Beijing Yunji Technology Co., Ltd.
北京雲迹科技股份有限公司
(A joint stock limited liability company incorporated in the People's Republic of China)
(Stock Code: 2670)

INSIDE INFORMATION
FINANCIAL PERFORMANCE UPDATE
FOR THE SIX MONTHS ENDED JUNE 30, 2026

This announcement is made by Beijing Yunji Technology Co., Ltd. (the "**Company**", together with its subsidiaries, collectively the "**Group**") pursuant to Rule 13.09(2)(a) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited and Part XIVA of the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong).

The board (the "**Board**") of directors (the "**Directors**") of the Company wishes to inform the shareholders of the Company (the "**Shareholders**") and potential investors of the Company that, based on the preliminary assessment of the unaudited consolidated management accounts of the Group for the six months ended June 30, 2026 (the "**Reporting Period**"), it is expected that the Group will record for the Reporting Period (a) revenue of approximately RMB177 million to RMB195 million, representing an increase of approximately 62% to 79% as compared with the same period last year; (b) net losses of approximately RMB105 million to RMB130 million, representing a decrease of approximately 9% to 27% as compared with the same period last year; and (c) adjusted net losses of approximately RMB100 million to RMB125 million, representing an increase of approximately 212% to 292% as compared with the same period last year.

Based on the information currently available to the Board, the Board believes that:

a. The revenue growth of the Group was primarily driven by three factors: increased sales volume of robots and functional kits with continuously expanding customer outreach; steady development of the AI digitalization system business; and achievements in overseas market channel construction and application scenario expansion, which drove significant growth in overseas product deployment and related revenue.

b. Along with the growth of the Group's revenue and also contributed by the decrease in changes in the carrying amount of redemption liabilities, listing expenses and share-based payment expenses, but offsetting by the increases in (i) R&D expenses as a result of the Group's continuous increase in R&D expenses in its core technology areas; (ii) selling and marketing expenses as a result of the business scale expansion and commercialization advancement; and (iii) impairment loss recognized on trade receivables as a result of the Group's revenue growth and the extension of credit terms for certain customers, which further caused the impairment provisions calculated by the Group under the expected credit loss model to increase, the Group's net losses for the Reporting Period narrowed.

c. Based on the above factors and after excluding the effects of changes in the carrying amount of redemption liabilities, listing expenses and share-based payment expenses, the Group's adjusted net losses for the Reporting Period increased.

All business operations of the Group are progressing as expected, and there has been no material adverse change in the business operations and financial position. The Group has continued to increase its strategic investment in technology R&D and market sales, and the relevant progress has been fully reflected at the operational level. During the Reporting Period, the Group continued to deepen its R&D layout, consolidate long-term technology reserves and competitive barriers, and actively expand its ecosystem partner network and sales channels, achieving breakthrough progress – during the Reporting Period, the average daily number of robots online simultaneously increased by approximately 30% as compared with the same period last year, the scale of ecosystem interconnection continued to expand, and the number of intelligent service instances increased by approximately 46% as compared with the same period last year.

Adjusted net losses represent net losses after deducting the effects of the following items: listing expenses, share-based payments expenses and changes in the carrying amount of redemption liabilities ("**Adjusted Items**"). The Board wishes to highlight that "adjusted net profits/(losses)" are not defined under the International Financial Reporting Standards. The Board believes that eliminating the effects of the Adjusted Items, which are non-operating or non-recurring expenses of the Group, will provide Shareholders, potential investors of the Company and other parties with useful information for further understanding and evaluating the operating results of the Group. This is a necessary measure to enable the Group's financial position to achieve significant improvement in the future.

The information contained in this announcement is only based on the preliminary assessment made by the Board with reference to the information currently available and the Group's consolidated management accounts for the Reporting Period which have not been audited by the independent auditor of the Company nor reviewed by the Company's audit committee. Shareholders and potential investors of the Company are advised to refer to the announcement regarding the Group's interim results for the six months ended June 30, 2026 to be published by the end of August 2026.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.
