% at the height of the last global financial crisis in 2009. Within the category, TV advertising related billing growth was only 3.1% as well.

During the first half of 2012, the Group began taking steps, to implement the new business plan, to diversify from over dependence on earning stream from TV ad times sourcing and to improve overall gross margin in the future. Some steps have already shown positive impacts. For example, the Group has increased ad placement with novelty non-TV advertising media platforms specialised in high-end venues such as golf courses and airports, which in turn cushioned impact of narrowing margins from TV ad times and provided some growth support to both revenue and net earnings. Midas Media Limited ("Midas Media"), the joint venture company with leading international 4A firm GroupM, was fully established on 6 January 2012. During the following months, Midas Media has put in place a professional team and began formulating cooperation with international brands such as Bacardi, Estee Lauder, Audemars Pigeut, Citizen, and Peugeot & Citroen. The joint venture aims to provide one stop service of integrated media planning, execution, and media space sourcing to clients. The Group hopes to derive, through Midas Media, higher yield from existing client base and to take advantage of the extensive network of GroupM. Activities in the first half focused mostly on business developments, with ad placements expect to begin in the second half.

Financial Market Information Business

Due to volatilities in the world financial markets, segmental revenue from the financial market information business was HK$14,382,000 for the six-month period ended 30 June 2012, representing a 4% decline from the same period in 2011 (2011: HK$14,964,000). Its segmental operating profit for the current period also dropped from HK$1,388,000 in 2011 to HK$628,000.

Direct Investments

The Group has two associated companies engaging in online games and online education business respectively. Both operation units showed positive developments during the first six months of 2012. In particular, there has been strong monthly growth of registered players with the online game business, which has begun to generate both revenue and positive cash flow.

Prospects

Advertising Agency Business

The Group is of the view that the current advertising market environment will continue in the second half of 2012. At the same time, fast growth of new advertising media platforms will continue to compete for market share from traditional media. Therefore, the Group will continue with its strategy to expand placement channels to reduce reliance on the TV media and expand billing bases to clients by developing other advertising operating services to offer a more comprehensive range of services.

To diversify from TV media, the Group is actively seeking opportunities to expand its placement capabilities into other advertising media platforms. Media resources associated with high-end venues such as golf courses and airports will be one of the Group's priorities. The Group already had some past success in placement at outdoor media platforms at golf courses and airports, and will continue to expand its capacities in this area including possibilities to acquire additional resources in the near future.

On the service side, the Group will continue to expand its service range with the objective of becoming a provider of comprehensive advertising operation services. The plan is to develop Midas Media into a service platform, in order to leverage on the extensive resources of GroupM while cultivating new billing potentials from the Group's existing client base. In the short term, the professional team at Midas Media will be continuingly strengthened to advance its service capabilities.

The Group is also developing digital media data analysis capabilities, through its jointly controlled entity 乾志互動數碼科技(上海)有限公司("乾志互動"). Data analytical systems are useful tools to help clients to improve efficiency of their advertising delivery. 乾志互動 was established in May 2011, and is currently at a stage of system development and testing. In the first half of 2012, 乾志互動 has installed a trial data analytical system within the ad management system of Huan TV ("歡網"). Huan TV is a provider of internet TV systems and solutions and is a joint venture of TCL and Changhong, two prominent Chinese TV manufacturers. 乾志互動 has also installed trial ad management software systems with Shanghai Oriental Cable and Suzhou Cable as part of their trial lottery channels.

The Group's objective is to grow its advertising agency business into a non-media specific advertising placement platform that offers a comprehensive range of advertising operation services which will help to optimise client's advertisement delivery and effectiveness. As such, it will also look for acquisitions to compliment and expedite the development of its service capabilities.

Direct Investments

Both operation units are developing new projects and new products, including the next version of the "Call of Gods" game for the online game business. It is expected that the growth of registered players for the online game business will continue in the near future while the online education business is still under the stage of business development in the second half of 2012.

Employees

The Group has developed its human resources policies and procedures based on performance and merit. The Group ensures that the pay level of its employees is competitive and employees are rewarded on a performance-related basis within the general framework of the Group's salary and bonus systems. The Group provides on-the-job training to its employees in addition to retirement benefit schemes and medical insurance. Employees are offered discretionary year-end bonus based on individual merit.

The Group operates a share option scheme for the purpose of providing incentives and rewards to eligible directors and employees of the Group to recognise their contribution to the success of the Group. No share options were granted to any eligible directors or employees by the Company during the six-month period ended 30 June 2012 (2011: Nil).

The total number of employees of the Group as at 30 June 2012 was 435 (31 December 2011: 554).

Financial Review

Liquidity and Financial Resources

At 30 June 2012, the Group recorded total assets of HK$1,257,325,000 (31 December 2011: HK$1,562,288,000) which were financed by liabilities of HK$350,961,000 (31 December 2011: HK$432,812,000), non-controlling interests of HK$117,892,000 (31 December 2011: HK$117,941,000) and shareholders' equity of HK$788,472,000 (31 December 2011: HK$1,011,535,000). The Group's net asset value per share (excluding non-controlling interests) as at 30 June 2012 amounted to HK$0.69 (31 December 2011: HK$0.89).

The Group had a total cash and bank balance of HK$434,773,000 (out of which HK$145,580,000 was included in assets held for sale) (31 December 2011: HK$413,641,000) without any bank borrowings (31 December 2011: Nil) as at 30 June 2012. The increase in the cash and bank balance was resulted mainly from the settlement of trade receivables during the current period. The Group has sufficient banking facilities available from its bankers for its daily operations.

Since the gradual completion of the backlog shipment of STB in 2011 and the settlement of the trade payables related to the purchase of STB during the current period, the balance of trade payables was significantly reduced from HK$196,496,000 at 31 December 2011 to HK$131,490,000 (out of which HK$111,999,000 was included in liabilities held for sale) at 30 June 2012.

Treasury Policies

The Group adopts conservative treasury policies and has tight controls over its cash management. The Group's cash and cash equivalents are held mainly in Hong Kong dollars ("HKD"), Renminbi ("RMB") and United States dollars ("USD"). Surplus cash is generally placed in short to medium term deposits in light of the Group's funding requirements.

Exposure to Fluctuations in Exchange Rates and Related Hedges

The Group operates mainly in Hong Kong and Mainland China. For the operations in Hong Kong, most of the transactions are denominated in HKD and USD. The exchange rate of USD against HKD is relatively stable and the related currency exchange risk is considered minimal. For the operations in Mainland China, most of the transactions are denominated in RMB. Due to the limitations in financial markets and regulatory constraints in Mainland China, the Group has an increasing exposure to RMB as its investments in Mainland China increase. No financial instrument was used for hedging purposes. It is expected that the appreciation of RMB in the long-run would have a favourable impact on the Group.

Material Acquisitions and Disposals of Subsidiaries and Associates

In January 2012, the Group made the second stage investment payment of approximately HK$8,532,000 upon the achievement of the performance criteria by the Group's associated company, 上海博游網絡科技有限公司("上海博游") and increased its equity interest in 上海博游 from 25% to 37%.

Save as mentioned above, the Group did not have any material acquisitions or disposals of subsidiaries and associates during the six-month period ended 30 June 2012.

Charges on Assets

The Group did not have any assets charged to third parties as at 30 June 2012.

Capital Expenditure Commitments

The Group did not have any material capital expenditure commitments as at 30 June 2012.

Contingent Liabilities
